Summary of New Updates

Section 15 **Cloth & Linen Products:** Additional Flame-retardant linen products (Bed spread, Tablecloths etc.), Laundry rack are newly included.	**Section 17** **Tableware & Galley Utensils:** Eco-friendly disposable cutlery (wood/biodegradable plastic/ recycled paper cups & plates), biodegradable plastic bags, Sanitary management products are newly included, 221 codes.	**Section 19** **Clothing:** New globes (Biodegradable plastic disposable / Touchscreen capable), High ancle shoes are newly included.
Section 23 **Rigging Equipment & General Deck Items:** Wire rope lubricator, Crosby products (from USA), Cargo lashing belt, Eco-friendly oil sorbent and stretch film are newly included.	**Section 27** **Painting Equipment:** Graco products (from Netherlands) are updated.	**Section 31** **Safety Protective Gear:** Bump cap, Harness and Lanyard, Anti-piracy products, Cut-resistant products are newly added, 32 codes.
Section 33 **Safety Equipment:** Safety signs are fully updated including Damage control plan signs & pipe identification tape, Pyrotechnics, Drager & Riken products, Portable drug tester are newly included.	**Section 37** **Nautical Equipment:** LED Searchlights, Remote control searchlights, Windsocks are newly added, Publication & flags are updated.	**Section 39** **Medicine:** "List of Recommended Medicines in IMG 3rd edition", and "Mapping of the medicines in the 3rd edition of the Guide to the quantities in 2nd edition, Australian and UK guidelines for ships" are updated.
Section 45 **Petroleum Products:** Ecofriendly oils & greases, Anti-seize products, WD-40 products are newly included and updated.	**Section 55** **Cleaning Material & Chemicals:** Eco-friendly products (Laundry detergent sheets, Various cleaners, Grease removers, Liquid air freshener), ECA water device, Water purifiers, Urea water are newly included.	**Section 59** **Pneumatic and Electrical Tools:** Various pneumatic and electrical tools are updated suggested by worldwide manufacturers, Rustibus (Norway), Holger Clasen (Germany), Trelawny (U.K.), Nitto Kohki (Japan) Den-Jet Marine (Singapore) etc.
Section 65 **Measuring Tools:** Various measuring tools are updated suggested by worldwide manufacturers from SIKA, Martechnic, TX Marine (all from Germany) etc.	**Section 75** **Valves & Cocks:** Various valves are updated suggested by worldwide manufacturers from KITZ (Japan), Gerhard Goetze (Germany), MESON (Denmark) etc.	**Section 79** **Electrical Equipment:** Various LED Products (Lamps, Floodlights, Explosion-proof lights, Cargo lights, Flashlights), Ex-proof products (Cable grands, Joint boxes sounders & neacon etc.) are newly added.
Section 81 **Packing & Jointing:** Various general repair products are updated suggested by worldwide manufacturers from ITW Devcon (worldwide), Weicon GmbH (Germany), Wencon (Denmark) etc.	**Section 85** **Welding Equipment:** Refrigerant gas cylinder and Fluorocarbon refrigerant recovery equipment, Portable arc welders are newly included and updated.	**Section 87** **Machinery Equipment:** Ultra high-pressure products for main engine (from CEJN), Various equipment are updated suggested by worldwide manufacturers from MESON (Denmark), Niikura Kogyo (Japan) etc.

Preface

Dear Colleagues,

A warm welcome to the 8th edition of the world leading, IMPA Marine Stores Guide, the industry standard for maritime procurement. The International Marine Purchasing Association (IMPA), alongside our partners Fuji Trading Company of Japan is once again immensely proud to introduce this new edition.

In an ever changing and dynamic maritime purchasing and supply environment it is important that the Marine Stores Guide, in both data and book formats remains a constant! The vision remains the same as well and whilst the portfolio now includes extensive online, offline and digital offerings, the printed book continues to be produced in response to the people of the industry.

As many readers and users will know, IMPA is at the heart of the sustainability movement within our industry and has been for many years, I am delighted therefore to be able to say that there are more sustainable products in this edition that ever before. We encourage all users to buy in the most sustainable way, which can often mean the most cost effective as well, in the long term.

Great work has been done in introducing colour photographs and improving content wherever needed and wherever possible, we hope the new format, design and layout will appeal to all users whether they are at sea or on land.

The MSG content is linked to the Marine Stores Guide Data License, that allows users to specify products quickly and effectively using the unique data that can be imported into a procurement or planned maintenance system. With illustrations, specifications, product information and comparison tables for major manufacturers the Marine Stores Guide 8th edition provides an invaluable reference for those involved in the maritime industry and we trust you will enjoy this new and improved edition.

You will find a separate list with Sections where changes, amendments and new additions have been made.

We continue to fight against counterfeit copies that are being circulated in the industry, this is of course illegal and breaks international copyright law. We therefore encourage you to always ensure you are buying the genuine MSG book, this has an impact on our association and the industry.

We are confident you will find this 8th edition to be of great use and value to your business whether you are a ship operator or ship supplier. If you have any comments or recommendations for further improvement or if you find any misprint etc, please visit www.marinestoresguide.com where you will find a customer feedback form and contact details for the MSG team.

Finally, I would like to thank the MSG team at Fuji Trading Co and at the London UK office who work hard to continue the development of our industry leading reference guide.

As always best wishes

Susan W. Koefoed
Chair & Chief Executive Officer
For and on behalf of IMPA – The International Marine Purchasing Association

Taking Actions for Our Ocean

Compared to two decades ago, the world is producing twice as much plastic. Every year, millions of tonnes of plastic waste leak into our oceans, altering habitats and natural processes, and harming ecosystems' ability to adapt to climate change. Under the influence of solar UV radiation and other natural factors, plastic breaks down into small particles that can kill wildlife, and can help transport invasive marine species, threatening the food web and biodiversity. The transfer of contaminants between marine species and humans through consumption of seafood has already been identified as a health hazard, and research is ongoing.

Plastic pollution is growing relentlessly and has become a widespread global problem. By making better, more sustainable choices, you can be part of the solution. The Marine Stores Guide is here to help you.

Here are some of our sustainable tips:

1. Where possible, try to choose more eco-friendly alternatives to plastic. Go for items made of stainless steel, wood, bamboo, natural fibres, paper or cardboard.
2. Where steering away from plastic is not possible, choose products made of biodegradable plastic or, if unavailable, simply choose safer classes of plastic, such as 2 (HDPE), 4 (LDPE) or 5 (PP).

IMPA 17 41 89

17 02 75

17 04 90

Biodegradable Plastic Products

3. Ditch single-use plastic drinking water bottles by using water purifiers onboard vessels and simply refilling reusable bottles. Make your own juice by adding water to boxed concentrated juice.

IMPA 55 06 90

4. Select larger available portions for food items, which often mean a reduction in packaging waste, and where possible, select items packaged in tins or paper.

5. Choose more eco-friendly materials for your packaging needs, and consider biodegradable wrapping films, 100% recycled and widely recyclable packaging items, and other eco-friendly methods of packaging.

Plastic Recycling Codes and Symbols

Below you will find the international coding system currently in use for plastic products identification. Understanding this will help in your endeavour to choosing safer classes of plastic where alternative, more eco-friendly options are not available.

PLASTIC RECYCLING CHART

Code and Symbol	1	2	3	4	5	6	7
	PETE	HDPE	PVC	LDPE	PP	PS	OTHER
Type of plastic	Polyethylene Terephthalate	High Density Polyethylene	Polyvinyl Chloride	Low Density Polyethylene	Polypropylene	Polystyrene	Other Plastics including acrylic, polycarbonate, polylactic fibres, nylon, fiberglass
Example of products	Soft drink bottles, Mineral water, Fruit juice containers, Cooking oil bottles	Grocery bags, Milk jugs, Cleaning agents, Laundry detergents, Bleaching agents, Shampoo bottles, Washing and shower soaps	Pipes, Window profiles Fencing , Flooring, Shower Curtains, Trays for sweets and fruits, plastic packing (bubble foil) and food foils to wrap the foodstuff	Plastic bags, Six-pack rings Dispensing bottles, Wash bottles, Molded lab equipment	Auto parts, Industrial fibres, Food containers Dishware	Desk Accessories, Cafeteria trays, Coffee cup lids Styrofoam, Video cassettes	Headlight lenses, Safety shields/goggles, Plastic lumber applications, Various bottles
Recyclable?	Widely Accepted	Widely Accepted	Rarely /Never Accepted	Moderately Accepted	Moderately Accepted	Rarely/Never Accepted	Rarely/Never Accepted

Please note that even if your plastic waste is recyclable according to the above system, each port sets its own rules for recycling. It is therefore advisable that you ask local suppliers for recycling rates and conditions in each area.

In this edition of the Marine Stores Guide, you will notice that we have included a vast array of eco-friendly products that can act as suitable alternatives to many conventional plastic items. We believe these products can considerably aid your efforts towards a greener, safer planet, so please do check these out. Below you will find the index.

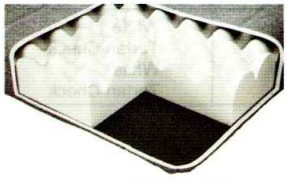
Non-ironing Bed Sheets

Sábanas con Plachado Permanente ノーアイロンシーツ 免熨床単

Non-iron blend of 50% polyester, 50% cotton, 32 denier, 165 threads per square inch. This fabric blend is smoother and softer than cotton, machine washable and tumbler dry.

Unit Per Sht.



CODE	15 01 81	15 01 82
Size mm	1,370 × 2,300	1,828 × 2,500

Mattresses

Colchones マットレス 席梦思

There are two types of mattress filling constructions available: foam rubber type and spring type. All materials, regardless of construction, are covered with a rigid cotton cloth.

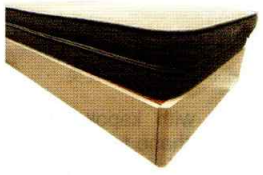
Standard sizes are listed below. If the size you require is not listed, please measure the inside length and width of the bedframe you are using.

Foam Rubber

Spring

Unit Per Pc.

CODE	Type	Size mm		
		Width	Length	Height
15 02 01	Foam Rubber	900	2,000	150
02		1,350	2,000	150
15 02 06	Spring	900	2,000	150
07		1,350	2,000	150



Mattresses and Foundations

Individual Spring Type

Colchoes y Bases con Resortes Individuales

個別スプリングマットレス及びボトム 独立弹簧式席梦思

Mattresses

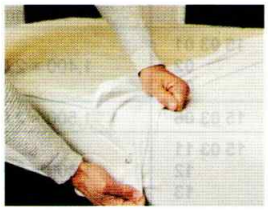
Quality, longlife mattress made with individually wrapped coils providing even support and comfort to all parts of the body. A double sized mattress consists of more than 890 coils. The cover is a heavily padded, prebuilt, boarder taped box lining. The surface is button tuffed with ventilators and chord handles at each side.

Unit Per Pc.

CODE	Type	Size mm			Numbers of Pocket coils
		Width	Length	Height	
15 02 31	Single	970	1,980	170	594
32	Semi Double	1,200	1,980	170	759
33	Double	1,370	1,980	170	891
34	Queen	1,520	1,980	170	1,023

Foundations (Box Spring)

Box frame composed of specially shaped, heavy gauge tempered cone coils which are wire tied and mounted on a strong seasoned timber base. The frame is insulated with a firm 100% cotton pad and can be fitted with legs, castors, or special angle iron frames.



Unit Per Pc.

CODE	Type	Size mm			Height with Leg	Nos. of Coils
		Width	Length	Height		
15 02 41	Single	960	1,970	195	332 mm	55
42	Semi Double	1,190	1,970	195	332 mm	77
43	Double	1,360	1,970	195	332 mm	88
44	Queen	1,510	1,970	195	332 mm	99

Mattress Covers

Fundas de Colchón

マットレスカバー 护床垫

White or blue covers tightly woven of 100% cotton fabric, 20 denier, 120 threads per square inch with seamed edges for more durable wear. The length and width of the covers are usually 50 mm larger than the mattress to be covered. When ordering, please specify the size of mattress to be covered.
When ordering, please specify the following:

How to order: 15 - 02 - 51

Anti-shatter Films
(Blast Mitigation)

Láminas de seguridad para cristales (antiexplosiones)
窓ガラス用粉砕防止フィルム　窗玻璃防碎贴膜

Anti-shatter film provides protection from flying glass in the event of a natural disaster or demolition by pirates. It forms an almost invisible protective coating on the glass surface. This window film should only be applied to flat glass. It should never be applied to polycarbonate (plastic). Adhesive window films are constructed from a multi-lamination of micro-thin polyester. They also have a scratch resistant coating to protect the film surface and enhance durability (except films for external application). The film should be cut 10 mm over size in both dimensions, and trim around the oversized edges using a sharp trimming knife after squeezed the film.

15 08 21	Film, anti-shatter (Blast mitigation), 200 micron, Width 152 cm x Length 15 mtr	Rls.

Airtight Plastic Food Service Containers with Coloured Clip

Recipientes Herméticos de Plástico para Alimentos con Clip de Color
カラークリップ付きプラスティックフードコンテナ
带彩色夹子的食品用密封塑料容器

Plastic container includes the double airtight lip for airtight seal and 7 identification colour clips to prevent cross contamination for sanitary management on board. Handbook for Inspection of Ships and Issuance of Ship Sanitation Certificates 2.4.2 states the prevention of cross-contamination through use of separate utensils and cutting boards, and separation by colours will help for achieve this requirement. Dishwasher proof, HACCP and NACCP certified.

Ecologo Mark Product

Marca Ecologo Producto エコロゴマーク商品 Ecologo 标识产品

The EcoLogo program is one of North America's most respected environmental leadership certification programs. To earn the EcoLogo mark, tissue products must demonstrate significantly reduced environmental impact among five key lifecycle based criteria: resource consumption, energy consumption, wastewater quality, aquatic toxicity and solid waste.

Fold Type Paper Towels

Trifold Paper Towel with signature "Absorbency Pockets" that absorb a lot of water fast, for superior hand drying. Designed to increase 27% in water absorption and reduce waste in your work place (about 40% of post-consumer waste). Available in Economic type and Standard type, differences are thickness and basis weight (GSM). Meet EPA standard and are FSC-Certified.

Unit Per Box

36. Garbage Disposers

Can Crushers *(Can Compactors)*

Compactadoras de Lata
空き缶処理機　开罐机

Units designed to crush cans before recycling or disposal. Electric or manually operated models are available.

Manual

Electrical

Machines of various capacities are available. When ordering, please specify the model name, the capacity (number of cans crushed per hour), and the dimensions of the machine if space is limited.

Unit Per Set

Manual Operation		Electrical Operation	
CODE	Material	CODE	Voltage
17 55 71	Steel	**17 55 73 74**	AC 110V AC 220V

Garbage Compactors

Compactadoras de Basura　ゴミ圧縮機
垃圾压缩机

An efficient, mobile compactor essential for marine use. It compacts refuse into small, easy to accommodate packages, drastically reducing the need to dump refuse at sea. A hydraulic pump unit creates high compaction forces at low amperage.

The machine cubes general wastes, bales paper, cardboard, bags, and light weight mixed wastes, and boxes organic waste. The inner and outer cabinet linings are made of stainless steel to resist corrosion.

Machines of various capacities are available. When ordering, please specify the model name, the capacity (volume of refuse), and the dimensions of the machine if space is limited.

17 55 84	Garbage compactor, AC 110V with further details	Set
85	Garbage compactor, AC 220V with further details	"

Accessories for Garbage Compactor

Accesorios para el Compactador de Basuras
生ゴミ圧縮機用付属品
垃圾压缩机配件

Plastic bags for garbage compactor. Both regular plastic bags and biodegradable plastic bags are available. Biodegradable bags can break down naturally and more environmentally friendly.

Winter Caps

Corros de Invierno　防寒帽　防寒帽

For protecting the head from cold wind. Available made of knit or leather.

Pointed Crown Knit

Fullface Knit

Leather

19 06 31	Winter cap, pointed crown, knit	Pc.
32	Winter cap, fullface, knit	"
33	Winter cap, leather	"

Neck Warmers

Calientacuellos　ネックウオーマー
保暖脖套

A knitted tubular neck warmer to protect neck from getting chilly. It is free size and reversible. Please specify if any specific colour is required.

19 06 36	Warmer, neck, knitted	Pc.

Winter Jackets & Trousers

Anti-electro-static

Chaquetas y Pantalones de Trabajo/Antiestático
静電防止防寒衣
防静电工作上衣 / 裤子

Winter windbreaker jacket and trousers with anti-electro-static process.

Available colour in beige, navy blue or green. Please specify the size with requested colour when ordering.

Requirement of Certificate

Please mention on your request for Ropes and Hawsers, if you require a Certificate for each ropes, and specify which type of certificate: Class / Factory / Manufacturer, etc.

Marine Ropes

Please pay special attention to the following matters when ordering ropes.

1. Breaking strength is a guide line only, based upon the rope size.
2. Specifications are based on tests of new, unused ropes of current manufacture.
3. Once a rope is put into service, it is continuously deteriorating.
4. Manila rope will deteriorate in storage even under ideal conditions.
5. All weights shown in this catalogue are approximate net rope weights.

3-Strand Manila Ropes

Cuerda de Manila 3 Cordones
三つよりマニラロープ　3 股马尼拉绳

A heavy-duty all purpose rope. It provides the necessary tensile strength for safe operations. When ordering, please indicate the correct circumference or diameter of the rope to avoid misdeliveries.

How to order: CODE

Manila rope, 3-strand, DIAM × LENGTH

Unit Per C/L

Mooring Ropes

AMENDMENTS TO SOLAS: SAFE MOORING OF SHIPS

Cuerdas de amarre Enmiendas a solas: amarre seguro de buques
係船索に関する SOLAS 条約の改正
系泊绳索 对《公约》的修正：船舶安全系泊

The Marine Safety Committee approved amendments to SOLAS Regulation II-1/3-8 at MSC.102 and it will come into force for new building ships constructed on or after 1 January 2024. These amendments showed new requirements for mooring arrangement and equipment including lines to be designed with appropriate conditions. It aims to emphasize the importance of proper mooring arrangement design, the selection of suitable mooring equipment and fittings for safe mooring operations.

The amendments to SOLAS Regulation II-1/3-8 refer to an update to MSC.1/Circ.1175/Rev.1 titled "Revised Guidance on Shipboard Towing and Mooring Equipment" and two new Guidelines:

MSC.1/Circ.1619: *Guideline on the Design of Mooring Arrangements and the Selection of Appropriate Mooring Equipment and Fittings for Safe Mooring*, will apply to ships

constructed on or after 1 January 2024 and give an approach to the design of mooring arrangements and selection of mooring equipment and fittings which should be combined with principles of ergonomics and usability.

MSC.1/Circ.1620: *Guideline for Inspection and Maintenance of Mooring Equipment Including Lines*, which shows guidance and recommendation for the inspection and maintenance of mooring equipment that is already in service. It includes specific criteria for identifying worn-out lines and tales should be removed from service before failure, and criteria for selection of replacement mooring lines and tails.

Definitions (excerpt of MSC.1/Circ.1619 Annex p.1~2)

2.1 Line Design Break Force (LDBF) means the minimum force that a new, dry, spliced, mooring line will break at. This is for all synthetic cordage materials.

2.9 Ship Design Minimum Breaking Load (MBL_{SD}) means the minimum breaking load of new, dry, mooring lines for which shipboard fittings and supporting hull structures are designed in order to meet mooring operations.

The selection of mooring lines should take into account (excerpt of MSC.1/Circ.1619 Annex p.6)

5.2.3.4 the Line Design Break Force (LDBF) to be 100% to 105% of the MBL_{SD}

5.2.4 To avoid overload on mooring winches, fittings and mooring lines, consideration should be given to select mooring winches with brake capacity of less than the ships design minimum breaking load of the mooring line or with adjustable brake capacity.

Load limits (excerpt of MSC.1/Circ.1619 Annex p.7)

5.2.8.4 The WLL of mooring lines should be used as user operating limiting values, not to be exceeded. The WLL is expressed as a percentage of MBL_{SD} and should be used as a limiting value in operational mooring analyses. Steel wires have a WLL of 55% of MBL_{SD} and all other cordage(synthetic) have a WLL of 50% of the MBL_{SD}

8-Strand Polypropylene Mono-Filament Hawsers

Estacha Polipropileno Mono-Filamento 8 Cordones
八つ打ちポリプロモノホーサー　八股丙纶大缆绳

Often called a cross or square rope. Suited well for use as a mooring rope because it does not kink, slip, absorb water, and is easy to handle.

Supplied in standard cut lengths of 200 mtr/110 fathoms or 220 mtr/120 fathoms. Ropes of other lengths must be made to order.

When ordering, please specify whether eyes should be spliced on one or both ends of the rope, and if the eyes should be covered with canvas or leather.

Manufacturers certificate is attached to each rope. Lloyd's, ABS, and NK certificates are available upon request.

How to order: CODE

Hawser, polypropylene monofilament, 8-strand, DIAM x LENGTH

Mooring hawsers will be normally supplied with standard size of eye-splice at both ends.

8-Strand Polypropylene Split-Film Hawsers

Estacha Polipropileno Sprit-Film 8 Cordones Trenzadas
八つ打ちポリプロスプリットフィルムホーサー　八股丙纶复丝大缆绳

Known as a cross braided or square hawser. This rope is unique as a mooring hawser because it does not kink, slip, or absorb water, is durable and easy to handle.

When ordering, please indicate if one or both ends of the rope should be eye spliced and covered with canvas or leather. Also, please specify if a manufacturer's certificate will be required.

How to order: CODE

Hawser, polypropylene split-film, 8-strand, DIAM x LENGTH

8-Strand Nylon Hawsers

Estachas de Nylon 8 Cordones
八つ打ちナイロンホーサー　八股线尼龙缆绳

Designed for sea berth mooring, towing, and other heavy-duty jobs. This rope will not kink and is highly durable.

When ordering, please indicate the number of eye spilces and if a canvas or leather cover is required for the eyes. Also, please indicate if a certificate is required.

How to order: CODE

Hawser, nylon, 8-strand, DIAM x LENGTH

Mooring hawsers will be normally supplied with standard size of eye-spilce at both ends.

Double Braided Hawsers

Estachas de Doble Trenzado

ダブルブレードホーサー

双股尼龙双层编织缆绳

Rope construction designed with a braided inner core which is covered with another braided outer sheath. Usually made of nylon, polypropylene multifilament, and polyester, or a combination of those materials.

The rope can be provided with either a nylon or polypropylene inner core and a polyester outer sheath.Standard length of the coil is 200 or 220 mtr. When ordering, please specify the coil length and the material brand required.

The Illustration of Double Braided Construction

Features of Double Braided Hawsers

- 30% higher breaking strength than the 3 or 8 strand rope.
- 30% less stretching/elongation than the 3 or 8 strand ropes.
- Superior abrasion resistance.
- High flexibility and easy handling.

Outer Braided Cover: Nylon
Inner Braided Core : Nylon

High Performance Mooring Ropes 8-Strand Dan Line Super Polypropylene Ropes

Estachas Polipropileno "Dan Line Super" 8 Cordones

ダンラインスーパーロープ　八股超强化纤维缆绳

The durability of this rope does not decrease as the strength of the load is increased. It is suitable to use for high tension work loads, for mooring, or as a towing line.

* 30 % higher breaking strength than polypropylene.
* Light weight: with a specific gravity of 0.91, it will float in water.
* Will become elongated when necessary to absorb shocks.
* Has superior abrasion resistance.

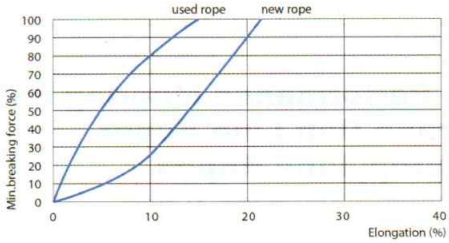
Tipto® Eight 8-Strand Mooring Ropes



Estachas "Tipto® Eight" 8 Cordones
ティプト・エイト・ロープ
Tipto®Eight 八股缆绳

A high-performance mooring rope, TIPTO®EIGHT's strength, abrasion resistance and energy absorption ensure a long service life and low cost of ownership. The rope's small diameter and low weight make handling easier on board. As a floating rope, the risk of getting the rope caught in the ship and tug propeller is minimal, thus avoiding costly downtime.

Karat® Maxi Plus Mooring Ropes 8-strand

Estachas "Karat® Maxi Plus" 8 Cordones
カラットマキシ プラスロープ　卡拉特八股缆绳

Karat® Maxi Plus has very high strength/ weight ratio which allows substantial size reductions and ease in handling. It has the following performance features, *Highest strength of the conventional permanently floating mooring ropes, *High abrasion resistance, *No loss of strength when wet, *High energy absorption, *Very low snap-back effect, *Manufactured acc. to ISO and OCIMF MEG4 Guideline, *EStalon™ is a polyester/polypropylene melt mixture, *Eurolefin™ in the outer yarn. Ropes are tested and certified by Lloyd's Register type approval.

When ordering, please specify the diam and length of the rope and if one or both ends of the rope should be eye spliced.

Atlas Mooring Ropes 6-Strand Cross-laid

Estachas Cruzado "Atlas" 6 Cordones
六つ打ちアトラスロープ
六股交织 Atlas 缆绳

Atlas rope is a synthetic fiber rope formed from 100 % nylon monofilament and continuous filament yarns. It has a greater tendency to elongate than steel ropes and therefore is less susceptible to breakage from shock tension strain. Also, compared to steel ropes, it requires much less maintenance and is considerably lighter and easier to handle, facilitating rapid mooring.

Atlas rope is generally easy to handle and can be spliced easily allowing for any type adjustment or moderation to be done on board. This rope has excellent resistance to abrasion and will become more flexible and easier to handle with extensive use. Standard length is 220 mtr. When ordering, please specify the diam and length of the rope and if one or both ends of the rope should be eye spliced. Relative density: 1.14.

Karat® Winchline™ 6-Strand Mooring Ropes

Estachas "Karat Winchline" 6 Cordones
六つ打ちカラット・ウインチラインロープ　卡拉特六股缆绳

Combined the unique characteristics of the high strength Karat®-fibres with a 6-strand "wire rope" lay. The outer layer of each strand comprises a special combination of Nylon monofilaments and Nylon multifilaments. This rope is specially designed to be used on self-tensioning winches and is DNV Type Approval. Special characteristics are high resistance to deformation, no crushing or jamming on winch, high abrasion resistance, excellent fatigue properties giving longer lifetime, and maintenance free. When ordering, please specify the diam and length of the rope and if one or both ends of the rope should be eye spliced.

Buoyant Winchline™ 6-Strand Mooring Ropes

Estachas "Buoyant Winchline" 6 cordones
六つ打ちブイヤントウィンチライン
浮水 Winchline™ 六股缆绳

A unique fibre rope with a 6-strand "wire rope lay". The outer layer of each strand comprises a special combination of Nylon monofilaments and PP multifilaments. Buoyant Winchline™ is designed to be permanently floating and to be used on self tensioning winches. Special characteristics are light weight (floats), high resistance to deformation, no crushing or jamming on winch, high abrasion resistance, excellent fatigue properties giving longer lifetime, high strength which gives better safety, and maintenance free.

When ordering, please specify the diam and length of the rope and if one or both ends of the rope should be eye spliced.

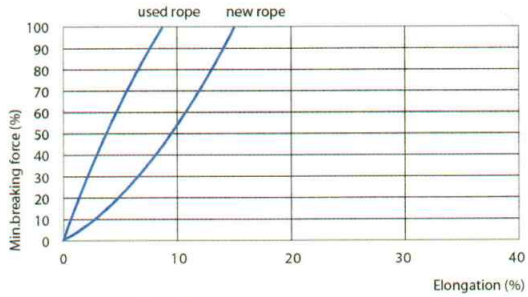
Tipto® Winchline 7-strand Fibre Mooring Ropes

Cable de Amarre de Fibra "Tipto-Winchline", 7 Trenzas
七つ打ちティプトウインチライン・ロープ　Tipto 絞車繊縄



A dedicated floating winch line for self-tensioning winches. This load-bearing 7 strand core combines high strength and relatively low elongation. The non-loadbearing braided jacket includes phosphorescent tracer yarn allowing the rope to glow during the hours of darkness, increasing dockside visibility and creating a pleasing visual effect of the moored vessel for your passengers. The jacket also provides protection of the core for longer service life. The mooring efficiency of the vessel is enhanced by the ease of handling of the rope due to its low weight and ability to float. Tipto® Winchline does not lose its strength when wet.

Specifications

Marine Power 12-Strand Mooring Ropes

Cable de Amarre con 12 Trenzas
マリンパワーロープ　船用 12 股繊縄

Made by combination of polyester multi-filament and special polypropylene mono-filament which braided with 6 pairs of two strands together. The braided surface is smoother than

conventional 8-strand rope makes more better durability in abrasion.

The 12 strands rope produced 20% higher tensile strength than conventional 8-strand of rope and longer pitch about 1.5 times than strander diameter makes excellent characteristics in handling.

Ordering can be made by indicate clearly the following items ; Size (Diameter), length (Standard length 200 mtr – the length of rope will be requested by customer) and size of eye-splice (Whether eyes should be spliced on one or both ends of the rope).

Mooring Ropes 8-Strand "Marine-Combi-Rope"

Cable de Amarre con 8 Trenzas "Marine Combi Rope"

マリンコンビロープ　8股线系船缆 "海上混合钢索"

Made by mixing of polyester multi-filament (White colour) and special polypropylene mono-filament (Orange color) which braided with 8 pairs of strands together. By the mixing of these two elements makes well balanced in floating, abrasion and cost saving.

The color of white polyester and orange of polypropylene mono-filament can be seen clearly in the water. One of the strongest ropes among water-floating product in 8-strand rope category.

Ordering can be made by indicate clearly the following items; Size (Diameter), length (Standard length 200 mtr - the length of rope will be requested by customer) and size of eye-splice (Whether eyes should be spliced on one or both ends of the rope).

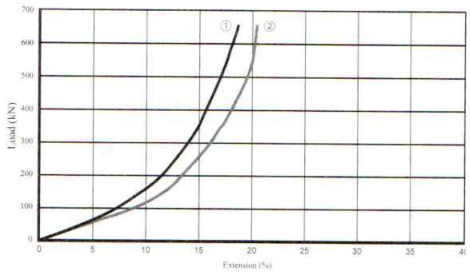
Mooring Ropes

Polypropylene/Polyester Composite Rope "Bell Mix Rope"



Cable de Amarre/Cable compuesto de Polipropileno y Poliéster

混紡ロープ "ベルミックスロープ"　繫船索 聚丙烯 / 聚酯纖維混合繩

A composite rope with Polypropylene and Polyester with the following remarkable characteristics ; Low elastic elongation, stronger resistance to cut and abrasion, easy to handle and process of eye-splice, etc. The rope keeps same strength whichever in air or in sea, and it floats. There are three types of braided construction as illustrated below. Standard length is 200 mtr. When ordering, please specify the diam and length of the rope, and one or both ends of the rope should be eye spliced.

	12-strand (2 × 6) Southern Cross
	12-strand (1 × 12) Southern Braid

Load Elongation Curve

① Bell Mix Southern Braid (1×12)
Rope diam. 60 mm, B/S 660 kN

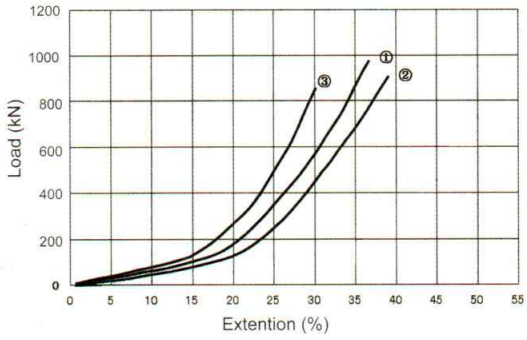
Mooring Ropes

High Strength Nylon "Unilon"

Cable de Nilón Altamente Reforzado "Union"
ユニロンロープ　高耐受力尼龍繫船索 "Unilon"



Compared to former nylon ropes, Unilon rope produces 30% higher strength, providing substantially better service life. It keeps softness even after long period of operation, and keeps endurance to direct ray, inclement climate, and cold climate.

Available three types of construction as illustrated below. Standard length is 200 mtr. When ordering, please specify the diam and length of the rope, and one or both ends of the rope should be eye spliced.

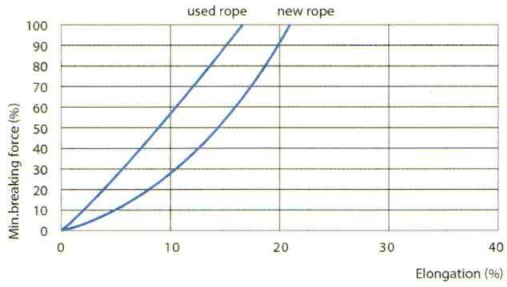
Mooring Lines 8-strand Eurofloat® Premium

Cuerda de Amarre a 8 Trenzas Eurofloat
ユーロフロートプレミアムロープ
八股繫泊索



A floating high performance rope constructed from high strength polyolefin and polyester yarns. It is manufactured to the latest EN and ISO standards, and complies with OCIMF recommendations. The floating characteristic makes it a safe rope to work with, while its high TCLL value ensures excellent fatigue resistance.

Tested in compliance with OCIFM MEG4: 32 – 88 mm
DNV type approved product: 32 – 112 mm

Specifications

Nika-Cord® 8 Strand Ropes

Cuerda de 8 hilos ニカコードロープ 8股绳 Nika-Cord®

Constructed using double twisted yarns of NIKA-steel® fibers, a special melt mixture of high quality European raw materials (Polypropylene, High Density Polyethylene, UV stabilizer and other improving elements).

They exhibit much higher tenacity and abrasion resistance than most conventional monofilament and flat Polypropylene and Polyolefin fibers.

The double twisting process offers improved performance in dynamic and shock loading conditions while maximizing the resistance against internal and external abrasion.

Constructed according to ISO 10572 and they comply with the latest regulations and recommendations of OCIMF for the safe mooring of tankers.

Applications: Mooring, Anchoring, Messenger Lines, Tow Lines, Tails

* Specific gravity : 0.92 (Floating)
* Melting point : 165 °C
* Elongation at breaking : 18%
* Chemical resistance to alkali : Good
* Chemical resistance to organic solvent : Excellent
* Chemical resistance to acid : Excellent
* Strength loss in NaOH and H_2SO_4 in high concentration and temperature

Nikaforce® Polypropylene Mooring Ropes

Cable de Amarre de Polipropileno, "Nikaforce"
ニカフォース・ポリプロピレン・ロープ Nikforce 丙纶大缆绳

NIKAFORCE® ropes exhibit:

- Exceptional strength to weight ratio
- High breaking load exceeding Cordage Institute specification CI 1901 and EN ISO 10572*1 specs.
- High abrasion resistance
- U.V. stabilization to 160 KLY (Suitable for Florida, U.S.A. & Dubai, UAE sunshine).
- High shock & dynamic load absorption, with filaments of equal thickness and tensile strength.
- Electronically controlled even load distribution.
- Ease of handling.

*1 EN ISO 10572 has replaced EN 14687 standard

Only virgin bright white European raw materials used. Filament tensile strength exceeds EN and ISO specifications. Recommended working load limit: 20% of the minimum breaking load. Approved by ABS, B.V., L.R.S., G.L.
Ropes are also according to the latest regulations and recommendations of OCIMF for the safe mooring of tankers. Ordering can be made by indicating clearly the following items; Preferable number of strands (8-strands, 12 strands or 24 strands), Size (Diameter), Length (Standard length 220 mtr – the length of rope will be specified by customer) and size of eye-splice (Whether eyes should be spliced on one or both ends of the rope).

Applications : Mooring, Anchoring, Towing, Tails.
Melting Point : 165°C
Elongation at Breaking : 15%
Specific Gravity : 0.92 (Floating)

Improved Mixed "NIKASTEEL®" 12/24 Strand Ropes, Polyester/ NIKA STEEL Combination

Cable de amarre mejorado ニカスティール・ムアリングロープ 系泊缆

Constructed using specially twisted yarns of NIKA-Steel® fibers with High Tenacity Polyester fibers (in a 60% - 40% w/w combination respectively) in the outer layers of the strand. Each strand is composed of mixed NIKA-Steel®/ HT Polyester yarns in the outer layers and NIKA-Steel® yarns in the core layer.

Their mechanically balanced structure, accordant to EN ISO 10556, protects the strands' outer layers against abrasion while achieving high breaking strengths.
Produced according to international standards such as EN ISO 10556.
Comply with the latest regulations and recommendations of OCIMF for the safe mooring of tankers.

APPLICATIONS: MOORING – ANCHORING – TAILS

Specific gravity: 0.99 (Floating)
Average Polyester w/w percentage: 25%
Melting point: 165°C (NIKA-STEEL®) / 265°C (PES)
Elongation at breaking: 15%-18%
Chemical resistance to ALKALI: VERY GOOD
Chemical resistance to ORGANIC SOLVENT: VERY GOOD
Chemical resistance to ACID: EXCELLENT.
Strength loss in NaOH and H_2SO_4 in high concentration and temperature

Mooring Ropes "Timm Master 12 SBA"

Cuerda de amarre "TIMM Master 12 SBA".
ムアリングロープ "TIMM マスター 12 SBA"
系泊绳索 "TIMM Master 12 SBA"

The safest conventional mooring rope, which reduces dangerous snap backs by utilizing the innovative solution of Timm Snap Back Arrestor (SBA™) technology. If the load bearing construction breaks, the SBA™

will absorb the snap back forces, resulting in a reduction of snap back. As a result of the construction and the rope having high tenacity polyester in the outer layer of the strands, Timm™ Master 12 SBA™ has excellent abrasion resistance. The color scheme is designed to give a visual anti-twist indicator to easily spot undesirable twists in the rope. Timm Master 12 SBA™ being floating and resistant to UV, with one of the best strength-to-weight ratios on the market, it serves as a lightweight and reliable solution, suitable for all vessel types.

The SBA technology is currently being certified by DNV. All Timm Master 12 SBA™ ropes are compliant with OCIMF MEG 4, SIRE 2.0, RightShip RISQ2.0, SOLAS, Intertanko.

OCIMF ガイドライン（MEG4）に準拠したタンカー向け係船索について

根据 OCIMF 系泊设备准则（MEG4）进行的油轮系泊绳索布置

Ship design Minimum Breaking Load (ship design MBL)
The MBL of new dry mooring lines for a ship's mooring system meets environmental criteria restraint requirements. Ship design MBL is the core parameter for sizing and designing all other components of the mooring system within defined tolerances.

Line Design Break Force (LDBF)
New & dry mooring lines have a declared breaking force specified by the manufacturer. LDBF of selected lines should be 100%-105% of ship design MBL. Nylon lines are tested wet and spliced.
Wet testing should be specified for the LDBF for nylon (polyamide) mooring lines.

Working Load Limit (WLL)
WLL is the maximum load for mooring lines based on environmental criteria. It is expressed as a percentage of ship design MBL and used as a limit in design and operations. Steel wire ropes have a WLL of 55%, while all other cordage (synthetic) has a WLL of 50% of the ship design MBL.
Ship design MBL simplifies analysis and comparison, despite manufacturer differences.

Design Basis Load (DBL)
The design load on a fitting, calculated by multiplying the ship design MBL by the Factor (GF).

Tail Design Break Force (TDBF)
TDBF (The Tail Design Break Force) for tails should be higher than LDBF due to increased wear. The TDBF of tails should be 125%-130% of ship design MBL. TDBF is tested and defined in the wet condition and accounts for any material strength loss when wet. Increasing TDBF beyond this may not enhance fatigue life and can compromise system integrity. Grommet configurations have rated break forces, but D/d ratios from common joining methods may not achieve them. Users should seek tail manufacturer guidance.

Tail configurations
Prefer single leg tails, but grommets have advantages in certain operations. If smaller diameter needed, use double the stiffness of single leg.

Tail Connections (Joining Shackles)
Tail connections: Through the use of mechanical connecting devices (i.e. joining shackles) or directly with the use of a cow hitch. Considerations for each method explained below.

Connection devices
Tail connections: Metal devices used for steel wire and HMSF lines. If alternative materials may be considered, follow the guidance. No standard safety factors between SWL and minimum yield strength or Ultimate Tensile Strength (UTS)/ failure values.

Most manufacturers will supply connection devices with a safety factor of three (breaking load three times the SWL). Joining shackles' SWL should be equal to or greater than the mooring lines' WLL.

SWL should not exceed working load range. WLL values for wires and synthetic lines differ (55% and 50% of ship design MBL respectively). Matching shackle SWL to WLL is not necessary. Minimum safety factor of three is recommended. Consider mooring system design to minimize connecting device failure risk.

All values are percentage values of the ship design MBL.

	Lines					
Mooring Line Type/Component	Wire	Synthetic	HMSF	Polyamide (Nylon)	Synthetic Tail	Joining Shackle
Shackle SWL (Synthetic)						50
Shackle SWL (Wire)						55

Ultra High Molecular Weight Polyethylene (UHMWPE) Fiber Mooring Ropes 12-Strand "AmSteel®-Blue", Dyneema SK78

Cable de Amarre con 12 Trenzas de Fibras de Polietileno de Ultra Macro Peso Molecular (UHMWPE) "AmSteel-Blue"

超高密度分子重量ポリエチレン繊維ロープ　アムステル・ブルー

12 股迪尼玛超强拉力大缆绳

AmSteel®-Blue is a proven cost-saving replacement for wire rope in key applications where strength, weight and safety are important.

Recognized worldwide as the standard for single braid HMPE ropes, AmSteel®-Blue is easily spliced and inspected. These features, with the superior wear and tension fatigue of Dyneema® SK-78 fiber and Samthane coating, are combined in a torque-free 12-strand single braid design. The result is an industry-leading braided synthetic rope that outlasts wire rope and has proven operator cost saving benefits.

AmSteel®-Blue, at only 1/7th the weight of wire, requires less committed crew for most operations, significantly reduces mooring times and tug costs, and improves crew safety. The reduced weight, high strength and low stretch also make it ideal for tug assist/maneuvering lines, resulting in quick, efficient connections and controlled response. AmSteel®-Blue is proven to provide longer service life and reduced costs when compared to wire in a variety of applications.

Standardized working pendants are available for mooring and tug assist lines. It is recommended for split drum winch applications, not recommended for use on H-bitts, capstans or cleats if surging or rendering the rope is required.

Standard length is 200 mtr. When ordering, please specify the diam and length of the rope, and one or both ends of the rope should be eye spliced.

Features:
- Uses Dyneema SK-78
- A Size for size strength replacement for wire rope at only 1/7th the weight
- Torque-free, very flexible, easy to handle
- Similar elastic elongation to wire rope
- Easily inspected or field spliced
- Floats

Applications
- Primary vessel mooring lines
- Face and wing wires for push tugs
- Emergency and seismic tow lines

Tug and Mooring Lines, 8-strand

Blend of Polyester & Dyneema SK-75, "Quantum-8™"

Cuerda de Tirar y Amarrar a 8 Trenzas

8本撚りムアリングライン　八股拖船及繫泊索

Quantum-8 was developed to meet customer requests for a light-weight, high-strength, torque-free rope that can float and grip a winch or capstan. Quantum-8 is a unique upgrade. This patented construction utilizes Samson's exclusive DPX™ fiber technology. Samson's proven DPX fiber technology has the best abrasion and cut resistance of all high performance fibers, so rope durability is excellent. Quantum-8 has multiple marine uses.

It can be used as a high performance tug working line, a floating tug stem line, a typhoon or vessel mooring line, an offshore messenger or pick-up line.

Quantum-8 has an orange urethane coating for high visibility as well as additional abrasion resistance.

Standard length is 200 mtr. When ordering, please specify the diam and length of the rope, and one or both ends of the rope should be eye spliced.

Features
* A blend of polyester and HMPE
- Good grip on capstans and H-bitts
- Excellent single drum spooling capabilities

Applications

- Wire replacement
- Secondary mooring lines
- Berge and dredge working lines
- Tracer tug winch lines
- General working lines
- Heavy lift slings
- Rig tow lines
- Lowering/Lifting lines

Tug and Mooring Lines, 12-strand

Blend of Polyester & HMPE, "Quantum-12™"

Cuerda de Tirar y Amarrar a 12 Trenzas
12 本撚りムアリングライン　十二股拖船及繫泊索

Much like Quantun-8, Quantun-12 is a lightweight, high strength, floating rope that can grip a capstan or H-bitt. The DPX fiber provides superior abrasion and cut resistance, but with a higher coefficient of friction than similar high performance ropes such as AmSteel®-Blue. The 12-strand construction provides added flexibility, improved handling and easy spliceability. Green Samthane coating provides excellent visibility and additional abrasion resistance.

Standard length is 200 mtr. When ordering, please specify the diam and length of the rope, and one or both ends of the rope should be eye spliced.

Applications

- Wire replacement
- Offshore messenger or pick-up line
- For use on H-bitts, capstans and winches
- General working lines
- Rig row lines

Technical Specifications

- Specific Gravity: 0.99 (Floats)
- Elastic Elongation %: At % of break strength
  10%.....0.65%, 20%.....0.75%, 30%.....0.90%
- Splicing Procedures Required:
  Eye splice - 12 strand/Class II rope
  End for end splice - 12 strand/Class II rope

Winch Lines with 100% Dyneema

"Turbo-RC™"

Cuerda para Cabrestante con Dyneema al 100% "Turbo-RC"
ウインチライン 100% Dyneema "Turbo-RC"　絞車繩

Turbo-RC has the firmness and low stretch of wire, yet only 1/6th the weight. The durable 'turbo' braided jacket is very cut and abrasion resistant, and protects the 12-strand single braid strength-member core.

Turbo-RC spools on winches easily, does not rust or "fish hook" like wire rope, and it floats. Turbo-RC is specially designed for improved service life in applications where creep results from long-term static loads. Both cover and core are

coated with a Samthane coating.

A standard cover repair kit is available and easy to field apply. This product design requires a specialized splicing technique. Standard length is 200 mtr. Please specify the diam and length of the rope, and one or both ends of the rope should be eye spliced.

Features
- Excellent single drum spooling capabilities
- Lightweight handling
- Superior drum compression resistance
- Retains hard round shape during use
- Protective cover with Dyneema provides superior wear characteristics

Applications
- Single or split drum winch primary mooring lines for various vessels
- Wire replacement in commercial fishing trawl systems
- "Tugger" winch lines for AHVs
- Deep water lifting projects

Technical Specifications
- Specific Gravity: 0.98
- Elastic Elongation %: At % of break strength 10%.....0.30%, 20%.....0.50%, 30%.....0.80%
- Splicing Procedures Required: Eye splice - Product specific

Mooring Lines, 12-strand

Polyester Jacketed "Turbo-EPX™"

Manguera de cubierta de poliéster "Turbo-EPX"

ポリエステルカバーホーサー "Turbo-EPX" 聚酯外罩 "Turbo-EPX"

Lightweight, high strength, round and firm winch rope.

Turbo-EPX is a unique jacketed product This durable jacket provides grip and protects the strength member core from degradation. The core and jacket of Turbo-EPX work in harmony, preventing excess cover slack during mooring operations, which translates into longer service life. This construction creates a firm, round, torque-free rope, much like wire rope, but at 1/6th the weight. Turbo-EPX delivers excellent performance on all types of winches and offers much better resistance to flex and tension fatigue than wire. Coating improves service life, reduces snagging, enhances abrasion resistance, and prevents contamination. Standard length is 200 mtr.

Features
- Good grip on winch drums
- Heat resistant
- Lightweight for safer and easier handling
- Superior winch performance with firm, round construction

Applications
- Wire replacement - jacketed
- Deepwater lowering and lifting lines
- Primary mooring lines
- Winch based tug working lines
- Wire replacement - tug working pendant

Mooring Line, Tug Line & Pendant High-Tenacity Polyester Line

"HTP-12™"

Cable de amarre, cable de tirar y colgadero de poliéster de alta resistencia "HTP-12"

12 本拠りムアリングライン、タグライン、ペンダント "HTP-12"

十二股系缆、拖缆、HTP-12 浮筒链

HTP-12 is a 12-strand construction that provides optimum performance in static bending situations, making HTP-12 ideal for use where small D/d ratios are common. Made with high-tenacity polyester fiber, HTP-12 provides good flex-fatigue resistance and shock absorption.

Standard Length is 200mtr, and also suitable as a high performance mooring pendant.

Applications

- Vessel Mooring
  - General Working Line
  - Pendant
- Tug
  - Mainline
  - Pendant
  - Shock Line
- Offshore
  - Lifting Slings
  - Synthetic Extension Pendants
  - Winch Line

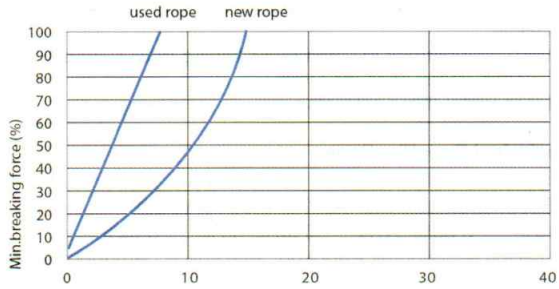
Tug and Mooring Lines, "Strong Line™"

Línea de remolque y amarre, "Strong Line™"
タグライン＆係船索 "ストロングライン"
拖船和系泊缆绳 "Strong Line™"



STRONGLINE™ has a rope construction comprising a parallel core with a braided protective cover. The parallel core produces a far higher strength rope than might be expected for a rope of this diameter and material. The protective cover ensures a long service life due to its excellent resistance against abrasion. Regular maintenance can significantly lengthen the rope service life. STRONGLINE™ can be recycled. The main applications of STRONGLINE™ are towing and mooring.

DNV type approved product: 32 – 112 mm

Primary Mooring Lines for FSRU

EverSteel™-X, 100% Dyneema®

Linea de atraque principal para FSRU
浮体式 LNG 受け入れ基地用係留索
浮式液化天然气接收站用系泊缆

EverSteel-X is the first line to be designed specifically for FSRU (Floating Storage Regasification Unit) mooring applications, using Dyneema Max DM20 technology to achieve superior creep performance and flex-fatigue resistance. It is a torque-free 12-strand single braid that is optimized in strength-to-size and strength-to-weight ratios. Size-for-size, it has the same strength as steel, but it's so light, it floats.

With the addition of a Samson proprietary coating, EverSteel-X is designed for long-term, continuous load conditions, and will last for long-term FSRU mooring applications. These features point to EverSteel-X as the best choice for FSRU mooring.

Features
- Superior creep performance
- Size-for-size as strong as wire
- Durable and lightweight
- Made with Dyneema® DM20 fiber
- Flex-fatigue resistant
- Floats in water

Application
- Long-term primary mooring line

Mooring Tails
(Forerunner, Pendants)

Calabrotes テイルロープ 缆绳尾

Reasons for Using Mooring Tails

When using mooring ropes, especially for tanker vessels or large vessels, there is a general desirability for the additional elasticity provided by mooring tails. The additional elasticity reduces the loads induced in mooring wires or HMPE lines under dynamic conditions by permitting the ship to respond more favorably to various combinations of wind, wave, and current forces, as well as to ships passing by in close proximity. Tails also tend to distribute the loadings more evenly in the mooring lines in the same service.

The additional elongation of the mooring line system permitted by the tail reduces the risk associated with poor line tending and the frequency and precision of line tending, particularly in berths where large tidal variations in high loading- unloading rates. Tails are also valuable at berths requiring short breast or spring leads as they provide the same effect as long all-wire line systems. And lastly, they facilitate the handling of wire lines by boatman and mooring gangs.

There are two configurations of tail ropes commonly used on board.

Single-Leg

Standard length is 11 mtr overall length with a 2 mtr soft eye for the outboard end and a 1 mtr soft eye for the inboard end. 22 mtr may also be requested depending on extreme berth conditions.

Grommet(Strop)

Standard length is 11 mtr overall length with 2 mtr and 1 mtr soft eyes formed by seizings. The body of the strop is also seized together 3 mtr from each eye lashing. 22 mtr may also be requested depending on extreme berth conditions.

When ordering, please specify the following:

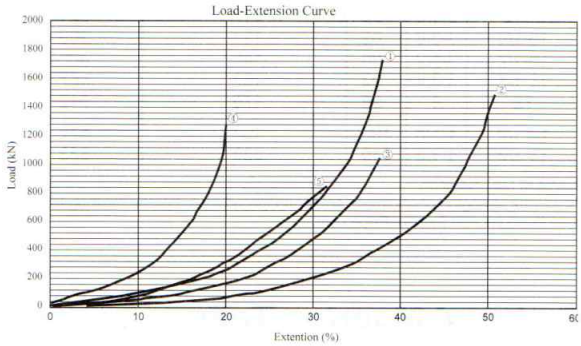
(A) Material of rope (PP/PE mixed Line, Nylon, Polyester, etc.)

(B) Construction of rope (8-strand/12-strand/double braided etc.)

(C) Diam or Circ of the ropes

(D) Length of the ropes and the desired eye sizes on each end.

(E) Ship Design Minimum Breaking Load (SDBL) and required Tail Design Break Force (TDBF) based on the criteria according to OCIMF Mooring Equipment Guidelines. (MEG4)



The TDBF of tails should be 125%-130% of ship design MBL. TDBF is tested and defined in the wet condition and accounts for any material strength loss when wet.

Mooring Pendants
MP-1™

Ramal de fondeo 非自転性係留用ペンダントロープ 防旋转系泊吊绳

MP-1 is a non-rotational rope with excellent abrasion and wear resistance for use as a pendant in vessel mooring applications. It has been proven to provide superior abrasion resistance and strength retention with extensive use.

MP-1 utilizes a polyester/polyolefin blend that provides a 10% lower linear density (lbs./ft.) compared to traditional 100% polyester fiber pendant constructions. This decreased weight makes for easier handling by crew members in mooring situations. MP-1 is verified by ABS according to MEG4.

Features:
- 10% lighter than 100% polyester ropes
- High strength,
- Low elongation,
- Hockle-resistant
- Non-rotational,
- Durable,
- Flexible

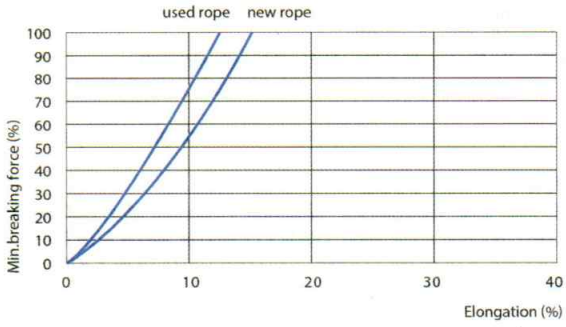
8-strand Mooring Tails

Euroflex®

Cola dde Amarre con 8 Trenzas "Euroflex"
ムアリングテール "Euroflex" 船用八股缆绳尾



The Euroflex® mooring tails surpass nylon tails in quality. Moreover, the rope does not lose a large portion of its dry MBF when wet. As the strength is higher than that of nylon, a smaller diameter of rope can be used, providing better handling. Made of polyester and polyolefin composite yarns, the standard length is 11 m (effective working length). For those circumstances where more stretch is required, 22 mtr length is available. Both versions are fitted with two protected and spliced eyes of 2 mtr and 1 mtr respectively.

Tested in compliance with OCIMF MEG4: 55 – 88 mm
DNV type approved product: 55 – 88 mm

Diameter, weight and MBF (as well as other mechanical and physical properties) are determined acoording ISO 2307. The MBF refers to the breaking strength of the rope without splices or any other form of termiantion that can be formed with or without the use of accessories/fittings. The figures in red refer to the Line Design Breaking Force (LDBF) in spliced dry condition and products are manufactured, tested and documented according to OCIMF guideline MEG4 Appendix B.

Synthetic Emergency Tow-Off Pendants "Vulcan"

Colgadero sintético de remolque de emergencia Vulcan
非常時曳航用繊維ロープ 急拖航纤维缆绳

Emergency tow-off pendants (ETOPs), commonly referred to as "fire wires," provide a means of towing the ship away from the dock in the event of a fire. Samson developed Vulcan, a synthetic alternative to traditional wire rope fire wires. Vulcan is significantly lighter and eliminates "fish hooks," which are broken wires that protrude from the wire rope and result in hand injuries. Maintenance costs are also reduced when using synthetic ropes compared to wire ropes. Vulcan is made with aramid fiber and has a proprietary fire-resistant coating that meets the OCIMF-required breaking strength after exposure to flames and a high-temperature environment.

Features and Benefits;

- 60 to 70% (2/3rd) lighter than wire
- Abrasion resistant
- Easily stored when not in use
- Easy to adjust
- Heat and flame resistant
- Lightweight
- No lubrication necessary
- Reduced mooring–related injuries and claims
- Specific Gravity: 1.39

How to order: 21 - 18 - 99

Chafe Protections

for Mooring Line

Protección contra Roces para Cuerda de Amarre
係留索用シェーフプロテクション 繫泊索防磨保護

Chafe protection maximizes the service life of the ropes, protecting ropes from abrasion and cutting damage. All chafe options can be factory-installed on your ropes prior to shipment from the mfr's plants, or are available in bulk for field installation by certified personnel.

When replacing wire ropes with synthetics, it is important to prepare or repair the surfaces of deck equipment damaged by the wire rope. Chocks, fairleads, bollards, bitts or other hardware contacting the rope need to be smooth and free of rust to ensure the synthetic ropes achieve longest service life possible.

The followings are typical examples of Chafe protections:

Dynalene

Dynalene is a unique product that protects the strength member from abrasion, yet allows the rope to be easily inspected for both internal and external fiber wear. Braided from cut and abrasion resistant Dyneema fiber, Dynalene is permanently spliced over the rope, and acts as a sacrificial cover protecting the rope from abrasion and wear in mooring and offshore applications.
Dynalene is fully repairable in the field, does not absorb water, and floats. It is easy to install anywhere on the rope.

* Fixed or adjustable for easy positioning
* Light weight / Floats
* Easy inspection without removing
* Excellent durability

Available in;
Small (fits 7/8" to 1-1/4" dia rope)
Medium (fits 1-5/16" to 1-5/8" dia rope)
Large (fits 1-3/4" to 3" dia rope)
Extra large (fits 3-1/4" to 4" dia rope)

DC Gard

DC Gard is a tightly braided cover construction of Dyneema fiber that is spliced onto the strength member to protect it from wear and abrasion in specific areas. Designed for use in applications where frequent handling and use put a premium on rope protection and resistance to snagging, DC Gard provides the maximum protection for synthetic fiber ropes.

* Fixed or adjustable for easy positioning
* Light and flexible / Floats
* Can be removed for rope inspection
* Cut resistant
* Superior durability

Available in ;
Size C: (fits 1" to 1-1/4" ropes)
Size D: (fits 1-5/16" to 1-3/4" ropes)
Size E: (fits 1-7/8" to 2-1/2" ropes)
Size F: (fits 2-5/8" to 3-1/8" ropes)

DC Moor-Gard S

With a 100% HMPE fiber cover construction as DC Gard, DC Moor-Gard is a tubular sleeve solution that provides sliding protection from wear and abrasion. Standard length is 10' and the ends are coated with urethane.

* Fixed or adjustable for easy positioning
* Light an flexible / Floats
* Easily removed for rope inspection
* Cut resistant
* Superior durability

Size E (fits 1" to 1-3/4" ropes)
Size F (fits 1-7/8" to 2-14" ropes)
Size G (fits 2-3/8" to 3-1/4" ropes)

How to order: 21 - 18 - 91

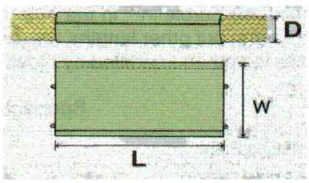
Eye Protectors for Hawser

Protectores oculares para Hawser
ホーサー用アイプロテクター
缆绳护眼装置

Designed to cover the synthetic hawser's "eye" to protect from friction on the surface of steel bitt at shore side. Basically, eye covers are preinstalled at factory and difficult to replace when get damaged, but this product will easily cover and remove around the eye with Velcro tape. Material is Polyester.



Unit Per Pc.

CODE	Size	Applicable Rope Size
21 18 46	S	40 mm - 52 mm
47	M	53 mm - 69 mm
48	L	70 mm - 90 mm

Hawser Protectors

Protector de calabrotes
ホーサープロテクター
缆绳保护装置

Designed to cover the synthetic hawser to protect from friction on the surface of steel chock, enable hawser to make long-term use. Easily attached and removed around hawser and can be fixed around chocks by the hook and loop fastener. Normally the width will be determined by rope diameter and please specify the length when ordering.

Properties: Melting Point, Polyester, 240°C

How to order: CODE

Please specify;
- The product name of Hawser rope/Structure/Diameter
- Length of protector

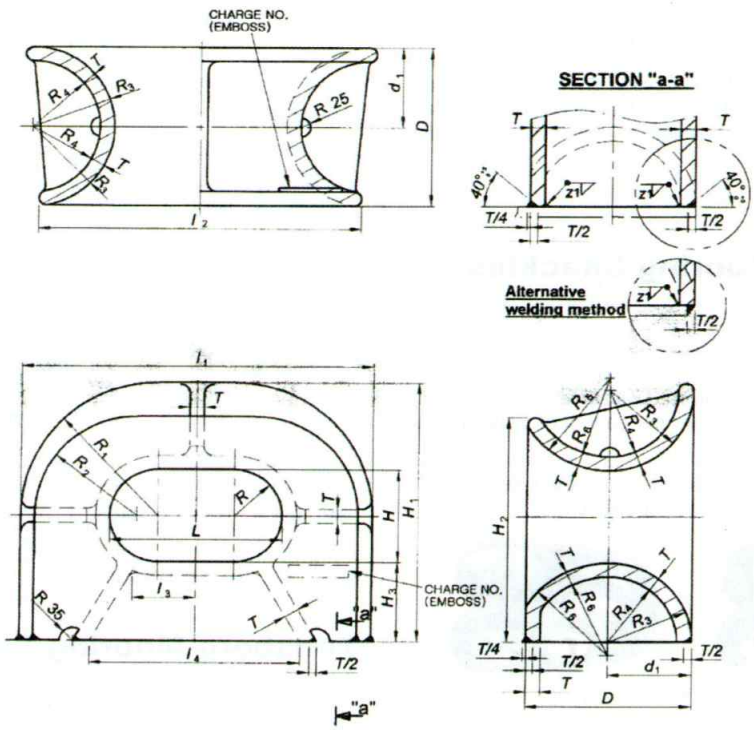
Closed Chock Covers



Tapas de Calzo Cerradas

チョックカバー　封闭式底座盖

Designed to cover the closed chock to protect mooring ropes from friction with the surface of steel chock. Mainly used for tankers or large bulk carriers which use UHMPE rope for mooring. Easily installed and removed around chock by Velcro tape, and mostly used UHMPE or polyester material.

*Not applicable for bulwark chocks.

Mooring Links and Shackles

Grilletes de Enlave (Unión)
ムアリングリンク シャックル　缆绳尾连接卸克

Specially designed to connect the forerunner of a synthetic rope with a wire rope when mooring. These links are important in preventing any friction or coiling in the connection between the wire rope and the mooring tail and they make the mooring process a great deal easier.

According to OCIMF Mooring Equipment Guideline (MEG4)

Most manufacturers will supply connection devices with a safety factor of three (breaking load three times the SWL). Joining shackles' SWL should be equal to or greater than the mooring lines' WLL.

SWL should not exceed working load range. WLL values for wires and synthetic lines differ (55% and 50% of ship design MBL respectively). Matching shackle SWL to WLL is not necessary. Minimum safety factor of three is recommended. Consider mooring system design to minimize connecting device failure risk.

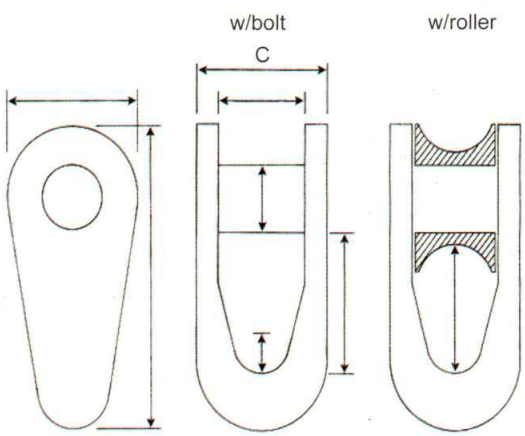
Boss Link - Mooring Shackles

Grilletes (Eslabón) Tipo Boss　ボスリンクシャックル　缆绳尾连接卸克

A stainless steel mooring link (anti-corrosive), used as connection between steel wire ropes or HMPE fiber ropes and mooring tails. Can be delivered with or without roller. The shackles are proof-tested under the control of DNV GL and carry DNV GL type approval.

Recommended working load limit: 50% of the specified MBL
Normal working load: 20% of the specified MBL

With Bolt



With Roller

Suitable Rope Size

Timm Boss Link 120T/140T
for mooring tail 6-10" circ. 48mm – 80mm diameter

Tonsberg Mooring Links

Grilletes (Eslabón) "Tonsberg"
トンズバーグリンク
缆绳尾连接卸克

Galvanized steel mooring link of compact design typically utilised as connection between wire rope and fibre tail. Stocked in four sizes 90T, 120T, 180T and 250T. 300T can be supplied on special request. Steel wire rope around the body-fibre rope around the bolt. Each link is proof-tested and certified by DNV Type Approval, compliant to OCIMF MEG4 Guidelines.

Unit Per Pc.

Mooring Wire Sockets, Roller Pin Type

Escaje de Amarre Tipo Rodillo
ローラーピン式ワイヤーソケット　缆绳用开口索节

Quite new style of mooring shackle as substitute for traditional connection of a synthetic tail rope with a wire rope when mooring. Attaching this new type Roller Socket at the end of mooring wire rope you can connect directly to mooring tail rope (Forerunner) by its unique construction combined conventional mooring shackles and wire rope socket. You don't need to buy standard mooring shackle anymore if this new style roller shackle is attached to mooring wire.

Roller shackle is made from carbon and alloy steel with pin and roller which are detachable for connecting tail rope. Normally the roller shackle will be supplied pre-attached to mooring wire rope by factory, but it is possible to attach by ship's workers using a unique socketing media "Wirelock".

21 11 71	Mooring wire socket, roller pin type 0-42 carbon and alloy steel for 42 mm dia wire rope	Pc.

Socketing Resin "Wirelock"

Resina para Enclavijar la Terminación de cable Metálico "Wirelock"
ソケット加工樹脂 "ワイヤーロック"
缆绳修补树脂胶

The suitable resin for socketing wire rope terminations. This wire rope assemblies are 100% efficient when used with steel wire rope, galvanized wire ropes.

Pass the wire rope through the end hole of roller socket, and measure the rope ends to be socketed. The rope end should be seized at the sufficient length so that the ends of the unlaid wires (from the strands) will be at the top of the socket basket. The wire rope is secured in a vice directly below the seizing to allow the strands to be unlaid to the seizing. Plasticine or clay based putty, i.e., window or glazing putty, is required to seal the base of the socket prior to pouring, thus, preventing resin leakage which may cause voids. All of the liquid resin should be placed in the mixing container and then all of the power added to it (or vice versa) before mixing. Always mix all of the resin with all of the powder. Upon mixing, the resin will turn to a greenish turquoise color. If the mix remains a pale straw yellow color, do not use the kit. Once the resin is mixed, it should be poured immediately into the socket to ensure good penetration. The rope can be put in service or proof loaded one hour after the material in the socket has gelled. Whenever possible, the assembly should be proof loaded.

Warning

* Incorrect use of the socketing resin can result in an unsafe termination which may lead to serious injury, death, or property damage.
* Do not use the resin with stainless steel rope in salt water environment applications. Consult with the manufacturer.
* Use only soft annealed iron wire for seizing.
* Do not use any other wire (copper, brass, stainless, etc.) for seizing.
* Never use an assembly until the resin has gelled and fully cured.
* Remove any non-metallic coating from the broom area.
* Sockets with large grooves need to have those grooves filled before use with the resin.

Caution

* This resin, in liquid state, is flammable.
* Chemicals used in this product can give off toxic fumes and can burn eyes and skin.
* Use only in well-ventilated work areas.
* Never breathe fumes directly or for extended time.
* Always wear safety glasses to protect eyes.
* Always wear gloves to protect hands.
* Avoid direct contact with skin anywhere.

21 Rope & Hawsers

Man Ropes

Cuerda Plastificada
マンロープ（ギャングウェイ手摺り用ロープ） 扶手绳

Used as handrail rope for a gang way or wharf ladder, made of vinylon rope strand with vinyl chloride coating.

Strand of vinylon rope

Vinyl chloride coating, 2 mm (thickness) white color

Finished diam. 22 mm

Weight per mtr 1 kg

How to make rope ends:

Diamond Preparation

Small Eye

How to order: 21 - 13 - 65

Man rope, vinylon with vinyl chloride coating, 22 mm diam x FINISHED LENGTH (Mtr)

Tarred Marlines

Merlín (Alquitranado)
タール付マーライン
粗油麻绳

Sturdily woven, thoroughly tarred, waterproof, polished jute. When ordering, please specify if the marline is required in ball or hank form.

CODE	Diam. mm	Weight kg	Unit	CODE	Diam. mm	Weight kg	Unit
21 14 01	3	0.3	Hank	**21 14 03**	4	0.3	Hank

Elastic Trapeze Cords

Cuerda de sujeción elástica
固縛用伸縮コード
固定用弾力縄

Elastic cord similar to rubber band but more durable and stronger. Use for fastening the items very easily. Attached with hook and clamp.

21 14 61	Elastic Trapeze Cord, 10 mm dia with hook and clamp	Mtr.
21 14 62	Hooks for Elastic Trapeze Cord	Pc.
21 14 63	Rope Clamps for Elastic Trapeze Cord	Pc.

Marine Oakum

Estopa Filástica　オーカム　麻絮

Available spun or unspun. The primary use of marine oakum is for caulking the seams of wooden vessels and the wooden decks of all types of marine structures. Both spun and unspun oakum are waterproof and essential for all marine work.

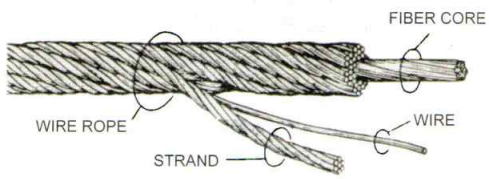
Unit Per Kgs.

CODE	Description
21 14 71	Spun marine oakum
72	Unspum marine oakum

Cordage

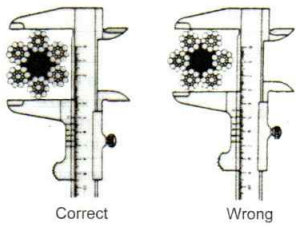
Name	Descriptions of Cordage
Point Line	Small rope used for reef points. Usually about inch to 1-3/4 inch in size. Generally referred to by the number of threads, 15 to 21, used in making it.
Ratlines	Small ropes stretched horizontally between shrouds to form foot and hand holds when going aloft. Sized to forward and after shrouds, clove hitched around intermediate shrouds.
Houseline	Soft laid three yarn stuff used for general purpose. May be tarred or untarred.
Boat Lacing	Line by which a boat's canvas cover, or other canvas gear, is secured in place.
Marline	Superior kind of spunyarn laid up left-handed.
Spunyarn	Spunyarn is a small stuff and is the cheapest and most commonly used for seizing, service, etc., where neatness is not important. It is laid up loosely, is left-handed, 2, 3 or 4 stranded, and is tarred.

Specifications of Cordage



Name	Material	Number of Strand	Number of Thread & Diameter	
Point Line	Manila	3	12 thread 15 " 21 "	9 mm 10 12
Ratlines	Tarred Hemp of Manila	3	6 thread 9 " 12 "	6 mm 8 9
Houseline	Manila	3		5 mm 6
Sash Cord	Cotton	Senette Lay		6 mm 8 9
Wrapping Twine	Jute & Hemp	Spun	1.5 - 2.0 mm	
Boat Lacing	Manila	3	6 thread	6 mm
Manila	Hemp	-	3 lay 2 "	2 mm 3 4
Spunyarn	Jute	Spun	2 lay	4 mm

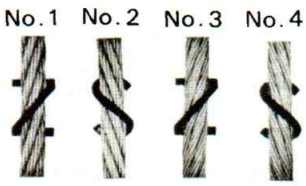
Steel Wire Ropes



Cables de Acero - Mediciar - ワイヤーロープ　綱纜

Wire rope construction is indicated primarily by the number of strands and the number of wires in each strand. For instance a 6 x 24 steel wire rope is composed of 6 main strands and each strand has 24 main wires. These numbers are modified as follows:

1) The arrangement of wires in the strand, i.e. Filler, Seale, Warrington, etc.
2) Lay of stranding, i.e. regular, lang, right, left, etc.
3) Outer covering, i.e. galvanized, ungalvanized, etc.
4) Type of center, i.e. hemp core, I.W.R.C. (Independent Wire Rope Core) and strand.



Gauging Wire Rope

The diameter of a wire rope is the diameter of the circle which will enclose all of its strands. When measuring a wire rope by caliper, care should be taken to measure the correct circumference of diameter of all the strands, not areas where there are two adjacent strands. See diagram above.

The Lays of Wire Rope

The picture right shows and indicates the regular and Lang's lay of wires.

1) Right hand regular lay
2) Left hand regular lay
3) Right hand Lang's lay
4) Left hand Lang's lay

Wire ropes can be either Lang's lay or Regular lay (Ordinary lay).

Lang's lay construction is one in which the wires in the strand are laid in the same direction as the strands are laid into the rope.

The advantage of using Lang's lay is that a rope so constructed offers a better wearing surface when in use, and, therefore, can be expected in many cases to survive for a longer period than a rope made with regular lay. Lang's lay ropes should never be used when one end of the rope is free to rotate.

Regular lay construction is one in which the strand wires are laid in one direction, and the completed strands laid into the rope in the opposite direction.

Nearly all ropes are supplied right-hand lay, but left-hand lay is occasionally required.

Nominal Tensile Strength

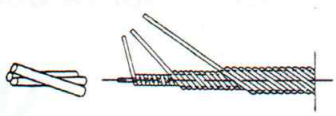
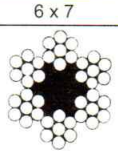
For right-handed drum = left-hand rope

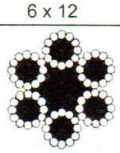
Left-Hand Rope	Right-Hand Rope	Drum
		
		

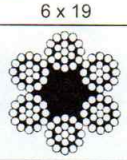


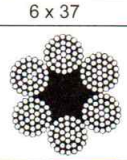
Unwinding Wire Rope

Cross Section of Wire rope





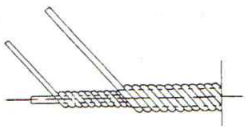




Construcción de Cable de Acero ロープの構成による分類 钢丝绳

A) Cross Lay (Conventional Lay)

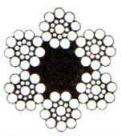
The strands of a so-called conventional wire rope have equal-sized wires in all layers. Each layer has different length of lay and the wires of one layer cross the wires of the underlying layer.

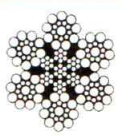


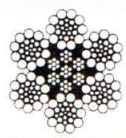
When the strands are spun in this manner the wires of the individual layers are in point contact with each other. In conventional ropes, all wires, except for the center wire, are of the same length.

Construction	6 x 7	6 x 12
Illustration		
6 x 19	6 x 24	6 x 37
		

B) Parallel Lay (Equal Lay)

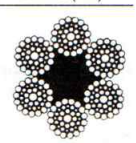


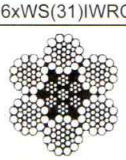


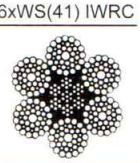


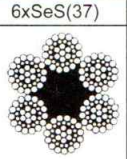
The strands of equal lay ropes have wires of varying sizes laid in such a way that the wires of one layer are parallel with and supported over their total length by wires in the underlying

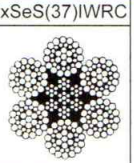
layers. All wires have the same length of lay, and are laid up in a single operation.











The use of equal lay strands avoids deformation, internal wear and secondary bending stress which result from the point contact between the wires in the conventional type. In most fields of application, therefore, equal lay ropes have proved to have a longer life than conventional ropes. The following types of construction are equal lay : Warrington, Seale, Filler and combinations of the same.

6 x 19 Classification

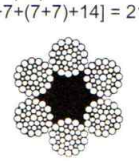
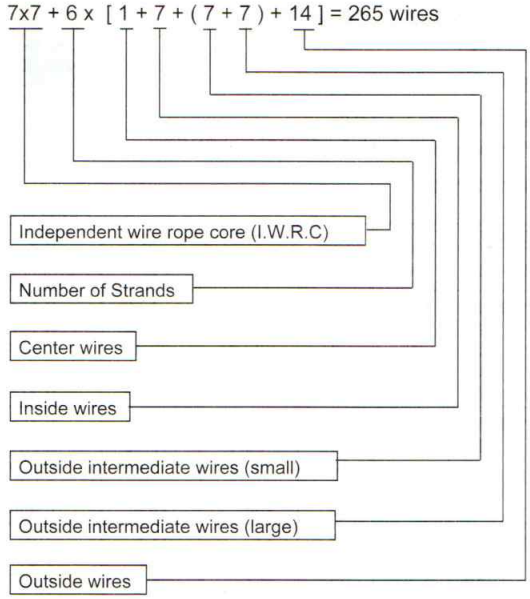
Wire Arrangement



6 x 24
6 x (9+15) = 144 wires

6 x 37
6 x (1+6+12+18) = 222 wires



6 x WS (36)
6 x [1+7+(7+7)+14] = 216 wires

IWRC
6 x WS (36)

7x7 + 6 x [1 + 7 + (7 + 7) + 14] = 265 wires

Wire Rope Selection:

1. Wire ropes are available in various types and constructions, each having specific uses. Therefore, it is important to select the rope according to the intended application. Namely, it is necessary to see what properties are required for the rope to be used correctly. The properties cover breaking strength, flexibility, resistance to bending fatigue, anti-friction, resistance to deformation, non-rotation and anti-corrosion. In most cases, the key point of selecting the rope for a particular application is consideration of the above properties.

2. Selection by features

1) Where breaking strength is important, IWRC parallel lay ropes are recommended. For example:
IWRC 6 x Fi(25), IWRC 6 x Fi(29), IWRC 6 x WS(36).

2) Where flexibility is important, FC (Fibre Core) cross lay ropes are recommended.
For example: 6 x 24FC, 6 x 37FC.

3) Where resistance to bending fatigue is important, ropes made of strands with as many wires as possible are recommended.
For example: FC 6 x WS(36), FC 6 x WS(41).

4) Where anti-friction is important, ropes consisting of outer strands made of thick wires are recommended.
For example: 6 x S(19), 6 x Fi(21), 6 x Fi(25).

5) In case resistance to deformation is important, parallel lay ropes are recommended.
For example: IWRC 6 x WS(31), U4 x SeS(39).

6) Where non-rotation is required, non-rotating wire ropes are recommended.
For example: U4 x SeS(39), 18 x 7, 19 x 7, etc.

7) Where anti-corrosion is important, galvanized or stainless steel ropes are recommended.

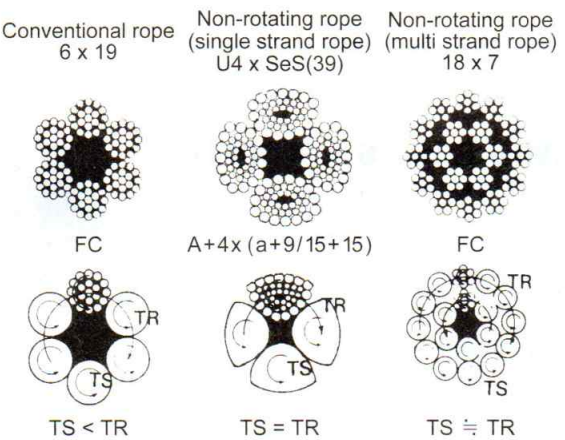
Non Rotating 4 Strand Wire Ropes

Cable de acero de 4 hilos no giratorio
非自転ワイヤー 无旋转 4 股钢丝绳

Best for use as a single lift crane rope. This rope has a unique four strand construction which serves to control and minimize the self spinning or rotating nature of the rope. The simple construction of the rope prevents sectional collapse and deformation. A smooth exterior finish, created through a special process, withstands abrasion and fits easily to the grooves of a drum or sheave. Because the outer shape of the rope is fitted well to drums and sheaves, there is less resulting friction during actual use, extending the length of service of the rope considerably.

The breaking strength of the non rotating ropes is higher than that of 6 strand ropes of an equivalent diameter and the margin of safety is higher. In spite of the 4 strand construction, these ropes have superior flexibility.



Recommended for use as the hoisting lines of tower and derrick cranes, as grab winch ropes, derrick fall ropes and lifeboat fall ropes.

UNI-Rope U4 x SeS(39)

* Principles of non-rotating properties of wire rope

(1) By making wire rope with multi strands and by laying the strands of the inner core of the rope in the opposite direction of the outer strands, the self rotating torque can be counteracted.

(2) By lengthening the lay (pitch) of the strands, reducing the number of strands, and laying strands of a more triangular shape, the tendency for the rope to be affected by spherical motion is decreased.

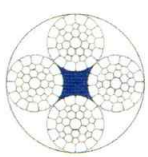
4 Strand Non Rotating Wire Ropes



LANKO®FOUR

Cable de Acero no Giratorio de 4 Cordones
非自転ワイヤー ランコーフォー
4 股无旋转钢丝绳

LANKO® FOUR

LANKO® FOUR COMPACTED

LANKO®FOUR is a 4 strand, non-rotating, hoisting wire rope for use on cranes, such as Fukushima and IHI. Galvanized and lubricated to provide long protection against inner abrasion and corrosion. The LANKO® FOUR COMPACTED wire rope has a higher MBF and to maintain the required safety factors. Both versions have a thick outer wire making the wire robust and impact resistant in the often harsh conditions of loading and discharging.

Multi Strand Non-Rotating Wire Ropes

37x7 LANKO®LIFT COMPACTED

Cable de acero no rotatorio de múltiples cordones
非自転ワイヤー ランコーリフト
防旋转钢丝绳 LANKO

Multi strand, non-rotating, hoisting wire rope. During the production process, the core is covered by an especially designed HDPE extruded cover. This special feature gives the wire rope stability, and avoids point-to-point contact between wires of the outer and inner strands, as well as preventing corrosion and wear of the core. When the high breaking strength is taken into account, this hoisting wire rope offers exceptional quality.

Applications: Cranes, Hoists

Quality	:	Galvanized
Tensile Strength	:	1,960 N/mm²
Construction	:	37 x 7
Direction of Lay	:	Right Hand Lang Lay
Greasing	:	Yes
Swivel	:	Yes

8-strand Wire Ropes

Lanko®Top Compacted

Cable de acero de 8 cordones compactado Lanko® Top
ランコートップ
LANKO ®TOP

An 8 strand compacted luffing wire rope. The core is covered by an especially designed HDPE extruded cover. This special feature gives the wire rope stability, and avoids point-to-point contact between wires of the outer and inner strands, as well as preventing corrosion and wear of the core. Compacting the wire rope provides greater strength, due to higher steel content, and better abrasion resistance, thanks to the larger contact area between wire rope and sheave.

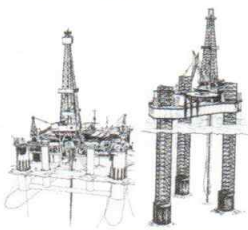
Wire Ropes for Offshore Drilling Units

The following recommendation table lists ropes which are designed and manufactured to meet the requirements for structural use on offshore drilling units. Many of the ropes are shown previously in the catalogue, but to simplify the selection process, the most popular wire constructions for offshore applications are provided below. These ropes are made to order, so ropes of constructions other than those listed below are also available upon request.

When ordering, specify the construction type, diameter, length of coil, and other related information helpful in identification of the rope.



Rope Recommendations Table

All ropes are right-hand, regular lay unless otherwise stated.

Applications	Recommended Construction
Drilling Lines	6 × 19, Seale with IWRC 6 × 26, Warrington Seale with IWRC
Anchor Lines	6 × 25, Filler Wire with IWRC 6 × 36, Warrington Seale with IWRC 6 × 41, Warrington Seale with IWRC
Anchor Pennant Lines	6 × 25, Filler Wire with IWRC 6 × 41, Warrington Seale with IWRC
Riser-Tensioner Lines	6 × 41, Warrington Seale with IWRC,Lang's lay
Guide Lines	6 × 25, Filler Wire with IWRC 6 × 36, Warrington Seale with IWRC
Crane Hoist Wires	6 × 25, Filler Wire with IWRC or FC 6 × 36, Warrington Seale with IWRC or FC 18 × 7, Hercules 37 × 7, Nuflex U4 × SeS(39), UNI-ROPE, etc.
Crane Derricking Wires	6 × 25, Filler Wire with IWRC or FC 6 × 36, Warrington Seale with IWRC or FC 6 × 41, Warrington Seale with IWRC or FC
Sand Lines	6 × 7, PPC
Pipe Handling Slings	6 × 24, FC
Heavy Lifting Slings	Cable Laid Steel Wire Rope IWRC

*** Please indicate Tensile grade (IPS or EIPS) and Finish (Bright or Galvanized) when ordering.
IPS=Improved Plow Steel, EIPS=Extra Improved Plow Steel,
IWRC=Independent Wire Rope Core, FC= Fibre Core

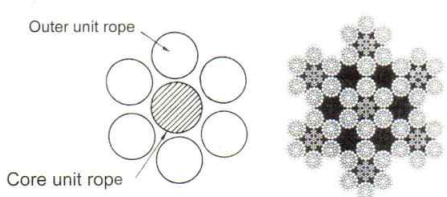
Offshore Drilling Units
Typical Assembling Plan for Towing Bridle

Quantity listed below shows for 2 sets of Towing Bridles



1	Towing Chain 78 mm Φ × 18 mtr	4 Set
2	Anchor Shackle	14 Pcs.
3	Towing wire 84 mm Φ × 41 mtr	4 Set
4	Connection Plate	4 Pcs.
5	Tri Plate	2 Pcs.
6	Pendant Wire 80 mm Φ × 50 mtr	2 Set
7	Recovering Rope 28 mm Φ × 125 mtr	2 Set
8	Recovering Rope	4 Set

Cable Laid Slings

Cables de Acero Ligado ケーブルレイドスリング 强力钢丝绳吊索

Steel slings which are designed for use in situations where extremely heavy load capacity is required. In the structural design and construction of modern offshore drilling rigs it is necessary to use ropes which can withstand very heavy loads for extended periods of time under extreme conditions.

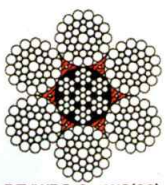
For such jobs, ropes of more complex construction designs with high breaking strengths, good flexibility, easy handling, and product reliability are in greater demand.

Cable Laid Design

The term "Cable Laid" indicates a rope that is constructed from a number of unit ropes laid up in a helical design. Because of the complexity of the rope design, there is a wide choice of sling constructions available. A more typical design is illustrated in this section.

When ordering, please indicate the size of the eye splice at each end of the rope as well as the diameter of the sling, the construction, breaking strength, and total length.

How to order: 21 - 38 - 01



Sling, cable laid, galvanized, DIAM of SLING, CONSTRUCTION, BREAKING STRENGTH, LENGTH

Delta Filler Wire Ropes

Cable de Acero Tipo "Delta" デルタフィラーロープ 三角形填充钢丝绳

DF IWRC 6×WS(36)

A specially designed IWRC type rope with a patened plastic filler liner between the inner core and the outer strands of the rope. There are several unique advantages to this wire construction which make it more efficient and durable than normal wire ropes.

Delta Filler Rope eliminates one of the leading cause for unexpected wire rope failure, the invisible breakage of wire contact points inside of the wire core. When a rope is in use, the inner core of the rope is constantly in friction with the outside strands, causing abrasive wear on the connecting points in the wire core. With the Delta Filler Rope, a plastic lining fills the inner space of the rope stabilizing the strand lay construction and absorbing any friction between the inner core and the outer strands of the rope. The inner plastic lining also protects the inner core from corrosion. It keeps water and other elements from entering the inner core of the rope while keeping the anticorrosive lubricant oils inside of the rope from dripping out and polluting the environment.

Because of the ropes tendency not to twist it has a higher breaking strength than conventional ropes.

Delta Filler Rope is suitable for the following uses:

* As a mooring line for LNG carriers
* As a ramp support for RO-RO vessels.
* As an anchoring line for large vessels.
* As a luffing for deck cranes.
* As a guy line for large cranes.
* As a towing line for ocean tugboats.

How to order: 21 - 38 - 06

Green Ropes

Cable de Acero Tipo "Green"
グリーンロープ 格林钢丝绳

A unique full circle processed form provides approx. 10 to 20% higher breaking strength and endurance against abrasion compared with conventional wire rope.

Also this form will not get out easily under hard conditions by passing through the rollers or sheaves, or by winding into rope drum frequently.

Applications: Winches, Cranes

How to order: 21 - 38 - 11

Stainless Steel Wire Ropes

Cable de Acero Inoxidable ステンレスワイヤロープ 不锈钢钢丝绳

There are many kinds of stainless steel ropes which are applicable for use in a wide variety of industries. The most commonly used stainless steel alloys are the AISI 304 and AISI 316 alloys which have superior resistance to corrosion in atmospheres with the presence of alkaline, acidic, or chemical elements. Stainless steel is also superior in its resistance to the adverse effects of extreme hot or cold temperatures.

Features of Stainless Steel Rope

* It will not rust easily in normal atmospheres and keeps a clean surface appearance.
* It will resist corrosion easily in high temperatures.
* It will resist corrosion from many industrial chemicals.
* Hard stainless steel has a high breaking strength and superior mechanical properties.
* Soft stainless steel wire rope is laid with bright annealing wire and is very flexible.
* Stainless steel AISI 304 complies with Japanese Industrial Standards SUS-304 for wire ropes.

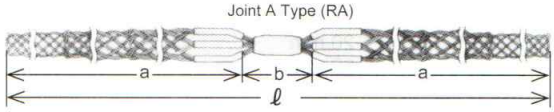
Cable Grips (Cable Stocking)

Asideros de Cables　ケーブルグリップ　钢丝绳套环



Cable grips are invariably made from woven mesh wire in the shape of an open ended stocking or sleeve. Cable grips of the same diameter as the rope to be restored are prepared with the strand ends fitted with pull collars. The sock is placed over the ends of the new and old wire ropes and when it is pulled taught, the woven mesh tightens snug around the rope.

The grip is easily fitted and removed. It holds the wire rope securely, operates safely, and saves labor costs compared to other means of rope repair.

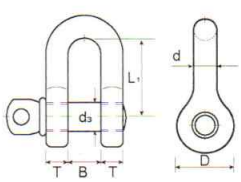
Green Pins Standard Shackles



Grilletes estándar Green Pin

グリーンピン標準シャックル　Green Pin® 标准卸扣

High quality, high tensile "Green Pin" shackle can be identified by the green coloured pin and the marking on the shackle body and pin. Green pin shackles meet all relevant requirements of the Machinery Directive 2006/42/EC and all latest amendments.

Dee Shackles with Screw Collar Pin G-4151

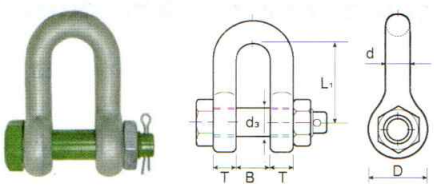
Material: Body and pin high tensile steel, Grade 6, quenched and tempered

Safety Factor: MBL equals 6 x WLL (Working Load Limit)

Standard: EN 13889 and meets performance requirements of US Fed. Spec. RR-C-271 Type IVB Class 2, Grade A

Finish: Hot dipped galvanized

Temperature Range: -20°C to + 200°C



Certification: At no extra charges this product can be supplied with a works certificate, material certificate, manufacturer test certificate, EC Declaration of Conformity and all shackles starting from 2 t can be supplied with DNV 2.7-1 certificate.

Unit Per Pc.

Green Pin Sling Shackles

Bow Shackles with Safety Bolt

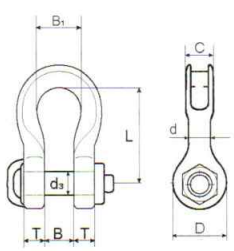
Grilletes deeslimgas Green Pin
グリーンピンスリングシャックル　Green Pin® 吊索卸扣

These shackles cover a range from WLL 7 tons up to 1,500 tons. Compared to the standard Green Pin shackles they have an increased bow radius for saving slings and improving wearability. These shackles are ideal for use with wire rope and synthetic sling applications.

Material: Body and pin alloy steel, Grade 8, quenched and tempered

Safety Factor: MBL equals 5 × WLL

Finish: Shackle bow painted silver, pin painted green



Temperature Range: -20°C to + 200°C

Certification: Can be supplied with a works certificate, material certificate, manufacturer test certificate, EC declaration of Conformity and all shackles from 75 ton are supplied with a Lloyd's Register of Shipping Certificate on proof load. An MPI and/or US inspection certificate can be supplied on request.

Note: ± 5% forging tolerance on inside width and length

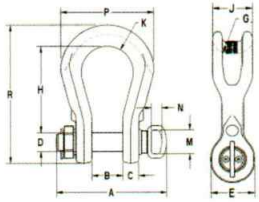
Wide Body Shackles

G-2160/G-2160E



Grillete de Eslinga Crosby

ワイドボディ シャックル　寛幅U形鏈鉤

Greatly improves the durability of wire rope slings. The increase in shackle bow radius provides minimum 58 % gain in the sling bearing surface and eliminates the need for a thimble. Increases the usable sling strength a minimum of 15 %. Forged alloy steel from 7 through 300 metric tons, and cast alloy steel from 400 through 1,550 metric tons. G-2160E as Easy-Loc type will be provided for Working Load Limit 75 to 300 metric tons.

Pear Shape Lashing Links

(Grab Links)

Eslabón (Anilla) Forma de Pera
ラッシング用リンク　梨形捆扎环（黑皮）

Pear shaped end links for chain or lashing turnbuckles. Forged steel, self-color or galvanized finish. Has 22 mm diam., 240 mm outside length and 130 mm outside width.

Unit Per Pc.

CODE	Description	Diam. mm	Overall Length mm × Width mm
23 11 81	Black	22	240 × 130
82	Galvanized	22	240 × 130

Log Lashing Spanners

Llaves para Trincar Troncos
ログラッシング用締付けレンチ　原木捆扎扳手

Light to carry and easy to use to tighten the turnbuckles for lashing log and lumber cargoes on deck. Can be used for the final lashing in port, as well as the important task of retightening turnbuckles daily on the voyage. You'll make the job faster and easier, reducing your crew's time and exposure on deck.

Unit Per Pc.

Wire Rope Lubricators

Lubricadores de Cable
ワイヤーロープルブリケーター 钢丝绳润滑器

A unique method of automatically lubricating on wire ropes, utilizing a high pressure collar with seals which delivers grease into the core of the wire ropes while providing a thin grease film outer coating as wire ropes passe through the lubricator. Lubrication protects the ropes against corrosion while also providing excellent lubrication of wire strands both internally and externally. This can provide safety lubrication work for crew and reduce the labor on lubrication by up to 90%, and significant increases in wire rope life.

Lubricator can also remove the grease or contamination from the wire rope prior to lubrication with cleaner attachment, which improve the effectiveness of the lubrication process.

There are several brands available, and each brand has different applicable rope diameters and accessories, so please specify the manufacturer and brand name when ordering replacement seals.

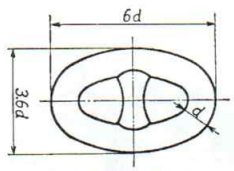
4. Chains/Links

Stud Link Anchor Chain Cables

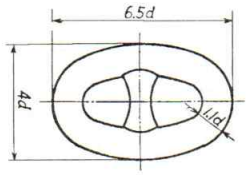
Flush Butt Welded

(Ref.JIS F 3303-1993)

Cadenas con Cartrete/Soldadas Eléctrica
フラッシュバット溶接アンカーチェーン
嵌入式对接缝焊的有档链环锚链钢索

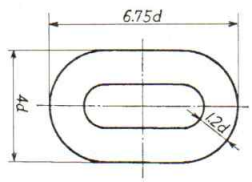


The specifications of these flush butt welded Anchor Chain Cables and their accessories for ship and harbour use are as follows.



Nominal Size	Denoted by the diameter "d" shown in the sketch.
One Length	One length of the chain is 25 or 27.5 mtrs between the farther point end of the inner side of the end link and that of the opposite end link. May be also including the joining shackle and kenter shackle.
Nos. of Link	The total number of links for each length is odd except where it includes a swivel.
Shape & Size of Link, Shackle, etc.	The shape of each link, shackle and swivel must be determined in proportion to the size as shown in the sketches. They must be uniform in shape, and those next to each other must fit properly and move freely.

Specification



Kind of Chain		Symbol	Material
Stud Link Chain	Class 1	ST 1	SBC 300 : Steel bars for chains SS-400 : Rolled steel got general structure S20C : Cold rolled special steel strip
	Class 2	ST 2	SBC 490 : Steel bars for structure
	Class 3	ST 3	SBC 690 (or KBC) : Steel bars for structure

Joining shackle for 28(d) mm stud link anchor chain cable, ST2 with certificate

Note: When ordering, be sure to state the size of the anchor chain for which these shackles are to be used. These shackles are proof and break tested to the same specification loads as the anchor chain with which they are used.

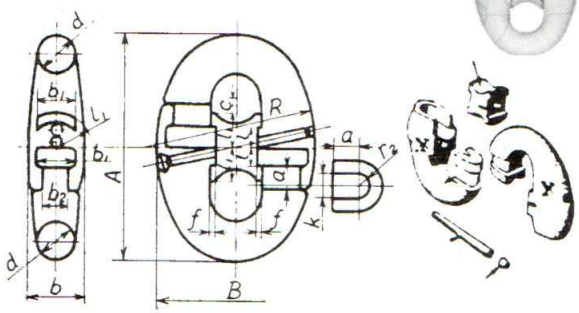
Remark: Shackles of sizes other than those listed above are also available upon request.

How to order: 23 - 11 - 79

Anchor shackle for 28(d) mm stud link anchor chain cable, ST2 with certificate



Note: When ordering, be sure to state the size of the anchor chain for which these shackles are to be used. These shackles are proof and break tested to the same specification loads as the anchor chain with which they are used.

Kenter Shackles

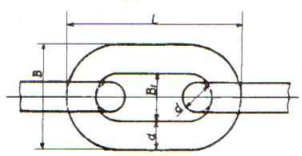
Guide of How to order

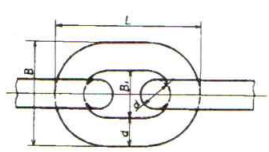
When ordering, please fill the following column.

Chains for General Use



(Ref. JIS F 2106-1988)

Cadenas de Uso General



船用一般チェーン　普通无档链环（长环）

Galvanized, rolled steel chains for general uses such as for guard or fence chains or for accommodation chain ladder slings. Two types of chains, short link and long link are available. Please specify the total length of the chain required in meters when ordering.

Long Chain

Short Chain

Unit Per Mtr.

Swivel Type Latch Lock Hooks

Gancho de Seguridad de Cierre Giratorio
スイベル式ラッチロックフック　轉環式鉤鎖

Drop forged and heat treated from a special bar steel. Safety hook with latch type closing mechanism which automatically closes when hook is loaded. Unlocking the trigger button on the hook will easily release the lock and open the hook. When ordering, please specify the safety working load required for the use of the cargo hooks.

7. Sling Chains & Hooks

Sling Chains

Eslinga de Cadena　スリングチェーン　链条

Available single leg type, 2-leg type, or 3-leg type sling chain suitable for overhead lifting. Slings are furnished preassembled to the alloy steel chain with link or hook at both ends. 2-leg and 3-leg type chain slings provide more stability and strength than single leg chain sling. All attachments are mechanically connected to chain. The drop forged identification tag is attached to the master end coupling link of each chain sling. Please specify chain size, type and reach when ordering.

How Lifting Angles Reduce Working Load Limits of Slings

How to order chain slings.

23 - 11 - 77: Chain sling with the following information;

1. Determine the maximum load to be lifted.
2. Refer to the table above and choose the proper type of chain sling (single, double, etc) dictated by the size, shape and weight of the load.
3. Estimate the approximate angle between a leg of the sling and the load during operation.
4. Select proper attachments (hooks and master links) for your chain sling.
5. Determine the overall reach from bearing point on master link to bearing point on attachment.
6. Refer to the Working Load Limit Chart and to your predetermined angle of the type sling you have selected.
7. Choose the chain size which meets your requirements.

Note: Angle to the load on multiple leg slings will be 60° or greater as long as the distance between lifting eyes of load is not greater than reach shown on identification tag.

Eliminator Single/Double Hooks

A-1361/A-1362

Enganche sencillo/doble Eliminator
エリミネーターフック　ELIMINATOR 単 / 双挂钩

The Crosby® ELIMINATOR® combines selected features and functionality of a master link, connecting link, grab hook and adjuster legs to provide you with one fitting that is suitable for applications that require an adjustable length chain sling. Made of forged alloy steel - quenched and tempered. It can be used for personnel lifting applications and meets the intent of OSHA Rule 1926.1431(g)(1)(i) (A) and 1926.1501(g)(4)(iv) (B). Suitable for use with Grade 100 and Grade 80 chain. Use the A-1361 and A-1362 in combination to make 3 leg chain slings. All sizes are RFID (Radio Frequency Identification) equipped.

Sling Saver Web Connectors

S-280

Conectores de redes para economizar eslingas
スリング・金属金具接続用補助コネクター
吊绳与金属配件连接用辅助连接器

Increasing synthetic sling efficiency as compared to standard anchor and chain shackle bows and conventional eye hooks. This allows 100% of the slings rated Working Load Limit to be achieved. Allowing better load distribution on internal fibers.

Durable vinyl cover that protects sling at eye, and keeps sling positioned correctly on spool.

Unit Per Pc.

CODE	Round Sling Size (No.)	Web Slings			Working Load Limit (t)	Weight Each (kg)
		Webbing Width (mm)	Eye Width (mm)	Ply

Sling Saver Web Sling Shackles

S-281

Grilletes de eslingas de redes para economizar eslingas
スリング・金属金具間接続用シャックル　吊绳与金属配件连接用卸扣

Designed to connect synthetic web slings and synthetic round slings to eyebolts, pad eyes, and lifting lugs. All alloy construction.

Increased radius of bow gives wider sling bearing surface resulting in an increased area for load distribution, thus: Increasing synthetic sling efficiency as compared to standard anchor and chain shackle bows and conventional eye hooks.

Unit Per Pc.

CODE	Round Sling Size (No.)	Web Slings			Working Load Limit (t)	Weight Each (kg)

Slide-loc Lifting Points

SL-150

Puntos de suspensión con juntas deslizantes
スライドロックリフティングポイント　滑锁吊点部件

Available in capacities from 0.5 to 3.2 metric tons. Bail is Forged Alloy Steel – Quenched and Tempered, and swivels 360° degree. Meets the Machinery Directive 2006/42/EC guidelines and is marked with CE accordingly.

Unique locking mechanism makes the lifting point well suited for quick attachment to load surface. No need for tools.

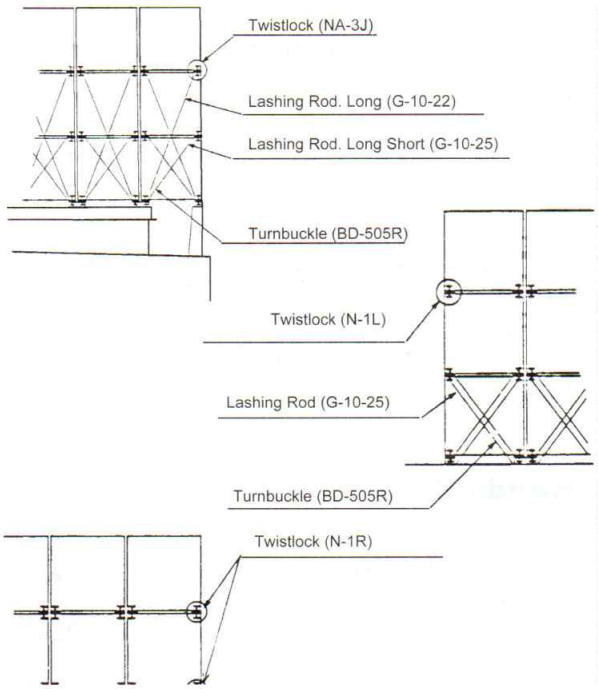
Lashing Snatch Blocks

Pastecas de Retorno para Cables, de Bisagra
ラッシングスナッチブロック 捆绑用凹槽滑车

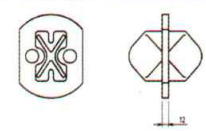
Has a safe and easily operated locking device with a 150 mm sheave diam. Applicable wire rope sizes are 18, 20 and 22 mm diameter. Weight 12 kg. S.W.L. 5 tons. Test load 15 tons.



23 17 51	Lashing snatch block, 150 mm S.W.L. 5 tons	Pc.

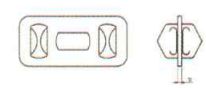
10. Container Lashings

Container Lashing and Securing Gears



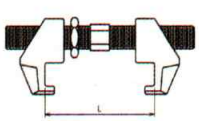
Trincage de Contenedores
コンテナーラッシング用具 集装箱底角（镀锌）

The lashing gear and lashing systems described below will ensure the safety of cargo during transport, secured efficiently with the minimum amount of lashing used. From among a wide range of products, the most popular models are illustrated below with the respective specifications.



Stackers

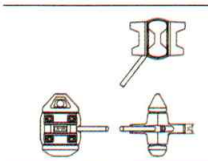
Unit Per Pc.



CODE	**23 18 01**
Model	M-1G
Type	Single Stacker
Flange Thickness	12 mm
Weight	2.8 kg
Finish	Galvanized

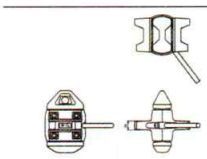
CODE	**23 18 02**
Model	M-3
Type	Double Stacker
Flange Thickness	12 mm
Pitch of Cone to Cone	204 mm
Weight	8.3 kg
Finish	Painted with Primer

Bridge Fittings



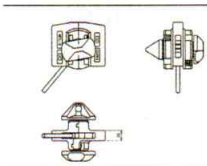
Unit Per Pc.

CODE	**23 18 06**
Model	L-3L
Feature	Allowable container distance: L: 102 - 294 mm
Weight	4.9 kg
Finish	Galvanized



Twistlocks

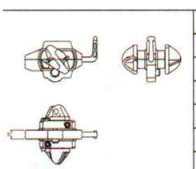
Unit Per Pc.



CODE	**23 18 11**
Model	N-1R
Feature	Right Hand Lock
Flange Thickness	25 mm
Weight	5.6 kg
Min. B.L.	500 kN
Finish	Galvanized

(to be continued)

CODE	**23 18 12**
Model	N-1L
Feature	Left Hand Lock
Flange Thickness	25 mm
Weight	5.6 kg
Min. B.L.	500 kN
Finish	Galvanized



CODE	**23 18 13**
Model	MTL-2
Feature	Left Hand Lock
Flange Thickness	30 mm
Weight	6.4 kg
Min. B.L.	500 kN
Finish	Galvanized

Semi-Auto Twistlocks

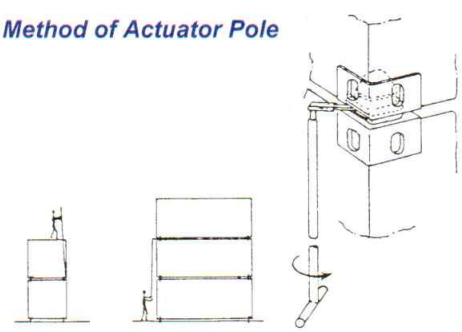
When loading the containers, put the semi-auto twistlocks in the bottom corner fittings of the containers at quay, the twistlocks will be locked automatically by putting on the other containers. The NA-3J twistlock is locked with the handle in the horizontal position.

When unloading the containers, unlock the twistlocks by using the bar and remove the semi-auto twistlocks from the containers at quay.

Unit Per Pc.

CODE	**23 18 31**
Model	NA-3J
Feature	Horizontal Lock
Flange Thickness	29 mm
Weight	7.2 kg
Min. B.L.	500 kN
Finish	Galvanized

Note: NA-3J is a dual function type twistlock.



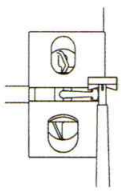
Actuator Poles (Aluminium)

Unit Per Pc.

	CODE	Model	Length	Material
	**23 18 16**	N-OV-V	1.8 m	Aluminium
	17	-14	4.3 m	
	18	-22	6.7 m	
	**23 18 21**	N-OH	1.8 m	Aluminium
	22	-14	4.3 m	
	23	-22	6.7 m	
	**23 18 26**	N-OV-U	1.8 m	Aluminium
	27	-14	4.3 m	
	28	-22	6.7 m	

Note: The above models, made of aluminum, can be divided at any length.

Handling Method of Actuator Pole

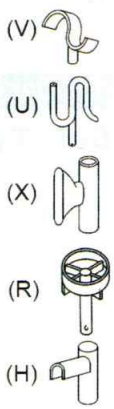


Actuator Poles (Carbon Glass Fiber)

Unit Per Pc.

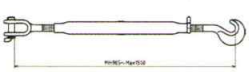
CODE	Model	Length	Material
23 18 33	RL-R-50	5.0 m	Carbon Glass Fibre
34	RL-R-20	2.0 m	
35	RL-R-29 (JOINT)	2.9 m	

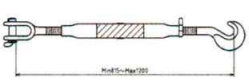
Note: The length of the above models, made of carbon glass fiber, cannot be changed.



How to use (RL-R)

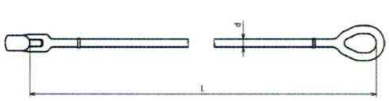
The shape of the head piece depends on the type of twistlock.





V, U, X and R: Vertical
H: Horizontal

Choose the material (aluminium or carbon glass fiber), length, and shape of the head piece.



Turnbuckles

Unit Per Pc.

Size: mm	CODE	23 18 36
	Model	BD-505R
	Feature	Jaw Bolt, Hook Bolt, Pipe Body
	Size	As Per Sketch
	Weight	14.0 kg

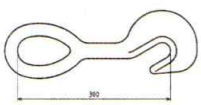
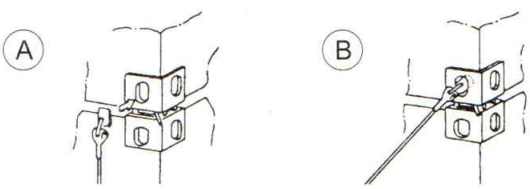
	Finish	Galvanized
Size: mm	CODE	23 18 37
	Model	BF-505R
	Feature	Jaw Bolt, Hook Bolt, Flame Body
	Size	As Peer Sketch
	Weight	14.9 kg
	Min. B.L.	500 kN
	Finish	Galvanized
Size: mm	CODE	23 18 38
	Model	BD-505RS
	Feature	Jaw Bolt, Swivel Hook, Pipe Body
	Size	As Per Sketch
	Weight	11.3 kg
	Min. B.L.	500 kN
	Finish	Galvanized

Hinge Rod G-10



Unit Per Pc.

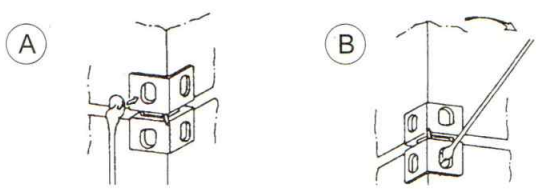


CODE	Model	Rod Diam. mm	Length mm	Proof Test Load Tons	Min. B/L Tons
		Short			
23 18 74	G-10-25	25	2,100	37.5	50.0
		Long			
23 18 76	G-10-22	22	4,700	27.0	36.0

Extension Rods

Unit Per Pc.

Size: mm	CODE	23 18 81
	Model	G-8-50
	Size	As Per Sketch
	Weight	3.0 kg
	Min. B.L.	500 kN
	Finish	Galvanized



Handling Method of Lashing Rod

Upper Lashing

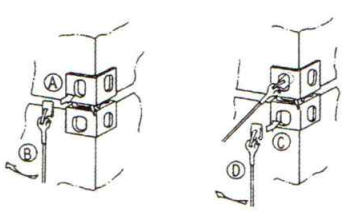
A Insert hinge rod into the lower end hole of third tier container.

B Swing the other end to cross lashing direction and tighten with the turnbuckle.

Lower Lashing

A Insert the hook of a short lashing rod into the lower end hole of the second tier container.

B Swing the other end to cross the lash and tighten it with the turnbuckle.

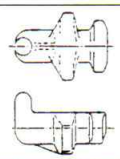


Handling method of the Hinged Lashing Rod. Same lashing rods and turnbuckles as mentioned above.

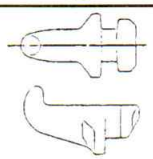
"Parallel Lashing System"

When the parallel lashing system is used, the lashing is made by applying the hinge rod to the lower end hole of the second tier container. The same hinge rod should also be applied to the upper end hole of the first tier container.

The lashing length is adjusted with the turnbuckle. A sagged, slacked, or overfastened lashing is not desirable.



The lashing should be adjusted to the proper level with the turnbuckle.



A. Insert the hinge rod into the bottom hole of the second tier container.
B. Turn the fitting to secure the internal cross lashing.
C. Insert the hinge rods into the upper end hole of the first tier container.
D. Turn the fitting to secure the internal cross lashing with the turnbuckle.

Corner Hooks

Unit Per Pc.

CODE	**23 18 83**
Model	CH-1
Weight	2.7 kg
Feature	Preferable for Bar Lashing
Finish	Galvanized

CODE	**23 18 84**
Model	CH-2
Weight	2.7 kg
Feature	Permit Crossing of 2 Lashing Bars
Finish	Galvanized

Lashing Chains

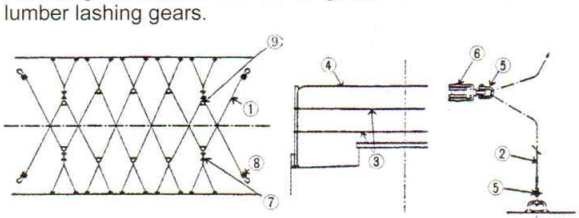
Unit Per Pc.

CODE	**23 18 91**
Model	LC-23-20
Feature	Both End Hook
B. L.	20.0 Tons
Finish	Dip Tar Epoxy
Length	As Per Request
Chain Tensioners	
CODE	**23 18 92**
Model	CT-1-20
B. L.	20.0 Tons
Finish	Dip Tar Epoxy

Cargo Lashing Belt

Cinturón de Amarre de Carga　カーゴラッシングベルト　货物绑带

Used to secure cargo or goods on deck to protect cargo from moving which leads to accidents. Typically made with a nylon or polyester and it can be fastened with metal buckle.



Unit Per Pc.

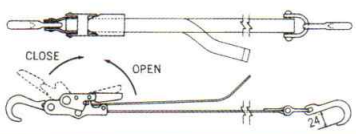
Lumber Lashing Gears

Trincage de Madera　木材ラッシング用具　木材捆绑链条

Following illustrations will be of guidance in how to order lumber lashing gears.



① ③ ④ Lashing Wire, Standard size is 22-26 mm ø, 6 x 24
② Pendant Wire
Loop at both ends, Standard size is 20 mm ø,6 x 24
⑤ Shackle B/L 20T or 30T
⑥ Snatch Block
⑦ Turnbuckle
⑧ Wire Rope Clip
⑨ Turnbuckle for Lumber Lashing, PTL: 8.0T, BL: 20.1T
⑩ Grab Link with long link, PTL: 5.6T, BL: 14.1T
⑪ Lashing Chain End Link at both ends BL: 18.0T

11. Car Claspers

Belt Type Car Claspers

Catraca Cinta Poliester　ベルト式カークラスパー　皮带式车辆固定器

Made of polyester belt with hooks at both end and used for fixing cars on deck for car careers. Max. length between hook and hook will be 1,350 mm and firmly secured by tightening lever.

Safe Working Load	400 kg
Max. Breaking Load	1,600 kg
Length	Max. 1,400 mm
	Min. 400 mm
Weight	0.9 kgs

23 19 01	Car clasper, belt type, normal working load 400 kg	Pc.

12. Ladders

Pilot Ladders

Escalas de Práctico　パイロットラダー　木质舷梯

Manufactured in compliance with ISO 799-1:2019

Excerpt of Pilot Ladder Rules

1. Side Ropes
Each side rope shall be mildew-resistant manila rope, or a spun thermoset polyester rope with a polypropylene core of a colour that contrasts with the spun polyester. Ropes shall have a breaking strength of at least 24 kN, and the diameter should be 20 mm (63 mm circumference).

2 Steps
The distance of inner edge of side ropes should be more than 400 mm. The centre of each hole shall be at least 50 mm from the short edge of the step. The width of step is no less than 115 mm, and thickness no less than 25 mm. Each step shall be equally spaced at 330±20 mm, of one-piece construction, of either hardwood or resilient plastic or rubber material, and its surface is grooved or patterned, or of a textured non-skid type which shall be integral with the step and shall be either moulded or cut into the step with the nominal depth of 3 mm. Non-skid adhesive sheeting may not be used.

3. The bottom 4 steps shall be made only of resilient synthetic or rubber materials. The rest of the ladder steps shall be of either hardwood or synthetic material.

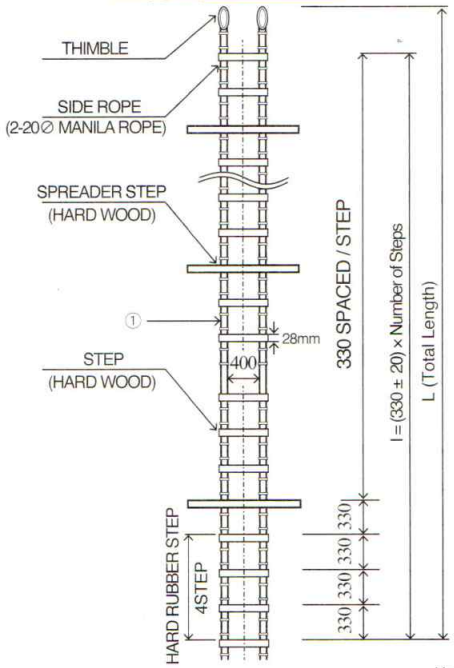
4. Spreader Steps
Each spreader step shall meet the requirements for other ladder steps, except that each spreader step shall be at least 1.8 meter long.

Number of steps and relative positions of spreaders

No. of Steps	The position of Preventer Steps	No. of Steps	The position of Preventer Steps
6	5	22	5, 14
7	5	23	5, 14, 21
8	5	24	5, 14, 22
9	5	25	5, 14, 23
10	5	26	5, 14, 23
11	5	27	5, 14, 23
12	5	28	5, 14, 23
13	5	29	5, 14, 23
14	5, 12	30	5, 14, 23
15	5, 13	31	5, 14, 23
16	5, 14	32	5, 14, 23, 30
17	5, 14	33	5, 14, 23, 31
18	5, 14	34	5, 14, 23, 32
19	5, 14	35	5, 14, 23, 32
20	5, 14	36	5, 14, 23, 32
21	5, 14		

Remark: Spreader-step positions are determined by the step number counted from the bottom of the ladder.

5. Replacement Steps
Damaged steps shall be replaced with replacement steps meeting the relevant requirements in item 2 and 4, and shall not include more than two replacement steps and one replacement spreader step. If a ladder requires a third replacement step or a second replacement spreader step, it shall be rebuilt.



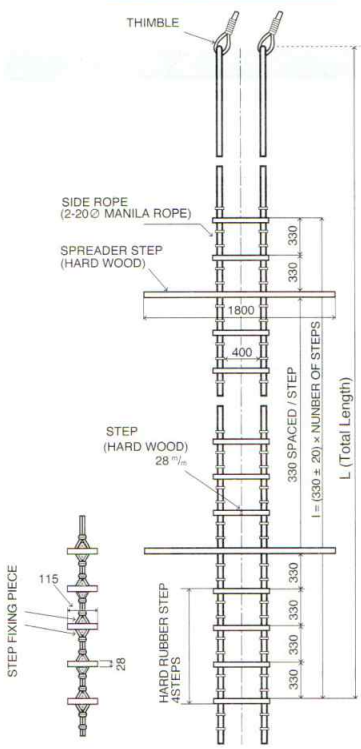
6. Step Fixing Piece
Step fixtures shall have rope seizing or purpose made arrangement such as solid nylon clamp blocks or hardwood clamp blocks to prevent the fasteners from loosening. Cable ties, u-clamps, worm driven clips are unacceptable.

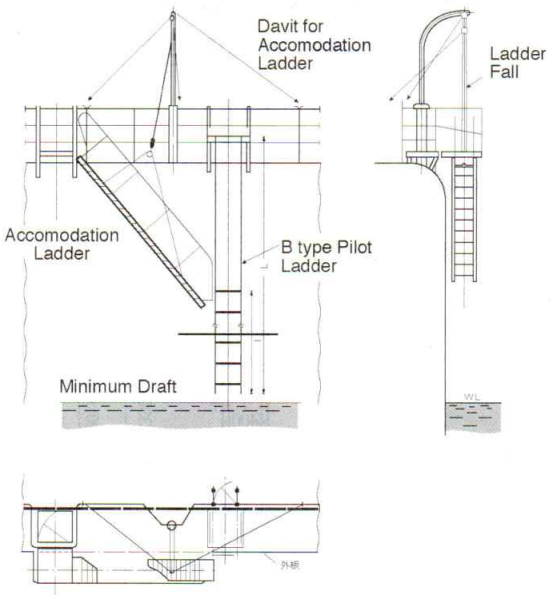
7. Fastening Hardware
Each metal fastener shall be made of material which is inherently or treated to be corrosion resistant. Ferrous metal part (not stainless steel) shall be coated in accordance with ISO 1461, stainless steel part shall be of a marine grade alloy with a corrosion resistance at least equal to grade "4401-316-00l" in ISO 15510:2014, aluminium part shall be 5 254 alloy or other grade containing not more than 0.06 % copper in accordance with ISO 209:2007. Metals in contact with each other shall be galvanically compatible, or insulated to prevent galvanic corrosion in a marine environment.

8. Marking
The bottom of the top step and bottom of the lowest spreader step of the ladder shall be marked with:
a) the name and address of the manufacturer;
b) the manufacturer's model designation;
c) "ISO 799-1" and "SOLAS";
d) the year of assembly or reassembly of the ladder;
e) identification of the approved maritime safety administration, along with any approval indications required by that administration, and
f) where used, identification of an approved organization acting on behalf of the maritime safety administration.

The construction of the pilot ladder

A type pilot ladder



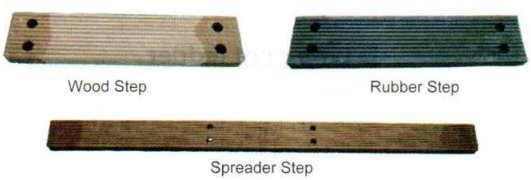


Unit Per Set

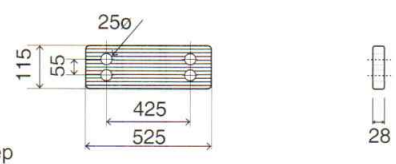
CODE	Type	Length	Numbers of	
			Total Steps	Preventer Steps
23 20 03	A	15 Mtr	45	5
04		12 Mtr	36	4
01		9 Mtr	27	3
02		6 Mtr	18	2

* Other length is also available on request.

B type pilot ladder



Unit Per Set



CODE	Type	Length	Numbers of	
			Total Steps	Preventer Steps

Aluminium Alloy Rope Ladders

with GS Type Oval Step

Escalas de Aleación de Alminio Tipo GS
アルミ合金 GS 型ステップロープライダー
铝合金 GS 型踏板绳梯

Aluminium alloy steps with synthetic fibre side rope. Light weight, easy handling, long life, non-corrosive, unbreakable, and very safe to the user. Suitable for various uses such as: – embarkation, liferaft, chain locker, draft survey, painting, etc.

Length of ladder, type of step, number of spreaders are optional, and are made to order according to the user's specifications.

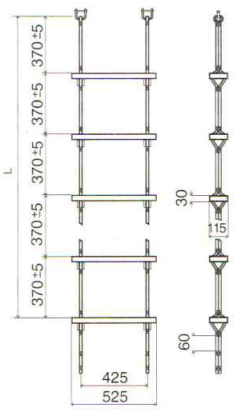
Embarkation Ladders

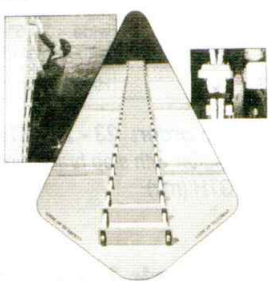


(Ref. E.L.M. J 2000)

Escaleras de embarque　乗込用はしご　救生登乗梯

The embarkation ladder is used on a merchant vessels to embark survival crafts.

Each wooden part must be hardwood that is free from knots, and each metal fastener must be made of a corrosion metal. Each side rope must be continuous from the top of the ladder to the bottom and must not be painted or otherwise coated or covered.



Specifications

Side Rope	Manila (or synthetic) rope with 2-3/4" cir. (22 mm dia)
Clear space between side rope	370 mm ± 5 mm
Step Size	W:115 mm x TH:30 mm x L:525 mm
Distance of center hole for each side rope	425 mm

23 20 52	Ladder, embarkation, length mtr, with further details	Set

Synthetic Step/Spreader and Rope Pilot Ladders

Escalas de Práctico Material Sintético
合成樹脂製パイロットラダー
引水梯

Steps and spreaders have hand holes and are molded from high-impact elastomer. Assembled with white dacron ropes, which have double the strength of manila ropes.

Connected by stainless steel bolts and nuts. Will resist fracturing and parting under severe conditions. Also this rope ladder conforms to USCG and meets the international requirements of the convention for SOLAS 1974.

- HIGH STRENGTH ALLOY
- STAINLESS STEEL FASTENINGS
- ELIMINATES UNRELIABLE MARLIN MOUSINGS
- EXCEEDS 2000 LB. REQUIRED LOAD TEST BY 100% MOLDED SYNTHETIC STEPS AND SPREADERS

Name of Mfr.: Coast Marine & Industrial Supply, Inc.

How to order: 23 - 20 - 56

Pilot ladder synthetic step/spreader and rope, finished length

Pilot Ladder with Step Brace Type

SOLAS Approved

Escala de Práctico con Tirante (aprobado por SOLAS)
沿え駒付きパイロットラダー　帯塾塞領航梯（SOLAS）認可

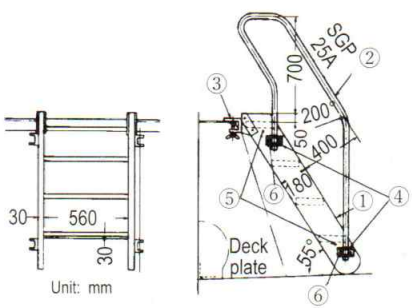
Fully comply with and exceed SOLAS Regulations and IMO Standards. These ladders are designed with new stainless steel clamping device tested to withstand loads up to 2,000

lbs (907.2 kilos). This new clamp will not slip or loosen with age. Manila rope and steps are fixed with hardwood step brace.

All steps are made from Ash hardwood, but the bottom 4 steps are furnished with in synthetic.

Pilot Ladder with all wood steps
Model No. PW

Pilot Ladder with bottom
4 - steps in synthetic
Model No. PWS



Specifications

1	Step	Ash hardwood 4.5" (115 mm) wide × 20.5" (520 mm) long × 1" (25 mm) thick.
2	Spreader	Ash hardwood 4.5" (115 mm) wide × 70" (1.8 m) long × 1" (25 mm) thick.
3	Step Brace	Ash hard wood
4	Clamp	Corrosion resistant stainless steel
5	Rope	Mildew-retardant manila 0.75" (19 mm) dia., 2.25" (65 mm) circ.
6	Lashing Ring & Thimble	Hot dipped galvanized lashing rings and thimble
7	Lanyard	10 ft. (3 mtr) lanyards with spliced in hot dipped galvanized ring and thimble for easy rope replacement
8	Lower 4 Steps	The 4 lower steps of pilot ladders are made with high impact Ultra-Poly synthetic 4.5" (115 mm) wide × 20.5" (520 mm) long × 1" (25 mm) thick with non-skid surface. Coloured safety orange.
9	Ties	High strength nylon-UV stabilized for longer life

Securing Suction Pads
for Accomodation Ladder "Blue Box"

Almohadillas de succión de agarre para la escala de práctico "Blue Box"
アコモデーションラダー固定用パッド　引航员软梯固定吸盘

Used to secure the bottom of the accommodation ladder to the ship's side and insures the accommodation ladder rests firmly against the ships side. (Requested by the amendments 2000 to the SOLAS regulation, Chapter V, Regulation 23 'Pilot Transfer Arrangement') The arrangement shall be provided to enable the pilot to embark and disembark safely on either side of the ship by an accommodation ladder in conjunction with the pilot ladder, or other equally safe and convenient means, whenever the distance from the surface of the water to the point of access to the ship is more than 9 meters.

Can be operated from free supplied deck air at 6 to 7 kgf/cm^2, and the unit is made from non ferrous material therefore is resistant to corrosion. Class ABS certified.

Specifications:

Pressure range: 25 to 102 p.s.i.

Consumption of compressed air: 26.4 Nl/min

Right angle holding force: About 3,200 N at 80& vacuum
Weight: 7 kg

23 20 91	Securing suction pad for accommodation ladder,'Blue Box'	Pc.

Name of Mfr.: PTR Holland Group

Securing Device

for Pilot Ladder

Almohadillas de succión deagarre para la escala de práctico
パイロットラダー固定装置　引航员软梯固定吸盘

Developed to make sure the pilot ladder is stabile for the pilot and can safely board and disembark from the ship. By using two vacuum generated spreaders can always secure the ladder firmly regardless the thickness of the paint on the ship, even if the surface is not smooth and has chipped paint. The required pressure range to this device is 1.4 – 4.0 bar, and has holding force at 715 kg.

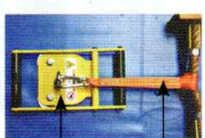
The device complies with the new SOLAS regulations 1045 (27), and Class Lloyd's certified.

23 20 92	Securing suction pad for ladder, SPT-928	Set

Name of Mfr.: PTR Holland Group

Holding Magnets

for Pilot Ladder



Imanes de sujeción para la escala de práctico
パイロットラダー固定用マグネット　引航员软梯固定磁铁

Specially developed to make life safer for sea harbor pilots by providing removable anchor points for the ladder on the ship's side. Designed to withstand aggressive marine environments, and powder-coating in safety yellow for high visibility. Resin encapsulation of magnetic elements makes the product seaworthy.

They are lightweight at around 3 kg, providing more than 800 kg of clamping force even through many layers of paint and salt scale and grime on a ship's hull. A derlin roller makes the hull magnet simple to attach and release. Class ABS certified.

The holding magnet is sold in piece, and tightening belt and storing wooden box are separate order.

Magnet　Tightening Belt

Storing Box

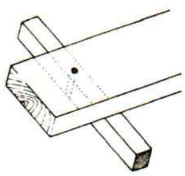
13. Scaffolds/Stages/Boatswain's Chairs

Prefabricated Steel Pipe Scaffolds

Andamio de Tubos de acero Prefabricado
組立パイプ足場（ローリングタワー）　组合式钢管架

A safe, movable, prefabricated scaffold made of galvanized high tensile steel pipe frames; easy to assemble and disassemble.



Each step set comprises 4 wheels attached with jacks for moving and adjusting the height of the feet for use on a rough surface. Each section is fitted with 2 steel step plates and safety rails. The floor is made of checkered steel plate. Dimensions are 1,500 x 1,800 mm.

Unit Per Set

CODE	Number of Nominal Steps	Height mm	Numbers of Main Frames

X-904-6	6 persons	102" × 102" × 36"	700 lbs
X-904-8	8 persons	102" × 102" × 36"	900 lbs

Name of Mfr. : Billy Pugh Co. Inc.

How to order: 23 - 21 - 66

Personnel Transfer Device, Model number., capacity etc.

15. Cargo Bags/Sling Belts

Cargo Sling Bags

Sacos de Carga con Eslingas　袋モッコ　吊货袋

Made of polyester, light weight, handy foldable cargo sling bag. Very useful for storage.

Size : 1 x 1.2 x 1.2 mtrs
Capacity : 1 ton

23 21 81	Cargo sling bag, polyester 1 × 1.2 × 1.2 Mtr	Pc.

Cargo Aluminium Bags

Bolsas de aluminio para mercancías
アルミシート製保冷バッグ　铝箔保冷袋

Made of aluminium sheet for heat insulation, keeping fresh/frozen provisions cool during transportation. Foldable, easy to set up with Velcro fastener.

Size: 1,080 x 970 x 1,350 mm

23 21 83	Cargo bag, aluminium 1,080 × 970 × 1,350 mm	Pc.

One Way Flexible Containers

Contenedor de Poliester Desechable
使い捨てフレキシブルコンテナー　一次性吊货袋

A one way type flexible container makes the transport, delivery, and loading of blasting sand, copper bits, or other bulk materials fast and easy. It reduces the costs and extra effort for loading bulk materials because the slings are loaded and then stay on deck until the material is used. Several types are available, but the most common types are shown below.

Unit Per Pc.

CODE	23 21 86	23 21 87
Type	Draw string with bottom release	Without bottom release
Material Cubic Volume Capacity Weight Capacity	Polypropylene/Polyester 1,000 - 2,000 Ltr 500 - 1,000 kg	

Belt Slings

Eslingas de correas　ベルトスリング　帯式吊索

Belt & endless types are available, and they weigh about one third the weight of a wire sling. The seamed part is so soft that it is easier to handle than other sling types.

Polyester Slings

Eslingas de Poliéster　ポリエステルスリング　涤纶吊索

Easy to handle by lighter and more flexible character of polyester.

Belt Type Sling

Specification

20. Fenders

Rope Netted Fenders

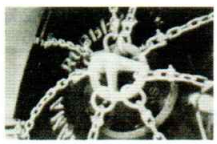
Ball Shape

Defensas de Cuerda ボールフェンダー 球形绳网防碰垫

Made with an interior filling of ground cork packed into strong gunny bags and netted on the outside, usually with polypropylene rope.

23 24 01	Rope Netted Ball Fender, 300 mm diam.	Pc.
02	Rope Netted Ball Fender, 360 mm diam.	"
03	Rope Netted Ball Fender, 450 mm diam.	"

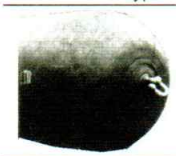
Pneumatic Rubber Fenders



Defensas de Goma (Neumática)
空気式防舷材 充气式橡胶护舷缓冲材料

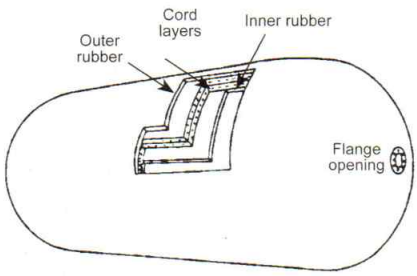
The characteristics of floating type pneumatic fenders are as follows.

1. Advantages
   a. Adaptable to change in the tidal level.
   b. Low and uniform surface pressure.
   c. Simple and low cost installation.
   d. Low maintenance cost.
2. Types
   a. Net Type



The net-type fender is covered by a chain net, wire net or fibre net for small size fenders.

Usually these nets have used tyres together with rubber sleeves for additional protection, except for the fibre net which has only rubber sleeves. Chain nets last longer against corrosion while wire nets are light and more easily repaired.



Chain Net Type (Heavy Duty Use)	Wire Net Type (Medium Duty Use)
	
Fibre Net Type (Light Duty Use)	
	

b. Sling Type

This type has eyelets built into the fender body for easy installation. Handling of the sling type is easy due to its light weight. Its maintenance is also easy.

Type		Appropriate Fender Size mm
	Sling Type	500ø × 1,000L to 2,500ø × 5,500L

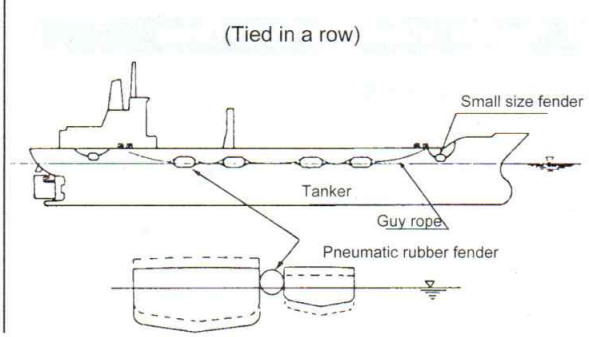
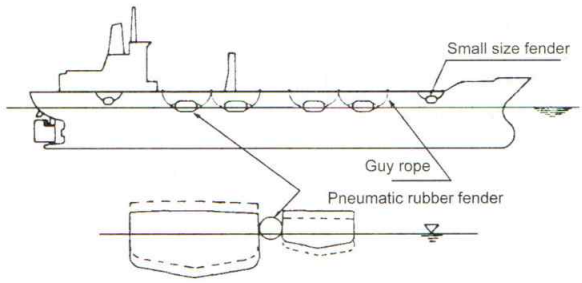
5. *Installation Methods*

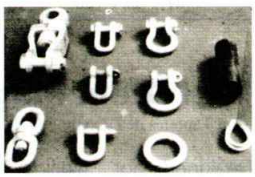


a. Jetty Quay and Dolphin Use

At both ends of the fender's chain or wire net, first fit the shackles, then the swivel joints and then further shackles should be installed. A guy chain or guy rope is secured to the outer shackle. The swivel joint prevents twisting of the guy.



b. Ship to Ship

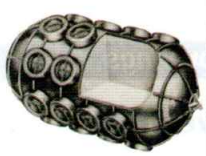


The following are examples of the installation method. Four pieces of large size fenders are usually floated as primary fenders to absorb impact energy at berthing. Two pieces of small-size fenders are hung high on the hull at both bow and quarter of the smaller ship to prevent contact during rolling due to swell. (Tied in a row)

(Fenders guyed individually)

6. Installation Equipment

The typical installation equipment and necessary parts for installations are shown below.



There are the various sizes of shackles, swivels, ring rubber sleeves, thimbles, etc. according to the applicable fender capacity.

How to order: 23 - 24 - 11

Foam Filled Rubber Fenders

Defensas de Goma
(Rellena de Espuma)
フォームラバー防舷材
泡沫填充式护舷缓冲材料

1. The characteristics of the fenders are

   a. Puncture-proof Construction

   There fenders are filled with a special micro-bubble foam that creates a 100 percent independent closed-cell structure which will not absorb water. The fact that they are puncture proof and offer superior elasticity, assures users of the excellent durability of these fenders even under extremely severe conditions.

   b. Long Life Performance

   With these fenders, there is no need to adjust the air pressure to allow for changes in atmospheric temperature. This feature makes them ideal for applications in which minimum maintenance is a priority. In addition, fitting to the quay is simple; once the fenders are secured with a wire rope or chain, they comprise a permanent and extremely durable protection system for all ships.

2. *Types*

a. Net Type

b. Hook Type

How to order: 23 - 24 - 16

Used Tyres

Neumáticos Usados 中古タイヤ 旧轮胎

Worn rubber tyre, suitable to use as a fender for tug boats, fishing boats, etc.

23 24 21	Used tyre, ruber, SIZE	Pc.

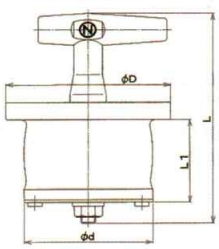
Used Bicycle Interior Tubes

Cámeras de bicicleta Usados 中古自転車チューブ 自行车旧内胎

Worn interior tube for bicycles, and normally used for binding over the leaked hole on the pipes or fittings as an emergency measure.

23 24 22	Used bicycle interior tube	Pc.

21. Scupper Plugs



Scupper Plugs

Llaves de Hundir Adrede 排水口栓 排水口拴

For sealing the scupper holes for spilled oil or polluted liquids. Easy to use, insert plug in the drain hole and tighten the handle until a slight resistance is felt, the rubber plug will be expanded and held firmly in place. Rubber parts are made of oil resistant rubber (CR). Seven types are available according to the pipe size. Specify the applicable drain pipe diameter when ordering, referring to the plug application list.

Mini Drain Plugs

Mini Tapones de Drenaje 排水プラグ 迷你排水塞

Designed for closing appliance for deck scupper holes. Rubber expansion mechanism, easy operation, non screw.

23 24 89	Mini Drain Plug, dia 32mm	Pc.

22. Deck Coverings

Deck Coverings

Tapas de Cubierta デッキカバー 甲板圆盖

Used to seal deck openings of tankers, barges, and cargo vessels. Simple and reliable cover which does not require the drilling of holes and the insertion of studs to install.

Made of bronze or stainless steel to eliminate sparking. Fits to any standard 318 mm deck opening and will fit to a deck thickness of up to 76 mm.
Unlike other deck covers, the quick action cover is perfectly flat. There are no protruding parts to trip over. Removed with a special speed wrench which provides security against theft and gives rapid action for opening and closing. Frequently used as tank ventilators in place of ventilator gratings.

CODE	Description	Unit
23 24 91	Deck cover, bronze, for 318 mm deck opening	Pc.

Deck Safety Protection Cover

Tapa de protección de seguridad de cubierta

安全用デッキカバー 甲板安全盖

A family of safety protection cover designed to prevents crew from falls and other injuries associated with open manholes on-board vessels and platforms. Specifically designed to allow ventilation and utilities to remain accessible while still covering the hole and protecting the crew. Max payload is 205 kg (450 lbs).

23. Oil Pollution Countermeasures

Overflow-Prevention Tanks

Tanques para Prevención de Derrame de Comnustible
燃料油排出防止タンク　防燃油溢流柜

This portable and fordable, fuel oil, overflow-prevention tank is made of transparent urethane film, processed by an all-double stitch method of high frequency welding. It is oil resistant, coldproof (–45°C), heatproof (70°C), long wearing, and airtight. Easily attached over an air release vent, this portable overflow catch performs most effectively in keeping the deck free from oil. A and B type available. When ordering, please specify the type and capacity of the tank.

Oil Absorbents

Absorbente de Petróleo　油吸着材　吸油纸

Made from specially treated polypropylene microfibers or polypropylene mixed with polyester, and ideal for emergency spill and daily clean-up of oils with no-sweeping or shoveling required. Less time is required to use and dispose of these materials. They are available in sheets, rolls booms and assorted sets in drum containers.

Oil Absorbents Eco-Friendly

Absorbentes de Aceite Ecológicos　エコタイプ油吸着材　环保吸油剂

Eco-friendly oil absorbents made from unused natural cotton fibers in the production cycle of cotton yarn. It is coated with water-repellent substance and selectively adsorbs oil in emergency spill or daily clean-up. Compared to synthetic fibre absorbents, it has low calorific value of incineration and causes less damage to the furnace, yet it is high strength, excellent cost performance and stable quality. Approved by MLIT and Eco Mark program by JPA.

Warning!

Always exercise extreme care when cleaning up flammable liquid spills. Activities such as walking, rubbing, and pumping can generate static electricity in products with high electrical resistance such as rubber hoses, plastic containers, tanks, etc. The Static Resistant Oil Sorbent will help reduce static charge build-up but will not provide you with a static free environment. Also exercise extreme care when handling, storing, or disposing of any absorbent material containing flammable liquids.

Oil Absorbent Pellets

Igneous Rock

Absorbente de Petróleo en Grano

油吸着材（粒状）　油吸附剂（粒状）

Made from glassy, igneous rock which is crushed into pellet sized fragments and heat treated. The pellets are extremely light weight and contain white sand like grains which have continuous pores which create strong oil absorbency through capillary action.

Types No. 1 and 2 absorb only oil whereas types 3 and 4 absorb oil and water. Pellets are not toxic or harmful to sealife.

Unit Per Bag

(to be continued)

Application	1. Treatment for spilled oil from a tanker accident, etc. 2. Treatment for floating oil from bilge, dirty ballast tank, tank cleaning, etc. 3. Treatment for oil from Petroleum Refinery, Petrochemical Plant, etc.	1. Treatment of oil pollution on the floor of the various plants and road surfaces. 2. Treatment of oil pollution on the road surface from tank lorry, train, cargo truck, etc. 3. Fire Extinguishing against Alkyl Alum Metallic Potassium, Metallic Sodium, etc.

Natural Fiber Oil Sorbents

Absorbente de Petróleo de Fibra Natural

天然繊維油吸着剤　天然纤维油吸附剂

An all natural oil sorbent made from natural wood fiber of recycled paper products. Comes in pellet and loose particulate form and can be used effectively on water as well as land as a substance which is light, easy to clean, and allows for a high oil recovery rate.

On water the sorbent instantly neutralizes the harmful effects of oil spills and forms islands for clean recovery with minimal residue and no sheen. Will absorb only the oil, not the water.

Oil can be recovered from the sorbent by squeezing it, or the materials can be burned and used as fuel in approved facilities.

CODE	Type	Weight Size	Unit
23 25 26	Loose Particle Solvent (Univeral Use)	20 lb	Bag
23 25 27	"	60 lb	Drum

Multi Purpose Absorbent

Absorbente Multiuso　多目的用吸着剤（粒状）
多功能吸收剂

The super multi-purpose absorbent instantly absorbs all kinds of liquids, of any viscosity, off any hard surface, leaving that surface clean and dry. This includes spills of oils, chemical products, solvents, paints, engine fuel, hydraulic oils, brake fluid, glycol, acids, bases, polymers, glue, herbicide, food (semi liquids), drinks and all bodily fluids (except for hydrofluoric acid). It has virtually unlimited uses as a dry absorbent that is safe in all applications.

Available for approx. 3 kg bag for 30 liters.

23 25 33	Multi Purpose Absorbent, 3 kg for 30 liters	Bag

Inflatable Oil Fences

Defensas Antiderrames
膨張式オイルフェンス
膨胀式油堵

Made to conform to the Marine Pollution Prevention Law. The fence is made of rubber lined, strong synthetic fibre cloth and it is resistant to wear from oil, seawater and all types of weather. The fencing is provided in 20 mtr lengths which can be connected together and extended with the use of fasteners and shackles.

Unit Per Lgh.

Oil Sample Cans

Latas para Muestra de Petróleo
オイルサンプル缶　油样品桶

Made of galvanized iron, 2 sizes available.

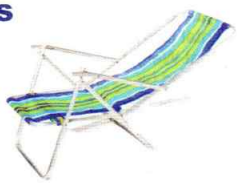
23 26 26	Oil sample can, 1 Ltr.	Pc.
27	Oil sample can, 4 Ltr.	"

27. Hand Cuffs

Hand Cuffs

Esposas　手錠　手铐

Made from stainless steel. Furnished with two sets of keys.



23 26 21	Hand cuffs, stainless steel	Pr.

28. Deck Chairs

Folding Deck Chairs

Pipe Frame

Sillas de Cubierta/Bastidor de Acero
ボンボンベッド　管架甲板折椅

The frame is made of stainless steel pipe with woven plastic tubing forming the seat. Can be folded into a sitting position or reclined back.

23 26 31	Deck chair, folding pipe frame	Pc.

Folding Deck Chairs

Wooden Frame

Sillas de Cubierta/Bastidor de Madera
デッキチェアー　木质架甲板折椅

A folding deck chair made with a wooden frame and a light canvas. It has an armrest that can be adjusted at three different settings. The inside width is 600 mm and the overall length is 1,250 mm.

23 26 32	Deck chair, folding wood frame	Pc.

Pipe Frame Folding Chairs

with Arm Rest

Sillas Plegables de Bastidor de Acero con Apoya-brazos
折畳椅子　管架式折椅（带扶手）

Seat and back are made of alum. pipe and coloured vinyl mesh strip. Folds compactly for storage.

23 26 33	Chair, folding, alum. pipe frame with arm rest	Pc.

29. Dunnage Bags/Plywood

Inflatable Dunnage Bags

Bolsas Inflables para Protección de Cargas
膨張式袋緩衝材　膨胀式缓冲袋

Reusable dunnage bag made from strong plastic film combined with several layers of hard-wearing, water-resistant paper. It can withstand pressure loads up to 15 - 20 tons and temperatures from 20°C to 65°C.

This dunnage bag gives the best protection imaginable from transport damage, absorbing harmful shocks time after time without loosing its shape. Suitable for protecting drums, boxes, palletized goods, tins, bottles, large machinery or machinery parts, large pipes and special cargoes, etc.
Simply insert the dunnage bag in any space between items loaded in cargo and inflate it. This dunnage bag will prevent the cargo from moving during transport and will protect items from any shock occurring from contact with other packages.

Paper Wiping Rags

Papel Limpiamanos 紙ウエス 清洁用纸

A disposable paper rag designed for use in place of cotton rags.

Unit Per C/S

CODE	Size mm	Contents
23 29 11	450 × 290	4,000 shts/case
12	380 × 380	100 shts × 15 box/case

Roll Paper Wiping Rags

Papel Limpiamanos Bobinas 紙ウエスロール型 清洁用卷筒纸

A sanitary paper wiping rag supplied in rolls for a variety of uses. There are many types available but the most common types have been selected and described below with respective specifications. The roller stands and dispensers are sold separately.

A-Tork
Designed for a wide variety of heavy duty wiping applications. A-Tork is a simpler, more efficient and more hygienic material than rags or cotton waste.

E-Tork
Specially developed to replace rags and cloths. E-Tork is for more detailed work such as the polishing of enamel paint or the cleaning of precision engineering parts. E-Tork is chemically pure and features an absorption rate as much as 4 times greater than cotton materials.

M-Tork & Mini Tork
Intended principally as a towel wipe. This single ply material can be utilized for many other lightweight purposes such as cleaning kitchen counters, bathroom fixtures or first aid rooms. Has the same quality paper as the A-Tork type.

Unit Per Box

CODE	Type	Paper Size	Ply	Rolls/Box
23 29 21	A-Tork	290 mm × 240 mtr	2	4 rolls
22	E-Tork	320 mm × 230 mtr	2	2 "
23	M-Tork	250 mm × 275 mtr	1	6 "
24	Mini-Tork	220 mm × 120 mtr	1	12 "

Name of Mfr.: SCA Hygiene Paper AB

Roll Paper Dispensers
Porta-rollo Papel Limpiamanos
ロールペーパーディスペンサー　巻筒清洁纸支架（地板式支架）

Designed for use with the rolled paper rags mentioned above. Paper rags and rolls are sold separately.

Unit Per Pc.

CODE	Type	Size mm	Applicatiion

Sludge Bags
Bolsa para el Lodo　スラッジ処理用袋　污泥袋

A thick Polypropylene bag for sludge disposal. Strengthened with inner Polyethylene bag to protect against leakage, and attached with string for binding the opening.

Size: width 600 mm x length 1,000 mm.

23 29 40	Sludge bag, polypropylene with inner, size 600 × 1,000 mm	Pc.

Used Gunny Bags
Sacos Usados de Yute
中古麻袋　旧麻布袋

A coarse jute bag for use as a wiping rag, as dunnage, or as a trash disposal or container for sawdust, sand, or pellets. Size approx. 580 - 710 x 1,000 - 1,010 mm weighing approx. 0.8 - 1 kg. Sold by individual pieces.

23 29 41	Gunny bag, used	Pc.

33. Used Drums/Used Cement Bags

Used Drums
Bibones de Segunda Mano　中古ドラム　旧油桶

A 200 ltr used drum which is cleaned for general purpose use. Available in cap type and open lid type.

23 29 42	Drum, used, 200 Ltr, cap type	Pc.
23 29 43	Drum, used, 200 Ltr, open lid type	Pc.

Used Cement Bags
Bolsas de Cemento, Usadas　中古セメント袋　旧水泥袋

Worn empty paper bag.

23 29 44	Used cement bag, empty	Pc.

34. Sand/Cement/Blasting Sand

Sand
Arena　砂　黄沙

Used for scrubbing wood decks, extinguishing fires, and in mixing cement. Packed in a strong plastic bag containing approx. 25 kg.

23 29 50	Sand, fine 25 kg	Bag

Portland Cement
Cemento Portland　セメント　普通水泥

Used chiefly as a coating for tanks, bilges, etc. Supplied 25 kg or 40 kg per package in a durable paper bag.

Garnet Blasting Grit
Abrasivo de soplado de granate
ブラスト用ガーネット　石榴石喷砂磨料

Garnet Abrasive is derived from mined Almandine and Andradite mineral deposits, and most commonly used as a high-performance blast media, for the cleaning of metal and

fibreglass structures. As an inert, non-toxic, natural mineral, it is also used on sites where water contamination is a concern. Various grain sizes are available. Packed in quantity of 25 kg in strong paper bags or metric ton.

Blasting Copper Grit

Gramalla de Cobre
サンドブラスト用 S.P. グリッド
喷砂用铜砂

Made from slag, a byproduct from a copper smelting refinery. Copper grit is less expensive than steel grit and works as effectively because the grits have pointed edges and contain over 30 % iron. Can be collected and reused. The size of the grit is 0.5 - 4.5 mm in mesh and it is packaged in quantities of 30 kg in durable paper bags. Sold by metric ton.

35. Separation Nets/Covering Sheets

Cargo Separation Nets

Red de Separación de Carga
カーゴセパレーションネット 隔货网

Made of synthetic fibre mesh for cargo separation. Several kinds of net sizes and colours are available. The most common size is 5 x 6 mtrs. Please specify the quantity and colour required when ordering.

23 29 81	Cargo separation net 5 × 6 mtrs coloured	Pc.

Burlap

Arpillera バーラップ 粗麻布

A course jute cloth used on board a ship chiefly as a protective cover for items on deck or exposed cargo. The size of a bundle is approx. W 115 cm x L 100 mtrs. Weighs 300 grams per square meter.

Unit Per Mtr.

CODE	Width cm	Gauge	Weight Per Sq/Mtrs. grm
23 29 87	115	No. 6	300

Biodegradable Stretch Films Eco-friendly

Film estirable biodegradable Ecológico
生分解性ストレッチフィルム
生物降解拉伸膜 生态友好型

Designed for eco-friendly alternative to traditional plastic stretch films for wrapping the goods. Made from biodegradable material that decomposes naturally over time, capable of breaking down into non-toxic elements and contributing to reduce environmental impact.

Available in 500 mm width x 160 mtr length.

23 29 91	Stretch film biodegradable, W: 500 mm x 160 mtr, 2.2 kg/roll	Rls.

Squared Polyethylene Sheets

Placa de Polietileno Cuadrada ブルーシート 平面聚酯合成板

Ready made square polyethylene sheet suitable for use protecting equipment on deck, covering rope coils which are exposed to sunlight or seawater, and covering interior floors,

etc. during painting or while in dock. All sheetings have holes enforced with grommets for tying the sheets down or connecting sheets together. Blue coloured sheet will be supplied unless specified otherwise.

Marine Paint

Pintura Marina　船用ペイント　船用油漆

A wide range of products from different manufacturers are available. Some points to pay attention to in the painting process are described as follows.

1) Method of surface preparation

If the pretreatment of steel is insufficient, it is not possible to expect satisfactory results in the paint application. The main surface preparation methods are listed below as a reference.

Blast Cleaning

Sand blast	Shot blast	Vacuum blast
Mill scales, rust and harmful substances can be completely removed.		
Surface with complicated configurations can also be treated.	Efficient treatment can be performed.	Scattering of dust is limited.

Power Tool Cleaning

Disc sander	Power brush	Tube cleaner
Rust removing and cleaning can be efficient performed with relatively little effort.		

Hand Tool Cleaning

Scraper	Hammer
Handling is very simple and easy.	

Chemical Cleaning

Picking
Mill scales and rust can be completely removed. Picking is suitable for treatment of complicated configurations.

2) Primary surface preparation

1. Mill scales, rust and other foreign matters are to be removed to the grade of near white by blast cleaning.
2. After the blast cleaning, all blast abrasives and dust on the steel surfaces must be completely removed.
3. The surfaces will return to rust within a short time. Therefore it is necessary to apply a shop primer immediately.

3) Shop primer

Rust will return to the surfaces within a short time so it is necessary to apply a shop primer immediately.

4) Secondary surface preparation

Secondary surface preparation should be performed before painting because the surface of steel plates that have been coated with shop primer will be damaged by fusion cutting, welding, distortion and exposure to corrosive atmospheres.

5) Storage stability

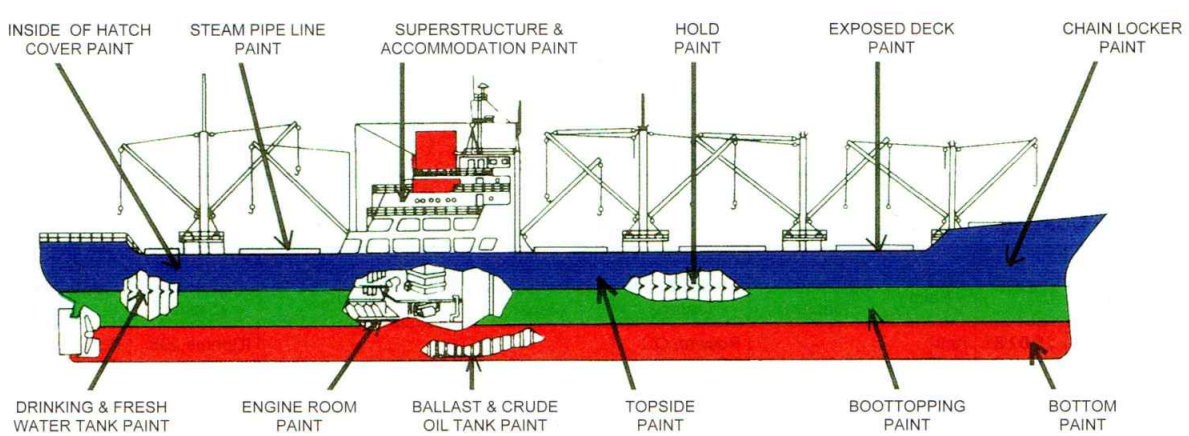
When paints are stored outdoors, they will deteriorate in a shorter period. It is therefore recommended to store paints indoors in a cool place.

6) Painting with an airless sprayer

When paint is being applied by an airless sprayer, it is necessary to select suitable painting equipment. The following table provides a guide in the selection of airless sprayers.

Guide Table for the selection of Airless Paint Sprayers

Pressure Ratio	23:1	30:1	45:1
Max. Pressure of Nozzle	160 kgf/cm^2	210 kgf/cm^2	300 kgf/cm^2
Max. Pressure of Air Supply	7 kgf/cm^2	7 kgf/cm^2	6.6 kgf/cm^2
Max. Discharge Quality	1.9 ltr/min	11.4 ltr/min	12.6 ltr/min
Application	General finish coating, anti-corrosive paint, etc.	Chlorinated rubber paint, epoxy resin paint, etc.	Epoxy resin paint, tar epoxy resin paint, high viscosity type paint, etc.



7) Atmospheres in which it is not suitable to paint

1. When the atmospheric pressure is less than 5°C.
2. When there is high humidity.
3. When there is a possibility of bubbling because the surface is scorched by the sun.
4. When there is a possibility that moisture, sand, dust, or other foreign matter will adhere to the paint while it is still wet.

8) Ventilation

It is required that the space being painted is properly ventilated to avoid the possible risk of ignition of paint or gasoline fumes and explosion.

Marine Paint Coating Chart

Marine Paint Comparison Table

The following tables show a comparison of paints from major paint manufacturers of the world. Listed here are typical standard examples. Some may differ depending on the trading condition, expected life, etc. Please consult with the paint manufacturer before making your final decision. Please specify the following points when ordering.

For example

1. Representative code : 25 02 81
2. Where to be applied : Boottop coating
3. Type of system : Alkyd
4. Kind of paint : Anti-corrosive
5. Manufacturer's name : _____
6. Brand name : _____
7. Colour : _____
8. Quantity : _____ltr

Latest Fouling Control Coatings

Últimos recubrimientos antiincrustantes
最新防污塗料　最新污垢控制涂料

Intersleek 1100SR

Specifically designed to tackle the problem of slime on vessel performance, this innovation in the Intersleek range delivers outstanding micro and macro fouling control with better static resistance.

The new patented fluoropolymer in Intersleek®1100SR has been developed by enhancing the slime resistant polymer groups used in earlier generations of Intersleek®.
The tailored surface chemistry of this new technology specifically influences and resists the adhesion and settlement of organisms that make up slime colonisation.

Intersleek® is biocide-free, which results in no leaching of biocides into the sea. This offers cost advantages at the next drydocking on waste treatment and disposal, plus enhanced environmental profile. Intersleek also has higher volume solids and lower required film thickness than SPC systems. Only a single full coat is required every five years through a vessels lifetime, therefore paint consumption is significantly reduced – further enhancing your environmental profile.

Intercept 8500LPP

A high performance, low friction, linear polishing polymer (LPP) antifouling incorporating unique patented Lubyon® and silyl methacrylate technology.

This combination of polymer technologies, based upon years of experience and development, provides the basis for this performance improvement over existing products and, as a result, Intercept 8500 LPP gives the highest performance of all our biocidal antifoulings. The Lubyon polymer brings its unique Linear Polishing Polymer properties which ensure that the faster polishing rate is controlled in a consistent manner throughout the in-service period of up to 90 months.

Unlike typical silyl and metal acrylate biocidal antifoulings, Intercept® products replicate the linear polishing behaviour of previous tributyltin based antifoulings. Typical silyl acrylate based products polish slowly initially, thereafter the rate of polishing steadily increases. Whereas typical metal acrylate systems polish fast initially before reaching a steady state.

Interfine 878

A patented high performance, high volume solids content acrylic polysiloxane cosmetic finish providing excellent long term durability. Interfine 878 significantly improves upon the gloss and colour retention exhibited by typical polyurethane finishes.

Intershield 163 Inerta 160

Intershield 163 Inerta 160 is a proven, high performance abrasion resistant coating especially designed for ice going vessels.

Key system features include:

- Smooth surface assists ice slip
- Resists ice adhesion to the coatings surface
- Low frictional resistance controls fuel costs and improves operating efficiency
- Abrasion resistant - controls mechanical damage and hull roughness, saving on future maintenance and repair costs
- Up to 2.5 times the impact and erosion resistance of standard epoxies
- Designed for operation in temperatures down to -50°C (-58°F)

Interbond 808

Designed primarily for WBTs for use on-board by riding squads or ship's crews, Interbond 808 is a light coloured, two pack epoxy particularly suited to repair at sea as it is both surface and damp tolerant.

Intershield 300

A light coloured, abrasion resistant, aluminium pure epoxy coating giving excellent long term anticorrosive protection for cargo holds, WBT and all outside shell and low temperature application capability.

Intershield 803Plus

An ultra high performance two pack abrasion resistant epoxy coating. Provides excellent protection against cargo abrasion and impact shooting damage caused by high speed belt conveyors, minimising mechanical damage and subsequent corrosion.

Non-Slip Coatings

for Floors, Ramps & Stairs

Revestimienos Anti-deslizantes para Suelos, Rampas y Escaleras
すべり防止塗料　地板、斜面及楼梯的防滑涂料

Designed for application in slippery areas to make them safer for operation of personnel and rolling equipment. A heavy-duty safety coating that has excellent adhesion to metal, concrete and wood surfaces.

25 16 11	Non-lip coating, 1 gal. (3.8 ltr)	Can
12	Non-lip coating, 5 gal. (18.9 ltr)	"

Monolar Mastics

Masilla monolar　保冷用マスティック　隔热树脂

A tough, flexible, fire resistant finish for protection of thermal insulation. It is also used as a vapor barrier coating for fittings. Its vapor barrier properties and unusual film strength permit its use as one coat protective coating. It is excellent for indoor or outdoor use where chemical resistance and durability are required.

Unit Per Can

CODE	**25 16 17**

StopStand Slip Protection Coating

Revestimiento de protección antideslizante StopStand
スリップ防止塗料
防滑涂料

StopStand increases the safety in slippery areas. Especially on the deck or at stairs in engine rooms a good foothold is essential for the safety. StopStand guarantees highest safety standards. The highly non-slippery coating can be easily applied on the spot.

Product Benefits:

Increases the safety in slippery areas.
3-compound-coating including all components.
Easiest application through a notched trowel.

Anticorrosive ZAP Paste

Pasta ZAP anticorrosiva　防食 ZAP ペースト　ZAP 防腐漆

An anticorrosive compound mixed weather-proof Butyl Rubber bonding material and a high purity zinc powder retained electrical conductivity. Suitable for steel surface protection of pipes, fittings, stairs, etc. It doesn't need to add any primer or solvent, and you can paint as soon as you finished surface preparation. It doesn't contain harmful toluene. Suitable temperature below 60 degree centigrade. The expecting durability is designed for 20 years after spreading.

Unit Per Pc.

Anti-corrosion Zinc-Aluminium Paint DRALL

Pintura anticorrosiva zinc-aluminio
常乾型高濃度亜鉛末防食塗料
常温干燥高浓度锌粉防腐涂料

Made from zinc and aluminium flakes which realized superior anti-corrosion performance with only 30 μm film thickness for once coating. Besides the sacrificial anti-corrosion effects of zinc, aluminium also suppresses the oxidation of zinc through chemical reaction and forms stable film. Because it is single liquid type and has little metallic precipitate, it is easy to stir the liquid at the beginning of operation. Moreover, its low viscosity ensures easy coating.

Usage

* The touchup of products (bolt, nut) [Repair flaw after the treatment of anti-corrosion thin film DISGO and LAFRE].
* The repair of the rusted parts.
* The anti-corrosion treatment of the section and welding parts.
* The repair of the galvanized steel sheet section.
* The repair of leakage and rusted parts after hot dip galvanizing.

Painting area: 4 – 5 m²/kg (including 20% loss)

Unit Per Can

CODE	Product	Content	Description
25 21 01 02	Brushable Zinc Coating	375 ml 750 ml	Excellent solution for touch up and corrosion protection of galvanized parts. Colour: approaching hot galvanizing. (Specific weight: 1.25 g/cm³)
25 21 03 04	Brushable Zinc Paint	375 ml 750 ml	Brushable liquid zinc paint assures durable and ideal corrosion protection for all metal surfaces. (Specific weight: 1.90 g/cm³)
25 21 05 06	Stainless Steel Paint	375 ml 750 ml	Stainless steel paint is a corrosion- and weathering-resistant surface coating based on metal pigments.
25 21 07 08	Aluminium Paint	375 ml 750 ml	Aluminium Paint is made on the basis of metal pigments and offers a high-quality and abrasion-resistant corrosion protection for all metal surfaces.
25 21 09 10 11	Corro-Protection	5 ltr 10 ltr 30 ltr	Forms a dry wax-like protective film which provides lasting protection of metal tools and precision parts for indoor storing and overseas shipment. TÜV approved.

Name of Mfr.: Weicon GmbH & Co. KG

Ferryl Coatings

Capa anticorrosiva Ferryl
フェリルコーティング
防锈保护涂料

One-component coatings with superior elasticity when dry, providing long-term anticorrosive protection without cracking. Also known as "plastics" because of the plastic-like coating that is created.

Unit Per Drm/Tin

CODE	Product No./Unit	Application
45 04 11	Ferryl 400R Anticorrosive White Coating 12 kg/drum	One-component product applied like paint. Flexible, non-cracking plastic-like coating. Used on non-rotating wires, standing rigging, rubber insulated electrical cables and (hydraulic) hoses.
45 04 12	Ferryl 401 Anticorrosive Transparent Coating 1 kg/tin	One-component product applied like paint. Flexible, non-cracking, plastic-like coating. For preservation of metals' original colour (steel, brass, bronze, copper). Also used as a wood varnish.
45 04 13	Ferryl 404 Dilution & Cleaning Liquid 10 ltr/drum	Solvent for cleaning and dilution of the Ferryl coatings. Used as a general thinner.
45 04 17	Ferryl 502 Anticorrosive Fluorescent Coating 1 kg/tin	One-component product applied like paint. Fluorescent orange-red colour. Flexible, non-cracking, plastic-like coating. Used for safety applications. (life-saving equipment, warnings, bridge, low beams / steps).
45 04 15	Ferryl 505 Anticorrosive Fluorescent Coating 1 kg/tin	One-component product applied like paint. Fluorescent yellow colour. Flexible, non-cracking, plastic-like coating. Used for high visibility marking applications (stairs, walkways, zone markings).

Name of Mfr.: Ferryl Sales Limited.

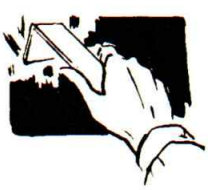
Rust Converting Latex Primer

Imprimación de Látex Anti-corrosivo
サビ転換型防錆塗料　溶锈型乳胶底漆

A water based chemical rust converter which converts the rust to magnetite, creating a non rusting metallic barrier layer on the steel.

Requires less preparation time and cost as it is not necessary to remove the rust completely before application.

25 99 06	Rust converting latex primer Corroseal 5 gal/can	Can

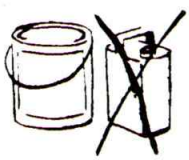


Name of Mfr. : Corroseal Inc.

General Painting Instruction

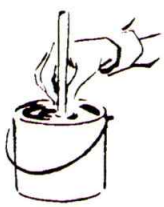
to Ship's Crew

Instrucciones generales de pintura　一般的塗装指導　一般绘画指导



Surface preparation

It is vitally important to prepare all surfaces sufficiently before painting, paying particular attention to ferrous metals. Rust and millscale must be removed by efficient scraping or vigorous wire brushing. When recoating over old paint, the surface must be free from soil, grease oil, and salt water deposits.



In the case there are salt water deposits on the surface, they are most easily removed by washing with water and common soda and then washing the surface clean again with fresh water and allowing the surface to dry completely.
Without these simple precautions the paint will not adhere well and will result in peeling and the need for subsequent recoatings.

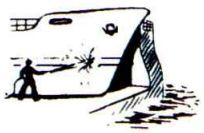
Selecting the right paint specification or process

Care must be taken to ensure that the correct painting process is adopted. For example, it would be fatal to apply a slow drying oil base and heavily pigmented primer with the intention of finishing with a modern synthetic product, surface tension would quickly encourage film cracks and peeling. Therefore, always keep to the same system following carefully the manufacturer's recommendation.

Stir the paint well before use

Even today, with all the advantages of science and technology, a large number of paint failures are occasioned by not stirring the paint before use. Good pigment dispersion prevents heavy deposits sinking and lying on the bottom of the can or drum, but the medium and the pigment will, to some extent, settle out without severe sinkage: this encourages users to apply the paint without careful stirring. Technical failures experienced by not allowing adequate stirring are inconsistent gloss for enamels, poor coverage performance or early film failure.

Give the surface the right pre-treatment to re-painting



Prior to re-painting, all old loose paint should be scraped off. Rust dots, if any, should be removed with a steel brush. Rust-scraping must be done to the point where the paint has good adhesion to the iron. Make sure that no rust has penetrated down under the old paint. Also make sure that there are no cracks in the old paint. Should there be any, they must be scraped and brushed down to the iron. Undamaged areas of the old paint need not be removed, but the old film should be washed with a common soda solution, and then rinsed according to the directions in surface preparation.

Adapt the priming to the finish required

Always bear in mind that the glossier the surface, the more important it is to ensure the proper preparation of that surface; for the least unevenness will be magnified on a high gloss surface.

Ships bottom (underwater area)

After the careful removal of marine life from the heel by scraping and rinsing, be sure to remove all millscale and rust pitted areas. It may be necessary to chip and scrape all corroded parts to get a clean painting surface. Be sure to let the surface dry thoroughly before any coating is applied.
In spots where rust is exposed during the preparation, it is important to "coat in" these areas with an anti corrosive composition, followed by the application of one or more coats of anti fouling to a grade suitable for the ships service life.

The belt

Special attention must be paid to this vital area of the vessel, which is normally contaminated with oil and grease from continuous harbour polution. It is most important to clean this area off, using a suitable cleaning agent or detergent. The preparation as suggested in the foregoing paragraph should be followed through.

Topside and superstructure

When dealing with the maintenance of the Topside and Superstructure, it is most essential to remove salt water deposits and to comply very carefully to the instructions as laid down in the points illustrated in our General Painting Instructions for the Guidance of Ships' Crew.

Decks

After carefully preparing steel decks and following the principles laid down in the General Painting Instructions, it is important to apply a good rust preventive primer prior to the application of the Deck Paint.

Main engines and machinery

Where re-painting is to be considered, special attention must be paid to adequately cleaning the surface and making it free from oil and grease deposits before re-coating is attempted.

Airless Spray System

Sistema de Pintado a Pistola

エアーレス・スプレー・システム　真空噴塗設備

Airless spray systems operate using high pressure to apply paint by forcing it through a specially shaped nozzle into a confined spray which cleanly and fully covers the painting surface. The pressure is provided by a pump which draws the paint up through the hose to the airless spray gun.

Airless spray machines are 4 times faster and 35 - 55 % more efficient than air spray machines with less paint loss through overspray. Airless systems can also handle thicker based paints and applicators easier and with better results than air spray or conventional methods.

Safe Operation of Airless Equipment

Airless spray equipment generates very high fluid pressure. To reduce the risk of fluid injection injury, burns from fire or explosion, or splashing of fluid on the skin or in the eyes, the following precautions must be followed.

1. Always read and follow all safety warnings in the instruction manual.
2. Always follow all recommendations regarding the use of protective clothing, eyewear and equipment.
3. Never exceed the maximum working pressure of any component in your system.
4. High velocity fluid moving through sprayers and hoses generates static electricity. Ground all equipment and objects being sprayed.
5. Make certain that the fluids you are pumping are compatible with the wetted parts of all components in your system. Do not use 1, 1, 1 - trichloroethane, methylene chloride, or other halogenated hydrocarbons with the sprayers and accessories. Such use could result in a serious chemical reaction which could cause serious injury and property damage.
6. Spray solvent - based fluids only in well ventilated areas, to exhaust the solvent vapors.
7. To reduce the risk of serious bodily injury from high pressure fluid, keep your fingers and hands away from the gun nozzle. Do not alter the tip guard or remove the trigger guard. Always relieve pressure and engage the trigger safety lock when you stop spraying.

Airless Paint Sprayers

Air-powered Type

Pintado a Pistola/Tipo: Neumática

エアーレスペイント塗装機エアー駆動式　气动无气喷漆器

Many types of sprayers are available for various jobs. The most common products for marine use are described below with their respective specifications.

Sprayers with much tougher fittings including specially treated, chromed stainless steel rods and cylinders which withstand wear and operate over a longer span or time when pumping highly abrasive or corrosive materials.

KING®

The Graco King units are designed to withstand the harshest environmental conditions and easily handle the toughest protective coatings and corrosion control applications. The King simply rules in all conditions.

- Outperforms and outlast traditional airless sprayers.
- Low repair and spares costs.
- Simple Maintenance - with removable valve cover and easy

access to poppet valves.

- Reduced Icing Potential - up to 70% reduction with thermally isolated poppets.
- Less Pulsation - smoother changeover and no pressure drops.
- Improved Sealing and Strength - with enhanced edge loading and seven throat packings instead of five.
- Multi-Gun Capabilities - with more powerful and efficient changeovers, the ability to spray with up to six guns is now a reality.
- Intrinsically safe for use in EX environments. Conforms to Directives ATEX 94/9/EC, Ex II 2 G c 230°C, Ex II 2 G c T6.

How to order: CODE

Sprayer, airless, heavy-duty cart type, King, complete package that includes XTR airless gun, 15 m x 3/8" hose and 1.8 m x 1/4" whip hose.

KING XL

Ideal for use in a high-output environment. Run up to six guns with virtually no pulsation or pattern fluctuation.

- The high output, high efficiency 10,000 cc XL Air Motor allows multiple guns with almost no perceivable pulsation.
- Reduced amount of total cycles results in less wear and tear on pump components, less downtime and maintenance expense.
- Elimination of non-restartable icing stalls for more uptime.

Airless Spray Guns

XTR

Pistola rociadora neumática

エアーレススプレーガン　空气喷枪

A rugged design to handle the toughest protective coatings. Built for extreme conditions. A compact design allows for easy maneuverability. Trigger is designed for four fingers.

XTR-5:
Maximum fluid pressure of 345 bar, 34.5 MPa (5,000 psi)
XTR-7:
Maximum fluid pressure of 500 bar, 50 MPa (7,250 psi)

Tips: 519 XHD RAC

Orifice Size : 0.019"
Flow Width : 10" – 12" (254 mm – 305 mm)
Flow Rate : 0.38 gpm (1.47 lpm)

Airless Paint Spray Roller

Jet Roller

Rodillo rociador de pintura sin aire
エアーレスペイントスプレーローラー
无气涂料喷涂辊

The JetRoller combines rolling and spraying into one action, saving time and labor on spray/back roll projects. This consists of a spray roller, a spray extension and a hand roller in one complete kit. Lightweight and portable, it fits existing airless sprayers and is the ideal time-saving addition to your painting arsenal. Ideal for rough or porous surfaces.

Unit Per Pc.

Improve spraying productivity and reduce downtime with the HD RAC switch tip. Saves time – no screwdriver required. Change tip sizes in seconds – without removing the tip guard housing. Locking tab ensures tip stays securely in guard.

RAC X tips

Choose the RAC X tips for Airless applications up to 350 bar.
* FFA tip (green) for Fine Finish applications.
* PAA tip (blue) for all Professional Airless Applications.
* HDA tip (brown) for Heavy Duty Airless applications.

XHD

For heavy-duty applications up to 500 bar (50.0 MPa, 7,250 psi). Recommended for Xtreme® sprayers and XTR™ airless spray guns.

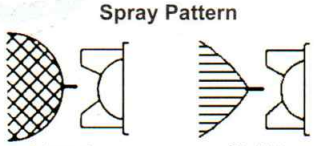
Spray Guns

Pistolas Rociadora de Pintura
スプレーガン　噴涂枪



There are many types of spray guns available and the spray gun required for a certain job is usually selected based upon the following specifications.

1. Material size to be sprayed
2. Quantity to be sprayed
3. Quality of finish
4. Paint viscosity

A wide variety of models from different manufacturers are available but the most common models are listed below.

Spray Pattern

Intersect　　Straight

Air Spray Guns

AirPro

Pistolas Neumáticas
エアースプレーガン　空气喷枪

Advanced spraying technology for automotive, metal, wood, waterborne, high wear and adhesive applications. This air spray gun delivers exceptional spraying performance while addressing your environmental and operator concerns. Cutting edge air cap and nozzle design optimize spray performance. Wide range of gun models to meet the needs of your specific application. Light weight design, low trigger force and ergonomic handle provide maximum operator comfort. Fewer parts means less maintenance and downtime. Air flow and consumption are tested to meet environmental compliance.

Slotted V-Gard Safety Helmets

with Staz-On Key Push Suspension

Casco de Seguridad para Protección Vertical con Banda de Suspensión

スライド式サスペンション付きガードヘルメット　V-GARD 型安全帽

Made of polyethylene shell with suspension system working together as a protection system. MSA V-Gard caps meet or exceed all applicable requirements for a Type I (top impact) helmet as outlined in ANSI Z89.1-2014, Class E, and as outlined in CSA Z94.1-2005, Class E with 1-Touch® and Fas-Trac suspensions. For European versions, Push Key suspension fulfills EN 397:1995. MSA V-Gard caps are not specifically designed to protect against lateral blows from the front, side, or rear.

Available in three sizes for cap : small (6-7 1/8), standard (6 1/2-8), and large (7–8 1/2), Hat : medium (6 1/2–8") only and in a wide choice of colours in order to satisfy your requirements.

Reduced Peak Safety Helmets Linesman

Casco de Seguridad con Visera Pequeña
小ひさし型安全ヘルメット　尖顶減厭型安全帽

High safety with low weight. Reassuring strength with feel-good comfort. Manufactured from high quality, strong ABS (Acrylonitrile-Buradiene-Styrene) material, the concept is 20% lighter than most other helmets. Unique design, provides an extended nape, ensuring increased neck protection. Dry-Tech sweatband for maximum comfort, for extended periods of use. It satisfies all the electric insulation requirements of EN397 and ANSI Z 89 class E. It comes complete with a high security head harness, quick release chinstrap, comfortable terylene cradle and sweatband. Standard size is 51-63 cm. Compliant with EN397–30°C (Low temperature), 440V A.C. (Electric resistance). Available also with wheel ratchet option.

Helmet Option: Reduced Peak Ratchet Non-Vented Weight 364 grm

Safety Helmets

V-Gard 900 series

Integrated Over-spectacle/Visor

Cascos de seguridad integrados con gafas/visera
ゴーグル / バイザー付きヘルメット　帯护目镜 / 面罩的头盔

V-Gard® 900 helmet range features a dynamic design and a premium shell for maximized strength. Various customization options (shell colors, stickers, badge holder, full color printing, etc.), ease of use and best in class comfort with Fas-Trac III suspension will optimize wearer acceptance.

The shell is made of ABS (Acrylonitrile Butadiene Styrene) and meet or exceed all applicable standard requirements in EN397, including optional requirements of very low temperature (-30°C), LD (Lateral Deformation), MM (Molten Metal), 440 VAC & EN 50365 1,000 VAC (non-vented version only for V-Gard 930), EN 134631-1, use in explosive atmosphere ATEX (zone 1, 2, 20, 21 and 22).

Size : 52 ... 64 cm.
Weight : V-Gard 930 is 495 grams, V-Gard 950 is 635 grams.

V-Gard 930 – Integrated over-spectacle with red micro-prismatic retro-reflective stickers

- Vented and non-vented shell in 6 different colors.
- Balanced, low profile with premium eye protection for Construction, Utilities, Shipping & OGPC.
- Premium anti-fog over-spectacle fits over all corrective glasses.
- Intelligent adjustment and innovative rubber seal to ensure gap free eye protection on the face.
- Grip area with rail system for quick and easy lens stowing.

Ventilated Safety Helmets

Cascos de seguridad ventilados
通気式安全ヘルメット　通气型安全帽

Six-point, webbed suspension system conforms to wearer's head for maximum comfort, safety, and stability; chinstrap designed to reduce risk of helmet loss during fall (strength greater than 50 daN); includes foam inserts in two thicknesses for custom fit. Sliding vent covers allow for adjustments to air circulation inside helmet. Slots, clips, and inserts for mounting ear and face protection and headlamps. Weight: 455 g. Circumference: minimum – 53 cm, maximum – 63 cm.

Certifications: CE EN 12492, UIAA, ANSI Z89.1-2009, Type I Class C.

Complies with EN 397 and EN 12492 for protection against impact and EN 397 for protection against lateral deformation and for wear in cold temperatures.

Bump Cap

Tapa abombada
衝撃緩和機能性キャップ
减震功能帽

Designed to protect your head from minor impacts and bumps. The inner shell or cushioning materials inside of the cap absorbs and disperses of the force of impact. Suitable for working with lower-ceiling or small spaces, or other similar work conditions.

31 03 52	Bump cap with adjustable back strap, size 54 - 62 cm	Pc.

V-Gard Headgear and Accessories

V-Gard Headgear y accesorios
V ガードヘッドギアー＆付属品類　V-Gard 的头饰和配件

V-Gard Headgear is a brow guard that in combination with the wide range of V-Gard Visors offers a lightweight, comprehensive face protection system. Featuring a durable and stylish HDPE frame and the choice of over 20 visors it is ideal for many applications. With the unique 3-point visor load system visors are fitted or removed easily and quickly. Adjustable to all head sizes and with two comfort sweatbands all day comfort is for sure.

Headgear Frames

- Can be used with earmuffs, half-mask respirators and more ...
- V-shaped alignment guides for easy installation.
- Non-metal construction for use in electrical applications.
- Optional ET frame is made of heat resistant Nylon in grey with extended crown for additional coverage.
- ANSI tested to temperatures of 400°F (204°C).
- Fits head sizes 52 – 64 cm.

Approvals

ANSI / ISEA Z87-1 : 2010 / CSA Z94 / EN166:2001 389 BT/ EN1731-F / AS/NZS 1337

Unit Per Pc.

Faceshield Frames

This frame works with any MSA slotted or non-slotted helmet and features our unique sloped design to help material slide off the frame and out of site. Can be used with earmuffs, half-mask respirators and other personal protective equipment. Stays securely on the cap, thanks to the heavy-duty, flat, rubber strap. The elevated temperature model withstands temps up to 350°F (176°C).

- Sloped design helps material easily slide off the frame.
- Pivot location for use with earmuffs, half-mask respirators and more.
- V-shaped alignment guides for easy installation.
- Replaceable, optional debris control creates tight seal between frame and helmet.
- Heavy-duty, flat, rubber strap for easy and secure placement of frame on cap.
- Non-metal construction for use in electrical applications.
- ET frame is tested to temperatures of 350°F (176.7°C), reducing warping, cracking or crazing.
- Fits MSA slotted or non-slotted helmets.

V-Gard Flat Polycarbonate Visors

A durable flat polycarbonate visors offer superior protection from flying debris, splash, or spray. Engineered wider than other visors, these visors provide improved resistance when it matters most. All V-Gard visors for general purpose can be worn with cap-mounted earmuffs.

- Fits MSA slotted or non-slotted helmets.
- 8" (20.32 cm) x 17" (43.2 cm) x .06" (1.52 mm).
- Anti-fog and anti-scratch coatings.
- Sides of visor are contoured towards face for a closer fit and improved resistance to impact and splash hazards.
- Maximum UV protection.
- Slightly thicker for industrial impact applications.
- Nitrometer can only be used with V-Gard Retractable or Standard Chin Protector.

Approvals

ANSI/ISEA Z87-1:2010 / CSA Z94-3 / EN 166:2001 (2C-1.2 1B, 2C-1.2 1B 389, 2C-1.2 1B 38 KN, 2-2 1B 38 KN) / AS/ NZS 1337

V-Gard Molded Polycarbonate Visors

A durable molded polycarbonate visors offer superior protection from flying debris, splash, or spray. Engineered wider than other visors, these visors provide improved resistance when it matters most. All V-Gard visors for general purpose can be worn with cap-mounted earmuffs.

- Thickest visors on the market; helps prevent warping, cracking and crazing, especially when working in high heat.
- Available in both clear and green tint.
- Maximum UV protection.
- Wide, longer design for improved resistance to impact and splash hazards.
- Molded PC for superior optics.

- Anti-fog and anti-scratch coatings on select models.
- Select models accommodate cap-mounted earmuffs.
- Not for use in radiant heat hazards.

Approvals

ANSI/ISEA Z87-1:2010 / CSA Z94-3 / EN 166:2001 (2C-1.2 1BT 389 KN, 2-2 1BT 389 KN) / AS/NZS 1337

V-Gard Molded Welding, Cutting and Brazing Visors

MSA V-Gard Visors help protect against damage from impact and infrared (IR) radiation. They are thick to prevent warping from heat or weld spatter. Designed for metal pouring, gas soldering, welding, light cutting and brazing, these visors are engineered for heavy duty use.

- Suitable for most applications where welding, cutting and brazing hazards exist.
- Molded PC for superior optics.
- Wider design for improved resistance to impact and infrared (IR) radiation hazards, up to Shade 3 or Shade 5, depending on model.
- Thickness helps prevent warping, cracking and crazing. Shape accommodates cap-mounted earmuffs.
- Nitrometer version should be worn with V-Gard Chin Protector (sold separately).

Approvals

V-Gard Molded Propionate Visors

These visors are for chemical and splash applications, and are ideal for use in manufacturing plants, laboratories, and other industrial applications that demand face protection against abrasive particles, splash and spray. Molded V-Gard Visors are manufactured with hand-polished molds for unsurpassed, distortion-free optical clarity and impact resistance.

- Green tint helps alleviate eye strain and fatigue by reducing excessive glare and light transmittance. Great for outdoor use in bright-light conditions.
- These visors provide maximum UV protection.

Approvals

ANSI/ISEA Z87-1:2010 / CSA Z94-3 / EN 166:2001 [1B 38] / AS/NZS 1337

Fire Fighter Helmets

Cascos de bombero

消火作業用ヘルメット 消防员头盔

The perfect head protection solution for Fire & Rescue Services and Emergency Services demanding high performance as well as being cost effective without compromise.

Thanks to the helmet's easy maintenance and adjustment procedures due to extremely simple product design, this allows the end user to confidently maintain, adjust and secure the helmet safely prior to use. EN 443: 2008 and EN 14458 certified, using high quality materials for all of its elements, providing a very high level of protection against the main risks encountered in structural fire-fighting operations: heat, flame, shock and electrical hazards.

Sizes M (52 - 62 cm) and L (58 - 65 cm).

Communication System

integrated in Fire Fighter Helmet

Sistema de comunicación

消火作業用ヘルメット用ヘッドセット

通信系统

Single Ear Headset

Communication headset for integration in MSA Gallet F1XF fire helmet.

- One or two loudspeakers, in plastic housing with mounting clips.
- Flexible microphone, adjustable in length (80 mm) to optimize position in front of the mouth or the speech diaphragm (BA face piece).
- Downlead Cable with anti-tearing, LEMO connecting plug (green cover).

Operates with an MSA Push-to-Talk (PTT) module enabling connection to the PMR radio. Connection through an anti-tearing LEMO plug with color codification.

- PTT module with Yellow connector: non ATEX system.
- PTT module with Green connector: ATEX system (for use with approved ATEX radios only)

Microphone:

- Noise cancelling Electret, 100 Hz-10 kHz, distortion < 3%
- Loudspeaker: 32 Ω, 20 Hz – 3 kHz, max power 100 mW
- Amplifier: adjustable gain (0 to 26 dB), 300 Hz-3 kHz Nominal output 50 mV RMS, Harmonic distortion 5%
- Down lead Cable: Fire retardant, shielded cable
- Housing: Polyamide (PA6), Fire resistant (V0)
- Operation Temperature: -20°C to +65°C, humidity < 98%

Approvals:

- EMC performance: ESD/EMI: 10 V/m
- Ingress Protection testing: IP56 (tested inside the helmet)
- ATEX (when used with an ATEX certified PTT module)
- ATEX level: II 2G Ex ia IIC T4

Connection with a wide range of brand and types of radios is possible.

CODE	Description	Unit
31 05 69	Communication headset for F1XF helmet, single ear type (specify brand and type of radio in use)	Set

Name of Mfr. : MSA The Safety Company

Helmet Mounted Headset

Active Hearing Protection headset with built-in communication capabilities,

including:

- Two earmuffs with padding and noise attenuation foam.
- Ear cup height adjustment system for optimal wearing position.
- Flexible microphone attached to the left muff.
- Down Lead Cable with anti-tearing, LEMO connecting plug (green).

Operates with an MSA Push-to-Talk (PTT) module enabling connection to the PMR radio.

Connection through an anti-tearing LEMO plug with color codification.

- PTT module with Yellow connector: non ATEX system.
- PTT module with Green connector: ATEX system (for use with approved ATEX radios only).

Microphone:

- Noise cancelling electret, 100 Hz-10 kHz, sensitivity -61 dB (nominal) at 50% humidity.
- Loudspeaker: 32 Ω, 100 Hz-20 kHz, max power 100 mW.
- Material: Cup: PC/ABS, Cushion: Synthetic leather.
- Down lead Cable: Fire retardant, shielded cable.
- Battery: 2 x AAA batteries, Duracell, Varta, Energizer (ATEX versions).
- Surrounding sound amplifiers: Omnidirectional, sensitivity -38±2 dB, Max input 110 dB S.P.L.
- Operation Temperature: -20°C to +65°C, humidity < 98%.

Approvals:

- EMC performance: ESD/EMI: 10 V/m.
- Fully watertight – equivalent to IP67.
- ATEX (when used with an ATEX certified PTT module).
- ATEX level: II 2G Ex ia IIC T4.
- SNR value: 26 dB / H=26 / M=23 / L=18.

Connection with a wide range of brand and types of radios is possible.

Winter Liners

for MSA Helmet

Forros de Invierno para el Caso MSA
MSA ヘルメット用防寒用ライナー
MSA V-Gard 安全帽用防護面具及面罩

Get superior under-the-helmet warmth and protection with these winter liners. Choose Supreme, Select or Value in any of 8 different styles, including flame-retardant and flame-resistant models, for protecting the head and neck from outside cold wind, or refrigerator work. To be fitted under the helmet.

- Delivers extra warmth and protection under safety helmets.
- Supreme liners offer three layers of true flame resistance (FR) and superior resistance to arc exposure (ATPV of 8 cal/cm²) ATPV denotes Arc Thermal Protective Value.
- Select liners can be laundered up to 50 times without affecting flame retardancy.
- Many models offer quilted earflaps so earmuffs can be used without compromising hearing protection levels.
- Adjustable chinstrap or extended neck closure helps ensure comfortable fit.

Supreme: Offers multiple layers of warm flame resistant fabric, tested to withstand arc exposure to an ATPV of 8 cal/cm². Water repellant.

Rx Overglasses

For users who wear prescription glasses, Rx Overglasses offer high protection while still providing excellent vision. The glasses fit over most prescription eyewear and feature horizontal and vertical adjustable temples, anti-fog lens and Tuff-Stuff™ anti-scratch lens coating. The limited lens curvature offers the best optics and distortion-free wide-angle viewing.

Meets general protector and impact requirements for ANSI/ISEA Z87.1-2010.

- Glasses fit over most prescription eyewear.
- Panto/retroscopic tilt and sliding horizontal length. adjustment offers a custom and secure fit.

Ultrasonic Goggles

Uvex 9302

Gafas Protectoras Ultrasónicos, Uvex 9302
ウルトラソニックゴーグル　防護眼鏡

Ultrasonic goggle shaped ergonomically design with a super panoramic lens, soft face and nose pads, a clever ventilation system and an infinitely adjustable, extra-wide headband. The lens, made of polycarbonate, is easily replaceable and is available with

the supervision HC-AF (Hard Coated Anti-Fog) coating. This unique technology guarantees a scratch-resistant surface as well as permanent anti-fog properties on the inside of the lens.

Recommendations for use:
Grinding work, acid work and galvanization, dusty environments

Compliant with requirement of DIN EN 166.

Harnesses

Fall Protection Range

Cinturón de Seguridad　作業用安全帯　工業用安全帯

Designed and used to prevent accidents at work or to protect against consequences of accidents at work.

Statistics prove, year after year, that lack of fall protection is a leading factor in job fatalities and injuries. The Fall Protection product lines enables your company to provide optimum quality, comfortable fall arrest systems for your workers. It combines quality, comfort, and value.

Approval: Most harnesses have compliance for each region depending on the delivery location, such as OSHA, ANSI, JP industrial standard, etc.

- Excellent value / Optimum quality / Reliable protection / Practical operation / User-friendly design / Comfortable

3M Full Body Harnesses for General Fall Arresting

A full body harness is personal protective equipment worn to prevent falls when working at heights and provide both high safety and comfort to support on-site work. The back D-ring is for fall arrest attached on the most harnesses. The chest-D ring enables connection to a ladder climbing safety system. Please specify if any additional attachment points or specifications are required.

- Durable polyester web construction.
- light and compact Pass-Thru buckle.
- Quick Connect buckles enhance adjust-ability.

Guide to European Norms and Selection Guide of Protective Workwear

To assist you with the selection of chemical protective clothing the EU has developed six "types" of chemical protective clothing.

EN Types	Definition	Alpha Tech® Products
European "Types" of Chemical Protective Clothing		
Type 1 EN943-1 EN943-2	**Gas Tight Chemical Protective Clothing** Protective clothing against liquid and gaseous chemicals, aerosols and solid particulates.	-
Type 3 EN14605	**Liquid Tight Suits** Suits which can protect against strong and directional jets of liquid chemical.	2500 PLUS 3000 4000 5000
Type 4 EN14605	**Spray Tight Suits** Suits which offer protection against a spray of liquid chemicals.	2000 Ts PLUS 2500 PLUS 3000 4000 5000 CFR
Type 5 EN ISO 13982-1	**Dry Particulate Protection** Suits which provide protection to the full body against airborne solid particulates.	1500 STANDARD 1500 PLUS 1800 STANDARD 1800 TS PLUS 1800 COMFORT 2000 STANDARD 2000 COMFORT 2000 Ts PLUS 2300 STANDARD 2300 COMFORT 2300 PLUS 2500 PLUS 3000 4000 5000 FR
Type 6 EN13034	**Reduced Spray Suits** Suits which offer limited protection against a light spray of liquid chemicals.	1500 STANDARD 1500 PLUS 1800 STANDARD 1800 TS PLUS 1800 COMFORT 2000 STANDARD 2000 COMFORT 2000 Ts PLUS 2300 STANDARD 2300 COMFORT 2500 PLUS FR
Other European Standards relevant to the AlphaTec® Product Range		
EN1073-2	Non-ventilated Protective clothing against radioactive particulate contamination.	1500 PLUS 1800 TS PLUS 1800 COMFORT 2000 STANDARD 2000 COMFORT 2000 Ts PLUS 2300 STANDARD 2300 COMFORT 2300 PLUS 2500 PLUS 3000 4000 5000 FR

(to be contunued)

EN Types	Definition	Alpha Tech® Products
EN14126	Protective clothing against infective agents. ["Type" prefixed with "-B" (i.e. Type 3-B) indicates approval to this European Norm].	2000 STANDARD 2000 Ts PLUS 2300 STANDARD 2300 PLUS 2500 PLUS 3000 4000 5000
EN1149-5	Protective clothing with electrostatic properties.	1500 PLUS 2000 COMFORT 2000 STANDARD 2000 Ts PLUS 2300 STANDARD 2300 COMFORT 2300 PLUS 2500 PLUS 3000 4000 5000 FR CFR
DIN32781	Protective clothing. Protective suits against pesticides.	2000 STANDARD 2000 Ts PLUS
EN ISO 14116	Protective clothing. Limited flame spread materials, material assemblies and clothing.	FR CFR

Remark: This guide is an indication of your suits protection against a particular hazard (gas, liquid or dust). Please be aware that conformance to these types standards does not mean that your suit is 100% impervious to your hazard.

AlphaTec® Coverall Size Chart Guide

Body measurements

(The measurements shown below relate to the wearer's body measurements and not the garment measurements.)

Height (cm)	Chest (cm)	Recommended Garment Size
164 - 170	84 – 92	S
170 - 176	92 – 100	M
176 - 182	100 - 108	L
182 - 188	108 - 116	XL
188 - 194	116 - 124	2XL (XXL)
194 - 200	124 - 132	3XL (XXXL)

Application Table for AlphaTec® Protective Workwear

Type	For	From
AlphaTec® 1500 STANDARD	Dust protection.	Asbestos, powder.
AlphaTec® 1500 PLUS	Splash and particle protection.	Asbestos, brick, dust, cement dust.
AlphaTec® 2000 COMFORT	Working in warm environment, and spray protection.	Low hazard liquid, particles.
AlphaTec® 2000 STANDARD	Chemical & pharmaceutical industries, paint spraying and crime scene investigation.	Infective agents, pesticides, particulates, fibres & low hazard liquid chemical spray.
AlphaTec® 2000 Ts PLUS	Paint spraying.	Low hazard liquid and fine particulates.
AlphaTec® 2500 PLUS	Biological protection.	Heavy low hazard liquid spray and particulates.
AlphaTec® 3000	Chemicals, oil and petrochemicals.	Inorganic chemicals and biological hazards.
AlphaTec® 4000	Hazardous area.	Concentrated chemicals and biological agent.
AlphaTec® FR	Working in potential explosive / flammable environments. (Wear over a thermal protective garment.)	Low hazard liquid spray and particulates, such as oils and petrochemicals, petroleum distribution and processing and utilities.
AlphaTec®CFR	Working in potential explosive / flammable environments. (Wear over a thermal protective garment.)	Oil and petrochemicals, tank, pressure cleaning delete, petroleum, processing and utilities.

Protective Workwear

Ropa de trabajo protectora 防護着 防护服

Protective workwear under an ISO 9001 approved quality control system, and meets the European Norms specified in Category III of the PPE (Personal Protective Equipment) directive for chemical protective workwear.

Designed for operatives who require particle (dust) and low hazard liquid splash protection.

Made from highly breathable SMS (Spunbond + Meltblown + Spunbond Nonwovens) fabric, and designed for workers involved in the stripping, clear up or handling of asbestos, general maintenance, construction and contract cleaning.

AlhaTec®
1500 STANDARD

Applications:

Where the need for dust (particle) protection is greatest, such as; asbestos related work, handling powders, general maintenance and construction.

Meets the following European Norms:

Type 5 : EN ISO 13982-1 Dry particle suit
Type 6 : EN 13034 Reduced spray suit

Note: Respirator is sold separately.

Unit Per Pc.

Name of Mfr.: Ansell Limited

Designed for operatives who require particle (dust) and low hazard liquid splash protection.

High quality 3-layer anti-static SMS fabric for splash and particle protection. The SMS fabric is highly breathable, making it ideal for operatives working in warmer environments.

SMS fabrics are a particularly good barrier against particulates such as, asbestos, brick, dust and cement dust and will provide protection from light aerosol mists as found in some paint spray environments.

Applications:

Asbestos related work, handling powders, general maintenance, construction, pharmaceutical industries, wood & metal processing, Touch-up paint spraying, fibreglass/resin applications/ceramic fibres.

Meets the following European Norms:
Type 5 : EN ISO 13982-1 Dry particle suit
Type 6 : EN 13034 Reduced spray suit
EN1073-2 : Barrier to radioactive particulates - Class 1
EN1149-5 : Anti-static

Note: Mask and goggles are sold separately.

Name of Mfr.: Ansell Limited

Ideal for operatives working in warmer climates or environments.

Specially designed for those working in warmer climates or warm working environments to help reduce heat stress. The critical areas to the front of the garment, including the hood, arms and legs, are AlphaTec® 2000 microporous PE laminate fabric which offers a high level of liquid and particle protection with a low level of water vapour resistance according to EN 31092 of Ret<15*.

*Ret is a measurement of a materials resistance to moisture vapour transfer.

AlhaTec®
2000 COMFORT

Applications:

Critical production environments where dust and low level spray protection are required, such as: paint spraying, pharmaceutical industries, fibreglass product manufacturing, Windmill manufacturing, boat and ship building and mining.

Meets the following European Norms:
Type 5 : EN ISO 13982-1 Dry particle suit
Type 6 : EN 13034 Reduced spray suit
EN1073-2 : Barrier to radioactive particulates - Class 1
EN1149-5 : Anti-static

Name of Mfr.: Ansell Limited

Ideal for a wide range of industrial applications such as; Pharmaceutical industries and Agriculture.

Designed to allow water vapour (perspiration) to escape from the suit yet will withstand saturation of liquid chemicals and filter 100% of particulates down to 0.01 micron in size, and provides protection from infective agents, pesticides, particulates, fibres & liquid chemical spray.

Garment feature:

- Microporous PE laminate fabric.
- Optimised body fit.
- Bound seams ensure spray tight protection.

AlhaTec®
2000 SATANDARD

Applications:

Chemical & pharmaceutical industries, Cleanrooms, Paint spraying, Crime scene investigation.

Meet the following European Norms:
Type 5 : EN ISO 13982-1 Dry particle suit
Type 6 : EN13034 Low level spray tight suit
EN 14126 : Barrier to infective agents
EN1073-2 : Barrier to radioactive particulates – Class 2

Name of Mfr.: Ansell Limited

Ideal for a wide range of industrial applications such as; Pharmaceutical industries and Fibreglass product manufacturing.

Designed to allow water vapour (perspiration) to escape from the suit yet will withstand saturation of liquid chemicals and filter 100% of particulates down to 0.01 microns in size. (EMSL test method) With stitched and taped seams, it provides an exceptional overall barrier to low hazard liquid spray and fine particulates.

AlhaTec®
2000 Ts PLUS

Features and benefits:

Protection -
Proven barrier to low concentration liquid chemicals, diluted pesticides, liquid & particulate biological hazards.

Silicone Free –
Critical in spray painting applications.

Low Linting –
Reduced risk of contamination in critical areas.

Anti-static –
Tested according to EN 1149-5.

Applications:

Agriculture, paint spraying, pharmaceutical industries, fibreglass product manufacturing, boat and ship building and Mining.

Protection Levels & Additional Properties:

Type 4-B : Spray tight suits (Suits which offer protection

against saturation of liquid chemicals).

Type 5-B : Dry particulate protection (Suits which provide protection to the full body against airborne solid particulates).

Type 6-B : Reduced spray suits (Suits which offer limited protection against a light spray of liquid chemicals).

EN 14126 : Protective clothing against infective agents ["Type" suffix with "-B" [i.e. Type 3-B] indicates approval to this European Norm].

EN 1073-2 : Protective clothing against radioactive particulate contamination.

DIN 32781 : Protective clothing. Protective suits against pesticides.

EN 1149-5 : Protective clothing with electrostatic properties.

Ideal for operatives looking for protection from biological agents.

Made from breathable microporous films, and designed to protect you from heavy liquid spray and particulates. The fabrics physical strength and flexibility ensures you are protected and comfortable in even the harshest environments.

AlhaTec®
2500 SATANDARD

Applications:

Where liquid tight protection and durability is required, such as: Biological Protection (Risk Groups 1-2, as per definition in the European BioDirective: Directive 2000/54/EC), chemical and pharmaceutical industries, low pressure industrial cleaning, industrial paint spraying and nuclear industry.

Meets the following European Norms:

Type 4-B : EN 14605 Spray tight suit
Type 5-B : EN ISO 13982-1 Dry particle suit
Type 6-B : EN 13034 Reduced spray suit
EN14126 : Barrier to infective agents

Name of Mfr.: Ansell Limited

Effective barrier against both inorganic chemicals and biological agents.

A soft and flexible 3 layer fabric with strong ultrasonically welded seams and an extremely effective barrier against both inorganic chemicals and biological hazards.

AlhaTec® 3000

Applications:

Protection against many concentrated inorganic chemicals, biological hazards and particles smaller than 1 µm, in industries such as; Chemicals, oil and petrochemicals, pharmaceutical, food industry, sewage purification installations, industrial & tank cleaning and mining.

Meets the following European Norms:

Type 3-B : EN 14605 Liquid tight suit
Type 4-B : EN 14605 Spray tight suit
Type 5-B : EN ISO 13982-1 Dry particle suit
EN14126 : Barrier to infective agents

Effective barrier against both organic and inorganic chemicals and biological agents

A unique multi-layer barrier fabric which is renowned for its lightweight textile feel and exceptional barrier to organic and inorganic chemicals and biological agents.

AlhaTec® 4000

Features and benefits:

- Double zip system, ultrasonically welded and taped seams to ensure liquid tight protection.
- Double cuff design for improved protection.
- Knitted internal sleeve cuff for wearer comfort.

Applications:

For hazardous areas where protection against concentrated chemicals and biological agents is required, such as: chemicals, oil and petrochemicals, pharmaceutical, mining, agriculture, industrial & tank cleaning, sewage purification installations and emergency services (HAZMAT, CBRN).

Note:

HAZMAT – Hazardous Materials.
CBRN – Chemical, Biological, Radiological, Nuclear, and Explosive.

Meets the following European Norms:

Type 3-B : EN 14605 Liquid tight suit
Type 4-B : EN 14605 Spray tight suit
Type 5-B : EN ISO 13982-1 Dry particle suit

Designed for operatives in potentially explosive/ flammable environments.

AlhaTec® FR

Made from flame retardant material, and offers wearers protection from liquid chemicals to EN Type 6 and particulates to EN Type 5, and peace of mind to workers in potential explosive/flammable environments. To decrease the risk of burn injury, wear over thermal protective workwear. The fabric is designed to allow water vapour to escape from the suit helping to reduce the risk of heat stress.

Applications:

Wear over a thermal protective garment [EN ISO 14116 Index 2 or above] in areas with a risk of flash fire and where protection from low level liquid spray and particulates is required, such as: oil and petrochemicals, petroleum distribution and processing and Utilities.

Meets the following European Norms:

Type 5 : EN ISO 13982-1 Dry particle suit
Type 6 : EN 13034 Reduced spray suit
EN1073-2 : Barrier to radioactive particulates - Class 1
EN ISO 14116 : Limited flame spread materials and assemblies
EN1149-5 : Anti-static

Note: Respirator is sold separately.

Name of Mfr: Scandia Gear
S3: 200 joule toecap protection.
Closed seat region (fully enclosed heel).
Antistatic properties. Energy absorption of seat region.
Water penetration and water absorption resistance.
Sole penetration resistance. Cleated outsole.

Antistatic Rigger Boots

Conformed to BS EN 345-1

Botas de Seguridad Anti-Electroestático, según la Norma BS EN 345-1

BS 規格適合静電防止リガーブーツ

防静电安全鞋

Made of rustic tan smooth leather, and with double density polyurethane sole. Extra wide fit with the following safety features.

- 200 joules toe protection to EN 345-1 and oil resistant outsole.
- Antistatic (dissipates static electricity between 100 kilohms - 1,000 megohms).
- Energy absorbing and shock absorbing heel.
- Heat resistant up to 200°C.

Unit Per Pr.

Anti-shatter Films

(Blast Mitigation)

Láminas de seguridad para cristales (antiexplosiones)
窓硝子用粉砕防止フィルム　窗玻璃防碎贴膜

Anti-shatter film provides protection from flying glass in the event of a natural disaster or demolition by pirates. It forms an almost invisible protective coating on the glass surface. This window film should only be applied to flat glass. It should never be applied to polycarbonate (plastic). Adhesive window films are constructed from a multi-lamination of micro-thin polyester. They also have a scratch resistant coating to protect the film surface and enhance durability (except films for external application). The film should be cut 10 mm over size in both dimensions, and trim around the oversized edges using a sharp trimming knife after squeezed the film.

15 08 21	Film, anti-shatter (Blast mitigation), 200 micron, Width 152 cm x Length 15 mtr	Rls.

Anti-Piracy Goods

Bulletproof Accessories

Productos antibalas antipiratería
海賊対策用防弾装具　反海盗用防弹装备

Bulletproof Combat Helmet	DC4-4NIJ IIIA level 9 mm colour Black, included cotton protection cover.
Bulletproof Body Armer (Vest)	DC2-3NIJ IIIA level 44 mm colour Black Due the layer of fibers in a vest, the protection level (resistance level) was determined. This model has the NIJ level IIIA protection, which against the heaviest bullets from a handgun, such as the 44 and 9 mm.
Bulletproof Plate	Vests with level III and IV require hard plates in the vest for protection against machine gun fire.

Remark: These products are dual use items, and may therefore be restricted in supply by some authorities.

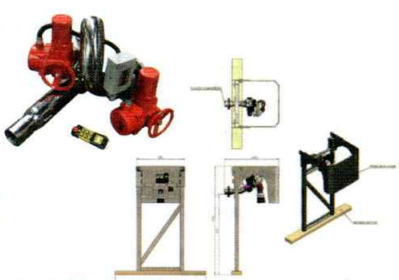
Anti-Piracy Dummies

Muñecos antipiratería
海賊対策用マネキン人形
反海盗用人体模型

A false security patrol man to assist deterring pirates from boarding ships. Any equipment dummy wearing are separate order.

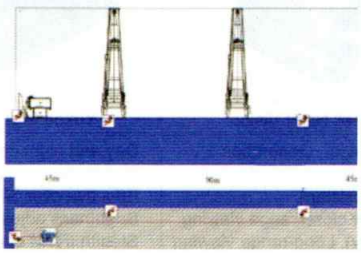


31 41 16	Dummy, anti-piracy, bare	Pc.

Anti-Piracy Water Jet Cannons

Cañones de agua antipiratería　海賊対策水射出器　反海盗水枪

A water jet cannon is based on the use of high quality oscillating water cannons, which are installed on several points on the ship and prevent any boarding attempt when activated. The system is sent to the ship as a modular package that is installed by the crew without any required external help. Training will be given to operate the system and a user manual will enable smooth operation of the system.



The installation of the system is divided into 2 main categories.

A – Engine room related installation

- Ensure existing pump has enough capacity.
- Else, in case the capacity is not available, connect engine room pumps to on deck diesel powered booster pump.
- Connection of hoses from pump (via engine room or deck).

B – Deck related installation

- Install water cannons on deck or railing, using supplied connection kit.
- Run 6" feeder hoses from main pump outlet / manifold.
- Run 4" hoses from feeder to water cannon.

System Components

- Storage container.
- High quality oscillating water cannons, (a modified type of the systems used by fire fighting departments).
- Special fittings to temporarily attach the cannons to deck or railing.
- Hoses, supplying water from pump to water cannons.
- Ballistic shields to protect water cannons from direct small caliber fire arms.

Typical Installation Pattern per Ship's Overall Length

Overall Length	No. of Cannon	Water Supply	
		ltr/min.	m3/hr
200 mtr	5 cannons	10,000	600
280 mtr	7 cannons	14,000	840
360 mtr	9 cannons	18,000	1,080

Performance of Water Jet Cannon

- Ultra compact
- Weight : just 11.4 kg
- Totally adjustable
- Capacity 2,000 ltr/min at 5.5 bar
- Range 50 – 55 meters
- High quality aluminium
- Includes manometer
- Left right radius between -180 degrees to +180 degrees
- Up down radius between -45 degrees to +90 degrees
- 12/24V electro motor
- Remote control option with joystick
- 10 year warranty

Water Supplying Hose:

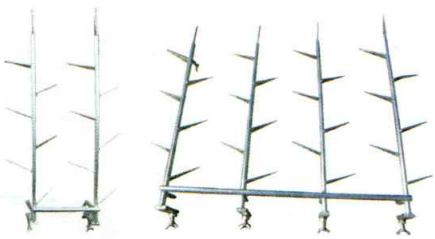
Made from thick woven synthetic thread with a bacl PVC/Nitril protection coating. The internal and external tubes are seamlessly interwoven to long levity. Consequently the internal tube cannot disconnect from the external tube. Totally oil and chemical resistant as well as extreme UV and Ozon protected.

Long levity, remains flexible, no maintenance, no rotting, temperature range -35°C to +100°C, sea water proof, high resistance to tearing and bending, and special textile cuff protect connector areas.

Couplings & Connectors:

High quality aluminium connectors with fast connect and release system, as used by fire fighting department worldwide

How to order: 31 - 41 - 21

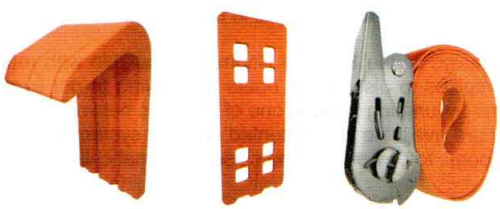


Water jet cannon system,With further details

Anti Piracy Spike Fence (APSF)

Valla de púas contra piratería　海賊対策用フェンス　防海盗用栅栏

Specially designed to safeguard ships sailing across high-risk sea area. The fence is steel welded with galvanized surface treatment, effective to prevent pirates or stealers to climb onboard. It can work for much longer time with effective anti-corrosive function, and easily installed firmly one by one along deck fishplate, gunnels with wing bolts. 2-spikes type fence and 4-spikes type fence are available, and can be designed other type as per requirement.



Unit Per Pc.

CODE	Model	Dimension L × B mm	Weight (kg/pcs)	Typical qty as per Ship's LOA
31 41 25	4-spikes	850 × 680	4.9	Quantity required =LOA×2/0.95
26	2-spikes	425 × 680	2.45	Quantity required =LOA×2/0.5

Anti Piracy Barrier

Barrera contra la piratería　海賊対策用バリア　反海盗屏障

An innovative defensive solution to prevent unwanted personnel (using ladders, poles, and ropes) from boarding a vessel. Sustainable and cost-effective denial of access maritime security solution used to protect commercial sea vessels passing through high-risk areas.

Unique patented design that allows for each unit to be self-installed with speed and strapped to vessel guardrail by using mounting panels and straps. Fend plate design along with innovative ribbed surface will repel hooked ladders and climbing poles to defeat rope based climbing systems. Available in orange and black colour.

Unit Per Pc.

CODE	Model	Material	Dimensions (mm)	Weight (Kg/pcs)

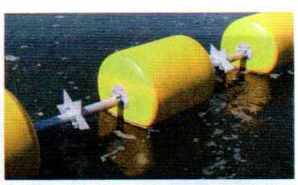
Ballistic Protection Plate System

Sistema de placas de protección balística
弾道保護プレートシステム　防弾保护板系统



Ballistic Protection Plate System (BPP) is a robust, ballistic and permanent non-lethal defensive solution that protects vessels from high velocity. It's a ballistic steal modular system comes in two materials, a Kevlar composite and an alloyed ballistic steel, and straps to the guard rail of any existing ship, offering complete protection of by preventing ballistic rounds, high velocity, and blast impacts.

Plate size: W595 x H1,163 x T12 mm

How to order: 31 - 41 - 30
Ballistic Protection Plate System (BPP), specify the total meterage for use

Anti-Piracy Security Booms

Auge de la seguridad contra la piratería
海賊対策用安全フェンス
反海盗安全围栏

Designed to be used in conjunction with unmanned maritime assets to fortify onboard defences against piracy. The tubular backbone makes the booms immensely strong, designed to take loads in excess of 50 tons.

The design of the Security Booms is available with rotating steel spikes to discourage boats from trying to get over the booms by jumping through one of the gaps between the oats. They are available with patented latching system that allows the booms to be opened and closed automatically.

How to order: 31 - 41 - 31
Anti-Piracy Security Booms, specify the total meterage for use

Night Vision Binoculars

for Anti-piracy

Binoculares de visión nocturna antipiratería
海賊対策用暗視双眼鏡　反海盗用夜视望远镜

An optical instrument that you can see a night view even in a moonless, cloudy night.

Remark: The products are dual use items, and may therefore be restricted in supply by some authorities.

Bushell Night Vision	Yukon Night Vision
· Night vision: Generation 1 · Infrared illuminator: Built-in · Water resistant · Great for close-range viewing (Security). Long-range viewing (Wildlife observation) · Magnification x objective lens: 2.5 × 42	· Day and night operation · Higher resolution than Gen. 1 · Effective over 300 yards · Brightness adjustment control · Stealth IRTM operation with invisible, powerful dual IR illuminators · Direct video output capability · Magnification x objective lens: 5 × 42

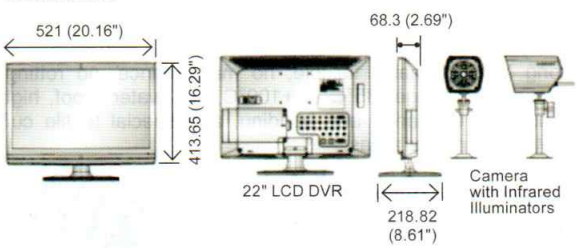
Camera Monitoring System



with Infrared Illuminators

Sistema de observación con cámara con iluminación infrarroja
赤外線発光式監視カメラシステム
红外灯监控摄像系统

Camera monitoring system provides maximum protection for any spot 24 hours a day, 7 days a week. Simple to set up, you can monitor any time from anywhere around the world. All four cameras are waterproof to IP66, compact and highly durable to achieve clear stable video, even in harsh outdoor conditions. Single cable to each camera cover all wiring needs including power so you have the freedom to place them anywhere, even if there is no electrical outlet in the area. The four night vision cameras are equipped with 30 infrared LEDs which allow them to detect and show objects as far as 50 feet, even in the darkest conditions. The built in 500 GB hard drive allows for extended recording time and is expandable to 1 TB for maximum data capacity. Please contact your local supplier about more details.

Dimensions

Main Feature:

· Smartphone ready
· 4 x infra red night vision cameras – 600 TV lines of high super resolution

· H.264 high performance compression
· 8 channel digital video recorder
· Vivid 22" LCD display
· 500 GB of storage USB 2.0

Inflatable Liferafts

Balsas Sallvavidas Inflables　膨張式救命いかだ　膨胀式救生筏

A wide variety of models from different manufacturers are available to meet the requirements of the International Convention for the Safety of Life at Sea (SOLAS), known as "96SOLAS".

They are furnished with standard equipment and additional features as the customer specifies, such as Deck Cradle, Hydrostatic Release, etc.

An exceptionally rugged construction supplied in glass-reinforced plastic (GRP) containers.

There are two types of inflatable liferaft mainly used on board, Throw-over type and Davit-Launching type. Throw-over type can be launched manually or by securing the tow line to a strong point on deck and throwing the container overboard. When the tow line is pulled taut, an integral CO_2 gas cylinder is activated which inflates the boarding step, buoyancy chambers and canopy support. Davit- Launching type is obliged to use for either Port or Starboard side on Bulk Carriers since 2007, lowering down by davit and inflate manually by pulling the tow line.

Every liferaft shall be serviced at intervals not exceeding 12 months.

Please specify the following points when ordering.

1) Capacity, 2) Throw-over or DL(Davit-launching) type,

3) Ship's registered flag, 4) Installation Height,

5) Classification society

Unit Per Set

Hydrostatic Release Units

Double Looped Rope Line Type

Desprendimientos Hidrostáticos, Tipo: Linea Cuerda Doble Lazo
自動離脱装置　静水压力释放器（双循环绳线路）

These units consist of a double looped rope line, a release mechanism, and a weak link. This release unit conforms with the requirements of the 1983 amendments to SOLAS 1974.

For Liferaft　For Epirb

These units will release the liferaft or EPIRB (Emergency Position Indicating Radio Beacon) at a depth of between 1.5 and 4 mtrs underwater. The units could be round or square shape. Below is a reference of brand & manufacturers, but there are specific types of HRU for certain EPIRB brand. Please specify the types and brand when ordering.

Life Jacket Lights

Luces para Chalecos Salvavidas
救命胴衣灯　救生衣灯

Each life jacket shall be fitted with a light complying with the requirements for a 0.75 cd light for 8 hours. The battery will be operated automatically upon entry into the water.

33 01 43	Life jacket light	Pc.
45	Bag for life jacket light	"

Lifebuoys

Aros Salvavidas　救命浮環　救生圈

Throw-over Lifebuoy

Quick Release Life buoy

Normally made from polyethylene outer skin and polyurethane foam inner core.

Cargo ships shall carry no less than the number or lifebuoys complying with the requirements of SOLAS described in the table below. In compliance with requirements it is fitted with a buoyant lifeline.

When being in used for operating the quick-release arrangement provided for the self-activated smoke signals and self-igniting lights, the lifebuoy have a mass sufficient to operate the quick-release arrangement or 4 kg, whichever is greater.

Required quantity by Regulation 32

Length of ship	Numbers of Lifebuoys
Under 100 mtr	8 pcs.
100 and under 150	10 pcs.
150 and under 200	12 pcs.
200 and over	14 pcs.

Unit Per Pc.

CODE	Approved	O.D.	I.D.	Weight
Weight Over 2.5 kg (Throw-over Lifebuoy)				
33 01 51 **56** **57** **58** **59**	H.K. U.K.DOT N.V. U.S.C.G. MED	Under 800 mm	Over 400 mm	Over 2.5 kg and less than 4.0 kg

33 01 54 **53** **55** **52** **60**	H.K. U.K.DOT N.V. U.S.C.G. MED	Under 800 mm	Over 400 mm	Over 4.0 kg

Immersion Suits

Trajes de Inmersión　イマーションスーツ　保温服

Made of foam rubber. Serves to prevent the loss of body heat when submerged in cold water. Shall be provided for every person assigned to the crew of the rescue boat and at least three immersion suits shall be provided for each open type lifeboat on the ship.

Below is reference of sizes available from several manufacturers.

Size		Height
Universal	M	140 - 170 cm
	L	170 - 190 cm
Oversize	XL	190 - 210 cm

Unit Per Set

CODE	Approved	Material
33 01 69 **70** **71** **72** **95**	U.K. DOT H.K. N.M.D. U.S.C.G. MED	Foam rubber

Universal Testing Device

for Immersion Suit/Anti-exposure Suit

Dispositivo de pruebas universal para trajes de inmersión/trajes contra la intemperie
イマーションスーツ用テスト・修理キット
保暖救生服 / 海上救生服用测试和修理套件

Complies with IMO guidelines for periodic testing of seams and closures on immersion suits and anti-exposure suits. Universal compatibility, including universal maintenance and repair kit. Consists of stainless steel pressure gauge, pressing and stable board and connecting hose, including metal carrying case and "Super Repair", contains: neoprene gasket, waterproof marker, two emergency lights.

Note: Two whistles, Sleeve cones for detachable gloves available separately.

Standards: MED/SOLAS-certified

33 01 97	Universal testing device for immersion suit & anti-exposure suit, MED/SOLAS certified	Set

Name of Mfr: Scandia Gear

Sleeve Cones for use with Universal Testing Device for Immersion Suit

Designed to test immersion suits with detachable gloves. Cone shape creates a universal fit.

Standards: MED/SOLAS-certified.

33 01 98	Sleeve cones for use with universal testing device for immersion suit, MED/SOLAS certified	Set

Name of Mfr: Scandia Gear

Portable Air Compressors for use with Universal Testing Device

An Air compressor with storage compartment designed for use with the Universal Testing Device for Immersion Suits. Easy maintenance, does not require oil.

Unit Per Set

CODE	33 01 99
Model	8100.04
Power	1,100W/1.5 pk.
Maximum pressure	8 bar
Tank capacity	6 L
Motor	3,400 rpm. 230 Vac.
Dimensions	470 × 580 × 330 mm
Weight	12 kg

Name of Mfr: Scandia Gear

Thermal Protective Aids

Ayudas Terinales o Térmicas 保温具 保温材料

A thermal protective aid is made of waterproof material with low thermal conductivity, and shall be provided for every person on the ship who has not been provided with one of the immersion suits in the open type lifeboat.

Unit Per Set

CODE	Approved	Material	Thermal Conductivity
33 01 75	H.K.	Polyethylene	Not more than 7,800 W/(m².K)
76	U.S.C.G.		
77	U.K.DOT

33 01 89	Silver SOLAS grade	50 mm × 45.7 mtr	For life saving equipment, conforms to IMO Res. A.658 (16) and approved by numerous national authorities.	Rls.

Radar Reflectors

Reflectores para Radar レーダー・リフレクター 雷达反射器

For reflecting radar signals back to their source. Used to inform a position to rescue squads while at open sea.

Prefabricated

Inflatable

Unit Per Pc.

CODE	Type	Material	Diam
33 01 90	Prefabricated	Polypropylene panel & alum. coated	320 mm
33 01 91	Inflatable	Double high-density polymer	460 mm

Note: All conforms to SOLAS requirement

Bailers

Achicadores あか汲み 救生艇水斗

For bailing out water accumulated in the bottom of the boat.

33 02 01	Bailer for lifeboat	Pc.
02	Bailer for liferaft	"

Hatchets

Hachuelas 手斧 救生艇手斧

A short handled, single edge rectangular head, usually with a lanyard.

33 02 03	Hatchet for lifeboat	Pc.

Sponges

Esponjas スポンジ 海绵

For absorbing water.

33 02 04	Sponge for liferaft	Pc.

Lifeboat Oil Lamps

Lámparas de aceite para Bote Salvavidas

ライフボート・ランプ 救生船油灯

Made of brass with a clear glass globe operated by kerosene.

33 02 05	Lifeboat oil lamp	Pc.

Lifeboat Matches

Fósforos para Bote Salvavidas

水密マッチ 救生火柴

Windproof matches for use during inclement weather conditions.

33 02 07	Lifeboat match	Pkt

Lifeboat Buckets

Cubetas para Bote Salvavidas バケツ 救生桶

For bailing out water.

33 02 09	Lifeboat bucket	Pc.

Dippers
Liara　ひしゃく　带绳索勺

Rustproof dipper with lanyard.

33 02 10	Lifeboat dipper with lanyard	Pc.

Lifeboat Compasses
Compases para Bote Salvavidas
ライフボート・コンパス　救生艇磁罗经

A small liquid compass, card dia 100 mm in a binnacle.

33 02 11	Lifeboat compass 100 mm w/cover	Pc.

Rescue Quoits
Aros Salvavidas de Rescate
救命浮輪　救生浮环（救生艇用）

Attached to not less than 30 mtr of buoyant line.

33 02 12	Rescue quoit for lifeboat	Pc.
13	Rescue quoit for liferaft	"

Sea Anchors
Anchas Flotantes　シー・アンカー　救生艇海锚

Fitted with a shock-resistant hawser & tipping line.

33 02 15	Sea anchor for liferaft	Pc.
16	Sea anchor for lifeboat	"

Sea Anchor Oil Cans
Latas de Aceite para las Anclas Flotantes
撒油缶　救生艇油罐

Made of galvanized sheet iron for holding storm oil.

33 02 17	Lifeboat sea anchor oil can	Pc.

Signal Tables
Tablas de Señales　救命信号説明表　救生信号

Waterproof card or in a waterproof container.

33 02 18	Signal table plastic	Pc.

Rations
Raciones　食料　救生艇食量

Approved by M.I.T.I. (Ministry of Industry and Transport, Japan). Each ration contains 9 meals.

33 02 23	Ration combination 9 meals	Pc.

Rations "Seven Ocean"
Raciones "Siete Océanos" Alimentos
セブン・オーシャン　救身艇用压缩饼干

Compressed vitaminized biscuit bars. Takes up little space and will keep for 5 years.

33 02 25	Ration seven ocean, 500 grm	Pkt
26	Ration seven ocean, 1,000 grm	"

Drinking Water
Agua para Beber　飲料水　救生艇饮用水

Completely sterile, vacuum-sealed water in a can. Required 1.5 ltr per person.

33 02 36	Drinking water, 385 ml	Can
37	Drinking water, 500 ml	Btl

Drinking Cups
Vasos para Beber　コップ　救生艇饮水杯

Should be rustproof and graduated.

33 02 41	Drinking cup for lifeboat	Pc.
42	Drinking cup for liferaft	"

First Aid Kits
Equipos de Primeros Auxilios　応急医療具　救生艇应急药箱

Stores medicines and medical instruments in a watertight container.

33 02 45	First aid kit for liferaft	Set
46	First aid kit for ifeboat	"

Anti-Seasickness Medicine
Pastilas Antimareos　船酔い薬　晕船药

Required 6 doses per person.

33 02 47	Anti-seasickness medicine	Pkt

Seasickness Bags
Bolsas para Vómito　船酔い用の袋　晕船用的清洁袋

1 seasickness bag required for each person.

33 02 48	Sea-sickness bag	Pc.

Can Openers
Abrelatas　缶切り　开罐器

3 pieces required for each liferaft or lifeboat.

33 02 49	Can openers, 3's	Set

Jack Knives
Navajas de Bolsillo Silbatos
ジャック・ナイフ　水手刀

Furnished with lanyard for attaching the knife to the boat.

33 02 50 51	Jack knife for liferaft Jack knife for lifeboat	Pc. "

Whistles
Sibatos　笛　救生艇哨笛

Made of seawater resistant tough plastic.

33 02 52	Whistle	Pc.

Signalling Typhoons
Bocina Niebla-Tifón　ラッパ　救生艇台风信号

Made with waterproof tin plate. Will provide a loud sound.

33 02 53	Signalling typhoon	Pc.

Fishing Tackles
Equipos de Pesca　釣り道具　救生艇鱼具

Contains hooks, lines and other equipment packed in a watertight container.

33 02 54	Fishing tackle	Set

Survival Manuals
Manuales de Supervivencia
生存する方法を示すマニュアル　救生艇求救信号书

A guidebook for survival at sea to meet the requirement of the SOLAS convention.

33 02 56	Survival manual	Pc.

Instructions for Immediate Action
Instrucciones para Acción Inmediata
迅速な措置の為の指導書　紧急救生筏登筏手册

A guidebook for immediate action aboard a liferaft.

33 02 58	Instruction for immediate action for liferaft	Vol

Waterproof Torches
Linterna (Merse) Bote Salvavidas　水密電気灯　救生艇防水手电筒

For Morse signalling, sealed in a waterproof container.

33 02 61	Torch electric waterproof	Pc.

Seawater Torches
Luz Activada para Agua de Mar
海水電灯　救生艇海水自动灯

Electric torch automatically activated in seawater.

33 02 62	Seawater torch	Pc.

Searchlights
Proyectores　サーチライト　探照灯

Provides illumination for a total period of 6 hours and will remain in operation for at least 3 hours.

33 02 64	Searchlight for lifeboat	Pc.

Daylight Signal Mirrors
Espejos Señales-Heliógrafo
日光信号鏡　救生艇反光镜

For daylight signalling to ships and aircraft.

33 02 71	Daylight signal mirror	Pc.

Lifeboat Ditty Bags
Equipo para Reparaciones de Vela
ライフボート小袋　救生艇针线袋

Consist of a strong waterproof canvas bag containing a sail makers palm, sail needles, sail twine, a marline spike, and beewax.

33 02 76	Lifeboat ditty bag	Pc.

Repair Outfit for Liferaft
Equipo para Reparacióne de Balsas Salvavidas
ラフト用修理用具　救生筏修理用具

For repairing punctures in buoyancy compartments.

33 02 77	Repair outfit for liferaft	Set

Topping up Pumps for Liferaft
(Bellows)
Bomba para inflar Balsa Salvavidas
充気ポンプ　充气泵

For pumping air into a liferaft when reinflation is required.

33 02 79	Topping up pump (Bellows) for liferaft	Pc.

Pumps for Lifeboat
Bombas Bote Salvavidas　手動ポンプ　救生船泵

For bailing water out of the lifeboat.

33 02 80	Manual bilge pump for lifeboat	Pc.

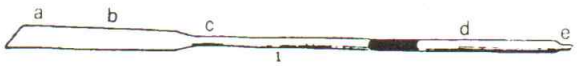
Storm Oil
Aceite para Tormentas　ストーム・オイル　救生艇防浪油

A vegetable oil which is spread on the sea to reduce the crest.

33 02 81	Storm oil, 4 ltr	Tin

Paddles

Canaletes かい 船桨



Shall be buoyant and light for easy propulsion of the raft.

33 02 83	Paddles buoyant for liferaft	Pc.

Oars

Remos オール 救生艇桨

Usually made of ash or similar wood. When ordering, please specify the overall length, if possible, also specify the sizes of (a) tip, (b) blade, (c) neck, (d) loom and (e) handle.

33 02 84	Oar buoyant for lifeboat	Pc.

Boat Hooks

Bicheros ボートフック 救生艇杆钩

When ordering, please specify the hook material and the overall length.

33 02 85	Boat hook for lifeboat	Pc.

Lifeboat Rowlocks

(Crutches)

Chumaceras ライフボート クラッチ 桨叉

Made of galvanized malleable iron. When ordering, please specify the size of the opening and the overall length.

33 02 86	Rowlock, lifeboat, length × opening	Pc.

Manually Powered Reverse Osmosis Desalinators

Desalinizador de osmosis inversa de operación manual

手動式海水脱塩装置 手动式海水除盐装置

LSA Code 4.1.5.1.19 requires the watertight receptacles containing a total of 1.5 liters of fresh water for each person the liferaft is permitted to accommodate. Of which either 0.5 liter per person may be replaced by a desalting apparatus capable of producing an equal amount of fresh water in 2 days, or 1 liters per person may be replaced by a manually powered reverse osmosis desalinator capable of producing an equal amount of fresh water in 2 days;

An emergency desalinator, which produces enough water up to 2.0 litres per hour.

* Desalination degree : more than 95%, eliminating bacteria or virus.
* Optimum pump frequency: 40 pumps per minute.
* Weighs only 1.6 kg.

33 02 24	Desalinator, reverse osmosis, manually powered, conformed to LSA Code 4.1.5.1.19	Pc.

Name of Mfr.: Kyumei

Lifeboat Repair Kits

Equipos para Reparación de Bote Salvavidas

ライフボート用補修キット 救生船修补工具箱

Used for lifeboat leakage repair in emergency. Consists of polyester resin, hardener, glass fibre mat, wool roller, etc. The ThistleBond kit is also used for the repair of liferaft containers.

Unit Per Set

CODE	33 02 87	33 02 88	33 02 89

Lifeboat Embarkation Ladders

(Ref. JIS F2617-2012)

Escalas de Botes ライフボート用なわばしご 登乗梯

This lifeboat embarkation ladder conforms to ISO 5489 -2008, SOLAS 1974 & LSA Code. When ordering, please specify the length required.

Specifications	
Length	According to users option but the overall length must be an integral multiple of 330 mm and be enough to ensure safe embarkation from the boat deck even when the ship is at its lightest sea-going draught and is listed 15 degrees to the opposite side.
Material	Steps are hard wood and step fixtures must be secured on both top and bottom of each step. The bottom 4 steps may be made of rubber of sufficient strength and stiffness. Side Rope 22 mm Manila Rope or 22 mm Synthetic fibre rope
Step Size	Length 525 mm, Width 115 mm, Thick 28 mm
Step Space	330 mm ±20
Side Rope Distance	400 mm

33 02 96	Lifeboat embarkation ladder overall length mtrs	Pc.

Liferaft Accessories

Accesorios para Balsa Salvavidas
救命いかだの艤装品　防寒防水救生服

International Life-Saving Appliance (LSA) Code, Regulation Chapter 4.1.5.

CODE	Description	Quantity
33 01 75	Thermal protective aid	Minimum 2 pc. For 25 men capacity, minimum. 3 pc
90	Radar reflector	1 pc.

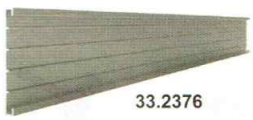
Photoluminescent Low Location Lighting System

LLL Strips

The simplest option to install the photoluminescent rigid strips, 35 mm, 57 mm, and 83 mm widths, is to reuest from with a self-adhesive backing foam which will allow you to paste them directrly to the wall of the escape route walkways.

33.2332 1000 × 35 mm LLL stips for wall marking
33.2331 1000 × 57 mm LLL stips for wall marking
33.2333 1000 × 83 mm LLL stips for wall marking

Aluminium LLL Carrier



Consisting of an aluminium carrier extrusion with a rigid photoluminescent PVC insert, which provides a quick and easy installation, combined with rugged and durable quality. We can supply in two sizes which offer a 54mm visible width of Class B photoluminescent or 32mm Class C photoluminescent. LLL signs should be used to give direction indication. End caps are available to neatly terminate the extrusion where required.

33.2394 - Angle Aluminium Rail 57 × 2000 mm
33.2395 - End cap Angled Rail 57 mm right
33.2397 - End cap Angled Rail 57 mm left
33.2376 - Aluminium rail for LLL strips 35 × 2000 mm
33.2377 - Plastic 35 mm end cap for aluminium rail
33.2378 - Aluminium rail for LLL strips 57 × 2000 mm
33.2379 - Plastic 57 mm end cap for aluminium rail
33.2388 - Aluminium rail for LLL strips 83 × 2000 mm
33.2392 - Plastic 83 mm end cap for aluminium rail

A range of signs sized to fit the systems above. The signs are printed on transparent, heavy duty vinyl which allows the photoluminescent LLL strip to shine through, highlighting the printed symbol.
The signs are supplied in packs of ten.

Self Adhesive Photoluminescent Tape

Installation

When used as part of a low location lighting system, the installer must ensure that there is sufficient ambient light available to activate the tape to attain the required performance.

Fire control symbols (ISO 17631), on self adhesive photoluminescent vinyl

Regulations:

ISO 17631 requires the use of these symbols on fire plants and booklets for new vessels or where existing fire plans have been significantly modified. These symbols are currently intended for use solely on fire plans, but in response to requests from the industry they are offered as signs to identify actual equipment where no standard sign is available. Purchasers should be aware that they are not currently recommended for use as signs by any official body. Although this situation may change if the future, there is no guarantee that the designs will be identical to those shown below.

Regulations:

ISPS Code Part B Section 9 requires the identification of restricted areas, access notices and forms of declaration. Part B 16.23 also requires that port facilities show similar identification.

ISPS Code 2003 edition SOLAS amendments came into force in July 2004 and require certain areas to have restricted access and be identified as such.

Temporary Tie Tags

Installation:

Tie tags are required wherever a need occurs to temporarily mark items and areas for safety reasons, usually during maintenance and in connection with the permit to work system. These tags are printed on a semi - rigid PVC with a matt finish to allow an authorisation signature and the date to be added in pen. The tags are supplied in packs of ten and come complete with cable ties for easy fixing.

N.B. Unlawful copies of ISM posters endanger crew and passenger safety.

Pipe Identification Tape, in accordance with ISO 14726

Installation

Pipelines should be marked at least once in each room; at each penetration point in bulkheads and decks, close to each valve and within a distance of 3 - 5m along the length of the pipeline. Local conditions may require more marking due to pipe bends or the close proximity of pipes for different services.

Prior to application, pipes should be dust and oil free. The tape should overlap by at least 20mm on the 'blind side' of the pipe, however on pipes with an external circumference of over 200mm the tape only needs to cover half the circumference of the pipe.

Waste Media	Ref. Nos.
Black water	33.2140 - 33.2141 - 33.2140
Waste oil/Used oil	33.2140 - 33.2142 - 33.2140
Bilge water	33.2140 - 33.2143 - 33.2140
Exhaust gas	33.2140 - 33.2144 - 33.2140

Fire Plan Holders

Portadocumentos de Extinción
消火計画書ホルダー　消防計劃書袋

This UPVC holder with weatherproof screw end cap comes complete with fixings and has been specifically designed to comply with the requirements of the SOLAS regulations. It has a length of 1 m and OD of 110 mm enabling Fire Plans up to size A0 to be accommodated without the need to fold the plan.

Pyrotechnics

Pirotecnia　救難信号　拯救灾难信号

Required Quantities of Distress Flares for Vessels, Lifeboats and Liferafts by the 1983 amendment to SOLAS 1974.

I) For Vessels

Regulation	Description	Required Quantity
17 & 49	Line throwing applicances 救命索引発射器	Includes no less than 4 projectiles, each capable of carrying the line at least 230 mtr.
6 - 3	Rocket parchute flares 落下傘付き信号	No less than 12 pcs must be stowed on or near the navigation bridge
7-1.3	Self-igniting lights 自己点火灯	No less than one half of the total number of lifebuoys
	Ship's length under 100 mtr 100 - 149 mtr 150 - 199 mtr 200 mtr and over	Quantity 4 pcs. 5 pcs. 6 pcs. 7 pcs.
	Self-activatiing smoke signals 自己発煙信号	No less than two of the total numbers of lifebuoys
	Manoverboards マノーバーボード	Substitute for above self-activating smoke signals, combined with self-igniting light
	Rocket star signals 火せん	6 pcs

II) For Lifeboats and Liferafts

Regulation	Description	Required Quantity
38 - 5.1 and 41 - 8	Rocket parachute flares 落下傘付き信号	4 pcs.
	Hand flares 手用信号炎	6 pcs.
	Buoyant smoke signals 発煙浮信号	2 pcs.

Major Pyrotechnics Comparison Table

A full range of distress signals are available from several manufacturers as listed below, under the SOLAS '83 regulations which conform to maritime approval authorities throughout the world.
When ordering, please specify the following points:

1. CODE number..... 33 03 01
2. Description..... Line throwing apparatus
3. Name of Mfr..... PainsWessex
4. Brand..... Linethrower 250
5. Classification ..... M.E.D
6. Quantity ..... Set

Line Throwing Apparatuses

Lanzacabos 救命索発射器 抛绳器

Self-contained rocket-powered line-throwing unit designed for ship-to-ship and ship-to-shore operations as well as for the rescue of people in distress at sea.

One line throwing apparatus is required to be equipped, which includes not less than 4 projectiles each capable of carrying the line at leastf 230 mtr in calm weather.

Line Throwing Apparatus Complete

CODE	Brand	Model	Unit
33 03 01	PainsWessex Linethrower 250, comprising body + Line (9500700) and rocket (9500800)	9502000	Pc.
33 03 09	PainsWessex Linethrower 250, with 4 unit complete	950200×4	Set

Manoverboards

Manoverboards (Hombre al Aqua)
マノーバーボード 人员落水信号

Combined light and smoke lifebuoy marker. Day and night signal which is attached to a lifebuoy (not supplied) and used in an emergency to mark position of a manoverboard.

1) Colour of smoke	Dense orange smoke
2) Duration of burn time	15 minutes
3) Light intensity and duration	Minimum 2 candela for 2 hours
4) Ignition	Pull-wire igniter

Pneumatic Line Thrower
PLT® Rescue 230

Lanzador Neumático de Cable Salvavidas
圧縮空気救命索発射機　气动抛绳器

The PLT® Rescue 230 meets the IMO SOLAS regulation 74/96. There is no expiry-date which means it will stay on board for the lifetime of your vessel. A stand-by tool for rescue purposes. The training projectile allows easy live training and line transfer at no cost. Launching unit with air cylinder holds sufficient air for 4 - 6 launches before refilling from a high pressure compressor (200 – 300 bars) or a diving cylinder. Holds Type approval, CCS approval, USCG approval and MED B&D certificate from DNV. NATO no.1095-25-142-3704.

Technical Data		Contents
Range	: Min. 230 mtr	4 Rescue projectiles

Line Throwing Appliance Electric Ignition Type

Lanzador de Cable Salvavidas con Chispa Eléctrica
電気点火式救命索発射器　电动抛绳器

Designed for portable, compact, safe and ease of operation, and projects a line to a normal range 230 mtr in calm weather condition, conforms to LSA code and IMO Resolution M.S.C. 81 (70).

It provides a new ignition system which can be fired by a self-contained electric ignition mechanism. The line-throwing device can be used from ship to ship or ship to sea shore and also is suitable for rescue operation at sea and on land. Effective period of rockets and igniter: 3 years and 6 months. The spares (Rockets, igniter and liners) are available on request.

Composition
1 Plastic casing with an igniter
4 Rockets
4 Lines
1 Container for rocket and lines

33 13 47	Line throwing appliance, electric ignition type, Koa Kako KM5E	Set

Communication Systems

for SCBA

Sistema de Comunicación para SCBA
自蔵式呼吸具用コミュニケーションシステム
SCBA 用通訊系統

By simultaneous use of a SCBA and a radio, communication is getting difficult in a noisiness area.

Communication system exist of a combined microphone – speaker, wired to a radio connector with a PTT(Push to Talk) knob, connected to the full face mask by a radio-exhalation valve adapter. Or to be used without full face mask.

Loud and clear communication is possible, even in combination with a full face mask. Other option is to use it in a gastight suit.

Connection with a wide range of brand and types of radios is possible.

Emergency Escape Breathing Devices

Equipos de Respiracón en Caso de Evacuación de Emergencia
非常脱出用呼吸具　救生呼吸器

Required by SOLAS 1974 in regulation 13 revised in 2000, all ships shall carry at least two Emergency Escape Breathing Devices (E.E.B.D.) within accommodation spaces for providing respiratory protection in toxic and oxygen deficient atmospheres. On all ships, within the machinery spaces, E.E.B.D. shall be situated ready for use at easily visible places, which can be reached quickly and easily at any time in the event of fire. The location of E.E.B.D. shall take into account the layout of the machinery space and the number of persons normally working in the spaces. The E.E.B.D. should have at least a duration of service of 10 minutes and should include a hood or full face piece to protect the eyes, nose and mouth during escape, complying with the Fire Safety Systems (F.S.S.) Code. Hoods and face pieces should be considered flame resistant and include a clear window for viewing. An unactivated E.E.B.D. should be capable of being carried hands-free.

Emergency Escape Breathing Devices

Single Use Type

Respirador de Escape de Emergencia del Tipo de Uso
使い切りタイプ非常脱出用呼吸器　使用型紧急逃生呼吸器

The M-20.2 is a self-contained, closed-circuit breathing apparatus for single use which do not require to refill the oxygen. The compressed oxygen delivery system activates

automatically when the device is removed from the clear case. The demand regulator allows the user to inhale immediately from the device when donned and provides up to 100 liters of oxygen flow during high work rates.

The M-20.2 can be either belt-worn or stored and is used in multiple markets to protect the user during escape from toxic, or oxygen-deficient atmospheres.

Specification

Oxygen Delivery	Automatic on, demand regulated
Performance Duration	10 minutes - NIOSH Approved 15 minutes - CE Marked
Donning Time	Less than 10 seconds
Service Life	15 years
Storage Temperature	-12.2 to + 65°C
Approvals	MED, CE/EN13794, NIOSH, NK, HK
Weight (kg)	1.4
Dimensions (mm)	69 x 167 x 155

33 04 43	Emergency Escape Breathing Device, Single Use Type	Set

Airline Trolley

Lineas Aéreas Universales
ユニバーサル・エアーライン
萬能軟管（氣體用）

Uninterrupted air supply is provided by the trolley-mounted cylinder(s) to the wearer via a hose reel. As the air-trolley can be easily re-located and therefore positioned in a safe zone which is in close proximity to working area, the user need only wear a lightweight harness during operation. This allows the wearer a greater freedom of movement, and less stress and fatigue than they would be subjected to if wearing a conventional self contained breathing apparatus unit.

The air-trolley is able to accommodate up to four compressed air cylinders of up to 12 litres in capacity and is constructed from an anti-static powder coated steel material. The trolley hose reel connector is protected with a cover to minimize inadvertent damage being caused. The system incorporates a safety pressure relief valve and the pressure reducer is shrouded in a protective plate for additional safety.

Application: Chemical tank cleaning, toxic spillages or certain tasks when working on offshore installations

Breathing Air Quality Tester

Probador de la calidad del aire de respiración
呼吸器用空気品質検査器　呼吸空气质量测试仪

Used to determine the quality of respiratory air in high-pressure compressor or a compressed air cylinder. The application of the test system ensures the reliable testing in accordance with the purification standard EN 12021. This quick check guarantees a reliable measuring result and provides information regarding the level of contamination within five minutes. In compliance to IMO MSC Circular.1/Circ.1432 on Revised guidelines for maintenance and inspection of fire protection systems and appliance for air quality of breathing apparatus air recharging systems.

Multi-Toxic Gas Monitor

Monitoer de Múlutiples Gases Tóxicos

酸欠事故防止用ガス検知器　多功能有毒气体检测仪

GX-3R / GX-3R Pro

A four to five gas personal monitor with advanced features including large LCD which can display 4-5 gas concentrations, current time, and battery indicator, temperature and peak reading simultaneously. Compact, lightweight tough design to withstand 7m drop.

* Simultaneously and read-time detection of 4 gases LEL, O_2 (Oxygen), H_2S (Hydrogen Sulfide) and CO (Carbon Monoxide).

  GX-3 Pro you can add one more gas detection from SO_2 and CO_2 as option.
* Rechargeable Lithium-ion battery pack.
* Continuous operation for up to 40 hours.
* Data logging standard.
* STEL (Short Term Exposure Limit) and TWA (Time Weighted Average) readout.

SC-8000

Reliable portable toxic gas detector with waterproof protection. It will operate correctly in any challenging situation to protect workers with real time detection with ppm range.

Unit Per Set

CODE	33 05 59
Model	SC-8000
Sampling method	Sample draw
Principle of detection range	
Power source	Lithium-ion battery, Alkaline AA 3 pcs
Battery life	Lithium-ion battery : 25 hours Alkaline AA : 18 hours
Operating temperature	-10°C ~ 40°C
Ingress Protection	IP 67
Dimensions	154 (W) x 81(H) x 164 (D) mm
Weight	1.1 kg
Name of Mfr	Riken Keiki Co., Ltd.

Combination Gas Detectors

Detectores de Gases Combinados

多目的ガス知器　四合一气体检测仪

Designed for detecting oxygen, combustible gas and toxic gas in the atmosphere. Providing full-function capability in a personal monitoring device.

Portable Type

Unit Per Set

CODE	33 05 21
Model	GX-8000
Detection Principle and range	Combustible gases (CH_4, i-C_4H_{10}, H_2, others): Thermal conductivity: 0-100 VOL% (1 VOL%) Catalytic combustion: 0-100%LEL (1%LEL) O_2: Galvanic cell 0-40 VOL% (0.1%) H_2S: Electro-chemical cell 0-100.0 ppm (0.5ppm) CO: Electro-chemical cell 0-500 ppm (1 ppm)
Sampling Method	Sample draw, minimum 0.75 l/min
Display	Digital LCD with auto backlight Digital display (7 segments) and digital bargraph (25 segments)
Gas Alarm	Combustible gases: Thermal conductivity: N/A Catalytic combustion: 1st 10%LEL, 2nd 50%LEL O_2: Low 19.5 VOL%, High 23.5 VOL% H_2S: 1st 5.0 ppm, 2nd 30.0 ppm, TWA 10.0 ppm, STEL 15.0 ppm CO: 1st 25.0 ppm, 2nd 50.0 ppm, TWA 25.0 ppm, STEL 200 ppm,
Types of Alarm	Gas alarm: latching, 2 alarms Failure alarms : Flow failure, sensor failure, battery failure, circuit failure, calibration failure
Display of Alarm	LED: LED's flash Buzzer: Buzzer sounds alternating between a low and high pitch Visual indication: Indication value flashes. Alarm message displays and flashes.
Power Source	Lithium-ion battery, standard (3 hours for a full charge) AA Alkaline battery (3 pcs), option
Continuous Operation	Lithium-ion battery: more than 12 hours AA Alkaline battery: more than 6 hours
Ingress Proof Rating	Equivalent to IP67
Explosion Proof	Intrinsically safe Exia II CT4
Approvals	IECEx , ATEX, TIIS, MED, HK, CE mark, Complying to IEC60079-29-1
Additional Features	Indication to show energizing (pilot indicator and pump driving indicator), "Activating confirmation beep and LED's flash (every one min)" Pump stop function, Bump test function, IrDA communication, Data logger, Password protection
Dimensions	Approx. 154 (W) × 81 (H) × 130(D) mm
Weight	Approx. 1.1 kg
Standard Accessories	AC powered charger (Input: AC100V-AC240V, 50/60Hz, Output: DC12V, 1.25A) Gas sampling probe Gas sampling hose (Spiral 1 mtr) Lithium-ion battery unit BUL-8000 Neck/shoulder strap Instruction manual

Multi Gas Detectors

GasAlertQuattro

Detectores de gases múltiples
マルチガス検知器　多气体探测器

A four-gas detector combines a comprehensive range of features with simple one-button operation, suited to a wide range of industrial applications including confined space entry. The graphic LCD displays easy to identify icons that indicate operational information, such as bump test and calibration status for simplified onsite auditing. Interchangeable power options with extended battery runtimes for longer shifts. Full function self-test of sensor(s), battery status, circuit integrity and audible / visual alarms on start up and continuous testing on sensor(s). Multi-language support in English, French, German, Spanish and Portuguese.

Sensor Specifications

Gas	Measuring Range	Resolution

Combination Gas Detectors

Detectores de Gas Combinados
多目的検知器　多功能探测器

Designed for detecting, combustible gas in the atmosphere. Providing full-function capability in a personal monitoring device.

MSA ALTAIR 5X/ALTAIR 5X-IR

The rugged, multi-featured MSA ALTAIR 5X Gas Detector provides maximum safety and make it easy to use in even the most demanding situations. It features large buttons for easy use, and its polycarbonate housing protects the detector for drops of up to 10 feet. The detector also boasts the exclusive MotionAlert™, which lets others know if the user has become immobile, and InstantAlert™, a manual alarm that alerts others if a dangerous situation has arisen, while the large buttons and bright display makes operation possible even when the user is wearing gloves.

Approvals:

USA/NRTL [Intrinsic Safety, Non-Mining]/Canada/CSA [Intrinsic Safety, Combustible Performance, Non-Mining]/ Australia [Intrinsic Safety, Industrial Mining–TestSafe]/ European Union ATEX–FTZU [Intrinsic Safety, Industrial and Mining]/IECEx [Intrinsic Safety, Industrial and Mining-Test Safe]/Wheelmark 213.050 Complying with SOLAS 74/78 Chapter II-2/4 and VI/3, as amended IMO Resolution MSC.98 (73) - (FSS-code) 15.

- Rugged detector tests levels of LEL.
- Rapid bump test gives results in under 15 seconds .
- Versatile MSA Link™ allows user to transmit data to a computer.
- Durable XCell sensor last longer than 3 years.
- Exclusive end-of-sensor warning cautions user when unit's sensor needs to be changed.
- Polycarbonate housing is both dust-tight and water-tight.

MSA ALTAIR 4X

The ALTAIR 4X Multigas Detector surpasses industry standards in several crucial areas. Its four-year sensor life is 60% longer than the industry average, while its 24-hour run time exceeds the industry average by 71%. This versatile portable detector is a perfect match for industries ranging from firefighting to welding, and its digital sensor output makes it less likely to suffer from RF interference. The unit features exclusive MotionAlert™, which lets others know if the user has become immobile, and InstantAlert™, a manual alarm that alerts others of potentially dangerous situations. This rugged unit is designed to withstand a drop of up to 20 feet and uses less than half as much calibration gas as the industry average.

Approvals:

USA: ETL Class I, Div. 1, Groups A,B,C&D , Tamb=-40°C to +54°C, ETL Class II, Div.1, Groups E,F&G, Class III, Div. 1, Tamb=-40°C to +54°C; T4 / CANADA : CSA Class I, Div. 1, Groups A,B,C&D, CAN/CSA C22.2 152; 12.13.01-2000, ETL Class II, Div.1, Groups E,F&G, Class III, Div. 1, Tamb=-40°C to +54°C; T4 / Australia/New Zealand TestSafe Australia/ European Union ATEX – FTZU [Intrinsic Safety, Industrial and Mining]/Wheelmark 213.048: Complying with SOLAS 74/78 Chapter II-2/4 and VI/3, as amended IMO Resolution MSC.98(73)-(FSS-code) 15.

- Dependable multigas detector tests for LEL.
- Economical construction saves users more than 50% on calibration gas, replacement sensor and maintenance.
- Unit uses 50% less calibration gas per minute than the average detectors within the industry.
- Large buttons and high-contrast screen make operation easy in low-light conditions.
- Ribbed rubber housing provides secure grip and high durability.
- Unit features 95+ db alarm and ultra-bright LEDs.
- Exclusive end-of-sensor warning cautions user when unit's sensor needs to be changed.

Personal Multi Gas Detection Devices

Dispositivos Personales de Detección de Gases Múltiples
パーソナル可燃性ガス検知器　个人可燃气体探测器

Designed to be a compact, robust, easy to use instrument for either flammable gas detection, or flammable and oxygen detection.

With a large LCD display, loud acoustic and bright optical

alarm with vibrating battery option, the X-am 2500 gives clear warning of a hazardous atmosphere and is, therefore, suitable for a wide range of personal monitoring and confined space entry tasks.

With EEx iad IIC T4 and IP67 approval, the X-am 2500 is suitable for the most demanding of environments.

3 years Warranty.

Multi-Gas Detector

Draeger X-am® 5000

Detector Multigas
多種ガス対応検知器　多气体检测器

This 1- to 5- gas detector reliably measures combustible gases and vapors as well as O_2 and harmful concentrations of toxic gases, organic vapors, Odorant and Amine. It is easy to exchange, upgrade or calibrate the sensors to other gases. The X-am 5000 provides dependable warnings in the event of explosive atmospheres thanks to the high level of sensitivity of the innovative catalytic Ex sensor. The optional external pump, which operates with a hose up to 30 (98 feet) meters long, makes it possible to use the detector for pre-entry measurements into confined spaces such as tanks, shafts, etc. Consisting of basic instrument with an integrated data logger and manufacturer's and calibration certificates.

Multi-Gas Detection Device

Draeger X-am® 5600

Dispositivo de Detección de Gases Múltiples
多種ガス対応検知器　多气体检测器

The smallest gas detection instrument for the measurement of up to 6 gases. This detector reliably detects explosive, combustible and harmful concentrations of O_2, Cl_2, CO, CO_2, H_2, H_2S, HCN, NH_3, NO, NO_2, PH_3, SO_2, O_3, Amine, Odorant, $COCl_2$ and organic vapors. Draeger infrared sensors for detection of CH_4 in inert or oxygen depleted condition and can generally be used for up to eight years. This advanced technology reduces the cost of ownership considerably because less replacement sensors are needed. In addition, a sensor calibration is only necessary every 12 months which reduces maintenance costs. An optional external pump which can be operated with hoses up to 30 m or 98 ft. in length is the perfect solution for pre-entry measurements in tanks or pipelines. The small and reliable gas detector is suitable for use in areas classified as zone 0, which are areas where explosive atmospheres are always to be expected.

Consisting of basic instrument with an integrated data logger, support CD, manufacturer's and calibration certificates.

Multi-Gas Detectors

X-am® 8000

DetectoresMultigas　マルチガス検知器　多种气体探测器

Measures up to seven toxic as well as flammable gases, vapours and oxygen all at once—either in pump or diffusion mode. Innovative signaling design and handy assistant functions ensure complete safety throughout the process. It can be connected with hoses of up to 45 mtr in length. An optional Bluetooth® module in the X-am 8000 enables measured values to be transferred automatically to the CSE Connect app. You can also use the app to create measurement reports. In case of an alarm, the X-am 8000 alerts you with colourful alarm LEDs, a loud horn (100 dB (A) at a distance of 30 cm), and clearly palpable vibration.

Specification:

* Dimensions (H x W x D): 179 x 77 x 42 mm.
* Weight: Approx. 495 grm depending on sensor configuration, without strap and pump.
* Ingress protection class: IP67.
* Energy supply: Lithium-ion battery, rechargeable, inductive charging.

Class I, Zone 0, AEx da ia IIC T4 Ga / Class II, Div 1, Gr. E, F, G T4 / C22.2 No. 152, ANSI-ISA 12.13.01:2000
CE labeling
MED/DNV (Please contact Draeger regarding availability.)

Selectable device options when ordering;

* Integrated pump with pump adapter
* Bluetooth® module
* RFID transponder

Please contact your local supplier more about sensors and accessories of your necessary jobs.

33 05 83	Multi Gas Detector, Draeger X-am 8000	Set

Name of Mfr. Draeger

Single-Gas Detectors

Pac® 8500

Detector de Gas　シングルガス検知器　单一气体检测仪

A reliable and precise instrument even under the toughest conditions. The device can be equipped with a hydrogen-compensated CO sensor or a dual sensor. This gives you the option of measuring two gases at once: either H_2S with CO or O_2 with CO, and detect of even low concentrations – and all in one and the same handy device. You can take vol.% measurements of oxygen and ppm measurements of carbon monoxide simultaneously using just one sensor. The Pac 8500 also provides a data and event logger for logging concentrations. Data can be loaded on a PC via an interface and processed further there.

The shock-proof, chemical-resistant housing meets the requirements specified in the IP68 standard rating. In case of an alarm, it sets off an audible, visual and perceptible vibrating alarm. All of the versions of the Pac 8500 are equipped with extremely durable DraegerSensors® and a powerful battery. Please contact your local supplier more about sensors and accessories of your necessary jobs.

Unit Per Set

CODE	33 05 84		
Model	Pac 8500		
Measuring Range	H_2S/CO 0–100 ppm H_2S 0-2,000 ppm CO	O_2/CO 0–25 Vol.% O_2 0–2,000 ppm CO	CO-H_2CP 0–2,000 ppm
Alarm Thresholds A1/A2	5/10 ppm H_2S 30/60 ppm CO	19/23 Vol.% O_2 30/60 ppm CO	30/60 ppm
Battery Service Life	1 year (O_2 sensors min. 10 months)		
Approval	cCSAus, IECEx, ATEX, CE		
Dimension (W×H×D)	64 × 84 × 20 mm		
Weight	106 grm

Bumptest and Calibration Station for Gas Detectors

Puesto de Prueba Funcional y Calibración de Detectores de Gases
ガス検知器用機能及び較正試験装置
气体探测器用冲撞及校正测试装置

An automated test system provides simple and intelligent testing and calibration of multigas detectors, driven by the most advanced technology available in any portable gas detector. The gas provided by the Bump Test Station flows through the dust and water filter to the sensor(s) confirming correct functionality of the gas detector ensuring compliance with country-specific requirements and regulations, standards, recommendations, etc. Once any gas detector is placed in this system, it can be tested, calibrated automatically.

Calibration and Bump Testing

Draeger X-dock® 5300/6300/6600

Aparato de Prueba Funcional y Calibración
較正及びバンプテスト装置　校正及通气测试装置

The X-dock 5300 includes a master station including a module for a gas detection instrument from the X-am 1/2/5x00 or Pac family. It is immediately ready to use.

The X-dock 6300 and 6600 versions can be configured freely. They consist of a master station and can be expanded with up to 10 modules for X-am 1/2/5x00 and/or Pac gas detection instruments.

Insert the device, close the lid and remove it when the indicator goes "green" – a test with the X-dock is just that simple. It immediately detects all sensor combinations. Furthermore, the X-dock automatically tests and adjusts when all required test gases are connected.

The X-dock stores all of the relevant data and reads the collected information from the gas detection instruments for subsequent evaluations. All Draeger test gas cylinders are already stored in the database – entering the part number will automatically fill in the fields required for the gas configuration.

<X-dock Master Technical Data>

Protection Class	IP20
Power Supply (power up to 3 modules)	Via 24V (8321849) power supply or car adapter
Approvals	CE marking

External Pump for Multi-gas Detectors

Draeger X-am® Pump

Bomba externa para detectores de gases múltiples
多種ガス検知器用外付けポンプ　多气体探测器外置泵

An external pump for the portable gas detectors Draeger X-am® 2500, 5000, and 5600 – designed for clearance measurement, for example in tanks and shafts. The X-am pump can reach the ambient atmosphere in inaccessible places – up to a distance of 45 m, e.g. in channels, shafts, or tank systems. The pump has an explosion protection approval for Ex zone 0.

The battery capacity lasts for three workweeks at 8 measurements per day (i.e. up to 20 hours of continuous operation).

Unit Per Set

CODE	**33 06 76**
Model	X-am pump
Item No.	83 27 100
Max. Hose Length	45 mtr NOTE: The sampling hose sold sepalately.

Halogen Refrigerant Leak Detectors

Detectores Halógenos de Fugas de Refrigerante
ハロゲンガス検知器　卤素制冷剂检漏仪

A hand held detector able to detect all halogen refrigerants(CFC, HCFC, HFC and HFO) enabling you to find leaks in your refrigeration system. Seven-segment visual leak size indicator, audible alarm, cordless, and supplied in carrying case and spare sensing tip.

CODE	33 05 35
Model	Unirx-1A
Detection mode	Microprocessor controlled circuit with advanced digital signal processing.
Sensitivity	Better than 5 ppm
Sensor	Corona Sensor
Display	LED
Power Supply	3 V DC
Batteries	2 × C cell alkaline (LR-14/AM-2)
Battery Life	30 hrs normal operation
Size	229 × 57 ×57 mm
Weight	560 grm
Approval	UL classified and CE approved
Name of Mfr.	Wilhelmsen Ships Service Co., Ltd.

Portable Toxic Gas Meters

Medidores portatiles de gases toxiicos
有毒ガス検知器　有毒气体检测器

A portable toxic gas meter with the following features.

- Peak hold function enable to memorize maximum density.
- Alarm is two-staged type (AL1 and AL2).
- Auto-zero function can calibrate automatically at the time of power-on.
- Long-life sensor (2 years, 1 year warranty).

Measurable Gas

Model	TIP-HS	TIP-HY
Measurable Gas	H_2S (Hydrogen sulfide)	H_2 (Hydrogen gas)
Measuring range (ppm) Low/High range	0-20/0-100	0-400/0-2,000
Resolution (ppm)	0.1	2
Alarm Level (ppm) AL1/AL2	5/25	100/500

Portable Gas Leak Detector

Detector de Fugas de Gas Portátil
ポータブルガス漏れ検知器
便携式气体检漏仪

Handy type of highly sensitive lightweight gas leak detector for Toxic, Combustible and CFC Freon gases. It uses a hot-wire semiconductor sensor (MOS) to detect a range of target gases from the list of 40 gases.

Unit Per Set.

CODE	33 06 79
Model	SP-220 TYPE SC
Sampling method	Suction Type
Principle of detection range	Hot Wire Type Semi-Conductor Method
Detection Range	Depend on target gas
Type of alarm	Gas alarm/Fault alarm Display: Lamp blinking/intermittent buzzer sounding
Ingress proof rating	IP55
CE marking	EMC/RoHS
Power source	AA alkaline battery × 2
Continuous operation	12 hours (normal temp. w/o alarms)
Dimensions	Approx. 43 (W) × 200 (H) × 39 (D) mm
Weight	Approx. 215 g (w/o batteries)
Operating Temperature range	-20°C ~ +55°C
Operating Humidity range	95% RH or less (Non-condensing)
Target Gases	PH_3, C_3H_6O, AsH_3, NH_3, i-C_4H_{10}, IPA, CO, C_2H_5OH, C_2H_4, VCM, CH_3CL, C_8H_{10}, EO, SiH_4, CH_3Br, H_2, C_2HCL_3, C_7H_8, EDC, SO_2, C_3H_8, r-134a, r-22, r-32, n-C_6H_{14}, C_6H_6, HCHO, CH_4, CH_3OH, MEK, H_2S, B_2H_6, GeH_4, HBr, HCL, r-407c, H_2Se, r-410a, r404a, $CH_2C_2F_4$
Name of Manufacture	Riken Keiki

Tube Type Gas Detectors

Detectores de Gases tipo Tubo
ガラス管式検知器　MSA 气体抽样泵（活塞式）

Measured value can be read-off directly and immediately via colour indication. It consists of sampler pump and tubes. A wide variety of tubes are available, applicable to the gas being tested. The most common tubes are discussed below.

KWIK-DRAW™

Draeger

Kitagawa

Uniphos

33 05 40	Tube type gas detector, Kwik-Draw™ Model Kwik-Draw Deluxe	Pc.
33 05 53	Tube type gas detector, Kwik-Draw™ Model Gas Tester II H	Pc.
33 05 54	Tube type gas detector, Kwik-Draw™ Model Gas Tester I	Pc.
33 05 60	Tube type gas detector, Draeger Model Accuro	Pc.
33 16 51	Tube type gas detector, Kitagawa Model AP-20	Pc.
33 16 72	Tube type gas detector, Uniphos Model ASP-40	Pc.

Tubes for Gas Detectors

Tubos para Detectores de Gas　ガス検知器用チューブ　气体检测仪用管

All tubes are sold 10 tubes each per pkt.

Tube Type Gas Detectors

All-in-one Automatic Tube Pump

Detectores de Gases tipo Tubo

チューブ式検知器　　MSA 气体抽样泵（活塞式）

The automatic tube pump is the first all-in-one solution designed for measurements with all Dräger short-term tubes and for sampling tubes and systems. Ease of operation and a high degree of reliability compliment the measurement and sampling of gases, vapours and aerosols.

Specification

Short-term Measurements	Using Dräger short-term tubes Number of strokes: adjustable, 1 to 199 strokes Stroke volume: 100 mL
Sample Taking	Flow rate range: 0.1 to 2.0 L/min Resolution: 0.1 to 1.0 L/min: 0.1 L/min ±5% Resolution: 1.0 to 2.0 L/min: 0.2 L/min ±5% Sampling time: adjustable, up to 12 hours, depending on flow rate Resolution in steps of 15 minutes (default) or 1 minute
Display	Two Parts: Segment and matrix
Use of Extension Hose	Up to 30 mtr (98 ft.)
Power Supply	Rechargeable Battery NiMH, T4: 7.2 V, 1,500 mAh (charging time < 4 hours) Alkaline Battery Pack, T4: 6 AA cells, (see battery pack label for approved battery types)
Battery Capacity at 25°C (77°F)	Dräger short-term tubes: >1,000 strokes Sample taking: up to 12 hours, depending on adjusted flow rate
Approvals	ATEX: Ex ia IIC T4 Ga Ex ia I Ma I M 1 / II 1G MED UL: Class I, Div. 1, Group A, B, C, D Class II, Div. 1, Group F, G 5°C ≤ Ta ≤ + 40°C Temp. Code T4 Ex ia UL: Class I, Div. 1, Group A, B, C, D Class II, Div. 1, Group F, G 5°C ≤ Ta ≤ + 40°C Temp. Code T4 Ex ia IECEx: Ex ia IIC T4 Ga CE-mark: according to 2004/108 EC and 94/9/EC
Dimensions (H × W × D)	Approx. 175 × 230 × 108 mm (7" × 9" × 4.25")
Weight (w/o battery pack)	Approx. 1.6 kg (3.5 lbs)

Name of Mfr. Draeger

CODE	Description	No.	Unit
33 05 72	Automatic Draeger Tube Pump, Model X-act 5000, without power supply	3707674	Pc.

Volatile Organic Compounds Detectors

Detectores de compuestos orgánicos volátiles
揮発性有機物質検知器　挥发性有机物质探测器

Designed to replace all range of gas tubes, it is a revolutionary handheld PID instrument for rapid, accurate detection of volatile organic compounds (VOCs) with exceptional resistance to humidity and contamination. Fastest response time of just 2 seconds and is as quick to clear down. It is simple and, enables one handed operation. Its rugged design and protective, removable rubber boot withstand the harshest environments. Inexpensive consumables and parts, and 5 years warranty when instrument is registered online.

Unit Per Set

CODE	33 05 99
Model	MiniRAE 3000+
Range	Detect up to 480 VOC
Maximum Reading	15,000 ppm or 20,000 mg/m3 (gas dependent)
Accuracy	± 5% display reading ± one digit
Intrinsically Safe Approvals	US and Canada: CSA, Classified as Intrinsically Safe for use in Class I, Division 1 Groups A, B, C, D Europe: ATEX II 2G EEx ia IIC T4
Battery Life	• Rechargeable, external field-replaceable Lithium-Ion battery pack • Alkaline battery adapter • Runtime 16 hours of operation (12 hours with alkaline battery adapter)
Calibration	Standard calibration 100 ppm isobutylene Custom calibration capability
Alarm	95dB at 12" (30 cm) buzzer and flashing red LED to indicate exceeded preset limits. • High: 3 beeps and flashes per second • Low: 2 beeps and flashes per second • STEL and TWA: 1 beep and flash per second • Alarms latching with manual override or automatic reset • Additional diagnostic alarm and display message for low battery and pump stall Pre-programmed with over 480 gases*
Protection	• IP-67 unit off and without flexible probe • IP-65 unit running
Weight & Dimensions	10" L × 3.0" W × 2.5" H (255 × 76 × 64 mm) Instrument weight 26 oz (738 g)

Carbon Monoxide Gas Alarm

Detector de gas de monóxido de carbono
一酸化炭素感知器　一氧化碳探测器

A device for detecting the "Silent Killer", Carbon Monoxide, which is released when fuels are burnt inefficiently. Raising loud 85 db alarm and flashing RED LED light to alert when detecting the CO in the room. This alarm can be mounted on the ceiling or on a wall near the ceiling. Battery operated, five year lifetime, and chirp sounds and indicator light notify you the end of battery lifetime. This alarm comes with calibrated test gas kit to enable the unit to be inclusively tested on installation and annually over the expected life. Certified to BS EN 50291. Battery included. Hard wire version is also available.

Unit Per Set

CODE	33 10 12
Alarm Sound	85 dB
Alarm Light	LED × 3
Size	112 mm diam × 40 mm thick
Weight	130 grm

Name of Mfr.: Gas Safe Europe Ltd.

CO Alarm Test Gas Kit

Equipo de gas de prueba para alarmas de monóxido de carbono
一酸化炭素感知器テストキット　一氧化碳探测器测试套件

A calibrated test gas kit for sensor inclusively testing Carbon Monoxide (CO) alarms manufacturered to BS EN 50291(Europe) and UL 2034(USA). Low cost, safe and easy to use, this test kit ensures CO alarm sensors are still sensing CO. Sensors have a limited and underminable life and can be effected by airborne pollutants such a cigarette smoke, cooking fumes etc. Each kit contains a patented enclosure shroud which holds the test gas at the required level for a fixed time to facilitate a field sensor test. It contains sufficient test gas to carry out 11 tests per can.

33 10 13	CO alarm test kit, 11 tests/can, 400ml	Can

Name of Mfr.: Gas Safe Europe Ltd.

Test Gas for Gas Detector

Comprobador de Gases para Detector de Gases
ガス検知器用テストガス　气体探测器的测试用气体

For testing the accuracy of gas detectors. There are various type of test gases according to the type of gas, manufacturer of the gas detectors.

When ordering, please specify the following points.

How to order: 33 - 05 -
Test gas for gas detector, TYPE of GAS DETECTOR, MFR'S NAME, MODEL NAME, COMPOSITION of GAS, GAS DENSITY

Example of Combustible Gases and Toxic Gases

Combustible Gases

Gases		Molecular Formula (Chemical Formula)	Explosion Range (Vol%)
Acetone	アセトン	C_3H_6O	2.1～13.0
Acetylene	アセチレン	C_2H_2	1.5～100
Butyl Acetate	酢酸ブチル	$C_6H_{12}O_2$	1.2～7.5
Butylene	ブチレン	C_4H_8	1.7～9.0
City Gas	都市ガス	-	5～
Ethanol	エタノール	C_2H_5OH	3.3～19
Ethyl Acetate	酢酸エチル	$C_4H_8O_2$	2.0～11.5
Ethylene	エチレン	C_2H_4	2.7～34
Gasoline	ガソリン	-	1.4～7.6
Hydrogen	水素	H_2	4.0～75.6
i-Butane	ｉ－ブタン	C_4H_{10}	1.8～8.0
Kerosene	灯油	-	0.8～
Liquefied Propane Gas	ＬＰＧ	-	2～12
Methane	メタン	CH_4	5.0～15.0
Methanol	メタノール	CH_3OH	5.5～44
Methyl Ethyl Ketone	メチルエチルケトン	$CH_3COC_2H_5$	1.8～11.5
n-Butane	ｎ－ブタン	C_4H_{10}	1.5～7.8
n-Pentane	ｎ－パンタン	C_5H_{12}	1.4～7.8
O-Xylene	Ｏ－キシレン	$C_6H_4(CH_3)_2$	1.0～6.0
Propane	プロパン	C_3H_8	2.1～9.5
Propylene	プロピレン	C_3H_6	2.0～11.7
Toluene	トルエン	$C_6H_5CH_3$	1.2～7.0

Toxic Gases

Gases		Molecular Formula (Chemical Formula)	Explosion Range (Vol%)
Acetaldehyde	アセトアルデヒド	CH_3CHO	4.0～57
Acrylonitrile	アクリロニトリル	CH_2CHCN	2.8～28
Ammonia	アンモニア	NH_3	15～28
Arsine	アルシン	AsH_3	0.8～98
Benzene	ベンゼン	C_6H_6	1.2～8.0
Butadiene	ブタジエン	C_4H_6	2.0～11.5
Carbon Monoxide	一酸化炭素	CO	12.5～74
Chlorine	塩素	Cl_2	-
Diborane	ジボラン	B_2H_6	0.8～88
Ethylene Oxide	酸化エチレン	CH_2CH_2O	3.0～100
Germane	ゲルマン	GeH_4	0.5～50
Hydrogen Chloride	塩化水素	HCl	-
Hydrogen Cyanide	シアン化水素	HCN	5.4～46.6
Hydrogen Sulfide	硫化水素	H_2S	4.8～45.5
Methyl Bromide	臭化メチル	CH_3Br	10.0～15.0
n-Hexane	n－ヘキサン	C_6H_{14}	1.2～7.5
Phosgene	ホスゲン	$COCl_2$	-
Phosphine	ホスフィン	PH_3	1.3～9.8
Silane	シラン	SiH_4	0.8～98
Sulfar Dioxide	二酸化硫黄	SO_2	-
Vinylchloride	塩化ビニル	CH_2CHCl	3.8～29.3

Span Gases

Gas Patrón　スパンガス　気体气瓶

Span Gas for all types of gas detectors and analyzer. To help comply with standards, various types of calibration gas cylinders are available for your usage.

The most important accessory to any gas detector is a calibration kit, which provides the means to determine if the instrument is working properly. When using gas detection equipment, it is necessary to calibrate the equipment on a regular basis to guarantee accurate results. According to some regulations and standards, one must test the gas detector prior to each use with a suitable test gas.

Can Specifications

Type	34 L	58 L	110 L
Height × Diam	280×74mm	360×88mm	360×88mm
Weight in kg	0.7	0.8	0.8
Material	Aluminium Alloy		
Filling Pressure	500 PSI	500 PSI	1,000 PSI
Usable Gas	34 ltr	58 ltr	110 ltr
Connection	5/8" - 18 UNF (C-10)		
FillingTolerance	5-49 PPM ±10%, 50-500 PPM ±5% > 500 PPM ±2%		
Transportation	UN 1956 Class 2		
Mixture	Flammable, non reactive and reactive gases		

Type of Mixture Gases

A span gas comes in aluminum alloy cylinder. Please specify kind of gas with capacity of cylinder you request selecting from standard ranges in the following table. If other Mixtures are required, please specify Gas Type and Concentration.

Unit Per Can

Regulators and Accessories

Reguladores y Accesorios

調整器並びにアクセサリー　調整器及附件

Fixed Flow Regulators for 34 ltr, 58 ltr, and 110 ltr

Available for portable detectors with no pump or hand pump, also ideal for fixed head detectors. Flow rate 0.3 litres/minute, 0.5 litres/minute or 1.0 litres/minute.

Unit Per Pc.

CODE	Flow Rate	CODE	Flow Rate
85 15 93 **94**	0.3 ltr/min 0.5 ltr/min	**85 15 95**	1.0 ltr/min

Demand Flow Regulators for 34 ltr, 58 ltr and 110 ltr

Special Designed for gas detectors with built-in electric sample pump. Important gas is supplied at "Sample pump" normal working flow rate, hence ensures testing and calibration are similar to true operation conditions.

85 15 96	Regulator, demand flow, for 34 ltr, 58 ltr and 110 ltr	Pc.

Gas Sample Bags with Clip Valve

Sample Bags are available too for use with fixed equipment or pumped instrument.

85 15 99	Gas sample bag with clip valve	Pc.

Safety Handlamps, Primary Cell Powered

Linterna del Tipo Antiexplosivo Alimentado Poe Pikas Primarias
一時電池式防爆安全手提げ灯　主単元格的公式安全手提灯

For use in a wide range of potentially explosive gases, vapours, mists and dusts, the lamp has a highly impressive light output of up to 269 lumens and battery duration up to 45 hours.

Constructed from an anti-static, exceptionally robust and highly durable thermoplastic material, it is well able to withstand the effects of heavy industrial use. The lamp has an Ingress Protection rating of IP66.

The Wolflite Primary Cell Safety Handlamp H-4DCALED meets all relevant provisions of the 2014/34/EU Explosive Atmospheres (ATEX Equipment) Directive

Unit Per Pc.

Rechargeable Safety Handlamps

Lámparas de Mano Seguridad Recargable
充電式防爆安全手提げ灯　充電式安全手提燈

The H-251ALED Rechargeable Handlamp is ideal for use as a general-purpose safety lamp for inspection and work tasks.

With a maximum light output of up to 210 lumens, the rechargeable battery duration is up to 18 hours, and offers a convenient and cost-effective solution for Ex applications where a handlamp is frequently required for long periods. The hand lamp body and lens ring is moulded in a highly

resilient thermoplastic material able to withstand the drop and impact expected from heavy industrial use, even at sub-zero temperatures. Additionally, the material is anti-static, ensuring there is no risk of a dangerous build up of static charges.

The lamp enclosure is sealed to IP66, preventing the ingress of dust and sealing against water in all conditions except submersion.

Battery Chargers

for Safety Handlamp

Cargador de la Batería oara Linterna
防爆安全手提げ灯用充電器
用于防爆安全手持灯的充电器

For use with the H-251A LED safety handlamp, the battery is charged internally via charging studs on the base of the handlamp. The handlamp is simply slotted into the charger and secured in place with the latch plate.

With the handlamps being held by the chargers whilst charging, the handlamps are always ready for use. It can be used at mains voltage of 230 volts or 110 volts, selectable by a voltage changeover switch.

The state of the battery charge is indicated by two coloured light emitting diodes, sequenced to show main and full charge. All chargers may be used free standing or can be bench or wall mounted.

High Powered LED Rechargeable Safety Handlamps

Lámparas de Mano Seguridad Recargable de LED de Alta Potencia
強力発光ダイオード型充電式防爆安全手提げ灯
強力 LED 充電式安全手提燈

A first handlamp that uses high power LED (Light Emitting Diode) technology for explosive environments. Instead of an ordinary bulb, the lamp uses a high power LED with a service life of capacity 50,000 hours. The lamp is equipped with an environmentally friendly NiMH battery whose continuous operating time is more than seven hours. The shock resistant cover is manufactured completely of antistatic plastic and aluminium and its enclosure class is IP 65. On the emergency lamp model an emergency lighting function switches the lamp on when a power failure occurs. The lamp must be stored and charged in an exclusive charging holder. Fully compliant with the Cenelec requirements for standards EN60079-0, EN60079-11 and EN60079-28 as well as with ATEX classification II 2G Ex op is IIC T4 Gb & II 2D Ex op is IIIC T135°C Db.

The Linkex™ WF-300®XL LED Floodlite is a high performance, robust, lightweight and portable Floodlite for use in potentially explosive atmospheres. It delivers an outstanding level of white light and is fully compliant with the latest ATEX and IECEx standards, including OPIS - Optical Intrinsic Safety. Fitted with Wolf's unique SOVI system to ensure safe operation, the Floodlite is certified for safe use in Zone 1, T4, IIc, -40°C to +55°C ambient, hazardous gas, vapour, mist or dust environments.

ATEX approved for use in Zones 0,1 & 2 potentially explosive gas atmospheres, and Zones 20, 21 & 22 potentially explosive dust atmospheres. Group I approval for use in mining applications.

Made of stainless steel with an anti-static coating, each frame incorporates hand lamp holders with a "snap-in/snap-out" function to secure the hand lamp, but quick release allows the floodlight stand of hand lamps to be manually tilted and locked in position. The hand lamps can be removed from the stand in the hazardous area and used for close inspection work or in awkward to reach locations.

Rechargeable LED Floodlights

Reflectores LED recargables　充電式 LED ライト　充电式 LED 灯

The ATEX & IECEx certified rechargeable, high output LED floodlight for use in harsh, remote applications for extended periods. It offers unique levels of light output, operational duration and robustness in a self-contained battery powered lamp.

Both models deliver up to 3,100 lumens of light from its 18 LED lamp head, have a battery duration of up to 40 hours with LED life of 100,000 hours.

LED Portable Daylight Signaling Lamps

Lámparas LED de señalización de luz solar
LED ポータブル昼間信号灯
LED 便携式日光信号灯

Installation required by SOLAS regulations Chapter V which reads as follows: "All ships of over 150 tons gross tonnage, when engaged on international voyages, shall have on board an efficient daylight signaling lamp which shall not be solely dependent upon the ship's main source of electrical power."

< Features >

* Long life and needless lamp exchange.
* 2 hours or more continuous operations with incorporated rechargeable battery in main body.
* All weather condition due to strict waterproof body.
* Durable corrosion-proof Synthetic body.
* Shutterless, Realized 86% lighter than existence model.
* HK & MED approved.

Fire Hoses
M.E.D. Approved Type

Rubber Covered Fire Hose SF-120
Outer Colour : Red

Mangueras de incendio aprobadas por M.E.D.
M E D認証消火ホース 获 MED 认证的消防水龙带

Features:
Tough, durable and very abrasion resistant.
Resistance to oil, fuel and a wide range of chemicals.
Resistance to heat, UV and ozone.
Excellent adhesion between rubber and textile.
No cleaning and drying required.

Applications:

Refineries, Chemical industry, Fire brigades, Marine and offshore installations and Fire hose for usage under tough conditions.

Service Temperature: -20°C up to + 100°C based on water.
Working Pressure: 20 bar

Unit Per C/L

Uncoated Single Jacket Fire Hose SF-121 Outer Colour: White

Features:

Very lightweight and highly flexible (even at low temperature). Small coil diameter.

Excellent resistance to weathering and ozone.

Very good resistance to sea water and a wide range of chemicals.
Mildew and rotproof.

Applications:

Industrial and municipal fire brigades.
Marine firefighting.
Service Temperature: -10°C up to + 60°C based on water.
Working Pressure: 15 bar.

Fire Hose

Inner/outer Synthetic Rubber Lined

Manguera Reforzada de Exinción
両面合成ゴム被覆強化ホース　消防皮龙

High durable fire hose with synthetic rubber reinforcement on inner and outer surface of the hose. It has excellent resistance to weather, abrasion, oil, chemical and especially to ozone attack. Easy to clean hose surface, and easy to handle because of difficulty to kink. Nominal working pressure is 16 kgf/cm². Supplied standard length in 20 mtr. Please specify type of hose coupling if necessary to be attached.

Unit Per C/L

Fire Hose Boxes

Cajas para Guardar Mangueras contra Incendios
消火ホース格納箱　消防皮龙箱

Versatile box to store fire hoses of up to 20 mtrs in length with nozzles and spanner.

The box and cover are made of polycarbonate for weather and sea water resistance.

33 07 51	Fire hose box, polycarbonate, capacity 20 mtrs	Pc.

Portable Fire Hose Binding Machines

Máquinas de fijación portable para mangueras de incendios
簡易式消火ホース金具結束機　简易式消防水带金属线捆扎机

Suitable for binding firefighting hose on hose coupling shanks using copper wire, G.I. wire or stainless steel wire. Applicable fire hoses between 25 mm to 110 mm to new hose couplings. Generally, 1.6 mm (16 SWG) galvanised wire is accepted as the binding wire.

33 07 52	Binding machine, fire hose, portable, For hose size 25 mm to 110 mm	Set

Spanners for Hydrant

Llave de Boca de Agua　消火継手用スパナ　消防扳手

Designed for tightening or loosening of fire hose couplings. Please select suitable spanner to your hose coupling type and size.

for Nakajima

for ANSI - Pin Lug

for ANSI - Slotter

Fog Nozzles 3-position for Fire Hose Nozzle

Lanza Contraincendios de 3 posiciones, Latón
ホースノズル用噴霧ノズル　消防皮龙三段式喷嘴

3-position nozzles produces shut-off/spray/jet flow spray modes.

Nozzle comes with couplings suitable to connect with the hose couplings of the ship. Made of brass.

International Shore Connections

Conexiones Internacional para Suministro de Agua desde Tierra
国際陸上施設連結具　国际通岸消防接头

Required by SOLAS regulations Chapter II Regulation 19. "Ships of 500 tons or more shall be provided with at least one international shore connection."

The connection is fitted with a coupling to match the hose couplings on the ship.

Please specify the required type of ship's coupling: Nakajima, ANSI Pin, etc. when ordering. Connections come with bolts, nuts, washers and gaskets.

Basic Dimensions

Outside Diam.	: 178 mm	Inside diam.	: 64 mm
P. C. D.	: 132 mm	Flange Thick	: 14.5 mm
Slots in Flange	: 19 mm diam × 4 holes		
Bolts and Nuts	: 16 mm diam × 50 mm length × 4 pcs.		

33 08 41	International shore connection fitted with couplings to match hose coupling on ship	Pc.

Keeping Box for International Shore Connection

Made of polyester reinforced with glass fibre. The outside is smooth finished.

33 08 40	Keeping box for international shore connection, polyester, red coloured, 290 × 290 × 170 mm	Pc.

Water Mist Lance and Mobile Water Monitor

Lanza de nebulización y control de agua móvil
ウォーターミストランス・移動式水噴射装置
水雾枪及移动式消防水炮

The SOLAS (SOLAS II-2/10 7.3) amendments requires the following additional firefighting systems for ships designed to carry container on or above the weather deck, and keel laid on or after 1 January 2016.

(i) Water mist lance (at least one should be installed on board), which is a device to penetrate a container wall and produce water mist inside containers.

(ii) Mobile water monitor (only for a ship designed to carry five or more tiers of containers on or above the weather deck), which is a portable device to spray water to the top tier of containers on deck. Ships with breadth less than 30m: at least two mobile water monitors to be installed, ships with breadth of 30m or more: at least four mobile water monitors to be installed.

Water Mist Lance

It complies fully with the IMO's Maritime Safety Committee's 93rd session and SOLAS regulation II-2/10.7.3. Mist Lance consists of a tube with a piercing nozzle which is capable of penetrating a container wall and producing a water mist inside the container when connected to the fire main.

Unit Per Set

CODE	33 08 12
Max. Working Pressure	20 bar
Water Consumption	72 ltr/min at 4 bar (K-Facter : 34.6)
Throwing Distance	Approx. 10 mtr
Inlet Connection	1" BSP female thread
Dimension L × W × D	530 x 150 x 28 mm
Weight	Approx. 2 kg (w/o Hydraulic coupling)

Special Hammer for Water Mist Lance

A heavy hammer for making an opening for extinguishing lances in doors, steel tanks, roller shutters, roofing tiles etc. Made from galvanized steel, solid welded-on impact tip and non-slip handle. Dimension: 480 mm x W165 mm. Weight: 2.8 kg.

33 08 13	Hammer galvanized for making an opening for water mist lance	Pc.

Mobile Water Monitor

In addition to SOLAS amendment, MSC.1/Circ.1472 was also approved to set design and performance standards of a mobile water monitor. It is water discharge device of portable type, consisting of inlet fitting, monitor water way, swivel fitting, discharge nozzle and a shut-off device.

Highly maneuverable, operating like hand line nozzles while delivering much more wear. Simple to set up for quick attack operations, and can be left unmanned at the fire scene to conserve manpower. Horizontal range of 0 degree from 250 degree, and vertical swivel range of 0 degree from 90 degree. Ground spikes at the base is resistant to long-term wear and provide excellent ground stability.

Flow Rate and Discharge Length ± 5% tolerance

Monitor Inlet Pressure	Flow Setting	Flow Rate	Straight Stream Reach

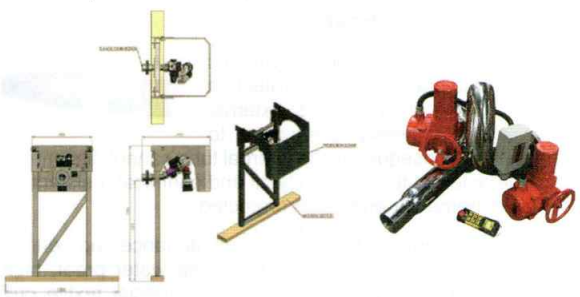
	2,660	2,820	60	63

Unit Per Set

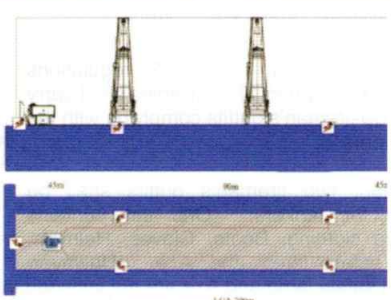


CODE	33 08 14
Model	WM-80M
Material	Body : Stainless steel 316 Jet spray nozzle: Bronze
Working Pressure	Max. 16 bar
Flow Rate	Over 1,300 ltr/min @4 bar
Discharge Length	Over 40 mtr @4 bar
Connection	2" PT female threads
Overall Dimension	Approx. 760 × 420 mm
Weight	Approx. 22 kg w/o coupling
Note :	Hydrant coupling for option
Certificate	KR & MED approval

Anti-Piracy Water Jet Cannons

Cañones de agua antipiratería 海賊対策水射出器 反海盗水枪

A water jet cannon is based on the use of high quality oscillating water cannons, which are installed on several points on the ship and prevent any boarding attempt when activated. The system is sent to the ship as a modular package that is installed by the crew without any required external help. Training will be given to operate the system and a user manual will enable smooth operation of the system.



The installation of the system is divided into 2 main categories.

A – Engine room related installation

- Ensure existing pump has enough capacity.
- Else, in case the capacity is not available, connect engine room pumps to on deck diesel powered booster pump.
- Connection of hoses from pump (via engine room or deck).

B – Deck related installation

- Install water cannons on deck or railing, using supplied connection kit.
- Run 6" feeder hoses from main pump outlet / manifold.
- Run 4" hoses from feeder to water cannon.

System Components

- Storage container.
- High quality oscillating water cannons, (a modified type of the systems used by fire fighting departments).
- Special fittings to temporarily attach the cannons to deck or railing.
- Hoses, supplying water from pump to water cannons.
- Ballistic shields to protect water cannons from direct small caliber fire arms.

Typical Installation Pattern per Ship's Overall Length

Overall Length	No. of Cannon	Water Supply	
		ltr/min.	m3/hr
200 mtr	5 cannons	10,000	600
280 mtr	7 cannons	14,000	840
360 mtr	9 cannons	18,000	1,080

Performance of Water Jet Cannon

- Ultra compact
- Weight : just 11.4 kg
- Totally adjustable
- Capacity 2,000 ltr/min at 5.5 bar
- Range 50 – 55 meters
- High quality aluminium
- Includes manometer
- Left right radius between -180 degrees to +180 deegrees
- Up down radius between -45 degrees to +90 degrees
- 12/24V electro motor
- Remote control option with joystick
- 10 year warranty

Water Supplying Hose

Made from thick woven synthetic thread with a bacl PVC/Nitril protection coating. The internal and external tubes are seamlessly interwoven to long levity. Consequently the internal tube cannot disconnect from the external tube. Totally oil and chemical resistant as well as extreme UV and Ozon protected.

Long levity, remains flexible, no maintenance, no rotting, temperature range -35°C to +100°C, sea water proof, high resistance to tearing and bending, and special textile cuff protect connector areas.

Couplings & Connectors

High quality aluminium connectors with fast connect and release system, as used by fire fighting department worldwide.

How to order: 31 - 41 - 21

Water jet cannon system, With further details

Fireman's Outfits

Trajes de Bombero　消防員装具　消防服

Required according to SOLAS regulations Chapter II Regulation 17. "All ships shall carry at least two fireman's outfits complying with the requirements."

In addition, two fireman's outfits shall be provided for tankers. One set contains Protective clothing, Boots, Gloves, Helmets, Electric safety lamp and Axe. However, Electrical safety lamp and Axe are not included in the unit.

Water-Jel Fire Blankets and Sterile Burn Dressings

Mantas Protectoras Contraincendios "Water-Jel" y Apósitos contra Quemaduras "Sterile Burn Dressings"
ウォータージェル防火毛布　水凝胶防火毯

When placed on a victim, this unique fire blanket helps stop burn progression, relieve the pain, cool the skin, and protect against airborne contamination all in one easy step.

The gel-soaked blankets can also be used to extinguish flames on a victim, protect a rescuer from heat and flames, and extinguish small fires.

Fire Blankets

Unit Per Pc.

Asbestos Safety Kit

Equipo de seguridad para asbesto

アスベスト保護キット　石棉保护套件

The asbestos safety kit is used by vessel's crew to remove asbestos materials during operation/at sea. The kit is accompanied by an instruction how to use the PPE, the equipment including vacuum cleaner. The kit is usually part of an Asbestos Management Plan. In this Plan the locations of asbestos are indicated and preventive measures to avoid exposure to the asbestos fibres. The kit is not to be used for large scale asbestos removal works e.g. during docking.

Each item in the kit is according to EU quality standard for asbestos removal, and approved by a certified company (such as Kiwa Oesterbaai) for Inventory of Hazardous Materials (DNV, Rina, Bureau Veritas, Lloyd's Register).

Asbestos Safety Kit contains:

- HEPA vacuum cleaner with vacuum cleaner bags
- PPE
- Asbestos waste bags
- Asbestos warning stickers
- Duct tape
- Glue spray
- Spray bottle with impregnating fluid
- Full instruction
- Certified

Dry Chemical Fire Extinguishers

Pressurized, ABC Type

Extintor de incendios de polvo químico, presurizado, tipo ABC
蓄圧式 ABC 粉末消火器　貯圧式 ABC 干粉灭火器

The universal designed Fire Extinguisher, with only 1/3 of power to squeeze the lever compared to a regular extinguisher. Since this cylinder is already pressurized, there are no worries about bursting at the time of operation (burstless). Maintenance check is quite simple to check the pressure gauge pointer is in green zone. Also it is in compliance with PRTRs (Pollutant release and transfer register).

Unit Per Pc.

ABC Fire Extinguishers

of Self-activating Chemical

Extintores Tipo ABC, Activados Químicamente

ABC 自動拡散型粉末消化器

ABC 自动扩散粉末消化器

The fire extinguisher works similarly to a sprinkler and is suitable for installation on the wall, near the ceiling, in the engine room, store room or empty cabin where people cannot identify the outbreak of fire. The fire extinguisher is fitted with a sensor capable of identifying atmospheric temperature over 95°C. ABC chemical powder is automatically radiated to extinguish a fire at the early stages.

Specifications

Applicable Class of Fire	ABC
Applicable Room Volume	8 m³
Powder Contents	1.5 kg
Sensor Reaction	Over 95°C
Time of Radiation	Approx. 6 sec.
Size W x D x H	102 × 107 × 475 mm
Weight	4.1 kg

33 10 79	ABC fire extinguisher, self-activating type with bracket	Set

Foam Concentrates

Espuma Concentrada　消火泡原液　泡沫浓缩液

For inflammable liquid fires it is essential to choose the foam concentrates suitable for the specific fire. The following foam concentrates are available for various fires.

No.	Name of Foam Concentrates
1	Fluoroprotein Foam
2	A.F.F.F. (Aqueous Film Forming Foam)
3	Protein Foam
4	Alcohol Resistant Fluoroprotein Foam
5	Alcohol Resistant A.F.F.F.
6	Synthetic Foam

Suggested Foam Application Methods for Various Hydrocarbon Fires.

Oil Fire

Type of Fire	Foam Concentrate	Expansion Ratio	Foam Generators
Oil Tank	1 Fluoroprotein Foam 2 A.F.F.F. 3 Protein Foam	Low Expansion Foam	•Foam Monitor •Foam Chamber
Oil Tank Sub-surface Injection	Fluoroprotein Foam A.F.F.F.	Low Expansion Foam (2-4times)	•High back pressure Foam Generator

(to be continued)

Type of Fire	Foam Concentrate	Expansion Ratio	Foam Generators
Polar Solvents	Alcohol Resistant Fluoroprotein Foam Alcohol Resistant A.F.F.F.	Low Expansion Foam	Pour gently foam on surface of Liquid
L.N.G. L.P.G.	Synthetic Foam	High Expansion Foam Medium Expansion Foam	•High Expansion Foam Generator •Medium Expansion Foam Generator
Fat Oil	A.F.F.F.	Low Expansion Foam	•Fog Foam
Engine Room Bilge	A.F.F.F.	Low Expansion Foam	•Foam Sprinkler •Fixed Foam
	Synthetic Foam	High Expansion Foam	•High Expansion Foam Generator
Sea Spill Fire *Ships *Birth *Tanker	Fluoroprotein Foam Protein Foam A.F.F.F.	Low Expansion Foam	•Foam Monitor
Offshore Rigs & Platforms	1% Concentration A.F.F.F.	Low Expansion Foam	•Monitor
Spill of Hazardous Materials	Air Foam Alcohol Resistant A.F.F.F.	Low Expansion Foam	•Foam nozzle

Precautions in Storage

(1) Exposure to direct sun light should be avoided.

(2) The frequency of contact with air must be reduced as much as possible.

(3) Blending with different types of concentrates or liquids or contamination of a new product by an old one should be avoided to ensure the safety and effectiveness of the foam concentrates.

Heat Detector Testers

Probador de Detector del Calor
熱感知器用テスター　感熱器測試儀

Designed to provide quick and reliable testing of heat detector with a maximum of safety regardless of the number of units to be tested.

33 10 71	Heat detector tester	Set

Heat Detector Testers for Explosion-proof Area

Probador de detectores de temperatura para zona a prueba de explosiones
熱感知器用加熱試験器　热感应器用加热测试器

Used for carrying out the operation test of the heat detector by utilizing chemical reaction of quicklime and water to generate the high temperature vapor. The tester can also be used at explosion-proof area, because it does not use fire during the operation test. After the vapor generation is finished, wait about 10 minutes before removing the heat generating material from the container because the heat generating material is hot.

In case of using the tester in the explosion-proof area, the applicable gases are limited to Grade IIB, T4 or less according to Gas Classification (Ministry of Labour, Research institute of Industrial Safety Japan) and those having the ignition temperature of 425°C or over. The tester is the approved product of Fire Protection Equipment & Safety Center of Japan, and it is required to be calibrated every 10 years. (The calibration label should be checked.) Support rods are sold separately.

Smoke Detectors

Detector de Humo 煙感知器 偵煙探測器

A device for detecting smoke emerged by potential fire, and raising an alarm and flickering LED light to alert. Normally the smoke detectors are mounted on the ceiling or on a wall near the ceiling. The detector is powerd by lithium battery and which life lasts for about 10 years, but depends on environmental condition where it is mounted. A little blip and indicator light notify you the end of battery lifetime.

Unit Per Pc.

CODE	33 10 72
Alarm Sound	More than 70 dB

Approved Class	Ex ib B T5
Weight	240 grm

Smoke Detector Testers

Detectores de Humo 煙感知器用テスター 烟感式探测器

For testing ionization and photoelectric detector at sight for smoke detection fire alarm system on the ceiling. Test gas is separate order.

33 10 73	Smoke detector tester	Set
74	Spare test gas for smoke detector tester, 350 grm/tin	Tin

Smoke Detector Test Spray

Pulverizador para pruebas de detectores de humo

煙感知器用テストスプレー 烟感探测器测试喷雾

For secure testing of optical or photoelectrical smoke detectors without the need of additional testing instruments. Safe and easy to use, gentle on electronic instruments, evaporation without residues, can content lasts for up to 150 applications, and free of silicone.

Shake can before use and spray test spray for about 5 seconds and with a distance of approx. 30 cm towards the smoke detector. The functioning of the smoke detector has to be tested on a regular basis, and recommended testing period is two inspections per year.

Unit Per Can

Smoke & Heat Detector Tester

(combined / dual unit)

Detector verificador de humo y calor

煙・熱感知器用マルチテスター 烟 / 热检测器用检测

A combined smoke & heat detector tester in one tool, suitable for testing;

(a) Optical and ionization smoke detectors, and (b) Heat detectors (fixed temperature or rate-of-rise).

The detector can be either conventional or analogue addressable. Also, this enables testing of multi-detectors or multi-criteria detectors from a single test unit.

Test Mode

Normal Heat	To test rate-of-rise and fixed temperature heat detectors up to 90°C.
Hi Heat	To test rate-of-rise and fixed temperature heat detectors up to 100°C.
Smoke	A simulated smoke generated internally using a miniature heat exchanger and a harmless liquid from the smoke capsule.
Clearing	Clean air is blown to remove previously applied smoke.

Also, execute programmed testing, such as simultaneously, sequentially, combined simultaneous and sequentially.

Safety Features:

- Battery over-current cut-out.
- Default 2 minutes maximum test duration timeout.
- Auto power off after 5 minutes of non-use.

Operating Features:

- Colour coded LED user feedback.
- Automatic infrared sensing of the detector.
- Adjustable multi-position head.

Unit Per Pc.

Detector de Humo Fotoeléctrico
光電式煙探知器　光电烟雾探测器

Photoelectric smoke detector for detecting smoke emerged by potential fire, especially in accommodation area and engine room. This will be mounted on the ceiling and once it detects the smoke, it will turn on the alarm indicator (Red LED).

Unit Per Pc.

CODE	33 14 01
Rated Voltage/Current	DC24V/100 mA
Alarm Indicator	LED Red
Detector Class	EN54-7
Weight	148 grm

Flame Detectors Infrared type

Detectores de llamas de tipo infrarrojo
赤外線式炎探知器　红外线式火焰探测器

A sensor designed to detect the presence of a flame or fire. Flame will be detected by Infrared type sensor, and unit will be mounted on the ceiling in the room. Once it detects a flame, it will flicker the warning indicator light.

Unit Per Pc.

CODE	33 11 03
Rated Voltage/Current	DC30V/100 mA
Alarm Light	LED Red
Detecting Class	Class 1 (EN54)
Weight	210 grm

Fixed Temperature Heat Detector

Detector de Calor de Temperatura Fija
定温式熱検知器　固定温度热探测器

Fixed temperature heat detector for detecting heat emerged by potential fire, especially in Galley or workshop, unsuitable

locations for smoke detector installation. This will be mounted on the ceiling and once it detects the heat, it will turn on the alarm indicator (Red LED).

Unit Per Pc.

CODE	33 10 00
Nominal Operating Temperature	60°C
Rated Voltage/Current	DC24V/100 mA
Detector Class	EN54-5 A2S
Weight	82 grm

Testing Device

for Infrared Spot Type Flame Detector

Dispositivo de pruebas para detector de llamas de tipo de punto infrarrojo

赤外線スポット型感知器作動試験器　点型红外线火焰探测器测试器

An operation-testing device for infrared spot type flame detector. The testing device is capable of providing 2 ranges of emission of spectrums that are required to operate infrared flame detector: the spectrum similar to CO2 spikes immersion region by using an infrared filters over a source and the flickering similar to a flame by using a flashing lamp.

Available two type of testing methods depends upon the testing site environments. (a) Using the Test Initiation Switch (Normally use in this method), or (b) Using the Manual Test Switch (use this method if the (a) is not possible).

This testing device is mandated to calibrate at every 10 years.

The testing rod (Total length: 3,990 mm) is sold separately.

Unit Per Pc.

CODE	33 09 10
Applicable Detector	Infrared Spot Type Flame Detector Model 2RA-P
Light Source	Bulb 4.8V 0.5A
Battery	AA × 4 (Matsushita LR6 (G) or equivalent)
Dimension/ Weight	110 (W) × 148 (H) × 153 (D), Weight: Approx. 600 grm
Accessories	Carry bag, Battery (4 pcs), Spare lamp (1 pc Placed inside), Cotton swab (4 pcs), Manual

Marine Fire Stop Systems

Sistemas cortafuegos navales

舶用火災防御システム　船用火灾防范系统

Marine firestop products are always designed specifically fast, safe, and simple to install. Additionally, the products are easy to retrofit for existing penetrations. Sealants are resilient, tough and vibration resistant while fire-rated cable pathways facilitate cable changes without compromising the integrity of the sealed opening, providing continuous savings over the lifetime of the structure or vessel.

The marine firestopping products are fully tested to applicable standards to maintain the integrity of the decks and bulkheads they are rated to such as A0, A15, A30, A60, B0, B15, and B30, as well as hydrocarbon testing for H-Class divisions.

MDM: Marine Fire Rated Cable Pathways

For conditions where cable changes will be frequent and water pressure tightness is not a requirement, the EZ-Path® Marine Cable Pathway is the fastest and most reliable solution. The steel raceway contains a self-sealing system comprised of compressible foam pads installed to form an arch. As the cables pass through the device, the pads retract and allow them to pass while gently squeezing the bundle to provide a functional smoke and air seal. Device modules can be installed individually, or ganged to increase cable capacity. Accessory plates allow for easy mounting to bulkheads or decks.

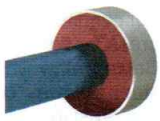
MDM300A　MDM400A　MDM400B

MDM400C　MDM400D　MDM400G

Features & Benefits:

- Provides sealing function to restrict the passage of fire, smoke, hot gases and conditioned air.
- Easily installable and retrofittable around existing cables with split plate kits.
- No specialty tools required to install.
- Smooth edges protect cable jacketing during install.
- Easily installed into a roughly cut openings, no welded or specialized sleeves required.
- Vibration resistant.

Applications:



- Accessories adapt the pathways to ganged configurations, thicker walls, retrofit with previously installed cables.
- No putty or sealant required.

Unit Per Pc.

Name of Mfr.: Specified Technologies Inc.

MFS: Marine Firestop Sealant

An advanced hybrid polymer sealant designed for use in H60, A0-A60 and B0-B30 Class divisions in marine and offshore construction around both cable and pipe penetrations. Marine firestop sealant cures in the presence of atmospheric moisture to form a durable elastomeric seal. This excels in applications where a high-degree of water resistance is required, and complies with International Maritime Organization (IMO) standards.

Features & Benefits:
- Non-corrosive, non-conductive.
- Fast curing, ozone and UV resistant.
- Excellent chemical resistance protects in polluted or corrosive environments.
- Provides superior sealing function to prevent the passage of fire, smoke, hot gases, sound, conditioned air, and water.
- No specialty conduit frames, bolts, nuts, tools, or precision fitting required to install.
- No need to plan or engineer out multiple cable or pipe penetrations.
- No need to layout cables and install individual parts around each cable.

Applications:
- Can be used to form flexible, vibration-resistant seals around pipes and cables in bulkheads and decks.
- Can be used for interior or exterior applications and bonds well to a variety of materials commonly used in marine and offshore construction.
- Can be used in watertight decks and bulkheads.

Unit Per Pc.

CODE	Model No.	Description	Weight
33 14 32	MFS100	Marine firestop sealant, 9.5 oz. tube (281 ml, 17.1 cu.in.)	0.5 kg (1.18 lbs)

Name of Mfr.: Specified Technologies Inc.

MPU: Marine Firestop Putty

Designed to seal small to medium size openings in H60, A0-A60 and B0-B30 Class divisions in marine and offshore construction for pipes and cables. Marine Firestop Putty is a non-hardening, moldable compound that can be hand-packed into openings for permanent or temporary sealing. Complies with International Maritime Organization (IMO) standards.

Features & Benefits:
- Non curing properties to allow for removal and re-installation, for cable removal or addition.
- Provides superior sealing function to prevent the passage of fire, smoke, hot gases, sound, conditioned air, and water.
- Easily repairable, retrofittable, and installable.
- No specialty tools required to install.

Applications:
- Can be used to form flexible, vibration-resistant seals around pipes and cables in bulkheads and decks.

Unit Per Pc.

CODE	Model No.	Description	Weight

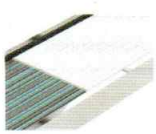
33 14 34	MPU52	Marine firestop putty coil, 15.9 ltr (3.5 gallon), packaged in pail	13.9 kg (30.8 lbs)

Name of Mfr.: Specified Technologies Inc.

MRF: Marine Firestop Foam

A two-component RTV silicone foam that features excellent crack-and-void filling capabilities. Marine Firestop Foam exhibits uniform cell structure, assuring reproducible, smoke-tight, fire resistant installations. The elastic properties of the foam readily accommodate minor vibration of the pipe, conduit, etc. without loss of system integrity. Used in a 1:1 mix ratio, Marine Firestop Foam, when properly mixed, expands 2 to 4 times its original volume, filling available spaces and forming an effective barrier against fire, smoke and water penetration.

Features & Benefits:
- High resilience allows movement due to expansion, contraction, or vibration.
- Excellent water resistance for water-tight sealing.
- Uniform cell structure ensures reproducible results every time. No charts to check.
- Excellent adhesion to most building substrates.
- Excellent smoke seal.



Applications:
- Designed as a seal for both deck and bulkhead penetrations against the passage of fire, smoke or other hot gases.
- Applied in liquid form (with proper damming) and then foams in place, readily sealing around penetrating items such as conduits, cables, duct work or mechanical piping.
- Useful in sealing areas such as control rooms against infiltration of airborne contaminants such as coal dust, dirt, etc.
- Ideal product for use as a thermal or acoustical insulation, or for vibration dampening.

Unit Per Pc.

CODE	Model No.	Description	Weight
33 14 35	MRF500	Marine firestop foam kit, 45.4 kg (100 lbs), part A and B	45.3 kg (100 lbs)

Name of Mfr.: Specified Technologies Inc.

MCC: Marine Cable Coating

A latex-based coating designed to protect grouped electrical cables against the propagation of fire. This material will limit flame spread along cables and cable trays. Marine Cable Coating will adhere well to virtually all cable jacketing materials. Application of material is achieved using airless spray equipment or by brush.

Features & Benefits:
- Water-based - easy installation, cleanup and disposal.
- Endothermic fillers - absorb heat and release water.
- High solids formula - no shrinkage!
- Sandable and paintable (when dry).
- Safe - low VOCs (Volatile Organic Compound), no solvents, non-halogenated.
- Excellent smoke seal.

Applications:
- Offers protection of grouped electrical, data, or communications cables in cable tray or racked cable applications.

Unit Per Pc.

CODE	Model No.	Descriptions	Weight
33 14 37	MCC105	Marine cable coating, 19 ltr (1,155 cu.in.)	24.9 kg (55 lbs)

Name of Mfr.: Specified Technologies Inc.

MFC: Marine Firestop Collars

Designed for use in A0-A60, B0-B30, and H0-H120 Class divisions to protect plastic pipes in marine and offshore construction. The heavy gauge stainless steel shell is lined with a molded, intumescent insert and provided with a marine grade, mild steel flange for attachment to the bulkhead or deck.

Features & Benefits:

- Heavy gauge, chromium rich 316 stainless steel construction.
- Resistant to aging and weathering, no soluble or hygroscopic ingredients.
- High volume of char.
- Provides sealing function to restrict the passage of fire, smoke, and hot gases.
- Easily installable and retrofittable around existing non-metallic pipes.
- Maintenance free.
- Tested and approved for use with USCG Approved SeaCor® and SeaDrain Plus® piping as well as other non-metallic and metallic pipes. (SeaCor® and SeaDrain Plus® are registered trademarks of Georg Fischer).
- Will not damage outside of pipe.

Applications:

- Sized to fit common pipe sizes.
- Applications were tested for common pipes including PVC, PVDF, CPVC, Pb, PE, PE-AL-PE, ABS, GRE, uPVC, Cu and Steel.

Unit Per Pc.

MFC-W: Watertight Marine Firestop Collars

Water-tight, factory-manufactured, intumescent device for use as a penetration seal in fire-rated bulkheads and decks.

Features & Benefits:

- Tested to IMO A.754 FTP (Class A0-A60, B0-B30, and H0-H120 Bulkheads and Decks).
- Provides water-tightness up to 4 bar and gas-tightness up to 1 bar.
- Rapid intumescent expansion under fire conditions quickly seals off the path for fire, gases, and smoke.
- Stainless steel body with mild steel flange for weld-attachment.
- Solid design requires pipe to be inserted through the water-tight bushing.
- Flexible intumescent liner accommodates vibration and will not damage pipe.

Applications:

- Applications were tested for common plastic pipes, including PVC, PVDF, CPVC, Pb, PE, PE-AL-PE, ABS and GRE, through pressure rated bulkheads and decks.

Unit Per Pc.

MFC-T: Transitional Marine Firestop Collars

Designed for use in A0-A60 and B0-B30 Class divisions to protect transitions between steel and plastic pipes in marine and offshore construction. The heavy gauge stainless steel shell is lined with a molded, intumescent insert and provided with a marine grade, mild steel flange for attachment to steel pipes.

Features & Benefits:

- Heavy gauge, chromium rich 316 stainless steel construction.
- Resistant to aging and weathering, no soluble or hygroscopic ingredients.
- High volume of char.
- Provides sealing function to restrict the passage of fire, smoke, and hot gases at transitions from plastic pipes to steel pipes or scuppers.
- Easily installable and retrofittable around existing pipes.
- Will not damage outside of pipe.
- No sealant or welding required.

Applications:
- Offers protection of connections between steel pipes or scuppers to plastic pipes in non-pressurized systems.
- Applications were tested for common plastic and steel pipes or scuppers.
- Easily retrofittable around existing, mated pipes.
- No pre-planning or staging necessary with split closure design.

Fall Protection Range

Cinturón de Seguridad　作業用安全帯　工業用安全帯

Designed and used to prevent accidents at work or to protect against consequences of accidents at work.

Statistics prove, year after year, that lack of fall protection is a leading factor in job fatalities and injuries. The Fall Protection product lines enables your company to provide optimum quality, comfortable fall arrest systems for your workers. It combines quality, comfort, and value.

Approval: Most harnesses have compliance for each region depending on the delivery location, such as OSHA, ANSI, JP industrial standard, etc.

- Excellent value / Optimum quality / Reliable protection / Practical operation / User-friendly design / Comfortable

3M Full Body Harnesses for General Fall Arresting

A full body harness is personal protective equipment worn to prevent falls when working at heights and provide both high safety and comfort to support on-site work. The back D-ring is for fall arrest attached on the most harnesses. The chest-D ring enables connection to a ladder climbing safety system. Please specify if any additional attachment points or specifications are required.

- Durable polyester web construction.
- light and compact Pass-Thru buckle.
- Quick Connect buckles enhance adjust-ability.

3M™ Protecta® Harness Sizing Guidance

Lanyards

Lanyards　ランヤード　挂绳

A rope or strap made of synthetic fiber with hooks, carabiners, shock absorbers to connect with safety harnesses as lifeline. Single leg or twin leg are available. Twin-lanyards provide 100% tie-off, allowing users to stay protected when changing locations.

Elastic Type Lanyards

Elastic type fall protection lanyard with shock absorber, elastic leg stretches in reaction to users movements. It is compact and fordable when not in use. Furthermore, it extends and effectively absorbs the impact during a fall event.

Single

Twin

Unit Per Pc.

CODE	31 15 35	31 15 36
Type	Single	Twin
Working length	1.7 m or longer	
Weight Capacity	130 kg or more	

Rope/Strap Lanyards

Rope lanyard type of fall protection equipment with pack-style shock absorber. It is compact and fordable when not in use. It dissipates energy, limiting the forces on the body by absorbing component in a fall event.

Single

Twin

Unit Per Pc.

CODE	31 15 37	31 15 38
Type	Single	Twin
Working length	1.8 m or more	
Weight Capacity	100 kg or more	

Self-Retracting Lanyard

It is designed to activate self-lock system when it detects the fall event to minimize the falling distance. It is very lightweight and easy to use. It is ideal fall protection equipment for workers under 5 meters height. Single or twin types are available.

Single

Twin

Unit Per Pc.

Dust Protecting Masks

Masacarilla para Protección del Polvo, 1 Filtro　防塵マスク　防尘口罩

Designed to prevent the inhalation of dust. Two types of filtering systems are available: a Mechanical Type which filters fumes and dust through a filter cartridge, and an Electrostatic Type which collects fumes and dust over the filter by static electricity.

It must be noted that these masks are not effective for poisonous gases or vapours. Also to avoid risk, it must never be used in circumstances where the Oxygen (O_2) concentration is lower than 18 %.

Respirators Advantage 200 LS

Mascarillas Advantage 200 LS　防毒マスク　防毒面具

The Advantage 200 LS Respirator provides a better looking, lighter, and softer face piece, which is made from a translucent "Ocean Blue" formulation of thermoplastic rubber:

The MSA patented MultiFlex® System – a soft, pliable combination of rubber and plastic that provides a virtually customized fit. In addition, the highly effective AnthroCurve™ Sealing Surface instantly conforms to each wearer, equalizing pressure on the face seal area and eliminating annoying pressure points. The unmatched fit exceeds all previous levels of comfort.

This half mask type respirator features a twin filter cartridge with large area and capacity to provide for low breathing resistance and long life.

Not for use in atmospheres containing less than 19.5% oxygen.

Fullface Respirators Advantage 3200

Respiradores Enteras　全面防塵防毒マスク　全面防尘防毒面具

New generation of lightweight air-purifying full face respirator offers a comfortable fit. The face piece lens has been engineered to be optically correct, giving you superior visibility and peripheral vision. The wraparound scratch-resistant polycarbonate face piece lens provides a wide distortion-free field of vision.

The lens meets all requirements of ANSI Z87.1 including the high-impact performance requirements.

Requires only routine filter replacement and approved according EN136 class 2. As well approved by NIOSH (The National Institute for Occupational Safety and Health) according 42 CFR, part 84.

Dust Mask Disposable EN149 FFP2/FFP3 Standard

Máscaras Desechables FFP2/FFP3 Estándar
使い捨てマスク FFP2/FFP3 規格
一次性口罩 FFP2/FFP3 标准

Protects against non-toxic dust, powders, and aerosol particles. Meets European Standard EN 149:2001 with following classes.

FFP2: Minimum 94% filtration percentage and maximum 8% leakage to the inside. Mainly used for variety of industry including healthcare against influenza viruses, SARS, new coronavirus etc.

FFP3: Minimum 99% filtration percentage and maximum 2% leakage to the inside. The finest filtering mask of the FFPs.

33 11 77	Dust mask disposable, FFP2/N95/DS2 standard	Pc.
78	Dust mask disposable, FFP3/N99/DS3 standard	Pc.

Fire Resistant Face Mask

Mascarilla Resistente al Fuego　耐火・耐熱マスク　防火口罩

Reliable, reusable masks that will shield you from workplace heat hazards. This fire-resistant mask defends well against heat hazards such as flash fires and sudden flames. An anti-bacterial inner layer makes it suitable for blocking microbial hazards. Made of Nomex IIIA fabric, renowned for its comfort, fire resistant and moisture wicking properties. Suitable for utilities, manufacturing, oil & gas and chemical industrial work.

Notice for use:

- Wash the mask frequently to ensure that no greases, oily soils or other flammable contaminants are present during use.
- Ensure that the masks are clean and in proper condition before each wearing.
- Retire any mask with visible holes, rips, and/or tears or contamination from flammable materials.

33 12 02	Fire resistant face mask	Pc.

Paint Spray Respirators

Máscarillas para Pintura　塗装用防毒マスク　喷漆防毒面具

Low concentration single filter half face gas mask used as a respirator for low concentrations of gases, such as when painting with sprayers. Never use when the oxygen concentration in the atmosphere is less than 18 %.

Full Facemask Respirators

Máscara Entera　全面防塵防毒マスク　全面型防尘防毒面罩

A fullface respirator which is light and comfortable to wear, even for long periods of time without becoming tired or stressed. A wide sealing edge provides a snug fit to the face and adjusts easily for wearer comfort. Can be worn with a helmet and hearing protectors.

The facemask has a wide field of vision with inhalation air directed across the inside of the visor to prevent misting. One can talk clearly with the respirator on because of a protected speech diaphragm. The exhalation valve is of a secure construction and keeps the carbon dioxide level inside the mask at a minimum.

The facemask materials are resistant to a wide range of chemicals. Applicable filters are a separate order.

Power Assisted Respirators

Respiradores con Ayuda de Fuerza

ファン付き防塵・防毒マスク　风扇式防尘防毒面罩

Full face respirators which are comfortable to wear, light in weight, easy to decontaminate and maintain and compact with no impending hoses. 1.5 kg total weight including the fitted battery power pack and the only connection is an extending coil cord from the battery to the integral fan/motor unit in the mask.

Low profile facemask gives the wearer a panoramic field of vision through an optically corrected high-impact and chemically resistant visor. Air flow is directed over the inside of the visor to prevent misting and provide a cooling effect to the face making the respirator more comfortable to wear for long periods.

The assistance of the fan provides low resistance gives benefits to protection. The negative pressure induced inside of the facemask is much lower than in other respirators.

Specifictions

Facemask	Silicone elastomer with panoramic visor complete with optical and impact requirement of BS 2092 Grade 1
Blower	Airflow : 120 ltr/min. (Minimum rate) Motor Life : 1,000 hours
Battery	Life : 500 recharge cycle Duration : 10 hours minimum. Charging : approx. 14 hours required.
Component	Complete with facemask, fan/motor unit, battery, filter, airflow tester & manual

Hose Adaptors for Power Assisted Respirator

Adaptadores de Manguera para Respiradores

ファン付き防塵・防毒マスク用ホースアダプター

风扇式防尘防毒面罩用软管适配器

By connecting a lightweight belt-mounted adaptor with flexible hose, two screw-in filters can be used in place of the normal single filter. This means that filters can be oriented away from the source of contamination, and two filters used in parallel to provide extended filtration capacity.

33 11 47	Hose adaptor for power assisted respirator	Set

Power Assisted Respirators

Respiradores Asistidos　パワーアシスト呼吸器　电动辅助呼吸器

If your job demands long-term breathing protection, the OptimAir 3000 PAPR [Powered Air Purifying Respirator] is the way to go. Your breathing remains easy and free from resistance even after hours of work.

A maximum in safety, flexibility and ease-of-handling lets you concentrate on your work, knowing that your health is not being compromised.

The OptimAir 3000 PAPR system allows you to breathe normally while you work. Your comfort, well-being and ability to perform effectively are greatly enhanced. Filters also last longer. The microprocessor controlled, variable-speed motor guarantees an optimum amount of air in your head top [mask or hood] – even as your breathing rate changes during more strenuous tasks. In many situations it is not even necessary to maintain an airtight seal.

The pressure differential causes airflow to travel continuously from your face to the outside environment, preventing unfiltered air from entering your head top.

ScanSilence ML3

Protection against very high noise level and loud sounds. Light weight, and limited contact pressure for all-day comfort. Cup is anti-scratch and its height is adjustable. Attenuation: H=37 dB, M=32 dB, L=24 dB. Signal-to-noise ratio: 35 dB.

Standards: CE Approved / EN 352-1

33 12 70	Ear cup kits, ScanSilence ML3	Pr.

Name of Mfr.: Scandia Gear

Ear Plugs

Tapones para Oido 耳栓 耳塞

Three types of ear plugs are available. Made of silicon-rubber for general noise from high-pitched to low-pitched noises or only for high-pitched noises. Made of flexfit, self-expandable and self-adjusting foam.

Silicon Rubber

Self-fit Foam

33 11 56	Ear plug silicon rubber for hi-low pitch noise	Pr.
57	Ditto for hi pitch noise	"
33 11 58	Ear plug self-fit foam	Pr.

Safety Helmets

Cascos de Seguridad 安全帽 安全帽

A lightweight safety helmet made of glass fibre reinforced polyester resin. Adjustable in size. Easy replacement of the suspension. Weight: approx. 380 grm.

33 11 59	Safety helmet, polyester resin, white	Pc.
60	Safety helmet, polyester resin, yellow	"

Slotted V-Gard Safety Helmets

Cascos de Seguridad 安全帽 安全帽

Economical, lightweight, comfortable headwear. Made of high-density polyethylene in a variety of molded-in colours ideal for general industry and construction. Suspension, sweat band and nape strap form the complete protective system. Cap with slots to hold accessories. When ordering, specify colour.

Unit Per Pc.

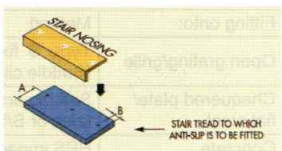
Anti-Slip Safety Products

Cintas Anti-caídas 滑り止め防止製品 防滑产品

An anti-slip safety products incorporate the unique Scotgrip® high-traction anti-slip safety surface which gives a sound foot-holding in the most extreme conditions. By installing anti-slip walkway & deck products not only is this slip hazard eliminated but the lifespan of the underlying material is greatly increased. These tough & durable products are manufactured under BS EN IS0 9001:2008 quality controlled conditions comprising of a reinforced composite base and a graded aggregate surface. As a Scotgrip® quality standard, these products are fire rated, spark and friction tested.

Scotgrip® Anti-slip Stair Nosings (SSN)



By installing Scotgrip® anti-slip stair nosings not only is this slip hazard eliminated but the lifespan of the step is greatly increased. These heavy duty safety products are easily fitted onto open grating/grille, chequered plate/flat steel, concrete or wood. Colour coded in a wide range of colour schemes to suit individual locations, but Safety Yellow colour one will be supplied if any colour code is not specified.

Designed for quick and secure fitting, either by mechanical fixings or bonding to existing surfaces. These products are pre-drilled where required for quick installation.

Surface Grades:
Coarse grade: 1 - 3 mm aggregate (1/16" – 1/8" approx.)
Extra coarse grade: 3 - 5 mm aggregate (1/8" – 3/16" approx.)

Fitting Data

Fitting onto:	Method
Open grating/grille	Type 'S' fixings (zinc or S/S) (Saddle clip assembles)
Chequered plate/ Flat steel	Self tap screws or nut, bolt and washer (zinc or S/S)
Concrete	HPS impact fixings (zinc or S/S)
Wood	Screws (zinc or S/S) or adhesive

Anti-slip Kicker Tread (KTS)

Designed to fit onto existing step

Anti-slip Kicker Tread® has all the same safety advantages of anti-slip stair nosings but has the added feature of a safety 'Kicker' incorporated at the rear of the tread to prevent objects being dropped or kicked over the back of it & falling below. These heavy-duty products are easily fitted onto open grating/ grille, chequered plate/flat steel, concrete or wood.

Standard Size of Kicker Tread

Breadth (or Depth) of Step	Length
Up to 200 mm (8" approx.) Up to 250 mm (10" approx.) Up to 300 mm (12" approx.)	Supplied to the exact length of your steps. (Please deduct 10mm (3/8" approx.) from length of steps to allow for proper seating.)

Surface Grades

Coarse grade Extra coarse grade	1 - 3 mm aggregate (1/16" – 1/8" approx.) 3 - 5 mm aggregate (1/8" – 3/16" approx.)

Coarse surface grade will be supplied if any surface grade is not specified.

Colour Code:
Colour coded in a wide range of colour schemes to suit individual locations. Available colours are: Safety yellow, Black/safety yellow, Black, Green, Grey, Blue, Red, White. Photoluminescent making is available.

Manufactured to customer specification:
Supplied to your requirements as the tread needs to be fairly snug with the stairway stringers.

Fitting Data

Fitting onto:	Method
Open grating/grille	Type 'S' fixings (zinc or S/S) (Saddle clip assemblies)
Chequered plate/ flat steel	Self tap screws or nut, bolt and washer (zinc or S/S)
Concrete	HPS impact fixings (zinc or S/S)
Wood	Screws (zinc or S/S) or adhesive

How to order: 33 - 45 - 36 (Sht)

Please specify the following:
Size (Breadth x Length), Surface grade (Coarse, extra coarse), Colour code (Safety yellow or any others), Pre-drill of fixing hole position (if necessary)

Name of Mfr.: Scotgrip International

Walkways/Decks

Walkways/decks/flooring can be made from various materials including the following: flat steel, open grating/grille, aluminium, concrete or wood. These tiles are installed onto your walkway/deck surfaces and secured by either mechanical fixing, welding or bonding with adhesive.

Surface Grades:
Coarse grade: 1- 3 mm aggregate (1/16" - 1/8" approx.)
Extra coarse grade: 3 - 5 mm aggregate (1/8" - 3/16" approx.)

Colour Code:
Colour code in a wide range of colour schemes to suit individual locations. Available colour codes are: Safety yellow, Black/safety yellow, Black, Green, Grey, Blue, Red, White. Photoluminescent making is available.

Anti-slip Grating Cover Tile (SGCT)

Designed for all open grating/grille surfaces (secured by Type 'S' Fixings - saddle clip assemblies). Approx. 5 - 7 mm thickness.

Gangway Treads

Marine gangways are renowned for being extremely dangerous, especially when the angle of the gangway is steep and the surface is wet or oily or both. Some gangways have metal or wooden spars across the surface which can be a trip hazard in itself. By installing this gangway treads not only is this slip hazard eliminated but the lifespan of the underlying material is greatly increased.

Gangway tread will provide a sound foot holding even in the most extreme conditions. Colour coded in a wide range of colour schemes to suit individual locations: safety yellow, orange, red. Other colours are available upon your request.

Extremely durable and will remain highly effective for many years. Gangway treads are manufactured and supplied to the exact length required for your gangway/brow. Designed for quick and secure fitting, gangway treads can also be easily cut/shaped on site if required. Designed for quick and secure fitting, simply place on top of the existing surface & secured with mechanical fixings.

Specifications	
Tensile Strength	26 MPa
Tear Strength	85 kN/m
Hardness	95 Shore A rating
Weight	1.2 kg/m length

How to order: 33 - 47 - 62

Gangway tread, specify the required length and Colour Code (Safety Yellow, Orange, Red or any other colour).

Name of Mfr.: Scotgrip International.

Anti-slip Pipewalkers

Pasa-tuberías antideslizante
滑り止めパイプウオーカー　管上行走防滑垫

Pipewalkers will provide a sound foot-holding even in the most extreme conditions and will help eliminate "Slips and Trips" in your working environment. Tough, durable, and easy to handle, and can be placed into position quickly and easily due to their flexibility and light weight construction. There are different types ; short tread and long tread. Standard colours black and yellow, and manufactured under BS EN ISO 9001: 2008 quality controlled condition using highly compatible raw materials.

Photoluminescent Wayfinding Walkway Matting

Cintas Fotoluminosas para Guia　蛍光誘導マット　萤光诱导地毯

For engine room safety in the event of darkness caused by a sudden power loss or low visibility caused by smoke. A durable hardwearing extruded PVC matting, which incorporates a central 100 mm wide photoluminescent wayfinding strip to show an escape path in sudden darkness. The material is non slip, shock absorbing, self draining and comfortable underfoot. It is resistant to most oils, acids, etc. which are used in the marine industry.

Unit Per Rls.

CODE	Width	Length
33 11 87	600 mm	10 mtr
88	910 mm	"

Hazard Warning Reflective Tapes

(Reflective Tiger Tapes)

Cintas Reflectivas para Advertencia de Peligro
反射虎テープ　虎斑带

Self adhesive black and yellow striped tape used to warn against hazards.

It can adhere to any reasonably clean surface and can be easily removed. Highly reflective for visibility at night or in a dark area.

Unit Per Rls.

CODE	Width	Thick	Length
33 11 91	45 mm	0.24 mm	10 mtr
92	90 "		
93	150 "		
94	970 "		
33 11 95	50 mm		33 mtr

Barrier Tapes

Cinta para Prohibir el Paso
バリケード・テープ　　封鎖帶

Strong, non-adhesive polyethylene barrier tape ideal for warning of danger areas or simply diverting the public etc. Normally striped in Black and Yellow.

Unit Per Rls.

CODE	Width mm × L mtr	CODE	Width mm × L mtr
33 11 98	80 × 50	**33 11 99**	75 × 500

Arm Bands

Brazaletes　腕章　　臂章

Made of felt covered by vinyl. For identification of person on duty, or appealing each other for caution to the hazards. Available various colours and notices upon request. Please specify colours, letters, symbols or signs when ordering.

How to order: 33 - 11 - 96
Arm band, COLOR, LETTER, SYMBOLS or SIGNS

Alcohol Screening Devices

Dispositivos de detección de alcohol
アルコールスクリーニング装置　　酒精筛选设备

An instrument to perform a breath alcohol test with speed and precision. It is also possible to measure alcohol in the ambient air (passive), in which case a mouthpiece isn't required.

All measurement functions can be operated with just one button to make it easier for you to perform the test. The large back-lit display is easy to understand due to its full-text messages which guide you securely through the alcohol test. An LED and audible signal complement the display and indicate the end of a measurement process.

Unit Per Set

CODE	**33 12 21**	**33 12 24**
Model	Alcotest 5820	Alcotest 6820
Sensor	Electrochemical Dräger sensor for 1/4" technology; alcohol-specific	
Measuring Range	0 to 2.5 mg/L	
Temperature Range	-5 to +50°C/23 to 122°F	
Display	Graphic backlit LCD display; 32 x 22 mm	Graphic LCD display; 41 mm x 24 mm
Datalogger	Storage of last 100 tests with test numbers	Space for saving the last 5,000 tests with test number, date and time

Portable Breath Analyzers

Analizador de aliento Portátil
アルコールチェッカー　　攜帶式酒精測試器

A portable alcohol tester offers PRISM* technology, let you avoid re-calibration process. Simply swap an old sensor with a new one, and you are instantly ready to get back to testing. Sensor requires to get replaced every 200 tests or every 12 months, whichever comes first.

Tester can be operated with a mouthpiece (included in package) for single use. If the "Flo" or "Flow" message is displayed while in use, this warns "insufficient airflow", and you are not blowing enough. Unit has range of 0.00 to 0.40% BAC (Blood Alcohol Content).

*PRISM (Pre-calibrated Replaceable Intelligent Sensor Modules)

US Patent No. 7,841,224,B2, and also globally patented.

Spare Sensor for Portable Breath Alcohol Tester

Spare sensor is also available as replacement, with PRISM Technology on AlcoMate Premium and Prestige Breath Alcohol Tester.

33 12 17	Sensor for portable breath analyzer	Pc.

Wall-mount Breath Alcohol Tester

Alcoholímetro de Montaje en Pared

壁掛け式アルコールチェッカー　壁挂式呼气酒精测试仪

A compact wall mounted breathalyser used extensively around the world. Following the on-screen instructions, donor inserts a mouthpiece into the sample port and blows steadily until the results appear. Uses premium grade platinum electrochemical fuels cells for accuracy. Test 100% of personnel prior to start of work. Patented modular system enables calibration to be completed on-site in 60 seconds increasing device availability for testing. Operates 24 hours per day in conditions from -10C to 55C. Easy installation. Optional data management system is available.

Unit Per Set

CODE	33 12 15
Model	Centurion Quantum
Test type	BrAC (Use Straw)
Data log capacity	10,000 + tests
Analysis Time	1 second for zero result
Calibration Period	12 months
Power Source	240 V
Certification	NHTSA/DOT/USCG AS3547:2019
Size mm	410 mm(H) x 210 mm (W) x 110 mm (D)
Weight kg	5 kg

Name of Mfr.: Alcolizer Technology

*BrAC denotes Breath Alcohol Concentration

Portable Drug Tester

Analizador de Drogas Portátil

ポータブルドラッグテスター　便携式药物测试仪

A fast, accurate saliva drug testing device for law enforcement and industrial workforces. A patented Optical Filtering System delivers accurate and fast drug test results and detects a variety of drug groups configured to target concentrations as specified under Australian Standards AS/NZS 4760:2019.

Unit Per Set

CODE	33 12 16
Model	Druglizer LE5
Test Options	Amphetamine, Benzodiazepines, Cannabis (THC), Cocaine, Methamphetamine, Opiates, Oxycodone
Sensor Type	Linear array with patented Optoelectronic sensor
Display	Transreflective colour graphics LCD screen
Analysis Time	90 seconds
Calibration Period	Module exchange system for one-site calibration every 6-12 months based on location
Power Supply	Rechargeable Li-ion battery
Operating Temperature	+15°C to +38°C
Standard	Australian Standards AS/NZS 4760:2019
Size mm	H196 × W66 × D43
Weight	310 grm

Name of Mfr.: Alcolizer Technology

Drug Testing Cups

Vaso para la Prueba de Medicamentos

ドラッグテストカップ　药物检验杯

A fully self contained drug screening cup for detecting drugs and drug metabolites in urine. Fully integrated design eliminates handling of the urine. Only the collector can activate the test, thus eliminating donor manipulation. Label hides test result from those who do not need to view results. The test is a fast visual, competitive panel immunoassay that can be used for the simultaneous, qualitative detection of a specific drug metabolite in human urine. Flat surface makes documenting result easy. The cup has easy Xerox feature where cup can be laid down on its side.

Features & Benefits

- FDA (U.S. Food and Drug Administration) 510(K) cleared.
- CLIA (Clinical Laboratory Improvement Amendments) waved.
- Up to 99% accurate.
- Adheres to the SAMHSA (Substance Abuse and Mental Health Services Administration) cutofffs.
- Shelf-life of 18 – 24 months.
- No more turning, simply put the key in and push.
- Easy to open top for the confirmation lab.
- The collector retains control of the chemistry & can time the results to insure proper interpretation.
- Tests for 5 drugs

  Marijuana (THC) 50 ng/ml

  Cocaine (COC) 300 ng/ml

  Amphetamine (AMP) 1,000 ng/ml

  Phencyclidine (PCP) 25 ng/ml

  Morphine / Opiates (MOR) 2,000 ng/ml

P. V. C. Water Suction/Delivery Hose

Plastic Coil Reinforced

Manguera de P.V.C. para Succiión y Distribución de Agua Reforzada con Bobina de Plástico
ウォーターデリバリー、サクションホース　P. V. C. 排水吸水管

Made of P. V. C. smooth inner and outer surface. The extreme clarity makes it most suitable for application where visibility of flow is an important requirement. Easy to handle and carry. Designed for both suction and delivery uses, but more suitable for delivery. The plastic coil reinforcement gives it durable strength.

Water Discharge Hose

P. V. C. Synthetic Fiber Braided

Manguera de Descarga / Fibra Sintética Trenzada de P.V.C.

ビニール化繊排水ホース　P. V. C. 化学纤维管

P. V. C. and synthetic fibers do not rust, corrode or require cathodic protection. Soft pliable, rolls up easily, requires minimum storage space. Tough, puncture proof, long service life.

Caution:

1. Transferring of paint, thinner, ethylene, gasoline, alcohol and similar chemical substaces is not advisable.
2. Do not use near nails, glass or other pointed objects.

Test Results

Flexibility:	Scott Type Flexibility Tests Operating load x 1,000 cycles No change
Resistance to Hight Temperature:	800°C ×168 hrs. No sticking
Resistance to Low Temperature:	-40°C ×168 hrs. No cracking
Resistance to Weathering:	800 hrs. by Sunshine-Weather-O-Meter exposure: No change
Water Absorbency:	Less than 0.9%

Plastic Transparent Hose

Manguera Transparente de Plástico

プラスチック透明ホース　塑胶透明水管

The extreme clarity makes it most suitable for application where visibility of flow is an important requirement. It can be easily flushed clean. It is resistant to sunlight and abrasion and is easy to handle. The hose can be twisted or knotted without any damage.

P. V. C. Steel Coil Reinforced Hose

Manguera de P.V.C. Reforzada con Alambre de Acero

スチールコイルビニール工業用ホース

P. V. C 钢丝增强管

Features : Ample flexibility. High external pressure resistance. Good transparency and smooth internal surface.

Application : As an oil hose for machine tools, or as a pressure pipe or suction pipe for various pulverized materials. Recommended for use in moderate temperatures of up to 65°C.

Unit Per Mtr.

Large Bore Hose

for General Chemical and Petroleum Cargo Use

Manguera de Gran Diámetro para Usos de Sustancias Químicas y de Petróleo

ケミカル・油用大口径ホース　原油用大口径管

Heavy duty, composite hoses for ship to shore, dockside and general shipboard use. Works in compliance with international standards including IMO standards, BS 5842 and US Coast Guard regulations. Made of polypropylene fabric and films with a weatherproof and abrasion resistant outer cover reinforced with internal and external wire spirals which are electrically bonded to the end connections giving full end-to-end electrical continuity for safety from static discharge.

Suitable for carrying a wide range of aggressive chemicals which require inert materials and can handle cargoes which involve factors of pressure and temperature with cryogenics such as LPG and LNG.

- Liquid and vapor hoses should be compatible with the cargo and suitable to the cargo temperature.
- Hoses subject to tank pressure or discharge pressure of pumps should be designed for a bursting pressure not less than 5 times the maximum pressure the hose will be subjected to during cargo transfer.

For Petroleum Use
(In compliance with IMO standard)

How to order: CODE
Hose for petroleum use, DIAM x LENGTH

Unit Per C/L

CODE	35 04 71	35 04 72	35 04 73
Nominal Size	4"	6"	8"
Working Pressure	10.5 kgf/cm²

Working Temperature	−25°C ~ +60°C		
Minimum Bend Radius mm	400	500	740
Standard Length mtr	18	18	15
Weight kg/mtr	6.5	11.0	15.0

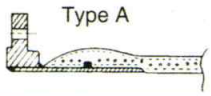
Note: When ordering, please specify what kind of chemical or material the hose will be used with.

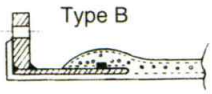
Suction and Discharge Hose

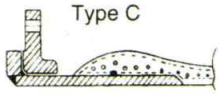
(Built in Fitting)

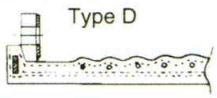
Manguera para Succión y Descarga

バンドレスホース　吸入及排放软管（内置于附件）









Designed for suction and discharge of air, water, oil, abrasion, chemical, heavy acid, etc. at working pressure of 100 psi, 150 psi, 200 psi, and 300 psi. These hoses are factory coupled, and there is no hose band used. Neither leakage nor flange separation will occur.

The hose details as to construction, flange, and usage are described as follows.

Hose Application & Size Table

W.P. / S & D HOSE	100 psi	150 psi	200 psi	300 psi	FLUIDS CARRIED
AIR	1"~ 20" (25A~ 500A)			1"~ 12" (25A~ 300A)	Compression Air, etc.
WATER	1"~ 20"			1"~ 12""	Cooling Water, Sea Water, etc.
OIL	1"~ 20"			1"~ 12"	Crude Oil, Heavy Oil, Kerosene, etc.
ABRASION	1"~ 20"			1"~ 12"	Cement, Sand, etc.
CHEMICAL	1"~ 20"			1"~ 12"	Caustic Soda, etc.
HEAVY ACID	1"~ 8" (25A~ 500A)				Hydrochloric Acid, Sulfuric Acid, etc.

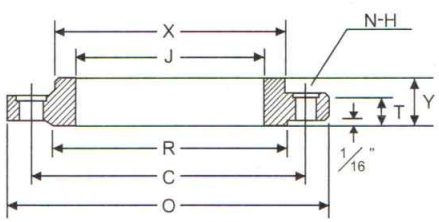
Details of Built-in Fittings for Hose End

 Type A	Built-in Nipple Type (Example...Air, Water, Oil, etc.)
 Type B	Rubber Lining Type (Example...Water, Abrasion, Chemical, Heavy Acid, etc.)
 Type C	Lap Joint Flange Type (Example...Air, Water, Oil, etc.)
 Type D	Split Ring Flange Type (Example...Abrasion, Chemical, Heavy Acid, etc.)

Fittings: According to customer's requirements.

Hose Specification

Reinforcement	Synthetic cord fabric plies and helical hard steel wire reinforced
Colour	Black
Maximum Length	Over 1' thru 14'65" (20 mtrs) Over 16' thru 20'20" (6 mtrs)
Remark	The Hose for Rubber Lining Type (B) has Flat Face Flange



Hose Composition Material

Material / S&D HOSE	Tube	Cover
AIR	Natural rubber	Synthetic rubber, resistance to weathering
WATER	Natural rubber	
OIL	Synthetic rubber, resistance to oil	
ABRASION	Synthetic rubber, resistance to abrasion	
CHEMICAL	Synthetic rubber, resistance to acid	
HEAVY ACID	Special compounded synthetic rubber, resistance to heavy acid	

The following tables are provided to assist you in determining the proper flanges and hoses for safe use at high temperatures and pressures, or when conveying chemicals or toxic material.

Details of Hose Flange Applied

Details of the Flange used for these hoses are as follows: ANSI B 16.5 Forged Flange Slip on Type.

Class 150 lb

Guide of How to Order

Above hoses are described only just for your reference and not coded, but when ordering, please specify exactly the following matters.

CODE	**35 - 05 - 01**
Fluid Carried	Air, Water, Oil Abrasion Chemical, Heavy Acid
×	
Nominal Size	1" ~ 20"
×	
Working Pressure	100 psi, 150 psi
×	
Hose End Fitting & Flange Type	Built-in Nipple Rubber Lining Type & Lap Joint Flange
×	
Working Temperature	-20°C ~ +60°C
×	
Length of Unit	20 Mtrs (1" ~ 14") 6 Mtrs (16" ~ 20")

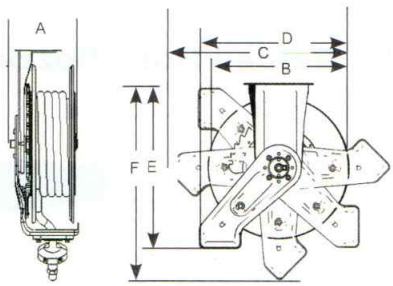
Reels with Hose

for Petroleum/Grease/Air/Water

Rollos de mangueras para petróleo/grasa/aire
油・グリース・エア用リール付きホース
配有卷盘的油、润滑脂、空气用软管

Increased frame strength in a single pedestal, composite spool option. Improved spring makes it easy to pull out the last 10 feet. Full-flow swivel maximizes material flow with minimal pressure drop. Larger hose capacity (30 - 60 foot, 10 - 20 meters) with smaller profile to fit into tight spaces. Improved latch design prevents lockout and simplifies repositioning the arm.

SD Series



Compact design easily fits in small spaces. Steel spool stands up to demanding use and applications. Can be used either as an open or enclosed reel. Flexible positioning of the guide arm for mounting on bench or ceiling, wall or utility truck. Structurally reinforced frame made from high strength steel won't bend or flex. Baked-on enamel finish protects reel from corrosion for longer life. Now available in six colours (Metallic Blue, White, Red, Black, Dark Blue, or Yellow), but Metallic Blue is supplied unless any colour is not indicated in your order.

Steel Spool Hose Reels

Designed for daily use applications. Long-lasting spring provides constant spring torque through the entire range of motion. Open swivel ports ensure high fluid flow with minimal pressure loss. Enclosure kits available-ideal when appearance and protection is important.

Name of Mfr.: Graco Inc.

Oxygen & Acetylene Gas Hose Reels

Enrolladores de manguera para oxigeno y acetileno
酸素・アセチレンガスホースリール
氧气和乙炔气体软管卷盘

Safely transports oxygen and acetylene gases for both welding and cutting applications from the cylinders to the working place. The hose serves as a flexible conduit, connecting

the gas supply to the torch or welding equipment. It is designed to withstand the high pressure and specific requirements of oxygen and acetylene gases, ensuring a reliable and controlled flow. Safety features are incorporated into the hose design to prevent leaks and maintain the integrity of the gas supply.

Plastic Garden Hose Nozzles

Lanza de Plástico para Manguera de Jardín
ガーデンホース用プラスチックノズル　水管喷嘴

Combination nozzle designed for spray or straight delivery by simply adjusting a round screw. Hose end is available in 15 mm size only.

35 10 01	Nozzle, garden hose, plastic hose end 15 mm	Pc.

Cast Aluminium Garden Hose Nozzles with Spray

Boquillas de Aluminio para Lanzas de Manguera von Rociador
アルミ鋳物ホースノズル　铝铸水管喷嘴

Made of cast aluminium. Spray flow can be adjusted by turning the nozzle. Two types of nozzles are available: a 9 - 15 mm adjustable hose end and a 25 mm fixed end.

35 10 04	Hose nozzle, adjustable, 9 mm and 15 mm hose end	Pc.
05	" fixed, 25 mm hose end	

Pistol Grip Hose Nozzles

Lanza Pistola　レバースプレー　手枪式水管喷嘴

Brass made and finished with chrome. Furnished with variable spray flow squeeze lever. Nozzle available in 15 mm dia. only.

35 10 08	Nozzle hose, pistol grip, 15 mm hose end	Pc.

Lock Type Air Hose Couplings

Racores de Manguera de Aire
ロック式エアホース継手　锁扣式空气管接头

The quick lock coupling feature makes it especially efficient and economical for every kind of air and pneumatic service. Press the two fittings together, give a quarter turn to one, and the connection is made. Made of cast brass, with hose ends on both sides. Furnished in sets only.

Unit Per Set

CODE	Hose Size		CODE	Hose Size

Universal Air Hose Couplings
with Hose End or Thread End

Coples de Manguera Universal para Aire con Punto para Manguera o con Punto de Rosca
ユニバーサルホース継手　万向空気管接头

Brass made couplings forming a positively locked connection that will not break or come apart in service. The locking jaws are heavy with large bulk surfaces which cannot bend or break loose. Couplings are interchangeable between various sizes and combinations according to DIN 3489. 42 mm distance between lugs.

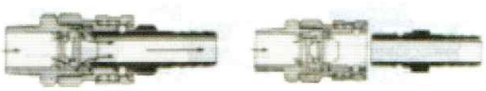
Quick-Connect Couplers

for All Purposes



Enchufes Rapidos Multiusos　万能流体継手　快速接头

A general-purpose coupling which can close at either end of the connection. It is a convenient, compact coupling set which connects and disconnects easily, providing dependable service for fluid transfer of hydraulic, pneumatic, and vacuum systems.

The flow side coupling has a floating ball valve which will automatically stop the flow of liquid or gas when the coupling is disconnected.

1. Single End Shut Off Coupler

Enchufes Simple　万能流体継手片路開閉型　快速接头

Connect　　Disconnect

One way ball locking most ordinary type of sockets & plugs. When these sockets and plugs are disconnected, liquid or gas inside will stop flowing automatically on the socket side.

Pressure Rating & Application

Withstanding capacity of main body materials against pressure is as follows.

Material / Fluid Pressure	Steel	Brass	Stainless Steel
Working pressure	1.5 MPa (15 kgf/cm²)	1.0 MPa (10 kgf/cm²)	1.5 MPa (15 kgf/cm²)
Pressure resistance	2.0 MPa (20 kgf/cm²)	1.5 MPa (15 kgf/cm²)	2.0 MPa (20 kgf/cm²)
Major Applicable Fluid	Air	Air, Water	Air, Water

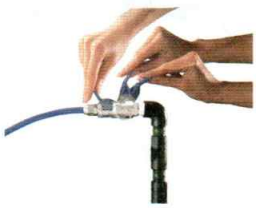
Purge System Hi Couplers and Line Couplers

Coples Altos y Coples para Línea de Sistemas de Purga

パージ式クイックカップラー・ラインパックカップラー

驱氧式 Hi 接头



Push-to-connect operation with valve opening and closing by the purge system lever action, which eliminates unpleasant shock and noise on disconnection.

The lever will never turn to open until plug is connected by means of safety measure.

Purge System Hi Cuplas

Made of chrome plated brass. Can be connected with PH, PM and PF series plugs sized from 1/4" to 3/4".

Unit Per Pc.

CODE	Model	Size Male Thread	Working Pressure	Max. Pressure	Applicable Plug Type

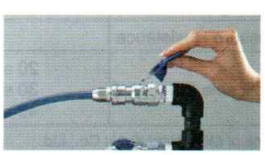
Name of Mfr.: Nitto Kohki Co., Ltd.

* Method of operation



1. Push-to-connect operation.
(In this stage, the valve in the socket is not open.)

2. Turning down the lever opens the valve and allows the fluid to flow.
(The turned-down lever works as a sleeve stopper and prevents disconnection.)

3. When the lever is pulled up, residual air pressure in the plug is purged without an unpleasant popping noise and a hose whip back motion on disconnection.
(In this stage, the socket valve is still closed.)

Purge System Line Cuplas

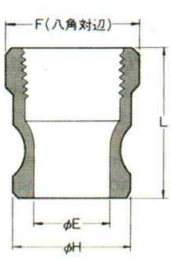
Cam and Groove Couplings

Acoplamientos para Leva y Ranura

エバータイトカップリング　　凸轮及槽式连接器



They are quick, tight, leakproof connections to pipe, tubing, hose or tanks and provide quick liquid and material hose connections that seal tight and stay tight. Sizes from 1/2" to 8" are available. They are made of aluminium alloy, brass, stainless steel and other metals for use with liquids, vapors, gases and air-blown dry products. Suitable for use with single connections and where changes in connection to a number of tanks or outlets may be required.

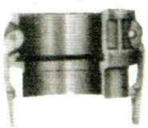
Any of these Adaptors will quick connect to.....

Part A Male coupler /female thread. 1/2" to 8".



Part F Male coupler /male thread. 1/2" to 8".

Part E Male coupler /hose end. 3/4" to 8".

		
Part E reducer or increaser (illustrated). Sizes 3" to 4".	**Part AW** male adaptor/socket or butt weld.1/2" to 10".	**Part AS** male adaptor/straight female pipe thread for dry products 3" to 10".

....any of these couplers of the same size

		
Part B female coupler/male thread. 1/2" to 6".	**Part D** female coupler/female thread. 1/2" to 8".	**Part C** female coupler/hose end. 1/2" to 8".
		
Part B reducer female coupler/ male thread. Sizes 2" to 4". Aluminium, brass.	**Part DW** female coupler/socket or butt weld. 1/2" to 10". All metals.	**Part DS** female coupler/female straight pipe thread for dry products 3" to 10". All metals.

Coupling Assemblies

Spool Adaptor 	Part SA spool adaptor connects two lengths of hose with coupler ends. 1/2" to 6". In all metals except in larger sizes. (Spool couplers are also available.)
Gaskets 	Gaskets are of buna composition unless another material is specified. Other available gasket materials include Neoprene, pure gum, butyl, teflon, viton, E.P.T., Thiokol or any other material to meet specifications.
Handles 	Handles are stainless steel or forged bronze with stainless steel pins. Cadmium plated rings are supplied on all sizes except 1/2", 3/4", 1", 6", 8", or 10".
Brass Chain	Brass chain, with two "S" hooks for attaching dust caps or dust plugs to adaptors or couplers, is available in any length desired.

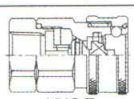
Quick Disconnect Couplings

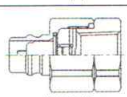
for Oil pressure and Liquid

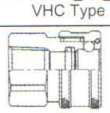
Acoplamientos de desconexion rápida

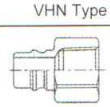
簡単脱着カップリング　　便于装卸式联轴器

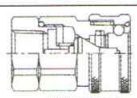
A quick connect and disconnect couplings suitable for flowing large spills of general hydraulic oil, water and chemicals by the possible large flow amount. There are three types of material; carbon steel, Brass or Stainless steel (SUS-304).

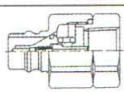












Maximum Usable Pressure of the Seal Material

Material		Working Temp. Range	Max. working pressure MPa (Stillness Pressure)				
Body	Seal		04	06	08	12	16
Carbon Steel	NBR	-30 to +93℃	45.0 (21.0)	32.0 (21.0)	28.0 (21.0)	25.0 (21.0)	14.0 (14.0)
Brass	NBR	-30 to +93℃	7.0	7.0	7.0	7.0	7.0
Stainless Steel	NBR	-30 to +93℃	7.0	7.0	7.0	7.0	7.0

Coupler Side Main Seal Form

Material		Form	Features
Body	Seal		
Carbon Steel	NBR	 Single O ring	It exhibits stable performance specially when under dynamic pressure.
Brass	NBR	 U Packer	It exhibits superior sealing performance than that of a single o-ring at less than the maximum usable pressure of 7.0 MPa.
Stainless Steel	NBR	 U Packer	

Carbon Steel

	Coupler	Nipple
With Valve	 VHC Type	 VHN Type
Without Valve	 OHC Type	 OHN Type
With PH Valve	 PHC Type	 PHN Type

Remark: PH valve enables connection even with residual pressure. Connection is possible at 17.7 N even under the residual pressure of 7.0 MPa. It can be connected when residual pressure is present, but cannot be disconnected under the circumstances.

Carbon Steel Coupler and Nipple Combination List

Type	VHN	OHN	PHN
VHC	○	○	○
OHC	×	○	×
PHC	○	×	×

Remark: o = Applicable, × = Not applicable

Signal Bells

Campanas de Señales　号鐘　船钟

Made of cast brass with a highly polished finish. The size is determined by measuring the bell mouth opening. The required size is over 300 mm diameter for the vessels of length greater than 20 mtr.

37 01 01	Bell, signal, cast brass	200 mm	Pc.
02	"	300 mm	"
03	"	400 mm	"

Air Horns

Bocinas de Aire (Niebla)
エアーホーン　汽笛

Required installation under the international regulations for preventing collisions at sea,1972 (COLREGs). The fundamental frequency of the horns shall be between 130 – 350 Hz for a vessel greater than 75 mtrs but less than 200 mtrs in length, and 70 – 200 Hz for a vessel 200 mtrs or more in length.

Manually operated and electromagnetic types are available.

How to order: CODE

Air horn, for vessels of 75 – 200 mtr in length, LENGTH of VESSEL, TYPE of OPERATION

Battery Chargers for Handheld Marine Radio

Cargadores de Batería para Radio Portátil Marino
無線電話用充電機　对讲机备用电池

Battery charger operates between 110-230V, charge time is approximately 3 hours. Please specify the manufacturer and model when ordering.

37 01 19	Battery chargers for Handheld Marine Radio	Pc.

Two-way VHF Radiotelephone Apparatus

Aparaatos de Radiotelefonía VHF, de Doble-vía
双方向 VHF 無線電話装置　双向 VHF 无线电话装置

According to the 1983 amendment to the SOLAS regulations 1974 in Chapter III Regulation 6, at least 3 two-way radiotelephones shall be provided on every cargo ship of 500 gross tons or more. The two-way radiotelephone enables communication between the survival craft, the ship, and the rescue boat.

Precautions shall be taken to prevent the inadvertent selection of VHF channel 16 on equipment capable of being operated on that frequency. A watertight model is required for satisfying GMDSS requirements (1988 amendment).

Specifications for Reference

Frequency Range	VHF 156.750 - 156.850 MHz
Size & Weight	165 × 64 × 45.5 mm, 600 grm

37 01 33	Two-way VHF radiotelephone conforms to GMDSS	Pc.

Handheld Marine Radios Intrinsically Safe – USTC Certified

Radios Marinos Portátiles Intrinsecamente Seguros

防爆型無線電話裝置

防爆型掌上無線通訊器 USTC 認證

Intrinsically safe radio conforms to all aspect of USTC (U.S. Testing Company) certification for portable used in hazardous locations. If further exceeds this by being fully submersible to 5 meters depth for up to one hour. Meeting MIL STD 810C/D/E rating for tough, enduring performance, the radio conforms to stringent standards, enabling it to withstand the everyday rigorous of shock, vibration and the corrosive action of dust and moisture, ensuring of many years of trouble-free use even in a salt water environment. Very simple to use, with the majority of its features accessed by a single key depression. Latest compandor noise reduction technology delivers loud and crisp audio no matter what environment you are in.

Intrinsically Safe Marine UHF Transceivers

400MHz 2W Waterproof

Transmisores navales UHF intrínsecamente seguros

本質安全防爆適合型舶用 UHF トランシーバー

本质安全防爆适用型船用 UHF 收发器

The Maritime Safety Committee (MSC) adopted the following amendment to SOLAS regulation II-2/10 regarding fire fighters' communication: "For ships constructed on or after 1 July 2014, a minimum of two two-way portable radiotelephone apparatus for each fire party for fire-fighter's communication shall be carried on board. Those two-way portable radiotelephone apparatus shall be of an explosion-proof type or intrinsically safe. Ships constructed before 1 July 2014 shall comply with the requirements of this paragraph not later than the first survey after 1 July 2018."

The JHS-431 is a 2 Watt UHF intrinsically safe transceiver designed for on-board communications in ship operations, loading/unloading, and mooring. The JHS-431's intrinsically safe structure meets ATEX Directive 94/9/EC for use when transporting flammable, dangerous materials by Tanker, LPG carrier, LNG carrier and/or LO carrier, and meets above SOLAS amendment by MSC.

3 more communication channels can be installed as a pre-set option.

Communication is getting difficult in a noisiness area

The MSA L'COM Communication system is a complete module with headband system for wearing without helmet.

- 2 x 32 Ω speakers in parallel, max power 100 mW.
- 100Hz-10 kHz electro-dynamic microphone.
- Omnidirectionnal microphone.
- Position of speaker and microphone close to ear, ear remain free.
- Loud and clear communication is possible.

Connection with a wide range of brand and types of radios is possible.

Osteo Communication

Osteo Comunicación
オステオ・コミュニケーション　Osteo 通信

By simultaneous use of a SCBA and a radio, communication is getting difficult in a noisiness area.
The MSA Osteo Communication system is a complete module with headband system for wearing with helmet in combination with or without full face mask.

- Module integrating loudspeaker.
- 32 Ω speaker (one speaker), max power 100 mW.
- Bone conductive microphone, accelerometer 1 mV/mG.
- Bandwidth 20 Hz to 20 kHz.
- Voice transmission by skull vibration.
- Connection in the helmet close to ear (Left or right) for the speaker module and attachment to the cradle net for the Bone microphone.
- Possibility to adapt a pouch for use without helmet.
- Loud and clear communication is possible.

Connection with a wide range of brand and types of radios is possible.

37 01 46	Communication System: helmet mounted type, Osteo communication (specify brand and type of radio in use)	Set

Name of Mfr.: MSA The Safety Company

Ear Muffs with Communication

Casco Auricular para la Comunicacón
通信機能付きイアーマフ　附通訊功能耳機

Highly efficient ear muffs for protection of loud noises of all pitches in factories and areas where air compressors and turbines are used. The challenge is to balance personal attenuation devices with comfort and the ability of communication, so that workers will wear their hearing protectors all the time.

MSA Sordin's Connected by Cable is a comfortable hearing protection line equipped with a noise cancelling microphone and a down lead for connection to a two-way radio.

Product features:
- Can be connected to mobile phones in combination with a separate adapter. Supplied with a 2.5 mm stereo plug.
- Also available for direct connection to communication radios such as Motorola, Kenwood, Icom, etc. and DECT phones.
- Noise cancelling boom microphone permits two-way communication with minimal interference from background noise.
- All electronic features are controlled using three distinct push buttons.
- Certified to EN 352-1 (headband version).
- Certified to EN 352-3 (helm mounted version).
- SNR 28dBA (headband version), 27dBA (helm mounted version).

Unit Per Pr.

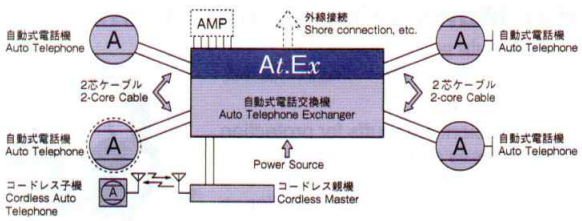
Ship Borne Telephones

Teléfonos Comunicaciones para Buque　船舶用電話機　船用電話機

As a wide range of multi-purpose telephone sets for the marine communication fields are available from different manufacturers, the most common types are listed below.



A. Marine Auto Telephones

Teléfonos Automáticos para Buque
船用自動式電話機 船用自動式電話機

These sets are built sturdy based on the design to achieve high reliability while also meeting all the requirements for the marine telephone sets to be connected with the marine electronic telephone exchange.

These telephone sets are designed to be compatible with the DP (Dial Pulse) /PB (Push Button) dials to meet the requirements of the various telephone lines. The received indication (Tone-ring & Lamp) is furnished on all models.

These telephone sets have been granted the approval of the JATE (Japan Approvals Institute for Telecommunication Equipment) standards to allow access, via the marine electronics telephone exchange, to the land line including the via-INMARSAT, cellular marine telephone and shore telephone sets.

Intrinsically Safe Auto Telephones

Teléfono automático intrínsecamente seguro
本質安全防爆自動式電話　本质安全型防爆自动电话

This telephone system is composed of telephones and safety maintaining unit. This telephone set located in explosive hazardous area can be connected to the telephone lines of marine telephone exchange, PABX (Private Automatic Branch Exchange) or analog telecom network via Buffer Unit.

With its safe security system, the equipment can be operated for a long period of time in a dangerous environment such as oil carrier ships, LNG/LPG carrier ships, chemical carrier ships. Specified to the intrinsically safe explosion proof construction grade that satisfies the ia standard, assuming two accidents, in compliance with the IEC specification, meets the requirement of the Ex ia IIBT4 class of equipment in terms of explosion proof and inflammable nature. The authentication of the IECEx has acquired.

Ex. Protection:

Marine Battery-less Telephones

Teléfonos navales sin pilas
船用バッテリーレス電話機　船用无电池电话机

These telephones do not require a source of electric power for calling and communication. Rotating handle will generate electric power to ring the other station, and accumulated power is used to amplify acoustic sounds to make conversation loud and clear.

They are roughly classified into two systems; Direct Telephone and Selective Telephone. The latter allows maximum 12/24 telephones to configure (one conversation link). And they are possible to connect to Intrinsically Safe Types, shown in the layout drawing below. Each telephone has relay inside terminal so that optional devices such as bells can be equipped.

INTRINSICALY SAFE BATTERY LESS TELEPHONE SYSTEM (Example) (12stations)

Marine Intrinsically Safe Construction Battery-less Telephones

Marine Intrinsically Safe Construction Teléfonos sin batería
舶用本質安全防爆構造バッテリーレス電話機
海洋本质安全建筑无电池电话

These telephones are of Intrinsically Safe construction. They can be used in hazardous areas and allow to connect to the telephones in the safety areas, shown in the layout drawing shown on the previous "Marine Battery-less Telephone". IS Barrier shall be equipped intermediate for safety connection between two areas (Marine battery less telephones and Marine intrinsically safe construction battery less telephones). This system is roughly classified into two systems; Direct Telephone and Selective (12/24 stations) Telephone.

As they do not have devices to tell the reception, other devices such as Air horn, Whistle, and/or Beacon should be equipped.

The authentication of the IECEx has acquired.

Waterproof type microphone to be used for ship's radio amplifier. Available as microphone only or with curl cord with capacity 40 Ω or 600 Ω. Please specify the length of curl cord if required.

Unit Per Pc.

CODE	37 01 81	37 01 82	37 01 83	37 01 84
Curl Cord	With	Without	With	Without
Impedance	40 Ω		600 Ω	
Frequency	100 - 8,000 Hz		100 - 8,000 Hz	
Switch Circuit Capacity	AC 125V 5A DC 115V 0.5A		AC 125V 5A DC 115V 0.5AC	

Radio Room Clocks

Relojes para Cuarto de Radio　無線室用時計　电台钟

For use in radio rooms. The diameter of the dial is 200 mm with the numerals 1 - 12 on the outer edge and the numerals 13 - 00 on the inner side showing international time. Seconds

are marked clearly in red between the hour numerals. There are two 3 minute silent periods at 15 and 45 minutes past the hour marked in red for emergency signals, and two 3 minute silent periods at 0 and 30 minutes in green for distress signals. The clock has 2 hour hands, one to be set in Greenwich Mean Time and the other to indicate local time.

A Vapour-Proof type(IP54) with Stainless Steel Casing is also available.

37 02 01	Clock, radio room, quartz 200 mm dia.	Pc.
02	Clock, radio room, stainless steel casing, vapour-proof	Pc.

Marine Clocks

Relojes Marinos　船用時計　船用钟

A quartz, battery operated clock. The case is backed with rubber to provide resistance to shock and dust.

A Vapour-Proof type(IP54) with Stainless Steel Casing is also available.

37 02 04	Clock, marine, quartz 200 mm	Pc.
05	Clock, marine, stainless steel casing, vapour-proof	Pc.

Stopwatches

Cronómetros　ストップウォッチ　秒表

Precision stopwatches which can time to the accuracy of 1/5 and 1/10 of a second on an analogue watch and 1/100 of a second on a digital watch.

Analogue

Digital

Unit Per Pc.

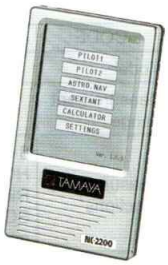
Analogue		Digital	
CODE	Second	CODE	Second
37 02 11	1/5	**37 02 13**	1/100
12	1/10		

Stopwatches and Time Printers

Cronómetros e Impresoras de Tiempo

プリンター接続可能ストップウォッチ　时间记数秒表

A 1/100 second digital stopwatch with a built- in printer to record the measurements. The main unit retains a memory even if the measurements are taken and printed out. It has an auto-start function that automatically starts measuring at the set time. The printer runs on 4 x R6P (UM-3) dry batteries. Furnished with two 38 mm wide rolls of printing paper.



37 02 16	System stopwatch digital 1/100 second	Pc.
37 02 18	Roll paper for digital stopwatch printer 38 mm wide × 2.5 mtr L　2's	Pkt
19	"　5's	"

Navigation Calculators

Calcuadoras de Navegación　天文航法計算機　天文航法计算器

Digital navigation calculators for assessing the ship's position by simple operation with built-in programs. Easy-to-understand dialogue system telling what input data are required, and what output data are displayed.

Major navigation functions are ;

* Simple operation with built-in programs.
* Course and Distance computation.
* Dead Reckoning computation.
* Great Circle computation.
* ETA computation.
* Current computation.
* LOP computation.
* Meridian Passage computation.
* Convenient conversions for to HMS and to HHH.
* Long term Nautical Almanac for the Sun, Moon, Venus, Mars, Jupiter, Saturn and 63 stars. The built-in Almanac is usable until 2100, and it is good with accuracy better than 0'.2.
* Twilight Time mode computes times of rise or set, civil twilight and azimuth for the Sun and rise or set, age and azimuth for the Moon.
* Prediction/Identification mode computes azimuth and altitude for all celestial bodies and displays any usable bodies above the horizon.

Specifications

Operation	Touch panel with stylus
Power source	3 pieces of size AAA battery (dry cell)
Operating time	Standard approx. 8 hours for continuous operation
Operating temperature	0°C - 45°C (32)
Display	Liquid crystal display (LCD), 240 × 320 dots
Dimensions	72 mm (W) × 125 mm (D) × 14 mm (H), or 2.83 in. (W) × 4.42 in. (D) × 0.53 in. (H)
Weight	165 g (without battery) or 582 oz. (with battery)
Standard accessories	Stylus and neck strap

37 02 27	Navigation calculator	Pc.

Digital Planimeters

Planímetros Digitales　デジタル面積計　数字式面积仪

A very precise instrument for quick and accurate determination of area on blueprints, maps, photographs, drawings, etc. Simply follow the outline of the area. The revolution of the measuring wheel in either direction is sensed by the electro shaft-encoder which generates pulses which are processed by the custom-made LSI.

Planix 7

Planix 10S marble

Unit Per Pc.

CODE	37 02 31	37 02 32
Model	PLANIX 7	PLANIX 10S Marble
Measurement Range	300 mm x 3 mtr	300 mm x 10 mtr
Measurement Functions	8 digits output/input HOLD, MEMO, BATTE, READY, cm^2, in^2, SCALE, m^2, km^2, ft^2, acre	Area, line length, and side length, with the following measuring units : mm, cm, m, km, in, ft, acre/yd, user-defined units
Display	Dot LCD 8 digits × 1 line, with zero suppression	LCD 16 digits × 2 lines
Resolution	One digit corresponds to 0.1 cm^2 or 0.01 in^2	±0.05 mm
Accuracy	Better than ±0.2% (±2/1,000 pulses)	±0.1% (100 x 100 mm area measurement)
Power	Internal nickel metal hydride (Ni-Mh) battery or AC adaptor	Internal nickel metal hydride (Ni-MH) battery or AC charger/adaptor
Operating Hours	30 hours (after 15 hours recharge)	20 hours (after 15 hours recharge)
Dimensions (Body)	150 × 240 × 39 mm	250 × 110 × 40 mm
Dimensions (storage case)	183 × 260 × 64 mm	183 × 260 × 64 mm

Accessories	Storage case, AC adaptor	Storage case, AC charger/adaptor, gauge template

Name of Mfr. : Tamaya

Automatic Chart Plotters

Instrumentos Automáticos de Dibujo para Carta Náutica

自動海図プロッター　自动图表绘图机

Automatic chart plotter continuously lights up ship's precise position on ordinary charts according to longitude and latitude signals from the GPS (Global Positioning System) or other position reference systems, contributing to ship operation labor-savings as well as safe navigation.

A convenient operation panel lets you register any chart for use in the system. The panel includes display functions for longitude, latitude, heading and speed. Additional interfaces receive data from an onboard gyrocompass and speed log for a high-accuracy position indication.

Also the automatic plotter has route planning and memory card storage functions.

When ordering, please ask for brochures or consult with a sales engineer from the local distributor for further information.

Specifications

Accuracy	±0.3 mm
Diameter of Light Mark	10 mm
Liquid Crystal Display	Alphanumeric, 16 characters × 2 lines
Display Information	Longitude, Latitude, Heading and Speed
Power Consumption	300 VA

37 02 36	Automatic chart plotter	AC 110 volt	Set
37	"	AC 220 volt	"

Clinometers

Clinómetros　傾斜計　倾斜仪

A clinometer is required for positioning a vessel on a proper trim. It also indicates the correct heel angle and is helpful in determining the appropriate locations for cargo and equipment.

Wall-mounted dial type and tube type(bubbles/balls) are available. With tube type clinometers you can check the inclination of the ship from the position of the air bubbles/balls in the glass tube.

There are types with maximum measurement angles of 40° (dial type), 5°, 15° (tube type with a bubble), and 40° (tube type with a ball).

Dial Type

Tube Type (Bubble)

Tube Type (Ball)

Unit Per Pc.

CODE	Type	Specification
37 02 41	Dial Type	Heavy glass front, 200 mm dial, graduated 0 – 40 on each side of the vertical plane in 5 integrals, 80 mm pointer and two maximum indicators with reset device and stop to hold movable pointer when not in use. Weight 1.5 kg.
37 02 42	Tube Type (Bubble)	Single tube clinometer with a bubble type. Size: 200 × 550 × 20 mm, The tube is graduated 0 - 5°. Weight 1.7 kg.
37 02 43	Tube Type (Ball)	Single tube clinometer with a ball type. Size: 200 × 350 × 40 mm. The tube is graduated 0 - 40°. Weight 1.5 kg.

Azimuth Circles

Círculos Azimutales

アジマスサークル　方位仪

The Azimuth Circle is mounted on the repeater compass. By means of a prism and reflection mirror, sunlight is projected in the form of a line on to the compass card through a slit, thus making it possible to observe the sun. The most common types are listed below. When ordering, please specify the name of the manufacturer.

How to order: CODE

Azimuth circle, MANUFACTURER'S NAME & MODEL of repeater compass

Unit Per Pc.

CODE	Manufacturer	Model	Size mm			Graduation
			I.D	O.D	H	
37 03 21	Tokyo Keiki	-	246	260	120	Nil
22	Yokogawa-Navitek	KX-603				Graduated
23	Others	-	-			-

Marine Aneroid Barometers

Barómetros Marinos
船舶用アネロイド気圧計　船用气压表

Specially designed for marine use. It will withstand the vessels vibration without losing accuracy. Available in 150 mm and 200 mm dial size.

37 02 46	Barometer, aneroid, marine use 150 mm dia.	Pc.
47	" 200 mm dia.	Pc.

Hygrometers

Hygrómetros　乾湿計　干湿计

Wet & Dry Bulb Hygrometer

Higrómetro de Bulbo Seco y Húmedo
乾湿計　干湿球湿度计

Consisting of dry and wet alcohol filled glass thermometers fixed on a panel. By differential indication between these thermometers, humidity can be read from the table mounted on a panel. Range –10 to 50°C in 1° integrals. Panel size 280 × 80 mm.

37 02 51	Hygrometer, wet & dry	Pc.

Dial Thermo-Hygrometers

Termohigrómetros de Esfera
丸型温湿度計 圆形温湿度计

Wall mounted bimetallic dial thermometer with hair hygrometer. Standard dial diameter is 100 mm. Best for cabin use.

37 02 56	Dial thermo-hygrometer wall-mount 100 mm	Pc.

Sling Psychrometers (Hygrometers)

Sling Psychrometers (Higrómetros)
振廻式乾湿計　旋转式干湿度计

Two similar balanced thermometers mounted on brass panel with chain. A metal handle enables the instrument to be whirled. Furnished with psychrometeric table and leather case. Range –20 to 50°C in 1/2° div. Case size is 200 × 40 × 40 mm.

37 02 61	Psychrometer, sling type, complete	Set

Hair Hygrometers (Lambreht's Polymeters)

Higrómetros Capilares　毛髪湿度計　毛发湿度计

This instrument, known as a polymeter, measures temperature, humidity, vapour tension and dew point. A mercury filled glass thermometer is attached. The humidity element is a bundle of human hair. The dial which indicates selective humidity is 80 mmø. Temperature range –20 to 50°C in 1° div. and Humidity scale 0 to 100 % 0.18 kg in weight. 263 mm in length.

37 02 66	Hair hygrometer (polymeter) with mercury thermometer	Pc.

Digital Thermo-Hygrometers

Termohigrómetros digitales　デジタル式温湿度計　数字式温度湿度计

A compact, portable thermo-hygrometer that monitors atmospheric temperature and humidity by single unit.

Weight		49 grm	75 grm

Digital Hand Anemometers

Anemómetros Manuales Digitales
デジタル手持ち風速計　数字式手持风速计

Portable digital anemometer with temperature measurement function. It can be used for wind force measurement in a wide range of fields, measuring range is 0.4 – 30.0 m/s, temperature range is -20°C - 60°C. Measurement accuracy will be ±3% +0.3m/s (wind force) and ±1.5°C (temperature).

37 02 71	Anemometer, hand, with dial gauge up to 22 m/s	Pc.

Digital Anemometers

Anemómetro digital　デジタル式風速計　数字式风速计

A portable digital anemometer with integrated vane or with remote vane extended by curled cord.

With Integrated Vane

With Remote Vane extended by Curled Cord

Unit Per Pc.

CODE	37 02 73	37 02 74
Type	With integrated vane	With remote vane extended by curled cord
Measuring Range	1.1 - 20.0 m/s -15 - 50.0°C	0.70 - 25.00 m/s -10.0 - 50.0°C
Power Requirement	1 × Lithium battery CR2032	1 × 9V (6F22) battery
Size	W144 × H47 × D26 mm	W71 × H181 × D38 mm
Curled Cord	-	L: 500 mm
Weight	95 grm	360 grm

Barographs

Barógrafos 自記気圧計
自动记录气压计

A newly designed self recording barometer. Very compact with a wide recording range. Can be installed in an indoor or outdoor instrument shelter. Provides an inked record of the station pressure for 24 hours or 7 days. Furnished with 7 days revolution recording paper for one year (55 sheets) and gear for one day drum rotation. One day recording paper is available upon request.

37 02 86	Barograph, 940-1, 045 mb, with recording paper for one year	Set
87	Recording paper 7 days for barograph 55 sheets	Pad
88	Recording paper 1 day for barograph 400 sheets	"

Specifications

Sensor	14 cell, 2 in. dia. aneroid
Sensitivity	±0.2 millibar
Accuracy	±0.2% of range
Lag Time	0.1 sec.
Temperature Compensation	Bimetallic Strip
Chart Scales	940 to 1,045 millibars 705 to 785 mm/Hg
Chart Drive	8-day spring wound
Drum Rotation	1 day & 7 day by gear change
Weight	3.5 kg
Size	325L × 155W × 240H mm

Sounding Leads

Plomadas おもり 测深锤

Designed for measuring sea depth. Has a hole at one end for connecting rope. Furnished without attached line.

Unit Per Pc.

CODE	Lead Weight (kg)	Description
37 03 01	3.2	Hand Lead
02	12.7	Deep Sea Lead

Sounding Rods

Varillas de Sondeo 测深棒 测深杆

A graduated square or round straight or jointed folding brass rod with attached ring; used for measuring the depth of liquid contained in a space. When ordering, specify the shape of the rod, the length, and the number of folds.

How to order: CODE

Sounding rod, NUMBER of FOLDING, SHAPE of ROD, LENGTH, GRADUATION

Nautical Sextants

Sextantes Náuticos 航海用六分儀
航海用六分仪

A sextant is an instrument for measuring the angle between two objects by bringing into coincidence to the eye of the observer, rays of light received directly from one object and reflected from the other. Its principal use is to measure the altitudes of celestial bodies above the visible sea horizon. Available in various types. When ordering, please specify the type of telescope (magnifying & lens diameter).

Unit Per Set

45	7 × 50	IF, WP, with Scale

Remark: CF=Center Focus, IF=Individual Focus, WP=Water Proof

All-Weather Stand Type Binoculars

Prismáticos con Soporte para Todo Tipo de Clima

全天候型スタンド式双眼鏡　全天候支架式望远镜

An airtight, waterproof, large binocular suitable for bridge use. Can be fixed with bolts onto a deck plate or bridge counter top. Specify the required magnification and lens diameter when ordering. The most common model is: Magnification 15, Lens Diameter 80 mm.

37 03 48	Binocular, stand type, 15 × 80 IFwater-proof	Pr.

Internal Gyro-stabilized Binoculars

Binoculares con giroestabilización interna

内蔵双眼鏡　内置陀螺稳定望远镜

This waterproof binocular makes the target easier to acquire and track even if it is moving at a high rate of speed, because of the prism, installed on a freely rotating gimbaled frame equipped with a highspeed gyro motor. The observer will have little problem keeping the target centered in the field of view.

Simply switch the power on and wait a moment until the gyro motor reaches operating speed. Focusing is achieved by adjusting each eyepiece. Foldback rubber eye cups permit eyeglass wearers to use this gyro-stabilized binoculars and still see a full field of view. To allow for individual differences in the distance between the eyes, an interpupilary control is provided. Finally simply lift the locking lever to free the gimbaled erecting prism assembly.

It can be operated with either 4AA batteries or 1 lithium battery, and also operated on 12-32 volt DC power sources when used with the supplied DC regulator, where auxiliary power is available.

Night Vision Binoculars

for Anti-piracy

Binoculares de visión nocturna antipiratería

海賊対策用暗視双眼鏡　反海盗用夜视望远镜

An optical instrument that you can see a night view even in a moonless, cloudy night.

Remark: The products are dual use items, and may therefore be restricted in supply by some authorities.

Bushell Night Vision

- Night vision: Generation 1
- Infrared illuminator: Built-in
- Water resistant
- Great for close-range viewing (Security). Long-range viewing (Wildlife observation)
- Magnification × objective lens: 2.5 × 42

Yukon Night Vision

- Day and night operation
- Higher resolution than Gen. 1
- Effective over 300 yards
- Brightness adjustment control
- Stealth IRTM operation with invisible, powerful dual IR illuminators
- Direct video output capability
- Magnification × objective lens: 5 × 42

Unit Per Pr.

CODE	Model	Capacity Magnification × Objective Lens
37 03 55	Bushell night vision	2.5 × 42
56	Yukon night vision	5 × 42

Navigation Lights

Luces de Navegación　航海灯　桅灯（双灯）

All lights suit to the requirements of "MSC253(83)" and "Convention on the International Regulations for Preventing Collisions at Sea, 1972" of IMCO (Inter-governmental Maritime Consultative Organization). Available with a polycarbonate lens and polycarbonate case. Each type of lights suits to the regulations as bellow.

Navigation Light Classification

Class	No. of Light	Application
Class1 A-2	Double & Single	For vessels of 50 mtr or more in length
Class1 or 2 B-1	Double & Single	For vessels of 20 mtr or more but less than 50 mtr in length

Proyector de Xenón
キセノンサーチライト　氙素探照灯

A compact searchlight "U-beam" mounted with a 150W high performance xenon short-arc lamp of high luminous intensity and low energy consumption. The searchlight radiates a powerful white beam with a luminous intensity of 1,500,000 candela and colour temperature of 6,000°K, similar to sunlight.
Two beam angle types are available. Use of the remote control allows for easy, simultaneous control of the horizontal and elevational angle of the lamp head.

How to order: CODE

Xenon Searchlight, BEAM ANGLE, LUMINOUS INTENSITY cd., POWER SOURCE VOLTAGE

Unit Per Set

CODE	37 04 91	37 04 92
Beam Angle	5	10
Center Luminous Intensity cd.	1.5 millon	1 million
Lamp Model	UXR-150MA	UXR-150A/W
Depression/elevation Angle	Upward : 5 Downward : 35	
Material	Anti - corrosion aluminium	
Power Source	DC 24V, 7.8A	
Weight	9 kg	

Suez Canal Searchlights

Proyector Canal de Suez
スエズ運河サーチライト
苏伊士运河探照灯

Complying with the "Rules of Navigation" established by The Suez Canal Authority, which states that ships which go through the canal during the night must be equipped with The Suez Canal Searchlight. The lamp must have a luminous intensity of a single light beam not less than 3×10^6 (3 million) candela, which is equivalent to a high efficiency lamp of 2,000 watts for vessels up to 30,000 S.C. tons gross and 3,000 watts for vessels over 30,000 S.C. tons gross.

The searchlights must have a certificate issued by one of the Classification Societies such as N.K., Lloyd, etc. and must be equipped with a 2 lamp carrier that can be turned into position to let the lamp focus directly on the reflector. Available in a floor mounting type or ceiling mounting type. The most popular model is the floor mounting, manual operated type as listed below. This type is also available for use with incandescent lamps or halogen lamps.

Specifications

Kind of Lamp		Incandescent lamp	Halogen lamp
Lamp	Voltage	100V, 110V, 115V, 220V, 230V	
	Watt	2,000W, 3,000W	2,000W
Reflector		550 mm	640 mm
Form of Control		Manual Operation	
Elevation Angle		Up above 30 deg. down below 30 deg.	Up above 20 deg. down below 20 deg.
Horizontal Turning Angle		360 deg.	
Height from the floor to the center of lamp		650 mm	
Temperature range		−25°C to 45°C	
Material		Stainless Steel 1.4301 (V2A)	
Weight		40 kg

Marine LED Searchlights

Proyectores LED Marinos

LED サーチライト　LED 探照灯

Multi-purpose LED search light, suitable for many types of ocean-going vessels, designed as a replacement of traditional halogen lamp. Made of aluminium base, waterproof (IP65). Compliance with ROHS and CE. Wide input voltage: AC 90-260V, 50/60Hz.

How to order: CODE

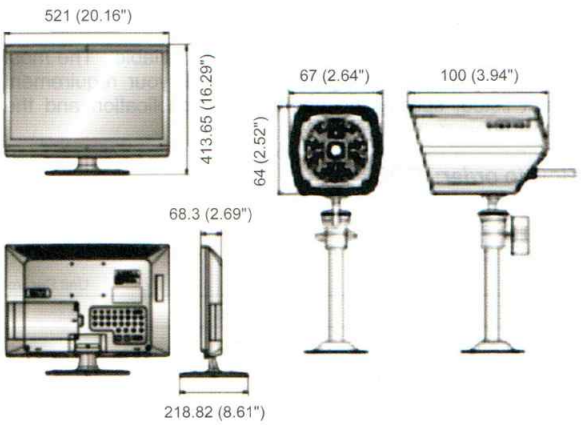
Camera Monitoring System



with Infrared Illuminators

Sistema de observación con cámara con iluminación infrarroja
赤外線発光式監視カメラステム
红外灯监控摄像系统

Camera monitoring system provides maximum protection for any spot 24 hours a day, 7 days a week. Simple to set up, you can monitor any time from anywhere around the world. All four cameras are waterproof to IP66, compact and highly durable to achieve clear stable video, even in harsh outdoor conditions. Single cable to each camera cover all wiring needs including power so you have the freedom to place them anywhere, even if there is no electrical outlet in the area. The four night vision cameras are equipped with 30 infrared LEDs which allow them to detect and show objects as far as 50 feet, even in the darkest conditions. The built in 500 GB hard drive allows for extended recording time and is expandable to 1 TB for maximum data capacity. Please contact your local supplier about more details.

Dimensions

Main Feature:

- Smartphone ready.
- 4×infra red night vision cameras – 600TV lines of high super resolution.
- H.264 high performance compression.
- 8 channel digital video recorder.
- Vivid 22" LCD display.
- 500 GB of storage USB 2.0.

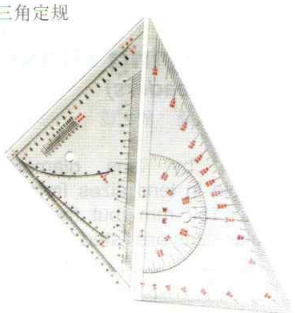
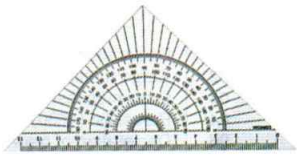
Nautical Triangles



(Set Squares)

Triángulos Náuticas　三角定規　三角定规

"Inoue" and "Kent" types are available.



1. Inoue Type

Nautical Triangles, a position finder for the navigator, consisting of a danger-angle triangle (A) and a protractor triangle (B) made of transparent plastic, 36 cm.

A　B

2. Kent Type

Two 45° triangles provide an easy method for plotting position and course and doing other chart work. Using protractor scales, the triangle is easily aligned in any direction with a chart meridian. Direction is maintained as one triangle is slid along the other to the desired position. Durable, clear, vinylite. Long side length 30 cm.

CODE	Type	Function	Size mm	Unit
37 10 07	Inoue	Danger angle and protractor	360 mm	Pr.
08	Kent	Protractor	300 mm	Pc.

Chart Dividers

Compás de División para Carta Náutica
海図用ディバイダー（両脚器）
海图两脚规

An instrument for chart work and other marine and engineering requirements. Made of brass with sharp steel points.

Unit Per Pr.

CODE	**37 10 11**	**37 10 12**	**37 10 13**
Length	150 mm	170 mm	200 mm

Chart Room Compasses

Compás de Cuarto para Carta Náutica
海図用コンパス
海图用室内两脚规

Extendible arm with a pencil lead point. The maximum circle diameter is 380 mm. 170 mm in overall length.

37 10 16	Compass, chart room, 170 mm	Pr.

Chart Weights

Pisapapeles para Carta Náutica　文鎮　海图压

Designed to keep charts firmly in place on the chart table. Backed with soft cloth in order not to scratch or harm charts and other papers.

Unit Per Pc.

CODE	**37 10 21**	**37 10 22**	**37 10 23**
Weight	550 grm	930 grm	1,300 grm

Magnifying Glasses
(Round Readers)

Lupas　拡大鏡　放大镜

Ordered by lens diameter. Available in lens sizes from 50 mm to 150 mm, but the most popular sizes are listed below.

Unit Per Pc.

CODE	**37 10 26**	**37 10 27**	**37 10 28**
Lens Diam.	75 mm	90 mm	100 mm

Chart Brushes

Cepillos para Carta Náutica
海図用ブラシ　海图用刷

A feather brush with grip. Overall length 270 mm.

37 10 31	Chart brush, feather 270 mm	Pc.

Illuminated Magnifiers

Lupa con Iluminación　照明拡大鏡　照明放大镜

The illumination magnifier product uses a large-diameter glass lens and a white LED as the light source.

It is highly effective for visual inspection and difficult assembly work of precision parts. This illuminated magnifier has a function to control the brightness of the illumination.

The product itself is compatible with 100 to 240 V as standard, but the outlet plug must be changed when used outside Japan.

Flexible Arm Type

Light Box Type

Flags

Banderas Mercantes　国旗、商船旗　商船旗

National Flag

Ensign

A ship hoists her National flag (Sometimes "Civil Ensign") at ship's stern to denote nationality and hoists a national flag of a country where ship called as a matter of courtesy at ship's foremasthead. Few countries, such as the United Kingdom, have national flags for land purpose and ensign for maritime purpose with different pattern and they hoist ensign as ship's own national flag at ship's stern. When ordering please do not confuse this matter.

Flags are made of warp-knitting polyester, if not any other material are specially required. The flag hook is normally separate order.

National Flags

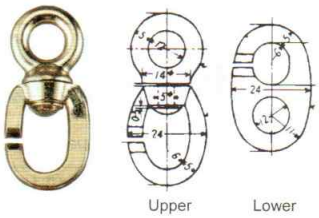
Tela para Reparación de Bandera
修理用旗布 修补用旗布



Synthetic fibre textile used for repairing flags. Available in 6 colours of black, red, yellow, white, green and blue. The standard width is 1,260 mm (4') in random lengths.

Unit Per Mtr.

CODE	Colour	CODE	Colour
37 15 71	White	37 15 74	Green
72	Red	75	Yellow
73	Blue	76	Black

Flag Hooks

Gancho para Bandera
旗用フック 旗钩

Made of cast brass or brass plated zinc die cast. The upper hook has a swivel and eye. The lower has an eye only with no swivel, sold individually or in sets.

37 15 81	Flag hook, complete upper/lower	Set
82	Flag hook, upper side	Pc.
83	Flag hook, lower side	"

Flag Blocks

Bloques para Bandera 旗用ブロック 旗坠

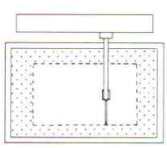
Cast brass flag line blocks covered by a semi-circle guard with an eye on top.

37 15 86	Flag block, brass, 32 mm	Pc.
87	Flag block, brass, 38 mm	"
88	Flag block, brass, 50 mm	"

Windsocks

Cortavientos 吹流し 风向标

A colonial textile tube shape that resembles a big sock. Used as a basic guide to wind direction and speed.

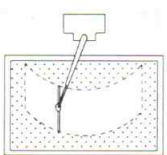


37 15 89	Windsock for wind direction and speed indication	Pc.

Marine Electric Window Wipers

Limpia-parabrisas Eléctricos para Ventanas
船用電動ワイパー 船用电动窗刷

A wide variety of wipers are available in parallel and fan types. The models below are provided merely as a reference for ordering the correct wipers. For further details, ask your supplier or provide a sample of the wipers you are currently using.



1. Parallel Type

1. Motor mounted : Inside, or outside
2. Wiping speed : Fixed, or variable
3. Heater : With heater, or without heater

1) Stroke speed is adjustable according to conditions.
2) Arm blade stops at a certain position.

2. Fan Type

1. Motor mounted : Inside, or outside
2. Wiping speed : Fixed, or variable
3. Heater : With heater, or without heater

1) Constant : Blade speed is constant
2) Variable : Blade speed is variable (Speed adjustable depending on the conditions of use)

Remarks:
Inside cabin type ... Motor is mounted inside the cabin.
Outside cabin type ... Motor is mounted outside the cabin.
With heater ... A heater is incorporated to prevent freezing.

3. Power Source

AC 100, 110, 115 V – Single Phase
AC 200, 220, 240 V – Single Phase

4. Motors

Parallel Type
Output 40W (Stroke Length 650 mm max.)
60W (" 1,200 mm max.)
100W (" 1,800 mm max.)
120W (" 2,600 mm max.)
Fan Type
Output 40W

5. Stroke Length - Parallel Type

400 - 650 mm (Single Blade)
700 - 1,200 mm (")
1,300 - 1,800 mm (")
2,600 mm (Twin Blade)

6. Wiping Angle - Fan Type: 30° – 110°

7. Blade Length: 600 mm

How to order: 37 - 20 - 01

5. *Heater (With or Without)*
6. *Installing position of the motor (Inside or Outside)*
7. *Mounting position of the main frame (Upper and Lower positions of the window)*
8. *Height and width of the clear parts of the window*
9. *Length of the arm and blade*

Clear View Windshield Screens

Aclaradpres y Limpia-parabrisas para Pantalla
丸型ウインドワイパー　船用电动窗扫

A range of well proven and superior clear view screens of the highest quality. Unlike other similar screens it is not necessary to cut a large center hole for the fixing. These are fitted directly into the window glass by a series of fixing bolts for which a drilling template is provided.

Made of high quality, corrosion free materials. Gas tight and non-gas tight models available. Unless specified when ordering, the non-gas tight type will be supplied as standard. Suitable for glass thickness from 6 mm – 19 mm. Also specify power source voltage when ordering.

How to order: CODE

Clear view windshield screen, CLEAR VIEW DIAM mm, DEPTH INSIDE mm, POWER SOURCE VOLTAGE

About GMDSS

All cargo ships of 300 gross registered tonnes and upwards and all passenger ships engaged on international voyages must be equipped with radio equipment that conforms to international standards as set out in the system.

The GMDSS was adopted by means of amendments to the International Convention for the Safety of Life at Sea (SOLAS), 1974. The amendments, contained in Chapter IV of SOLAS on Radiocommunications, were adopted in 1988 and entered into force on 1 February 1992 but provided for a phase-in period until 1 February 1999.

The final, global implementation of GMDSS became fully effective on 1 February 1999. On that date, all applicable ships had to comply with the GMDSS requirements in SOLAS. Specific equipment requirements for ships vary according to the sea area (or areas) in which the ship operators. The GMDSS combines various subsystems - all of which have different limitation with respect to coverage - into one overall system, and the oceans are divided into four sea areas :

About Inmarsat

It operates a constellation of geostationary satellites designed to extend phone, fax and data communications all over the world. Inmarsat provides the space segment necessary for instant and reliable distress and safety satellite communications for the maritime community.

Inmarsat-A

The Inmarsat-A analogue mobile satcoms system provides two-way direct-dial phone, fax, telex, electronic mail and data communications at rates up to 9.6 kbit/sec to and from anywhere in the world with the exception of the polar regions.

The service that most users access the Inmarsat system is Inmarsat-A. The first analog system of the Inmarsat system. Inmarsat-A can support high-quality direct-dial phone, telex, fax and data.

The System

An Inmarsat-A terminal is a small self-contained satellite earth station comprising, in the maritime environment, of an above deck equipment containing a parabolic antenna and electronics and a below deck equipment containing electronic units, power supplies and interface connections. Connections to telex, telephone, modem and facsimile equipment are contained in the below deck equipment.

Inmarsat ship borne terminals are referred to as a Mobile Earth Stations (MESs). In the same way Land based Earth Stations through which communications are routed are known as Land Earth Stations (LESs).

A call from an MES is routed via the Inmarsat network to an LES and thence into the national and international phone, telex and data networks. There are four Ocean Regions covering the world each with its own operational satellite.

Area A1 : Within range of VHF coast stations with continuous DSC alerting available (about 20-30 miles).

Area A2 : Beyond area A1, but within range of MF coastal stations with continuous DSC alerting available (about 150 miles).

Area A3 : Beyond the first two areas, but within coverage of geostationary maritime communication satellites (in practice this means Inmarsat). This covers the area between roughly 76° North and 76° South.

Area A4 : The remaining sea areas. The most important of these is the sea around the North Pole (the area around the South Pole is mostly land). Geostationary satellites, which are positioned above the equator, cannot reach this far.

Transmission and reception of signals are co-ordinated by four network co-ordination stations (NCS), one for each ocean region;

Atlantic Ocean Region East (AOR-E)
Atlantic Ocean Region West (AOR-W)
Indian Ocean Region (IOR)
Pacific Ocean Region (POR)

Inmarsat-B
The Inmarsat-B digital mobile satcoms system provides two-way direct-dial phone, telex, facsimile and data communications at rates up to 9.6 kbit/sec to and from anywhere in the world with the exception of the polar regions.

The System
An Inmarsat-B terminal is a small self-contained satellite earth station comprising, in the maritime environment, of an above deck equipment containing a parabolic antenna and electronics and a below deck equipment containing electronic units, power supplies and interface connections. Connections to telex, telephone, modem and facsimile equipment are contained in the below deck equipment.

Inmarsat ship borne terminals are referred to as a Mobile Earth Stations (MESs). In the same way Land based Earth Stations through which communications are routed are known as Land Earth Stations (LESs).

A call from an MES is routed via the Inmarsat network to an LES and thence into the national and international phone, telex and data networks. There are four Ocean Regions covering the world each with its own operational satellite.

Transmission and reception of signals are co-ordinated by four network co-ordination stations (NCS), one for each ocean region;

Atlantic Ocean Region East (AOR-E)
Atlantic Ocean Region West (AOR-W)
Indian Ocean Region (IOR)
Pacific Ocean Region (POR)

Inmarsat-B is the digital successor to Inmarsat-A. It supports high-quality direct-dial phone, telex, fax, data, and high-speed data. Inmarsat-B is a lower cost alternative to Inmarsat-A because the system is based on modern digital satellite telecommunications technologies. The use of digital technology enables Inmarsat-B to improve on Inmarsat-A, through less power usage and improved use of satellite power and bandwidth. Inmarsat-B offers Data services in two forms: 9.6 k standard service and 64 k High Speed Data (HSD).

Inmarsat-B is a good choice for high-volume users of voice and data. In the maritime environment these include the offshore exploration industry, cruiseship operators and deep-sea shipping companies.

Inmarsat-C
The Inmarsat-C satellite system provides two-way data communications to and from virtually anywhere in the world. Inmarsat-C terminals are simple, low-cost units small enough to be hand-carried or fitted to any vessel, vehicle or aircraft.

The System
Communications via the Inmarsat-C system are data or message-based. Anything that can be coded into data bits can be transmitted via Inmarsat-C. Messages are transferred to and from an Inmarsat-C terminal at an information rate of 600 bits/sec. Frequencies are 1626.5-1645.5 MHz (transmit), 1530.0-1545.0 Mhz (receive). Inmarsat-C is available in all four Inmarsat satellite coverage ocean regions · Atlantic Ocean East and West, Indian Ocean and Pacific Ocean · through about 40 land earth stations (LESs). A network co-ordination station (NCS) in each region controls communications traffic.

These units come in fixed, mobile, transportable, maritime and aeronautical configurations. All configurations employ omni-directional antennas.

Inmarsat-C supports tow-way text and data messaging, data-reporting and fleet broadcast communications at a data rate of 600 bits/sec. Inmarsat-C Internet gateway allows vessels to exchange Internet e-mail without the need for special software.

Inmarsat-M
It provides digital phone, fax and data capabilities through compact terminals. Inmarsat-M is still available in all ocean regions, this service has been largely replaced by the more cost-effective Inmarsat mini-M.

Inmarsat-mini-M
The Inmarsat mini M is a digital phone, fax and data system which is packaged in very compact terminals, utilizing spot beam satellite technology. The mini M terminal form is similar in size to a small laptop computer. The terminal provides direct-dial phone, fax and 2.4 kbps data connections.

The Inmarsat mini M comes in portable, maritime and vehicle terminal configurations. There is now a multi-terminal capable of multiple installation configurations.

Inmarsat M4
Inmarsat M4 is a combination of mini-M's low-speed voice, fax, and data capabilities with Inmarsat B's high speed data feature. An additional feature of M4 is the mobile packet data service. M4 utilizes the same spot beam satellite technology as mini-M, making it very small, lightweight, and power efficient.

About Cospas-Sarsat
Cospas-Sarsat is a satellite system designed to provide distress alert and location data to assist search and rescue (SAR) operations, using spacecraft and ground facilities to detect and locate the signals of distress beacons operating on 406 Megahertz (MHz) or 121.5 MHz. The position of the distress and other related information is forwarded by the responsible Cospas-Sarsat Mission Control Center (MCC) to the appropriate SAR authorities.

The Cospas-Sarsat System provides distress alert and location data to Rescue Coordination Centers (RCCs), for 121.5 MHz beacons within the coverage area of Cospas-Sarsat ground stations (Local User Terminals - LUTs), and for 406 MHz beacons activated anywhere in the world.

GMDSS Radio Equipment

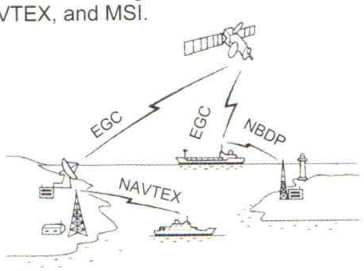
(Global Maritime Distress and Safety System)

Equipo de Radio GMDSS (Sistema Mundial de Socorro y Seguridad Marítima)

全世界的な海上遭難安全システム

全球海上遇險及安全系統（GMDSS）無線通訊設備

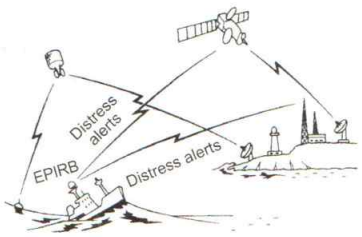
GMDSS will provide an effective search and rescue system on a global basis using the advanced technology of satellite and terrestrial communications.



The basic concept of the GMDSS is that search and rescue authorities ashore, as well as vessels in the immediate vicinity of a ship in distress, will be rapidly alerted to the distress incident so that they can assist in a co-ordinated search and rescue operation without delay.

In the GMDSS, the radio equipment to be carried on a ship is determined by the ship's area of operation, as designated below.

Conventional ships will be obliged to comply with the requirements for the installment of GMDSS systems in stages during the period between February 1, 1992 and February 1, 1999 for all ships.



During normal time:

Receives navigational and meteorological warnings via EGC, NAVTEX, and MSI.

In emergency:

Transmits distress alerts through INMARSAT, DSC, and EPIRB.

Amendment 1988 to the International Convention for the Safety of Life at Sea 1974 Chapter IV "Radiocommunications" Part C – Ship Requirements

Regulation 7 Radio Equipment - General

No.	Item	Descriptions
1.1	A VHF radio installation	For transmitting and receiving (1) DSC on the frequency 156.525 MHz (CH 70) (2) Radiotelephony on the frequencies 156.300 MHz (CH 6), 156.650 MHz (CH 13) and 156.800 MHz (CH 16)
1.2	A radio installation	For maintaining a continuous DSC watch on VHF channel 70
1.3	A radar transponder	For operating in the 9 GHz band
1.4	A receiver	For receiving International Navtex service broadcast
1.5	A radio facility	For the reception of maritime safety information by the INMARSAT enhanced group calling system
1.6	A satellite emergency position-indicating radio beacon (EPIRB)	For transmitting a distress alert either through the polar orbiting satellite service operating in the 406 MHz band or, through the INMARSAT geostationary satellite service operating in the 1.6 GHz band.

Regulation 10 Radio Equipment – Sea areas A1, A2 and A3:

No.	Item	Descriptions
1.1	An INMARSAT ship earth station	For: (1) transmitting and receiving distress and safety communications using direct printing telegraphy (2) initiating and receiving distress priority calls (3) maintaining watch for shore-to-ship distress alerts (4) transmitting and receiving general radiocommunications, using either radiotelephony or direct-printing telegraphy
1.2	An MF radio installation	For transmitting and receiving on the following frequencies (1) 2,187.5 kHz using DSC, and (2) 2,182 KHz using radiotelephony
1.3	A radio installation	For maintaining a continuous DSC watch on the frequency 2,187.5 kHz
1.4	Means of initiating the transmission	For ship-to-shore distress alerts by a radio service operating either : (1) through the polar orbiting satellite service on 406 MHz (2) on HF using DSC, or (3) through the INMARSAT geostationary satellite service
2.1	DSC, Radiotelegraphy and MF/HF radio installation	For transmitting and receiving between 1,605 KHz and 4,000 kHz and between 4,000 kHz and 27,500 kHz using, (1) DSC (2) Radiotelegraphy and (3) Direct-printing telegraphy

(to be continued)

No.	Item	Descriptions
2.2	A radio installation	For maintaining DSC watch on 2,187.5 kHz, 8,414.5 kHz and one of the distress and safety DSC 4,207.5 kHz, 6,312 kHz, 12,577 kHz or 16,804.5 kHz
2.3	Means of initiating the transmission	For the transmission of ship-to-shore distress alerts (1) through the Polar Orbiting Satellite Service on 406 MHz, or (2) through the INMARSAT Geostationary Satellite Service
2.4	Radiocommunication, or direct-print telegraph	For transmitting and receiving general radiocommunications using radiotelephony or direct-printing telegraphy by an MF/HF radio installation operating between 1,605 kHz and 4,000 KHz and between 4,000 kHz and 27,500 kHz.

Note: Every ship shall be provided with the requirements of Regulation 7. In addition to the requirements of Regulation 7, every ship engaged on voyages beyond sea areas A1 and A2, but remaining within sea area A3, shall be provided with the requirements of Regulation 10, Paragraphs 1 or 2.

The Definition of Sea Areas

Area A1	Within range of shore-based VHF coast stations	Distance from shore: App. 20 - 30 miles
A2	Within range of shore-based MF coast stations (Excluding A1 area)	Distance from shore: App. 100 - 150 miles
A3	Within the coverage area of INMARSAT geostationary satellites (Excluding A1 and A2 areas)	Between north latitude 70° and south latitude 70°
A4	The remaining sea areas outside areas A1, A2 and A3.	Around the North Pole and the South Pole

Automatic Identification Systems

Sistemas de Identificación Automaticá

船舶自動識別装置

船舶自動識別器

Designed to meet the SOLAS requirements Chapter 5 Safety of Navigation - in Regulation 19-2.4 to all of ships of 300 gross tonnage and upwards engaged on international voyages, and for simple installation onto a ships bridge, and with quick and easy access for repair or replacement. As well as being intrinsically tough and rugged, the system also features a sophisticated touch screen minimum display for intuitive operation. With its touch-screen LCD (Liquid Crystal Display) minimum display, this AIS transponder transmits the ship's data to other vessels as well as shore-based VTS (Vessel Tracking Systems). Utilizing various VHF channels, this is ship-borne station consists of an integral GPS engine for timing, one VHF transmitter, three VHF receivers and a computer. Interface this with an external GPS for navigation, an antenna, a gyrocompass, and an optional ECDIS (Electronic Chart Display and Information System) or ARPA (Automatic Radar Plotting Aid) display system and you have everything required to comply with the mandatory carriage requirements that comes into effect July 1, 2002.

Static and voyage related data is transmitted every six minutes, while the dynamic information is transmitted between 2 seconds to 3 minutes, depending on the ships navigational status and speed. Short messages from ships or shore stations can be inserted into the AIS message structure that contain such information as; notices to mariners, navigational warnings, weather forecast and SAR (Search and Rescue) communications etc.

Features and Functions:

- Provision of tactical and strategic VTS information. Transmitting port data, berth assignments, pilotage, tides, currents as well as shipping agency information.
- Automatic data exchange, ship-to-ship and ship-to-shore.
- Short message service (121 characters).
- Collision avoidance.
- Detection of vessels that may be hidden in radar shadows.
- Overcomes target swapping of radar contacts.
- 4 mode operation: Autonomous, Continuous, Assigned and Polled.
- Telemetry applications for navigation aids such as lighthouse or buoys.
- Reduction of global VHF voice traffic.

The AIS message is divided into a number of categories that contain specific information which include:

- Static Data: IMO number / Call sign and name length and beam / Type of ship / Location of position fixed antenna onboard the ship.
- Dynamic Data: Ships position / Time in UTC (Universal Time Coordinated) / COG (Course Over Ground)/ SOG (Speed Over Ground)/ Heading / Navigational status / ROT (Rate of Turn).
- Voyage Related Data: Ships draft / Cargo / Destination and ETA (at masters direction).
- Safety Related Messages: As needed.

Unit Per Set

CODE		37 24 01
Item		Automatic Identification System
Dimensions & Weight	Display Unit	L230 × H140 × D50 mm, 1.5 kg
	Transceiver Unit	L270 × W350 × D75mm, 6.5 kg
Power Supply		24V DC
Power Drain		75 watts
GPS Receiver		12 Channel
Interfaces		3 × RS232, 5 × RS422
Name of Mfr.		McMurdo Limited

Radar Transponders
(SART - Search and Rescue Radar Transponder)

Transpondedores de Radar
レーダー・トランスポンダー　雷达应答器

At least 1 radar transponder shall be carried on each side of every cargo ship of 500 gross tons or more.

Upon receiving radio waves from 9 GHz shipboard radar, this unit sends signals to indicate its position and bearing on the screen.

37 25 01	Radar transponder (SART) 9 GHZ (with ship's registered flag)	Pc.

NAVTEX Receivers

Receptores NAVTEX
NAVTEX 受信機　NAVTEX 受信机

NAVTEX is an international maritime radio telex system. For receiving navigational warnings and safety information via printing telegraphy broadcast on 518 KHz along coastal areas.

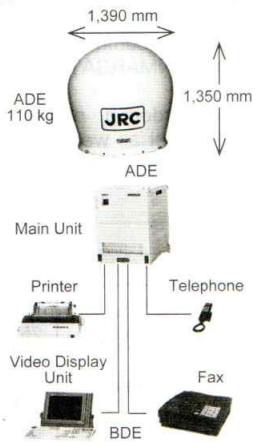
37 25 06	NAVTEX receiver 518 kHz	AC 110V	Pc.
07	"	AC 220V	"

Note: Please specify the ship's registered flag when ordering

Satellite Emergency Position-indicating Radio Beacons
(Satellite EPIRB)

Radiofaros Indicadores de Posicion Emergencia de Satélite (Satélite EPIRB)
衛星 EPIRB　卫星紧急定位无线电导航台（卫星 EPIRB）

Transmitting a distress alert either through the polar orbiting satellite service, operating in the 406 MHz band, or through the INMARSAT geostationary satellite service operating in the 1.6 GHz band.



The unit will also float free if the ship sinks and will be automatically activated when afloat or activated manually in emergency. The EPIRB mentioned here is operated on 406 MHz and 121.5 MHz by the COSPAS/SARSAT satellite system which is adopted widely to the ships in the early stage of the introduction of the GMDSS. This type of EPIRB will broadcast on 406 MHz to be received by the COSPAS/SARSAT satellite and on 121.5 MHz to be used for homing by search-and-rescue vessels along with a strobe to pinpoint exact location.

It is required, when ordering, to specify the ship's registered flag, call sign, etc. to be programmed into the EPIRB as a rescue signal by the manufacturer before delivery.

37 25 11	Satellite EPIRB 406 MHz & 121.5 MHz (with ship's registered flag, etc.)	Pc.

Satellite Communication Equipment
INMARSAT B Ship Earth Station

Estación Terrestre de Barco B de INMARSAT con Equioamiento para Comunicación de Satélite
インサルマット—B 船舶地球局
海事卫星船舶通信装置

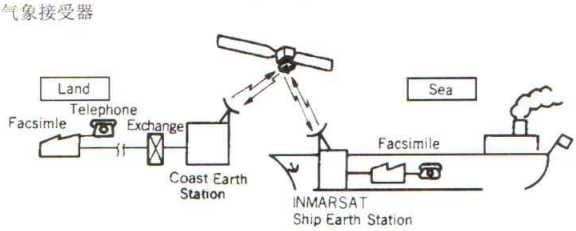
INMARSAT stands for the organization established by The Convention on the International Maritime Satellite Organization adopted on September 3rd, 1976. The INMARSAT maritime satellite communications service permits direct ship to land and ship to ship communication via INMARSAT satellite and coastal earth stations. The INMARSAT B Ship Earth Station provides a full range of instant, quality communication services from anywhere at sea into the world public telephone, facsimile, telex and data networks. It consists of an Above Deck Equipment (ADE) and a Below Deck Equipment (BDE) which are interconnected by a single cable.

ADE: Antenna and Radome
BDE: Communication unit, Video display unit and RO printer

Specification for reference

Frequency	Transmit: 1625.5 of 1646.5 MHz
Range	Receive: 1525.0 of 1545.0 MHz
Antenna	89 cm diameter parabolic antenna
Enclosure	FRP radome (1.39 mtr diameter)
Primary Power	100/110/220 VAC ± 10% Single-phase 60 Hz ± 6%
Size & Weight	ADE: H1,350 × φ1,390 mm, 110 kg BDE: Main unit H500 × W400 × D350 mm, 38 kg Video display unit H280 × W366 × D180 mm, 4.5 kg Printer H193 × W380 × D376 mm, 3.7 kg

How to order: CODE



Ship earth station INMARSAT B with standard attachments

GPS (Global Positioning System) Navigators

Navegadores GPS
(sistema Global de Posicionamiento)
GPS 受信装置　GPS 受信装置

Satellite-based radio navigation system to provide a global, all-weather, continuous 24 hour service for position fixing with high accuracy. The satellite system is available to an unlimited number of users when it is fully operational.
It is composed of 24 GPS satellites, each transmitting their own orbital data. The GPS navigator receives the orbital data from three or more GPS satellites to calculate a two or three dimension position, speed, and time.

Specifications for Reference

Accuracy Position & Speed	15 m RMS (C/A code, HDOP ≦ 2.5) 0.2 knot RMS (C/A code, HDOP ≦ 2.5)
Receiving Signal	1,575.42 MHz ± 1 MHz, C/A code
Data Display	A8 digit, 4-line LCD
Display Items	Position (Latitude, Longitude and Altitude), Course and speed, Data and time, Satellite data, Satellite signal receiving status and GPS positioning period, Range, Bearing and time to go, and Course deviation
Power Supply	100-115/220-240V, AC 50/60 Hz, 10-45V DC, 12W
Size & Weight	Receiver: H120 × W243 × D116 mm, 2.7 kg Antenna : H229 × 50 mm dia, 0.4 kg

VHF Radio Telephones

Radiotelefonía VHF
国際 VHF 無線電話装置
国际 VHF 无线电话装置

Designed to provide ship-to-shore, ship-to-ship and on board communications, allowing the ship's crew to easily obtain emergency, safety, navigation, weather and business information.

Equipped with all ITU channels, USA, USCG, Canadian and private channels. Continuous scanning watch on channel 16.

Specifications for Reference

Frequency Range	Transmit Receive	155.50 - 159.50 MHz 155.50 - 159.50 MHz (Simplex) 160.60 - 163.50 MHz (Duplex)
Channel Capacity		57 ITU/USA channels, 4 Canadian channels, 9 weather channels, Up to 99 private channels
Mode of Operation		Simplex or Duplex
Power Supply		13.8V DC
Size & Weight		H290 × W240 × D145 mm, 6.5 kg

37 25 41	VHF radio telephone 155.50 - 159.50 MHz simplex mode	Set
42	" duplex mode	"

Magnetic Compasses

Compasses Magnéticos　磁気コンパス　磁罗经

A compass which measures direction by a needle which continuously seeks the magnetic meridian.
SOLAS Regulation requires ships of 150 gross tons or more to be fitted with a magnetic compass.

Here are some types of magnetic compasses for your reference. There are several sizes of compass card diameter, according to the type of magnetic compass and the manufacturers.

Table Type

Stand Type

Projector Type

37 25 51	Magnetic compass (With further information)	Set

Azimuth Mirrors

Espejos de Azimut 方位鏡 方位仪

A measuring instrument used with the magnetic compass. For obtaining the azimuth of observed objects by observing an object's reflection in a mirror or prism, pivoted in the centre of glass over a compass card.

37 25 53	Azimuth mirror (With manufacturer's name and model of Magnetic Compass)	Set

Gyro Compasses

Girocompases ジャイロ・コンパス
电罗经

Ships of 500 gross tons or more constructed on or after September 1st, 1984 and ships of 1,600 gross tons or more constructed before September 1st, 1984 shall be fitted with a gyro compass.

The gyroscope is mounted, ballasted and fitted so that it's north south line always remains within the meridian through the influence of the earth's diurnal revolution. Can be used as a sensor for the following types of navigation devices : Autopilots, Radar, Collision avoidance systems, Satellite navigation systems, Direction finders, etc. Here are some specifications as a reference when ordering.

Specifications for Reference

Master Compass	Follow-up accuracy : 0.1° Follow-up speed : 360°/15 sec. Gimbal freedom angle : ±45° Range of speed error correction : 0-40 knot/0-70°	
Power Supply	Main supply voltage	AC 110V/115/220/380 440V 3P 50/60 Hz
	Emergency supply voltage	DC 24V, 2.5A

37 25 56	Gyro compass (With further information)	Set

Radars

Radares レーダー 雷达

Electronic system by which the bearing and distance of an object are found by the emission of a radio pulse.

An object's bearing and distance can be measured by observing the direction from which the pulse returns and the time elapsed from when it was sent.

Ships of 500 gross tons or more constructed on or after September 1st, 1984 and ships of 1,600 gross tons or more constructed before September 1st, 1984 shall be fitted with a radar installation.

From February 1st, 1995, the radar installation will be capable of operating on the 9 GHz frequency band. In addition, cargo ships of 300 gross tons or more, when engaged on international voyages, shall be fitted with a radar installation capable of operating on 9 GHz frequency band.

Specifications for Reference

Peak Power	25 kW
Frequency	9,410 ± 30 MHz
Range Ring	0.25/0.05, 0.5/0.1, 0.75/0.25, 1.5/0.25, 3/0.5, 6/1, 12/2, 24/2, 48/8, 120/20 nm
CRT	21-inch Raster scan
Power Supply	100/110/115V AC, 50/60Hz, 1-P (7 ft) 200/220/230V AC, 50/60Hz, 3-P (9 ft)
Size & Weight	H1,270 × W535 × D575 mm, 100 kg

Remark: The above specifications are listed as a reference only. Please contact with a representative about which required features are available from various manufacturers.

37 25 61	Radar (With further information)	Set

Automatic Radar Plotting Aid (ARPA)

(Collision Avoidance System)

Radar Automático de Ayuda Gráfica
(Sistema de Colisión Evitable)
自動衝突予防援助装置
自动雷达测绘辅助装置（防碰撞系统）

Automatic radar plotting aids are required for ships of 10,000 gross tons or more, constructed on or after September 1984, and tankers constructed before September 1st, 1984.

It is designed to be operated as a separate or integral part of marine radar equipment. It will give precise target information to avoid collision in vector and numeric form.

There are various models world-wide. Please ask a representative about detailed specifications. Listed below are some specifications for your reference.

Specifications for reference

Peak Power	25 kW
Frequency	9,410 ± 30 MHz
Scanner Length	7 feet
Target Acquisition	Automatic and/or manual
Target Tracking	Automatic up to 40 targets
CRT Display	28 inch (Effective dia.: 340 mm)
Radar Range	0.25, 0.5, 0.75, 1.5, 3, 6, 12, 24, 48,120 mm
Range/bearing Measurement	VRM 1/2 and electronic bearing line (EBL)
Warnings	Min. CPA : 0-9.9 min. in 0.1 step Min. TCPA : 0-99 min. in 1 step
Power Supply	100/110/115/200/220V AC, 50/60 Hz
Size & Weight	H1,278 × W700 × D875 mm, 135 kg

Note: CPA = Closest Point of Approach
TCPA = Time of Closest Point of Approach

Navigation Systems

Sistemas de Navegación　航法装置　導航系統

Various kinds of navigation systems are available in the world. Some major navigational systems are produced here for your reference.

Major Navigational Systems

Systems	Service Area	Effective Range	Accuracy
Loran C (100 kHz)	Japan/Korea U.S.A./ Canada/North Sea Mediterranean	1,500 miles (Daytime)	30 - 500 mtr
Loran A (1.75-1.95 MHz)	Japan	700 miles (Daytime)	0.25 - 0.5 miles
Decca (70-130 kHz)	Europe/Japan/etc.	350 miles (Daytime)	20 - 100 mtr
Satellite Navigator (150, 400 MHz)	World-wide	World-wide	0.1 mile
GPS (1,575.42 MHz)	World-wide	World-wide	100 mtr

Loran C Navigators

Navegantes Loran C
ロランC 航法装置
Loran C 導航系統

A long range aid to navigation. Master and slave stations transmit synchronised signals which can be received by a special receiver on board the ship.

Since radio signals travel at a known speed, the difference in time at which the signals arrive at the ship can be converted into distance.

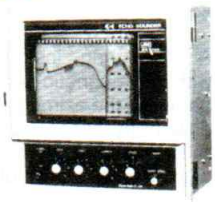
Signals from two pairs of Loran stations can thus fix the position of a ship.

Specifications for reference

Station Tracking	Master and all slave stations
Display	Fully automatic LAT/LON
Memory Capacity of Waypoints	50
Readouts	Course/Speed, Bearing/Distance and Time-to-go
Frequency	100 kHz
Power Supply	10 - 40V DC, 17W, 100/115/220V AC
Size & Weight	H142 × W271 × D314 mm, 4 kg

Decca Navigators

Navegantes Decca
デッカ航法装置　Decca 導航系統



A radio aid for fixing positions up to 300 miles or more from the transmitter.

A master transmitter ashore controls a chain of other transmitters. A ship provided with a receiver can receive a transmitted signal by measuring the phase-difference of the Decometers.

The numbers indicated on the Decometers refer to coloured lattice lines printed on special charts. The ship's position is symbolized by where the numbered lines cross each other on the chart.

Echo Sounding Devices

Aparatos de Ecosondeo
音響測深装置　回声探深仪

For ships constructed before May 25, 1980, weighing greater than 1,600 gross tons and for ships constructed after May 25, 1980, weighing greater than 500 gross tons. All vessels falling under this classification which sail international routes must be fitted with an echo sounding device.

Electrically operated instrument that emits a sound from vessel's submerged surface and then measures and records the time interval which passes before the echo returns.

The most popular model is shown here. Please ask for further information and brochures of various models available from local manufacturers when required.

Specification for reference

Depth Range	0 - 450 mtr, 3 ranges
Max. Sounding Depth	450 mtr
Frequency	50 kHz or 200 kHz
Recording Paper	Dry type, 150 mm width x 15 mtr
Power Supply	100/115/220V AC, 50/60 Hz
Size & Weight	H380 v W360 × D210 mm, 16 kg

37 25 71	Echo sounding device (With further information)	Set

Weather Facsimile Receivers

Receptores de Facsímile Meteorológico
気象ファクシミリ　气象传真装置

Weather facsimile service is provided world-wide, and designed to meet the WMO (World Meteorological Organization) standards.
The most popular model is shown here. Please ask for further information and brochures of various models available from local manufacturers when required.

Specification for reference

Mode of Receiving	Fully automatic, Semi automatic, Manual and Programmed
Recording	Solid-state scanning by thermal head
Effective Scanning line	256 mm (10 inches)
Scanning Speed	60, 90, 120 and 240 spm
Mode of Emission	F3C
Frequency Range	HF: 2 - 24.9999 MHz
Power Supply	DC10-42V, less than 70V AC
Size & Weight	H106.5 × W300 × D254.5 mm, 5.3 kg

37 25 81	Weather facsimile receiver (With further information)	Set

Personal Location Beacons

Radiofaro para Localización Personal
個人用位置指示無線標識　個人用位置信標

Featuring a built-in GPS receiver (Global Positioning System) combined with a 406 MHz transmitter and 121.5 MHz homing signal. In the event of an emergency, an alert signal is

transmitted to Cospas-Sarsat satellites and forwarded to a secure co-ordinate centre within typically 3 minutes. The built-in GPS receiver will provide latitude and longitude co-ordinates to give a position to within typically 30 meters anywhere in the world.

It comes complete with lanyard and designer carry case to enable users to keep the personal location beacon safely attached at all times.

Features
- Built-in 12 channel GPS receiver.
- Geostationary coverage > 75°N - 75°S.
- Global alert to Cospas-Sarsat polar orbiting satellites.
- 406 MHz transmitter.
- 121.5 MHz homing frequency.
- GPS cold start time to fix typically less than 3 minutes.
- Positional accuracy to typically within 30 meters.
- GPS transmitted position update rate every 20 minutes (as permitted by Cospas Sarsat).
- GPS reacquisition time, typically less than 60 seconds.
- Complete with lanyard and designer carry case.
- User replaceable battery pack.

37 28 11	Personal location beacon with built-in GPS receiver	Set

Name of Mfr.: McMurdo Limited

Wristwatch Manoverboard Beacon

Radiofaro Tipo Reloj de Pulsera
腕時計型位置指示無線標識
錶型位置信標

The light weight, easy to wear waterproof, multi-function wristwatch has a built-in radio transmitter which when activated either manually or automatically, immediately transmits a distress tone on the international emergency search and rescue frequency (121.5 MHz). The distress signal transmitted can be detected by a surface rescue vessel or helicopter, which can accurately home in to the watch using direction-finding equipment. The unit is a working watch, fully waterproof to a depth of 50 mtr and can be set to manual or automatic activation on immersion in water, making it functional and easy-to wear manoverboard transmitter for crew members.

The distress signal transmitted can be detected by a surface rescue vessel or helicopter, which can accurately home in to the watch using either the emergency receiver or direction finder.

Features
- Automatic activation with manual on/off override.
- Chronograph 1/100 second with lap/split control.
- Alarm with chime.
- LCD backlight.
- Water resistant - tested to a depth of 50 mtrs.
- Transmission activation audible and visual LED alarms.
- Up to 8 hours transmission time.
- Range to surface vessel up to 1 nautical mile.
- Range to SAR helicopter up to 5 nautical miles.

Unit Per Pc.

CODE	**37 28 15**
RF Transmitter Frequency	121.5 MHz (121.65 MHz Training)
Class of Emission	A3X
RF Power	-25 dBm
Frequency Error	+/- 3.5 kHz
Duty Cycle	100%
Modulation Type	Sweep downward from 1.5 kHz to 650 Hz with sweep repetition of 2 Hz
Modulation Duty-Cycle	50%
Voltage	3.2 volts max. (CR2 battery)
Current Draw	20 µ Amps Quiescent 110 mAmps Transmitting
Weight including Strap	81 grm

Voyage Data Recorder

Registrador de Datos de Navegación 航海記録装置 航海記録儀

Designed to meet the requirements of IMO performance standard A. 861 (20); (1) Passenger ships constructed on or after July 1, 2002, (2) Ro-Ro passenger ships constructed before July 1, 2002 not later than the first survey on or after July 1, 2002, (3) Passenger ships other than ro-ro passenger ships constructed before July 1, 2002 not later than January 1, 2004 and (4) Ships other than passenger ships of 3,000 gross tonnage and upwards constructed on or after July 1, 2002.

Voyage Data Recorder consists of Data Collection Unit (DCU), robust protective data storage capsule and replay and evaluation unit. It records conversations at the navigation bridge, VHF radio communication, speed, course and other information on the ship's condition for 12 hours. Records and plays back important voyage navigation, machinery and environmental data for post-incident evaluation and crew training.

Provides the following data recording solutions;
- Conversation and communication recording
- Radar recording
- Vessel motion response monitoring/recording
- Vessel performance and trends analysis
- Stand-alone and integrated bridge configulations

Data Collection Unit (DCU)

- Data Collection Unit
  Interfaced with ship equipment and collects, processes and stores all relevant ship's data for a period of 12 hours as required by IMO A.861.
- Protected Storage Unit
  Stores data received from the DCU on a solid state recording medium. The PSU is calamity resistant by means of a protective capsule. It is located on top of the ship's superstructure in order to provide easy access from outside.
- Relay and Evaluation Unit
  Used to reply and evaluate previously recorded time synchronized data. The REU is in addition an excellent

tool for training purposes. Data stores in the PSU can be downloaded through the DCU for replay or long-term storage of data.

Recording Paper

for Navigational Equipment

Papel para Equipamiento de Navegación
航海計器用記録紙　航仪器记录仪

As a wide variety of recording paper for use with different kinds of navigational equipment are available, please specify the name of the equipment, the type, model number, manufacturers name and any other information regarding the applications of the paper.

List of Recommended Medicines and Equipment by International Medical Guide for Ships - Third Edition

All ships subject to the regulations established by the international Maritime Organization (IMO) and International Labour Organization (ILO) must have adequate medical supplies, that are periodically inspected, kept in good condition, and are ready for use whenever required. The quantities needed on board will depend on the duration and destination of the voyage, the number of crew members, and the nature of the cargo.

The medicine chest is designed to hold a range of medicinal products needed for the most common medical emergencies likely to occur on board ship, however distant it is from shore.

Different communities have different methods of treatment. Items specific to national requirements and customs can be added to the list of recommended medicines and medical supplies provided at the end of this chapter. The added items, however, should not be used to replace any of the recommended medicines or medical supplies on the list, but should be integrated into the list together with detailed information about their actions and unwanted effects.

The list assumes that on-board medical treatment is dispensed by an officer working under the responsibility of the master. Ships with a doctor on board may carry an expanded range of medicines and other medical equipment and supplies.

Some of the listed medicines are available only on prescription. As regulations differ from country to country, no advice is given here about obtaining these medicines.

Quantification Addendum: International Medical Guide for Ships, Third edition

Background

The third edition of the *International Medical Guide for Ships* was published by the World Health Organization, in collaboration with the International Labour Organization and the International Maritime Organization in 2007. The Guide provides advice to help promote and protect the health of seafarers. An important section in the Guide is the 'Ship's Medicine Chest'. This section provides a recommended list of medicines that ships at sea should carry, as well as indications and dosing. The second edition of the Guide, published in 1988, also provided suggested quantities of medicines that ships of various size should hold; recommended quantities were not included in the third edition. The University of Newcastle WHO Collaborating Centre for Training in Pharmaco-economics and Rational Pharmacotherapy was commissioned to develop a list of recommended quantities of medicines listed in the third edition of the *International Medical Guide for Ships*.

	Category A	Category B
Definition of categories of ships	Ocean-going merchant vessels without a doctor on board.	Merchant vessels engaged in coastal trade or going to nearby ports, and not more than 24 hours away from a port of call.
Crew sizes and trip durations	Per 10 crews, the assumed duration of each trip is up to 3-4 weeks.	

List of Recommended Medicines

CODE	Description	Indication	Quantities per 10 crew		Notes
			A	B	
39 17 01	Acetylsalicylic acid, 300 mg tablet	Pain, fever, blood clots	50	50	
39 17 02	Aciclovir, 400 mg tablet	Herpes simplex/zoster	70+	35+	
39 17 03	Adrenaline, 1 mg/ml ampoule	Anaphylaxis	10+	5+	
39 17 05	Amoxicillin/clavulanic acid, 875 mg/125 mg tablet	Infections	20	10	
39 17 06	Artemether, 80 mg/ml ampoule	Malaria treatment	12+	12+	
39 17 07	Artemether + lumefantrine, 20 mg/120 mg tablet	Malaria treatment	24+	24+	Double if crew size >30
39 17 08	Atropine, 1.2 mg/ml ampoule	MI/organophosphate poisoning	10+	5+	Double quantity if carrying organophosphates
39 17 09	Azithromycin, 500 mg tablet	Infections	10+	5+	Double if crew size >30
39 17 10	Ceftriaxone, 1 g ampoule	Infections	15	5+	
39 17 11	Cetirizine, 10 mg tablet	Hayfever/hives/dermatitis	30+	30+	
39 17 12	Charcoal, activated, powder	Poisoning	120 g+	120 g+	
39 17 13	Ciprofloxacin, 250 mg tablet	Infections	20+	10+	Double if crew size >30

(to be continued)

CODE	Description	Indication	Quantities per 10 crew		Notes
			A	B	
39 17 14	Cloves, oil of, liquid	Toothache	10 ml	10 ml+	
39 17 15	Dexamethasone, 4 mg/ml ampoule	Severe asthma/anaphylaxis	3	1	
39 04 62	Diazepam, 5 mg tablet	Alcohol withdrawal	50+	20+	
39 17 17	Docusate with senna, 50 mg/8 mg tablet	Constipation	30+	-	
39 06 31	Doxycycline, 100 mg tablet	Infections	10	-	
39 17 19	Ethanol, hand cleanser, 70% gel	Hand cleaning	500 ml	500 ml+	
39 17 20	Ethanol, 70% liquid	Disinfect instruments	500 ml	100 ml	
39 17 21	Fluorescein, 1% eye strips	Detect corneal damage	20+	20+	
39 17 22	Frusemide, 40 mg/4 ml ampoule	Pulmonary oedema	5+	5+	
39 17 23	Glucagon, 1 mg ampoule	Hypoglycaemia	1+	1+	
39 17 24	Haloperidol, 5 mg/ml ampoule	Psychosis/severe agitation	5	5+	
39 06 44	Hydrocortisone, 1% cream	Allergy/inflammatory skin	2 x 30 g	1 x 30 g	One tube per patient
39 17 26	Ibuprofen, 400 mg tablet	Inflammation/pain	100	50	
39 17 27	Isosorbide dinitrate, 5 mg tablet	Angina/MI	10	10	
39 17 28	Lignocaine, 1%, 5 ml ampoule	Suturing/minor surgery	5	5	
39 17 29	Loperamide, 2 mg tablet	Diarrhoea	30	30	
39 17 30	Mebendazole, 100 mg tablet	Intestinal worms	6+	6+	
39 17 31	Metoprolol, 100 mg tablet	HTN/AF/Angina/Migraine	60+	-	
39 17 32	Metronidazole, 500 mg tablet	Infections	30+	20+	
39 06 52	Miconazole, 2% cream	Fungal skin infections	2 x 30 g	1 x 30 g	Double quantity if females on board
39 17 34	Midazolam, 5 mg/ml ampoule	Epileptic fits	10+	5+	
39 17 35	Misoprostol, 200 ug tablet	Post-partum haemorrhage	3+	3+	Only if females on board
39 03 90	Morphine, 10 mg/ml ampoule	Severe pain	10	10	
39 17 37	Morphine, 1 mg/ml liquid	Severe pain in patients able to eat and drink	100 ml+	100 ml+	
39 06 56	Naloxone, 0.4 mg/ml ampoule	Opiate overdose	10+	5+	
39 17 39	Omeprazole, 20 mg tablet	Reflux, peptic ulcers	30+	30+	
39 17 40	Ondanestron, 4 mg tablet	Vomiting, sea-sickness	10	10	
39 06 58	Oral Rehydration Solution, sachet powder	Dehydration due to diarrhoea	15 ltr (75)	10 ltr (50)	Quantities in brackets are number of sachets based on sachets made up to 200 ml
39 17 42	Oxymetazoline, 0.50% Nasal drop	Nasal obstruction/drain sinuses	2	1	One bottle per patient
39 06 60	Paracetamol, 500 ml tablet	Pain and fever	100	50	
39 17 44	Permethrin, 1% lotion	Lice	200 ml+	100 ml+	Double if crew size >30
39 17 45	Permethrin, 5% lotion	Scabies	300 ml+	100 ml+	100 ml per patient
39 17 46	Povidone iodine, 10% ointment	Disinfect skin/wounds	1 x 25 g	1 x 25 g	
39 17 48	Povidone iodine, 10% liquid	Disinfect skin/wounds	100 ml+	100 ml	
39 17 47	Prednisone, 25 mg tablet	Asthma/inflammatory conditions	30+	30+	
39 06 72	Salbutamol, 100 ug/dose inhalation	Asthma/bronchitis/emphysema	1	1	One inhaler per patient
39 06 73	Sodium chloride, 0.9%, 1 ltr liquid	Fluid replacement	5+	1	
39 17 04	Tetracaine [amethocaine], 0.50% eye drop	Eye examination	20+	20+	
39 17 50	Tetracycline, 1% eye ointment	Minor eye infections	2	1	One tube per patient
39 17 51	Vitamin K, 10 mg/ml ampoule	Reverse warfarin or similar	2+	2+	
39 06 82	Water for injection, 5 ml ampoule	Reconstitute infections	10	5+	Only used to reconstitute ceftriaxone
39 17 53	Zidovudine + lamivudine, 300 mg/150 mg tablet	Needle-stick injury prophylaxis	56+	56+	
39 06 83	Zinc oxide, 20% paste/ointment	Irritated skin	200 g+	100 g+	4 x 25 g or 3 x 30 g tubes per 100 g

Remark: Quantities marked with an '+' are suggested quantities irrespective of crew size.

List of Recommended Equipment

(According to Guidance to the International Medical Guide for Ships 3rd edition:Interim advice regarding the best use of the medical chest for ocean-going merchant vessels without a doctor onboard, Joint Statement of WHO Collaborating Centres for the Health of Seafarers and the International Maritime Health Association – 2009 Version)

How to use the proposed list of recommended medicines and equipment of the International Medical Guide for Ships 3rd edition, pages 430-461

- The Interim Advice is **only** to be used in conjunction with the International Medical Guide for Ships 3rd edition[2] as published by WHO in 2007.

[2] International Medical Guide for Ships (3rd Edition), World Health Organization, Geneva. 2007.

- All items suggested from WHO in the original list on pages 430 to 461 are included.
- Any additions to the original list (items and comments) are made visible by the use of italic letters. Reference pages from the medical textbook to the list of items which justify the additions are given.
- Running numbers have been given to the list of medicines and equipment including added items.
- Drugs, forms, books and equipment which are mentioned in the textbook but have not been displayed in the list of medicines are added to the list in alphabetical order.
- Reference pages to the medical textbook are given for all items to ease the use of the list.
- If an item may be omitted under special circumstances this is mentioned in italic letters in the last column.
- Suggestions for quantities have been included. Quantities are calculated on the basis of the following assumptions: Ocean-going merchant vessels without a doctor onboard. Maximum duration of travel of 3 weeks. Crew sizes of 10, 20, 30 or 40 persons.
- For merchant vessels without a doctor onboard engaged in coastal trade or going to nearby foreign ports, and not more than 24 hours away from a port of call, for fishing boats and private craft: Quantities may be adapted or omitted on the advice of a qualified medical practitioner or pharmacist with regards to the destination, medical facilities ashore, number of crew members and cargo.
- **For dosage, contra-indications, unwanted effects, radiomedical advice and further remarks the users needs to refer to original text of the IMGS 3rd edition.**
- Recommended quantities will not always reflect the standard packs in a given country. In this case the recommendation is for the nearest available dispensing sales pack above the minimum required quantity.
- Owners and operators may substitute exact equivalents on the advice of a qualified medical practitioner or pharmacist, provided they are satisfied that an equivalent level of treatment is assured.
- Specific items will not be available in certain countries, for example Chlorpyrifos was banned in the European Communion (Directive 98/8 eec of March 16th 1998). The pharmacist will have to supply an analogous drug in corresponding quantities. The same is true for items which have transport restrictions and cannot be delivered locally.
- For ships carrying dangerous goods according to the IMDG Code[6] : Medicines and equipment already available in the IMGS list may be counted toward the Medical First Aid Guide (MFAG) numerical requirement, if appropriate.

[6] Medical First Aid Guide (MFAG) for use in accidents involving dangerous goods. International Maritime Organization, London, 2004.

Ocean-going merchant vessels without a doctor onboard.
Maximum duration of travel of 3 weeks.
Crew sizes of 10, 20, 30 or 40 persons.
Only to be used in conjunction with the International Medical Guide for Ships 3rd editon

Running numbers are given to the alphabetical list of medicines and equipment. Items which have been added by authors appear in alphabetical order and are written in italic letters.	Quantities for the recommended minimum number of items for ocean –going vessels are based on an estimated 3 weeks inventory for a crew complement of 10 to 40 persons.	Comments in italic letters refer to added items which are mentioned in the textbook but have not been displayed in the list of medicines. Remarks on items which may be omitted under special circumstance are given. For dosage, contra-indications, doctor consulting, unwanted effects and remarks refer to IMGS 3rd ed. p.430-461 and textbook

Item No.	CODE	Recommended Item	Per 10	Per 20	Per 30	Per 40	Category Added Comments
1. RESUSCITATION EQUIPMENT							
1.1	**39 18 01**	Portable oxygen set, complete, containing;	*1*	*1*	*1*	*1*	Appliance for the administration of oxygen. *See pages 4-5.*
1.1a	**39 18 02**	1 oxygen cylinder, 2 ltr / 200 bar	*1*	*1*	*1*	*1*	Ready to use. *See pages 4-5.*
1.1b	**39 18 03**	1 spare oxygen cylinder, 2 ltr / 200 bar	*1*	*1*	*1*	*1*	*See pages 4-5. If no additional equipment from the MFAG on board consider to increase amount of oxygen to 4 x 10 ltr.*
1.1c	**39 18 04**	Pressure regulating unit and flow meter with tubes such that ship's industrial oxygen can also be used	*1*	*1*	*1*	*1*	*See pages 4-5.*
1.1d	**39 18 05**	3 disposable face masks of choice: including simple face mask and non-rebreathing mask	*1*	*2*	*3*	*4*	*See pages 4-5.*
1.2a	**39 18 06**	Guedel airway (Mayo-tube): sizes medium	*1*	*1*	*1*	*1*	Oropharyngeal airway, *See pages 4-5, 315.*
1.2b	**39 18 34**	Guedel airway (Mayo-tube): sizes large	*1*	*1*	*1*	*1*	Oropharyngeal airway, *See pages 4-5, 315.*
1.3a	**39 18 07**	Manual aspirator to clear upper airways	*1*	*1*	*1*	*1*	Mechanical aspirator, *See pages 4-5.*
1.3b	**39 18 35**	Catheters for aspirator	*2*	*2*	*2*	*2*	Mechanical aspirator, *different sizes; See pages 4-5.*
1.4	**39 18 08**	Ambubag or equivalent: supplied with small, medium and large masks	*1*	*1*	*1*	*1*	Bag and mask resuscitator *including oxygen reservoir bag and oxygen tubing, See pages 4-5.*
1.5	**39 18 09**	Brook Airway, Lifeway, pocket face mask or equivalent	*1*	*1*	*1*	*1*	Cannula for mouth-to-mouth resuscitation, *See pages 4-5.*
2. DRESSING MATERIAL AND SUTURING EQUIPMENT							
2.1	**39 18 10**	Assorted wound-plaster or plaster strips, water resistant – *slim and broad*	*200*	*200*	*200*	*200*	Adhesive dressings.
2.2a	**39 18 11**	Sterile gauze compresses, 5 cm × 5 cm, sterile	*50*	*50*	*100*	*100*	Sterile gauze compresses.
2.2b	**39 18 12**	Sterile gauze compresses, 10 cm × 10 cm	*50*	*50*	*100*	*100*	Sterile gauze compresses.
2.3	**39 18 13**	Gauze roll, 5 cm and 60 or 90 cm × 100 m, non- sterile	*1*	*1*	*1*	*1*	Gauze roll. *60 cm / 90 cm may be substituted by gauze roll of smaller size.*
2.4	**39 18 14**	Non-adherent gauze dressing, square, 10 cm	*10*	*20*	*30*	*40*	Gauze dressing with non-adherent surface.
2.5	**39 18 15**	Paraffin gauze dressing, 10 × 10 cm, sterile	*40*	*40*	*40*	*40*	Vaseline gauze.
2.6	**39 18 16**	Elastic fixation bandage, 4 m × 6 cm	*3*	*6*	*9*	*12*	Bandage.
2.7a	**39 18 17**	First-aid absorbent gauze-covered cotton pad sewn onto a cotton bandage (ambulance dressing) small	*5*	*5*	*10*	*10*	Sterile compression bandages.
2.7b	**39 18 36**	First-aid absorbent gauze-covered cotton pad sewn onto a cotton bandage (ambulance dressing) medium	*5*	*5*	*10*	*10*	Sterile compression bandages.
2.7c	**39 18 43**	First-aid absorbent gauze-covered cotton pad sewn onto a cotton bandage (ambulance dressing) large	*5*	*5*	*10*	*10*	Sterile compression bandages.
2.8a	**39 18 18**	Tubular gauze bandage for finger bandage, 5 m	*1*	*1*	*1*	*1*	Tubular gauze for finger bandage. *See pages 43-58.*
2.8b	**39 18 44**	Applicator for finger bandage	*1*	*1*	*1*	*1*	*See pages 43-58.*
2.9	**39 18 19**	Adhesive elastic bandage, 4 m × 6 cm	*10*	*10*	*10*	*10*	Adhesive elastic bandage.
2.10	**39 18 20**	Triangular sling	*5*	*5*	*5*	*5*	Triangular sling. *See pages 43-58 and 77.*
2.11	**39 18 21**	Sterile sheets for burn patients	*2*	*2*	*4*	*4*	Sterile sheet for burn victims. Different sizes *See pages 79-83.*
2.12	**39 18 22**	Honey for dressing burns 1 kg *(only purified 1,000 g)*	*1*	*1*	*2*	*2*	*Only if honey for medical purposes available. Otherwise use a hydrogel-burnkit. See pages 79-83.*

2.19c	**39 18 31**	Surgical gloves size 6.5, sterile, in pairs	*3*	*4*	*5*	*6*	Gloves *(sterile).*
2.19d	**39 18 63**	Surgical gloves size 7.5, sterile, in pairs	*3*	*4*	*5*	*6*	Gloves *(sterile).*
2.19e	**39 18 66**	Surgical gloves size 8.5, sterile, in pairs	*3*	*4*	*5*	*6*	Gloves *(sterile).*
2.20	**39 12 50**	*Eye pads*	*1*	*2*	*3*	*4*	*See pages 36, 38.*
3. INSTRUMENTS							
3.1	**39 18 32**	Scalpel, sterile, disposable	*10*	*10*	*10*	*10*	Disposable scalpels *See pages 71-74, 216-219.*
3.2	**39 18 33**	Instrument box (stainless steel)	*1*	*1*	*1*	*1*	Stainless-steel instrument box.
3.3	**39 13 61**	Operating scissors, straight (stainless steel)	*1*	*1*	*1*	*1*	Scissors.
3.4	**39 13 62**	Bandage scissors (stainless steel)	*1*	*1*	*1*	*1*	Scissors.
3.5	**39 12 69**	Splinter forceps, pointed (stainless steel)	*1*	*1*	*1*	*1*	Forceps.
3.6	**39 18 37**	Teeth tissue forceps (stainless steel)	*1*	*1*	*1*	*1*	Forceps. *See pages 71-74, 216-219.*
3.7	**39 18 38**	Needle holder, Mayo-Hegar, 180 mm, straight	*1*	*1*	*1*	*1*	Needle holder. *See pages 71-74.*
3.8	**39 18 39**	Haemostatic clamp, Halstead mosquito, 125 mm, stainless steel	*2*	*2*	*2*	*2*	Haemostatic clamps.
3.9	**39 18 40**	Razor, disposable	*5*	*5*	*5*	*5*	Disposable razors.
4. EXAMINATION AND MONITORING EQUIPMENT							
4.1	**39 18 41**	Tongue depressors, disposable	*100*	*100*	*100*	*100*	Disposable tongue depressors.
4.2	**39 18 42**	Reactive strips for urine analysis: blood/glucose/protein/nitrite/ leukocytes	*50*	*50*	*100*	*100*	Reactive strips for urine analysis, *See pages 311-312, 324.*
4.3	**39 13 34**	Microscope slides	*12*	*12*	*12*	*12*	Microscope slides, *See pages 265-269.*
4.4	**39 13 71**	Stethoscope	*1*	*1*	*1*	*1*	Stethoscope.
4.5	**39 13 68**	Sphygmomanometer (blood pressure set), preferably automatic	*1*	*1*	*1*	*1*	Aneroid sphygmomanometer, *See pages 305-307.*
4.6a	**39 18 46**	Standard thermometer, digital if possible	*2*	*2*	*3*	*3*	Standard thermometer, *See pages 302-304.*
4.6b	**39 18 47**	Rectal thermometer, digital if possible	*1*	*1*	*1*	*1*	Rectal thermometer, *See pages 302-304.*
4.7	**39 18 48**	Thermometer 32°-34°C, digital if possible	*1*	*1*	*1*	*1*	Hypothermic thermometer, *preferable range 26°C to 42°C to differentiate between severe-moderate-mild hypothermia; See pages 343-344.*
4.8	**39 18 49**	Penlight + blue cover	*1*	*1*	*1*	*1*	Penlight (Blue light) to detect damage to cornea. *See pages 33-34.*

Medical First Aid Guide Dangerous Good List

Appendix 14

LIST OF MEDICINES AND EQUIPMENT

Preamble

1 Medicines and equipment already available in the ship's medicine chest may be counted towards the MFAG numerical requirements outlined below.
2 In some cases, alternatives are given. This means that one of the given alternatives should be chosen.
3 Not all drugs and antidotes on the list may be licensed as pharmaceutical specialities in all Member States and thus available for general purchase. In such cases, the national authorities may issue a modified list, also in English, where drugs on the below list not available are substituted with analogous drugs in corresponding quantities.
4 In countries with official lists on contents of ship's medicine chests, the national authorities can decide to substitute some of the drugs on the below list with analogous drugs available in the ordinary ship's medicine chest.
5 The recommended minimum quantities are based on an estimate of risk to persons on board and the time within which full treatment on shore can be given.
6 National authorities can decide on exemption from carrying these medicines for vessels making short regular voyages of ten minutes or less.

Labelling, storage and dispensing should, in general, conform to the relevant specifications in the IMGS. Contents and storage conditions should be checked at least once a year, taking account of manufacturers expiry date and instructions. Medicines used should be replaced as soon as possible.

Column A of the following table shows the recommended minimum requirements for ships when casualties **cannot** be hospitalized on shore within 24 hours.
Column B shows the recommended minimum requirements for ships when casualties can be hospitalized on shore within 24 hours.
Column C shows the recommended minimum requirements for ships when casualties can be hospitalized on shore within 2 hours.

CODE	Medicine	Format/ Standard unit	Recommended Minimum Quantity			Dosage	Reference
			A	B	C		
39 19 01	amoxycillin	capsules 500 mg	30 capsules	none	none	500 mg × 3	Table 9
39 19 02	anaesthetic eye drops	eye drops (bottle)	5 bottles	5 bottles	5 bottles	several drops x several	Table 7
39 19 03	antibiotic eye ointment	eye ointment (tube)	5 tubes	5 tubes	none	apply 2 to 4 times daily or more frequently if required	Appendix 7
39 19 04	atropine	injection fluid 1 (or 0.5) mg/ml (1 ml ampoule)	15 (or 30) x 1 ml	15 (or 30) x 1 ml	none	1 mg x several	Table 17
39 19 05	beclomethasone (including inhalation device)	inhalation aerosol 50 µg/dose (200 doses) or 250 µg/dose (200 doses)	5 x 200 doses	5 x 200 doses	none	250 µg x several (5 puffs of 50 µg/dose) or (1 puff of 250 µg/dose)	Table 9
	or						
39 19 06	budenoside (including inhalation device)	inhalation aerosol 200 µg/dose (100 doses)	5 x 100 doses	5 x 100 doses	none	400 µg x several (2 puffs of 200 µg/dose)	
39 19 07	calcium gluconate gel	gel 2% (25 g tube)	5 tubes	5 tubes	5 tubes	apply several times	Tables 8, 16
39 19 08	calcium gluconate	Effervescent tablets 1 g	20 tablets	20 tablets	none	5 g x 2	Table 16
39 19 09	cefuroxime	injection substance 750 mg (750 mg bottle)	10 x 750 mg	none	none	750 mg x 3	Table 10
39 19 10	charcoal, activated	powder (50 g bottle) or effervescent granules (5g sachet)	2 x 50 g or 10 x 5 g	2 x 50 g or 10 x 5 g	none	50g x 1	Table 10
39 19 11	diazepam	rectal solution 10 mg (ampoule)	5 x 10 mg	5 x 10 mg	none	10 mg x 1 to 5	Tables 4, 5, 6
39 19 12	erythromycin	tablets 500 mg	30 x 500 mg	none	none	500 mg x 4	Table 9
39 19 13	ethyl alcohol	solution 99.5% (500 ml bottle)	3 x 500 ml	1 x 500 ml	none	25 ml x 8 (25 ml 99.5% in 250 to 300 ml water or soft drink)	Table19
39 19 14	fluorescein	eye test strip	1 package	none	none	1 test strip x 2	Appendix 7
39 19 15	furosemide (frusemide)	injection fluid 10 mg/ml (5 ml ampoule)	5 x 5 ml	none	none	50 mg x 3	Tables 2, 9
39 19 16	metoclopramide	injection fluid 5 mg/ml (2 ml ampoule)	30 x 2 ml	10 x 2 ml	5 x 2 ml	10 mg x 3	Tables 7, 8, 10, 13, 15, 20
39 19 17	metronidazole	suppositories 1 g	10 x 1 g	none	none	1g x 3	Table 10
39 19 18	morphine sulphate	injection fluid 10 mg/ml (1 ml ampoule)	40 x 1 ml	10 x 1 ml	5 x 1 ml	10 to 20 mg x 6 or 7	Tables 7, 8, 10, 13
39 19 19	naloxone	injection fluid 0.4 mg/ml (1 ml ampoule)	5 x 1 ml	5 x 1 ml	2 x 1 ml	0.4 mg x 1 to 5	Tables 4, 13
39 19 20	oral rehydration salts (ORS)	sachets or tablets to dissolve in water	ORS to give 18 litres solution	ORS to give 6 litres solution	none	1 litre x 3 or more	Tables 8, 10, 11
39 19 21	paracetamol	tablets 0.5 g	200 tablets	100 tablets	20 tablets	1g x 4	Tables 7, 8, 13
39 19 22	phytomenadione	injection fluid 10 mg/ml (1 ml ampoule)	10 x 1 ml	none	none	10 mg x 2 or more	Table 14
39 19 23	plasma expander (gelatine-based)	infusion fluids (500 ml bottles)	3 x 500 ml	3 x 500 ml	none	500 ml x 1 to 3	Appendix 13
39 19 24	rehydration salts - see oral rehydration salts						Tables 8, 10, 11
39 19 25	salbutamol (including inhalation device)	inhalation aerosol 100 µg/dose (200 doses)	5 x 200 doses	5 x 200 doses	1 x 200 doses	200 µg x several (2 puffs of 100 µg/ dose)	Table 9
	or						
39 19 26	terbutaline (including inhalation device)	inhalation aerosol 500 µg/dose (50 doses)	5 x 50 doses	5 x 50 doses	1 x 50 doses	500 µg x several (1 puff of 500 µg/ dose)	
39 19 27	sodium chloride, isotonic (saline)	9 mg/ml (0.9%) (1 ltr bottle)	5 x 1 ltr	3 x 1 ltr	1 x 1 ltr	1 ltr x 1 to 3	Table 7
39 19 28	terbutaline - see salbutamol						

LIST OF EQUIPMENT

Column A of the following table shows the recommended minimum requirements for ships when casualties **cannot** be hospitalized on shore within 24 hours.

Column B shows the recommended minimum requirements for ships when casualties can be hospitalized on shore within 24 hours.

Column C shows the recommended minimum requirements for ships when casualties can be hospitalized on shore within 2 hours.

(to be continued)

- A minimum of 44 litres/200 bar oxygen of which there should be at least:

- one complete portable set with 2 ltr/200 bar oxygen ready for use with a spare cylinder of 2 ltr/200 bar and

- one oxygen cylinder of 40 ltr/200 bar (at ship's hospital, assembled for direct use) with one flowmeter unit (two ports) for supplying of oxygen for two persons at the same time. If more than one non-portable oxygen cylinder is used, there must be two flowmeter units for supplying of oxygen for two persons at the same time.

List of Recommended Medicines and Equipment by International Medical Guide for Ships - Second Edition

The following table was devised in accordance with the "List of Medicines" recommended for the ship's medicine chest in accordance with the regulations of the World Health Organization. The table is set up in the same way as the International Medical Guide For Ships (2nd edition) with a code number assigned to each medicine to make it quick and easy to determine what medicines are required on board, compare the ship's current inventory of medical supplies, and submit orders for the medications required. We have also provided some helpful information about prescribing the medication as well as notes of caution in the use of the medication.

"List of Medicines"

WHO Number	Medicine with the corresponding IMPA code number	Required inventory	Conditions for which the medication is prescribed with notes of caution for use
1.	Acetylsalicylic acid, 300 mg tablets, 100's (Common aspirin) **39 01 86**	6 btl.	For relief of aches and pains caused by illnesses such as influenza, a cold, and sinusitis. Also to relieve headaches, neuralgia, muscular aches, joint pains, and fever.
2.	Alcohol, rubbing (70% ethyl alcohol), 500 ml **39 01 30**	6 btl.	Used as an antiseptic to sterilize and disinfect the skin prior to injections or other surgical procedures.
3.	Aluminium acetate, ear drops, 13% solution in 20 ml bottle **39 06 03**	6 btl.	Used for treating a boil in the ear.
4.	Aluminium acetate powder, 2 grm packet, 12's **39 06 04**	2 box	For external use only. A solution/mixture used as a soothing, astringent wet dressing for inflamed or exposed areas of the skin. Effective remedy for insect bites, poison ivy, or fungal infections such as athlete's foot. CAUTION : Keep away from eyes. Do not give internally.
5.	Aluminium hydroxide gel with magnesium hydroxide, 360 ml **39 06 05**	6 btl.	Used in treating gastric hyperactivity and peptic ulcer, acid ingestion, or sour stomach.
6.	Aluminium hydroxide w/magne-sium hydroxide, 1 grm tablets, 100's **39 06 06**	10 btl.	Used in the same way as the oral suspension.
7.	Aminophylline suppository, rectal 500 mg, 12's **39 06 07**	2 box	To facilitate breathing in patients who have bronchial asthma, asthmatic bronchitis, pulmonary emphysema, and certain types of heat failure. Give only on radio medical advice. (Refrigerate)
8.	Amitriptyline tablets, 25 mg, 100's **39 06 08**	1 btl.	A psychotherapuetic drug used in the treatment of depression and anxiety. To be prescribed only after obtaining radio medical advice. Not to be given to people with a history of seizure, urinary retention, glaucoma, liver disease, or to patients with cardiovascular complications.
9.	Ampicillin capsules, 250 mg, 100's **39 01 38**	3 btl.	For chest infections, urinary and gastrointestinal infections, and infections of the tonsils and throat. Give only upon radio medical advice from a physician. Persons allergic to penicillin should be assumed to be allergic to ampicillin and should not receive this medication.
10.	Antihaemorrhoidal suppositories, 12's **39 06 10**	6 box	For temporary relief of itching, burning, and soreness from haemorrhoids.
11.	Ascorbic acid tablets (vitamin C), 50 mg, 100's **39 05 44**	3 btl.	For the treatment and prevention of colds.
12.	Atropine sulfate injection, 0.5 mg/ml, 1 ml ampoules, 10's **39 06 12**	6 box	Used as an antidote in the treatment of poisoning by insecticides. Do not administer this drug before obtaining radio medical advice.
13.	Benzathine benzylpenicillin injection, 2.4 million unit/5ml vial **39 06 13**	20 pcs.	Used as an antibiotic, particularly for the treatment of syphilis. Before administering any penicillin preparation, determine if the patient is allergic to penicillin.
14.	Benzoic and salicylic acid ointment, 30 grm tube **39 01 96**	2 pcs.	Used in treating fungal infections of the skin. For external use only.
15.	Calamine lotion, plain, 120 ml. **39 02 20**	8 btl.	For the relief of itching or irritated skin, heat rashes, and hives. Do not use on open or seething sores.
16.	Calcium gluconate, effervescent tablets, 1 grm, 30's **39 06 16**	1 box	Used primarily in cases of poisoning by oxalic acid or sodium fluoride.
17.	Cetrimide, 40% solution, 500 ml (disinfectant) **39 02 26**	3 btl.	Disinfectant for external use only. This stock solution should be diluted before use.
18.	Charcoal, activated, powder, 120 grm **39 06 18**	1 btl.	Used in the initial treatment of most poisoning. Should not be used on unconscious patients because of the danger of the aspiration of the powder.
19.	Chloroquine phosphate tablets, 250 mg, 100's **39 06 19**	1 btl.	To prevent and treat malaria.
20.	Chlorphenamine maleate tablets, 4 mg, 20's **39 06 20**	3 btl.	For treating allergic reactions such as hay fever, urticaria, and anaphylactic shock. Do not give to patients with a history of glaucoma.
21.	Chlorphenamine maleate injection, 10 mg, 1 ml ampoules, 10's **39 06 21**	2 box	See previous item.

(to be continued)

WHO Number	Medicine with the corresponding IMPA code number	Required inventory	Conditions for which the medication is prescribed with notes of caution for use
22.	Chlorpromazine hydrochloride tablets, 25 mg, 20's **39 06 22**	4 btl.	For treating anxiety, tension, and agitation.
23.	Chlorpromazine hydrochloride injection, 25 mg in 1 ml ampoules, 10's **39 06 23**	2 box	Same as for chlorpromazine tablets.
24.	Clove oil, 20 ml **39 05 14**	2 btl.	For the relief of toothaches caused by cavities.
25.	Codeine sulfate tablet 30 mg, 100's Controlled substance **39 02 34**	1 btl.	Used to relieve coughing or diarrhoea. WARNING : A controlled substance. An exact record of its use must be kept.
26.	Cyclizine hydrochloride tablet, 50 mg, 100's **39 06 26**	4 btl.	For relief of nausea, vomiting and dizziness associated with motion sickness.
27.	Dextran injection, 6% and sodium chloride, 0.9% 500 ml **39 06 27**	6 btl.	To expand plasma volume and maintain blood pressure in the emergency treatment of shock due to loss of blood. Give only on the radio medical advice from a physician. Only trained people can administer this drug intravenously.
28.	Diazepam injection, 5 mg/ml, 2 ml ampoule Controlled substance **39 06 28**	20 pcs.	For treatment of severe agitation, including acute alcohol withdrawal states and convulsions. CAUTION : The injection should be given only on medical advice. This is a controlled substance. Keep an exact record of its use and keep stored in a locked cabinet.
29.	Diazepam tablets, 5 mg, 100's Controlled substance **39 04 62**	2 btl.	For the treatment of common anxiety and tension, and the management of agitation during alcohol withdrawal. Same precautions must be taken with the use of the tablets as the injections above.
30.	Dimercaprol injection, 100 mg in 2 ml ampoules, 10's **39 06 30**	6 box	Used as an antidote in poisoning from arsenic (pesticides), gold, and mercury. Always obtain radio medical advice in the event of such poisoning.
31.	Doxycycline hydrochloride tablets, 100 mg, 100's **39 06 31**	2 btl.	Antibacterial agent used in the treatment urinary infections.
32.	Ephedrine sulfate tablets, 25 mg, 100's **39 03 06**	1 btl.	To regulate breathing in asthma attacks, prevent asthma attacks for chronic asthma cases, and to relieve nasal congestion in hay fever and severe head colds. Obtain radio medical advice before using this drug. This drug should not be given to patients with chronic heart disease, high blood pressure, glaucoma, diabetes, or hyperthyroidism.
33.	Epinephrine hydrochloride injection, 1:1000, 1 ml ampoules 10's **39 06 33**	2 box	1. For acute asthma attacks and severe allergic reactions to penicillin and other drugs, and insect bites. 2. For cardiac or circulatory failure.
34.	Ergometrine maleate injection, 0.2 mg, in 1 ml ampoules, 10's **39 06 34**	1 box	Medicine administered to the mother after delivery of an infant, contracts the womb and reduces the risk of haemorrhaging.
35.	Erythromycin tablets, 250 mg, 100's **39 06 35**	3 btl.	Used for the treatment of a variety of infections of the upper and lower respiratory tract; infections of the mouth, gums, and teeth, ears, nose and sinuses.
36.	Eye anaesthetic drops, 0.5% solution of tetracaine hydrochloride, 10 ml **39 03 12**	2 btl.	For local anaesthetic of the eye before foreign particles are removed. For external use.
37.	Eye antiinfective drop, 1% solution of chloramphenicol, 10 ml **39 06 37**	3 btl.	For treating infectious eye diseases (blepharitis, conjunctivitis).
38.	Eye ointment, 1% tetracycline hydrochloride, 4 grm. tube **39 06 38**	6 pcs.	For superficial eye infections, trachoma, inflammation of the eyelids and tear sacs, and prevention of eye infection in injured eyes.
39.	Eyewash, isotonic, sterile, 120 ml **39 03 16/17**	6 btl	For irrigating or flushing the eye to wash away foreign particles, mucous secretions, and fluorescein die used in diagnosis.
40.	Fluorescein sodium ophthalmic strip, sterile, 200's **39 06 40**	1 pkt	Used for the detection of lesions or small foreign bodies embedded in the cornea of the eyeball.
41.	Furosemide tablets, 40 mg, 100's **39 06 41**	1 btl.	A potent, short acting diuretic which causes the production of urine by affecting the kidneys. This drug is to be used only after getting radio medical advice.
42.	Glyceryl trinitrate tablets, 0.5 mg, 20's **39 03 30**	2 btl.	For an acute attack of angina pectoris.

(to be continued)

WHO Number	Medicine with the corresponding IMPA code number	Required inventory	Conditions for which the medication is prescribed with notes of caution for use
43.	Hydrocortisone sodium succinate for injection 100 mg. **39 06 43**	5 vials	For use on medical advice only. 1. For severe shock. 2. For acute allergic reactions. 3. For the control of life threatening inflammation of the lungs after a patient has inhaled vomit.
44.	Hydrocortisone ointment, 1%, 30 grm tube **39 06 44**	6 pcs.	For temporary relief of certain skin disorders, common rashes, inflamed skin, and disorders causing itching and discomfort. WARNING : Do not apply to the eyes. Do not use for extended periods of time without a physicians order.
45.	Ichthyol & glycerine ointment, in 100 grm container **39 06 45**	3 pcs.	For treatment of boils, fishermen's hand infections, salt water boils, etc.
46.	Insect repellent, 50 ml **39 03 52**	12 btl.	External use only. Repels mosquitos, chiggers, flies, and other biting insects. Do not apply near the eyes, nose, or mouth.
47.	Iodine, 2.5% solution in 100 ml bottle **39 05 10**	4 btl.	For external use only. For disinfecting the skin against round worms and for the treatment of small cuts and skin bruises to prevent infection.
48.	Lidocaine hydrochloride injection 1%, 2 ml ampoule **39 06 48**	12 pcs.	For use as a local anaesthetic in minor surgical procedures.
49.	Lindane cream, 1%, 6 grm tube **39 06 49**	12 pcs.	For infestations of scabies and lice. For external use only.
50.	Magnesium hydroxide suspension, 550 mg/10 ml, 500 ml **39 06 50**	8 btl.	For use as a laxative. Never give magnesium hydroxide suspension to a patient with abdominal pain without first consulting a doctor.
51.	Metronidazole tablets, 200 mg, 100's **39 06 51**	5 btl.	For the treatment of salpingitis and other diseases of women and the treatment of amoebic dysentery.
52.	Miconazole nitrate, 2%, vaginal cream, in 80 grm container **39 06 52**	5 pcs.	For the treatment of external vaginal itching.
53.	Miconazole nitrate, 100 mg, pessary and inserter **39 06 53**	20 pcs.	Like miconazole vaginal cream, in genital itching.
54.	Mineral oil (liquid petrolatum) 500 ml **39 06 54**	1 btl.	Used as a skin emollient or protective agent. Also used to help remove ointments or creams from treated skin areas.
55.	Morphine sulfate injection, 10 mg/ml, 1 ml ampoules, 10's Controlled substance **39 03 90**	2 box	For severe pain which cannot be relieved by analgesics. Obtain medical advice prior to use. Caution : An addiction producing drug. Do not give morphine unless the radio medical doctor has instructed you to do so.
56.	Naloxone hydrochloride injection, 0.4 mg/ml, 1 ml ampoules **39 06 56**	6 pcs.	For the emergency treatment of respiratory depression resulting from the administration of narcotics, such as morphine.
57.	Neomycin and bacitracin ointment, 30 grm tube **39 06 57**	20 pcs.	Used in the treatment and prevention of infection in second and third degree burns.
58.	Oral rehydration salts in water-proof bags **39 06 58**	50 pcs.	For the treatment of diarrhoea and other diseases causing dehydration.
59.	Oxygen, size E tank **33 04 01/03**  7222 D, F	2 pcs.	To make up for the lack of oxygen in the blood and tissues, the symptoms for which are cyanosis (bluish colour to the skin and nail beds), dyspnoea (rapid shallow breathing), rapid thready pulse, and restlessness. Only trained personnel should administer oxygen. The use of oxygen presents an explosion hazard.
60.	Paracetamol, 500 mg tablet **39 06 60**	300 pcs.	To relieve pain and fever.
61.	Petrolatum, white, 60 grm tube **39 04 72**	6 pcs.	Used as a bland and neutral protective dressing for minor burns, abrasion, and dry skin.
62.	Phenobarbital tablets, 30 mg, 100's Controlled substance **39 04 42**	3 btl.	1. For insomnia. 2. For relatively prolonged sedation, as in some anxiety and tension states and in hypertension. 3. For the treatment of epilepsy. Patients using this drug should not drink alcohol.

(to be continued)

WHO Number	Medicine with the corresponding IMPA code number	Required inventory	Conditions for which the medication is prescribed with notes of caution for use
63.	Phenoxymethylpenicillin potassium tablets, 250 mg, 100's **39 04 38**	3 btl.	Used for susceptible infections. Give on radio medical advice only. Before administering any penicillin preparation, determine, if possible, whether the patient is allergic to penicillin.
64.	Pilocarpine hydrochloride eye drops, 2%, 15 ml **39 06 64**	2 btl.	Used for the management of glaucoma.
65.	Potassium permanganate, 100 grm. **39 06 65**	2 btl.	Diluted in water, this substance is used for the disinfection of the skin and mucous membranes and for the treatment of some skin diseases. For external use.
66.	Probenecid tablets, 500 mg, 100's **39 06 66**	2 btl.	Used along with intensive therapy with benzylpenicillin, with ampicillin, and a number of other penicillins for prolonging the effective blood concentration of these drugs.
67.	Procaine benzylpenicillin, sterile suspension injection, 600,000 units/ml, 1 ml vials, 10's **39 06 67**	2 box	To be given only upon the radio medical advice of a physician. Used for susceptible infections. Before administering any penicillin preparation, determine, if possible, whether the patient is allergic to penicillin.
68.	Proguanil tablets, 100 mg, 100's **39 06 68**	1 btl.	For the prevention of malaria. Given either alone or in association with chloroquine.
69.	Pyrantel tablets, 250 mg, 50's **39 06 69**	1 btl.	For the treatment of ringworm and roundworm infections.
70.	Quinine sulfate tablet, 300 mg, 100's **39 06 70**	2 btl.	Used for the treatment of acute attacks of malaria contracted in certain areas. Quinine sulfate may produce toxic symptoms such as ringing in the ears or sensation of fullness in the head.
71.	Quinine dihydrochloride, injection, 300 mg/ml, 2 ml ampoule, 10's **39 06 71**	2 box	For use in the treatment of acute attacks of malaria when the patient is unable to tolerate oral medication because of repeated vomiting or impairment of consciousness.
72.	Salbutamol, aerosol inhaler unit **39 06 72**	2 pcs.	An inhaled spray used for the relief of bronchial asthma.
73.	Sodium chloride injection, 0.9%, 1,000 ml **39 06 73**	6 btl.	Used intravenously to replace water, chloride, and sodium lost in excessive vomiting or diarrhoea, in dehydration due to excessive sweating, and in mild haemorrhage. Obtain radio medical advice before administering.
74.	Sodium chloride tablet, 1 grm, 1,000's **39 04 58**	2 btl.	Used to help avoid heat exhaustion, heat stroke, or heat cramps by replenishing body salts lost through excessive perspiration.
75.	Spectinomycin hydrochloride injection, 2 grm per 5 ml vial. **39 06 75**	20 pcs.	Used for the treatment of gonorrhoeal urethritis and proctitis in men and gonorrhoeal cervicitis and proctitis in women.
76.	Sulfamethoxazole & trimethoprim (400 + 80 mg) tablets, 20's **39 06 76**	10 btl.	For the treatment of urinary infections.
77.	Talc (talcum powder) 120 grm **39 06 77**	6 cans	Used as a skin lubricant and protector, and as a dusting powder for such skin irritations as chafing and heat rash.
78.	Tetanus immune human globulin, 250 units, vial **39 06 78**	5 pcs.	To provide immunity to tetanus in a patient who has not received vaccination and has a potentially contaminated wound. This drug should be carried only on ships transporting horses, cattle, and hides.
79.	Tetanus toxoid adsorbed, single dose, ampoule **39 06 79**	10 pcs.	For active immunization against tetanus.
80.	Tetracycline ear drops, 1% tetracycline solution, 10 ml **39 06 80**	10 btl.	For use in the treatment of ear infections.
81.	Tetracycline hydrochloride capsules, 250 mg, 100's **39 06 81**	3 btl.	For use in treatment of susceptible infections. To be given only after receiving radio medical advice.
82.	Water, sterile, 5 ml ampoules, 10's **39 06 82**	3 box	To dissolve penicillin in powder form.
83.	Zinc oxide paste, 30 grm tube **39 06 83**	12 pcs.	A non-toxic, protective, water insoluble, mildly astringent, and antiseptic paste employed in a large variety of diseases and irritations of the skin.

The following list comprises the required inventory of surgical equipment, instruments, and supplies for ocean going vessels in accordance with the provisions of the WHO International Medical Guide for Ships (2nd edition). All required equipment is listed with the standard inventory and a code number for easy stocking of the items.

Equipment

WHO Number	CODE	Description	Quantity required
1.	**39 13 16**	Basin, emesis, kidney shape	1 pc.
2.	**39 12 06**	Basin, wash, with rim	1 pc.
3.	**39 12 08**	Bedpan	1 pc.
4.	**39 12 33**	Cane, with rubber tip	1 pc.

Medical Stores required for United Kingdom Merchant Ships and Fishing Vessels

The Merchant Shipping and Fishing Vessels (Medical Stores) Regulations 1995 SI No.1802 (as amended 1996 SI No.2821)

Medical Stores Categories

The categories of vessels and the consequent requirements for medical stores and equipment are set out in the directive and the implementing legislation. The vessel categories are:

Category A : Sea going or sea-fishing vessels with no limitation on length of trips.

Category B : Sea going or sea-fishing vessels making trips of less than 150 nautical miles from the nearest port with adequate medical equipment. This category is extended to seagoing or sea-fishing vessels which make trips of less than 175 nautical miles from the nearest port with adequate medical equipment and which remain continuously within range of helicopter rescue services.

The requirements and recommended stores are set out in the following schedules.
Schedule 1 : Requirements for Categories A and B vessels.
Notes on schedule 1 : Requirements for categories A and B.
in the attached schedule the columns are as follows :

* Column 1 is the reference number in the EC Directive 92/29. This is included for identification of treatments when seeking or receiving radio medical advice from any European Community Member State.

* Column 2 is the treatment which must be available to comply with the Regulations.

* Column 3 is the medicine and dosage strength which MSA considers best complies with the statutorily required treatment. Owners and operators may substitute exact equivalents on the advice of a qualified medical practitioner or pharmacist, provided they are satisfied that an equivalent level of treatment is assured.

* Column 4 is the quantity of medicine/equipment considered sufficient to provide treatment for a crew of 10 persons or 10 persons in a lifeboat or liferaft.

* Drug supplies should be replenished wherever possible at the same strengths as specified in the British Pharmacopoeia. If drugs are obtained elsewhere, e.g. in the U.S.A., they may be of different strength, and this must be taken into account when administering them.

* The medicines have been chosen to ensure that they can be purchased at minimum cost. However if, for operational reasons, an alternative packaging is preferred this is acceptable. e.g. the use of the word "ampoule" should not exclude the use of a pre-filled syringe where available and preferred.

MEDICAL SUPPLIES

For any items marked * the specified quantity is considered sufficient regardless of crew size.

(e)	Local Anaesthetics				
	- Local anaesthetics using freezing	**39 08 64**	Ethyl chloride liquid spray 50 mg	1*	1*
	- Local anaesthetics given by subcutaneous injections	**39 08 65**	Lignocaine hydrochloride 1% 25 mg in 5 ml for injection	5	5
	- Dental anaesthetics and antiseptic mixtures	**39 08 66**	i) Lignocaine Gel 20 g (lignocaine hydrochloride 2% in a water miscible (bass) gel	1	-
		67	ii) Oil of Cloves 10 ml	1*	1*

MEDICAL EQUPMENT

Required Equipment	CODE	Recommended Specification	A	B
1. Resuscitation Equipment				
Manual resuscitation appliance				
Appliance for the administration of oxygen	**39 20 01**	Oxygen Giving Set comprising the following; 1) Oxygen reservoir 2) 1 flow meter unit giving a minimum setting of 4 litres per minute 3) 1 pressure regulating unit 4) 1 set of tubing 5) 5 x 24% oxygen disposable face masks 6) 5 x 35% oxygen disposable face masks each part constructed so that it can only be assembled in the correct manner	1	1
Mechanical aspirator to clear upper respiratory	**39 20 02**	Aspirator to clear airways (manual, hand operated) + two catheters	1	1
Equipment for mouth to mouth resuscitation	**39 20 03** **04**	Laerdal Pocket Mask Guedal Airway Sizes 3 and 4	1 1	1 1
2 Dressing and suturing equipment				
Disposable suture stapler or suture kit with needles	 **39 20 05** **06** **07**	Suture and needle pack Sterile non absorbable, sutures BP, of monofilament nylon or silk, swaged to a 26 mm, and 40 mm half circle needle with a cutting edge. Each needle and suture to be in a sealed pack (1) 26 mm half circle needle (2) 40 mm half circle needle (3) sterile absorbable sutures BP of catgut swaged to a 40 mm half circle cutting needle	 3 3 26	 - - -
Adhesive elastic bandage	**39 20 08** **09**	Adhesive Elastic Bandege 7.5 cm x 4 m Crepe bandege 7.5 cm x 4.5 m when stretched	4 4	1 1
Tubular gauze bandage, seamless, of a size suitable for finger dressings	**39 20 10**	20 m length with applicator	1	1
Sterile gauze compresses	**39 20 11**	Packet containing 5 sterile gauze pads BP size 7.5 cm x 7.5 cms	10	5
Cotton wool	 **39 20 12** **13**	Absorbent cotton and viscose wadding db, in a roll, in damp proof packaging (1) 15 gm, sterile (2) 100 gm, non-sterile	 6 3	 3 1
Sterile sheet for burns victims	**39 20 14**		1	1
Triangular sling	**39 20 15**	Calico, with two sides @90 cm and base @127 cm	4	4
Disposable polyethylene gloves	**39 20 16**	Large size	25	25
Adhesive dressings	**39 20 17**	Assorted, sterile	40	40
Sterile compression bandages	**39 20 18** **19** **20**	(1) No.13 Standard dressings (2) No.14 Standard dressings (3) No.15 Standard dressings	5 5 4	3 3 2
Adhesive sutures or zinc oxide bandages	**39 20 21**	75 mm adhesive suture strips	6	6
Non-absorbable sutures with needles		Use Equipment items 2(1) and 2(2)	Use 2(1) & 2(2)	Use 2(1) & 2(2)
Vaseline gauze	**39 20 22**	Paraffin gauze dressings, size 10 cm x 10 cm	40	40
3 Instruments				
Disposable scalpels	**39 20 23**		2	-
Stainless-steel instrument box	**39 20 24**		1	1
Scissors	**39 20 25**	- about 18 cm one blade sharp pointed and the other round-ended	1	1
	39 20 26	- 12.5 cm, both blades sharp pointed	1	1
Dissecting forceps	**39 20 27**		1	1
Haemostatic Clamps	**39 20 28**		1	1
Needle Forceps	**39 20 29**		1	-
Disposable razors	**39 20 30**		5	-
4 Examination and monitoring equipment				
Reactive strips for urine analysis	**39 20 31**		50	-
Temperature charts	**39 20 32**		1 pad	-
Disposable tongue depressors	**39 20 33**		10	10

(to be continued)

Required Equipment	CODE	Recommended Specification	A	B
Medical evaluation reports	**39 20 34**	(SCMG/3)	1 pad	1 pad
Stethoscope	**39 20 35**		1	1
Aneroid sphygmomanometer	**39 20 36**		1	1
Standard medical thermometer	**39 20 37**		3	1
Hypothermic thermometer	**39 20 38**		1	1
Additional equipment	**39 20 39** **40**	Sputum cup with cover (disposable) Specimen jars (strong glass or plastic with airtight lid 50 ml with black labels)	2 2	- -
5 Equipment for injection, perfusion, puncture and catheterization				
Bladder drainage instruments	**39 20 41**	Bladder drainage set (including bag, spigots and tube)	1	-
Rectal drip set	**39 20 42**		1	-
Disposable filter infuser	**39 20 43**	Integral in UK equipment. Foreign produced items may require a separate filter	if Reqd	if Reqd
Urine drainage bag		Use bladder drainage set	Use 5 (1)	Use 5 (1)
Disposable syringes and needle	**39 20 44**	2 ml, 5 ml, 10 ml, quantities of each size	6	3
Catheter	**39 20 45** **46** **47**	1) Foley type 16, Charriere guage, 5 ml balloon (Short/medium term use in adults) 2) Nelaton size 16 Charrire guage (with no balloon) 3) Penile sheath set	1 1 1	- - -
6 General Medical Equipment				
Bedpan	**39 20 48**	(stainless steel or sterilisable plastic)	1	-
Hot water bottle	**39 20 49**	with fabric cover	1	-
Urine container	**39 20 50**		1	-
Icebag	**39 20 51**		1	-
7 Immobilization and setting equipment				
Malleable finger splint	**39 20 52**		1	1
Malleable forearm and hand splint	**39 20 53**		1	1
Inflatable splints	**39 20 54**	Set of four (half-leg, full leg, half arm, and full arm)	1	1
Thigh splint	**39 20 55**		1	1
Collar for neck immobilisation	**39 20 56**	(Adult size set of 3, small, medium and large)	1	1
Thomas splint	**39 20 57**		1	-
8 Disinfection, Disinsectization and Prophylaxis				
Water-disinfection compound	**39 20 58**	In liquid form - litres	5	-
Liquid insecticide	**39 20 59**	In liquid form - litres	5	-

REQUIRED ADDITIONAL EQUIPMENT

Required Equipment	CODE	A	B
First Aid Kits - Vessels with a crew of more than 10 should carry first aid kits to be distributed in appropriate locations on the ship e.g. in the galley and engine room. (For passenger vessels see Schedule 3) The kit should include the following items to be kept in a portable waterproof container. (1) 4 x triangular bandages (90 cms × 127 cms base) (2) 6 x standard dressings no.8 or 13 BPC (3) 2 x standard dressings no.9 or 14 BPC (4) 2 x extra large unmedicated dressings, 28 cms ×17.5 cms (5) 6 medium safety pins, rustless (6) 20 assorted elastic adhesive dressings medicated BPC (7) 2 x sterile eye pads with attacthment (8) 2 x packeges containing 15 grammes sterile cotton wool (9) 5 pairs large size disposable polythene gloves	**39 20 60**	3 max	3 max

(to be continued)

Recommended additional equipment				
	Face masks disposable	**39 20 61**	6	6
	Plastic measuring jug 1/2 litre size	**39 20 62**	1	1
	Disposable paper towels	**39 20 63**	100	100
	Latex gloves surgical quality - sterile (large)	**39 20 64**	5 prs	5 prs
	Waterproof plastic sheeting, size 1 m × 2 m	**39 20 65**	2	2
	"Sharps" disposal box	**39 20 66**	1	1
	Lotion bowl (Size at least 200 mm × 90 mm, stainless steel or sterilisable plastic, to be marked "medical"	**39 20 67**	1	-
	Kidney dish (Size 250 mm stainless steel or sterilisable plastic)	**39 20 68**	1	-
	Safety pins, rustless medium	**39 20 69**	6	6
	Magnifying glass 7.5 cm diameter on handle	**39 20 70**	1	1
	Nail brush	**39 20 71**	1	1
	Stretcher equipment (A system for trauma management, i.e. immobilisation and stretcher equipment most suited for treatment on the vessel concerned).	**39 20 72**	1	-
	Baby bag - Large size	**39 20 73**	1	1
	Vessels in malarial areas only Microscope slides in individual transit containers	**39 20 74**	5	5
	1) Excavator double ended Guys' pattern G2 2) Filling paste inserter (for inserting filling paste into the tooth) 3) Dental mirror size 4 on handle 4) Cavit (temporary dental filling) tube	**39 20 75**	1 set all items	-
	Kit for protection against blood transmitted diseases (to be carried in all vessels trading in known malarial areas and in areas where medical facilities are limited and emergency shore based treatment is necessary). To be kept in a heavy gauge polythene bag, and labelled "to be used only for the treatment of ..." (insert the name of the seafarer going ashore for emergency treatment) Each kit to contain the following: (1) 10 × 2 ml syringes (2) 10 × 10 ml syringes (3) 20 × 21 swg 0.8 mm needles (4) 1 blood giving set (5) 1 blood taking set (6) pack of pre-injection site swabs (7) Disposable plastic gloves 2 prs. (large size)	**39 20 76**	1	-

Mapping of the medicines in the third edition of the Guide to the quantities in the second edition, the Australian and UK guidelines for ships

Quantification Addendum on International Medical Guide for Ships 3rd edition has been published to update the list of recommended medicines in 3rd edition, and also mapping the current medicines list to the quantities in the previous second edition and also to the Australian and UK guidelines for ships. The listing will be standardized to quantities per number of crew, and the definition of categories for each guideline is listed below.

Guideline	Definition	
	Category A	Category B
2nd edition of the Guide	Ocean-going merchant vessels without a doctor on board.	Merchant vessels engaged in coastal trade or going to nearby ports, and not more than 24 hours away from a port of call.
UK Guidelines	Seagoing or sea-fishing vessels with no limitation on length of trips.	Seagoing or sea-fishing vessels making trips of less than 150 nautical miles from the nearest port with adequate medical equipment. This category is extended to seagoing or sea-fishing vessels which make trips of less than 175 nautical miles from the nearest port that has adequate medical equipment and which remain continuously within range of helicopter rescue services.
Australian Guidelines	Seagoing vessel on unlimited voyages, and assumes that supplies can be re-stocked if necessary from wayports.	Seagoing vessel on short voyages, generally not extending more than 150 miles from the nearest port. Can be extended up to 200 miles if continuously within range of a helicopter rescue service.

* Quantities marked with '*' are those for an alternative drug/dose/indication described in the Notes section.
* NSAID: non-steroidal anti-inflammatory drug.
* GTN: glyceryl trinitrate.

Medicines

The medicines and medical equipment required on board ocean going commercial and passenger vessels are available below as outlined by the World Health Organization and the Merchant Shipping Notice for United Kingdom merchant ships and fishing vessels on medical precautions. The medications and equipment are available in a complete medical chest set or individually where they may be required. In addition, some more commonly used medications have also been provided for everyday minor ailments.

Whenever using or prescribing medications always be sure to follow the respective instructions carefully.

WHO Medical Chests

Medicines and medical equipment in accordance with WHO (World Health Organization). International Medical Requirements for ocean going vessels without a doctor aboard. The quantities of medicaments are based on an estimated 6-month inventory for a crew complement of 25-40 persons.

39 01 11	WHO Medical Chest, capacity for 25 - 40 persons	Set

Medical Stores required for United Kingdom Merchant Ships and Fishing Vessels

The Merchant Shipping and Fishing Vessels (Medical Stores) Regulations 1995 SI No.1802 (as amended 1996 SI No.2821) The United Kingdom implemented the requirements of Council Directive 92/29/EEC which sets out minimum standards for ships' medical stores by introducing the Merchant Shipping and Fishing Vessel (Medical Stores) Regulation 1995, as amended by the Merchant Shipping and Fishing Vessel(Medical Stores) Amendment Regulations 1996.

The requirements for medical stores set out in M1607 and M1608 have been reviewed and are replaced by this Notice.

39 01 06	Medical stores required for U.K. merchant ships and fishing vessels, Regulation 1995 SI No. 1802 Category A	Set
39 01 07	Medical stores required for U.K. merchant ships and fishing vessels, Regulation 1995 SI No. 1802 Category B	"

The following list of medical supplies and medications are those which may not be included in the World Health Organization or DTI medical lists for ocean going vessels but which are used commonly on ships for mild illnesses and injuries. A variety of the more popular over the counter medicines are listed with their uses and code numbers for easy referencing.

Condoms
(Prophylactic Rubbers)
Condones　コンドーム　避孕套

For protection against sexually transmitted diseases and for contraception.

39 12 26	Condom (prophylactic rubber) 12's	Pc.

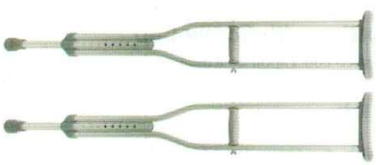
Containers
Recipientes　容器　容器

Ointment Containers
Recipientes para Pomadas　軟膏容器　药膏容器

For dispensing ointment.

39 12 28	Container, ointment plastic	Pc.

Tablet Containers
Pastilleros　錠剤容器　药片容器



Plastic bottles for holding tablets.

39 12 30	Container, Tablet, plastic	Pc.

Crutches
Muleras　松葉杖　拐杖

The length of these crutches is adjustable and the bottom of the crutches are covered with rubber to prevent slipping.

39 12 32	Crutches	Pr.

Enema Kits
Equipos para Enema
エネマ・キット　灌腸用具包

Stainless steel cylinder with a lid and hanger at the top and rubber tubing at the bottom. Used to inject liquid into the intestine.

39 12 40	Enema kit	Set

Enema Syringes
Jeringas para Enema
エネマ・シリンジ　灌腸注射器

Made of rubber with an overall length of 75 cm.

39 12 42	Enema syringe, rubber	Set

Dispensing Envelopes
Sobres para Medicamentos　投薬袋　分药袋

Furnished in packs of 100 sheets.

39 12 44	Envelope, dispensing, 100's	Pkt

Eye Baths
(Eye Cups)
Lavaoios (Vasos para Ojos)
洗眼コップ　洗眼杯

Plastic cup which withstands boiling. Has a rubber bulb on the side to splash liquids on the eye.

39 12 46	Eye bath with 2 spare bulbs	Set

Eye Droppers
Cuentagotas　点眼器　滴管

Glass tube with rubber bulb.

39 12 48	Eye dropper	Pc.

Eye Patches
(Eye Shades)
Parches para los Ojos　眼帯　眼罩

For covering an infected eye to protect it from foreign particles. Furnished with cleaning pads for the eye and the skin.

39 12 50	Eye patch	Pc.

Fingerstalls (Finger Sacks)
Dedales　指サック　指套

Available in rubber and leather. Can be provided in a variety of sizes. Specify the size required when ordering.

Unit Per Pc.

CODE	Material	Application
39 12 62	Rubber	Specify for which finger
63	Leather	For the thumb
64		For the fingers except the thumb

Forceps
Fórceps　ピンセット　镊子

Dental Packing Forceps
Pinzas Dentales　歯科用ピンセット　牙科包装钳

Made of stainless steel. Overall length is 16 cm.

39 12 66	Forceps, dental packing, stainless steel	Pr.

Hemostatic Forceps

Pinzas Hemostáticas 止血鉗子 止血钳

For stopping blood flow of a severed vessel by clamping it. Made of stainless steel. Overall length is 15 cm.

39 12 67	Forceps, hemostatic, stainless steel	Pr.

Sinus Forceps

Pinzas Sinusales 消息子 鼻窦钳

Made of stainless steel. Overall length is 18 cm.

39 12 68	Forceps, sinus, stainless steel	Pc.

Splinter Forceps (Epilation Forceps)

Pinzas para Astillas 刺抜きピンセット 镊子

For use in surgical operations. Made of stainless steel. Overall length is 13 cm.

39 12 69	Forceps, splinter, stainless steel	Pr.

Dissecting Forceps (Surgical Forceps)

Pinzas de Disección 外科用ピンセット 解剖钳

For use in a surgical operation. Made of stainless steel in a length of 13 cm.

39 12 70	Forceps, dissecting, stainless steel 13 cm	Pr.

Spencer Wells' Forceps

Pinzas Spencer Wells 持針器
斯宾塞－韦尔斯镊子

For holding a suture needle. Made of stainless steel with an overall length of 16 cm.

39 12 71	Forceps, Spencer Wells', stainless steel	Pr.

Gown Disposable for Isolation

Bata Desechable para Aislamiento
医療用使い捨てガウン 一次性隔离衣

Used to protect not only patients, but also yourself from spread of infection or diseases. Typically made of lightweight and breathable materials and providing full coverage and protection from liquid splashes, blood, and other bodily fluids. It is single use and can dispose after each use to minimize the risk of cross-contamination and spread of infections.

39 12 79	Gown disposble for isolation	Pc.

Surgical Gloves

Guantes Quirurgicos
手術用手袋 手术用手套

For use in a surgical operation. Made of rubber.

39 12 80	Gloves, surgical, rubber	Pr.
81	" " disposable	"

Gauze Masks

Mascarillas de Gaza
ガーゼマスク 纱布口罩

To prevent the inhalation of dirt, dust, or foreign particles, and to prevent possible infection of the patient during a surgical procedure.

39 12 82	Mask gauze	Pc.

Air Masks

Mascarilla de aire エアマスク 隐形口罩

Designed for sterilizing and deodorizing the room by just attaching the cloths or hanging on the neck. It contains chlorine dioxide which eliminate the disinfecting bacteria, and effective for 1m³, 99% of germs, bacteria and virus will be removed within 120 minutes. CLO2 will be slowly released and never exceed 0.017ppm, lasting for 1 month. Good personal protection from colds, influenza and pollen etc. FDA Class 1 Registered Disinfectant.

Remark: Not effective in open space on deck, only for indoor use.

39 12 85	Air Masks	Pc.

Hot Water Bottles

Bolsa de Agua Caliente 湯たんぽ 热水瓶

Made of rubber.

39 12 90	Hot water bottle, rubber	Pc.

Ice Bags

Bolsas para Hielo 氷のう 冰包

Screw cap sealed ice bags made of soft rubberized fabric to conform to the shape of the area on which it is applied.

39 12 92	Ice bag, rubber	Pc.

Disposable Hypodermic Syringes *with Needle*

Jeringas Hipodérmica Desechables
使い捨て消毒済注射器 带针头的一次性皮下注射器

Disposable, sterile syringe made of a plastic resin. Furnished with an injection needle.

39 13 10	Syringe, hypodermic, disposable, 2.5 ml w/needle	Set
11	" 5 ml w/needle	"

Disposable Hypodermic Needles

Agujas Hipodérmicas Desechables
使い捨て皮下注射針　一次性皮下注射针头

Sterile, disposable needle packed in a plastic cylinder.

39 13 12	Needle, hypodermic, disposable	Pc.

Kidney Dishes
(Surgical Instrument Trays)

Platos para Riñon (Riñoneras Metálicas)
腰盆　腰盆（外科器械托盘）

Made of stainless steel. Standard size of 210 mm but other sizes are available on request.

39 13 16	Kidney dish, stainless steel, 210 mm	Pc.

Biohazard Bags

Bolsas de Riesgo Biológico
バイオハザードバッグ　生物危害袋

Made with durable materials such as polypropylene or polyethylene, and are also labeled with biohazard symbol and word "BIOHAZARD" or "INFECTIOUS WASTE". Used for safe transportation and disposal for biohazardous items such as used needles, syringes, gloves, gowns and other contaminated materials, and also autoclave sterilizable.

39 13 17	Biohazard Bag (S), 310 x 660 mm	Pc.
18	Biohazard Bag (M), 415 x 600 mm	"
19	Biohazard Bag (L), 610 x 880 mm	"

Medical Labels

Etiquetas　ラベル　标签

Plain Labels

Etiquetas Lisas　白ラベル　普通标签

Furnished 100 sheets in a packet.

39 13 21	Label, plain, 100's/pkt	Pkt

Poison Labels

Etiquetas de veneno　劇薬ラベル　毒药标签

Furnished 50 sheets in a packet.

39 13 22	Label, poison, 50's/pkt	Pkt

Ligature Catgut
(Sutures)

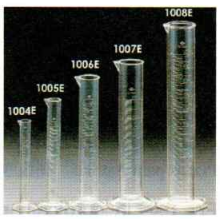
Catgut para Ligatura (Suturas Catgut)
糸付き縫合針（内科用）
内科用绷带肠线

Sterile suture for external and internal stitching. Furnished with a needle.

39 13 24	Ligature catgut	Pkt

Lotion Bowls

Tazones para Loción
ローション・ボール　消毒水盆



Stainless steel basin used when sterilizing the hands. 230 mm in diameter and 80 mm high.

39 13 26	Lotion bowl, stainless steel	Pc.

Medical Measure Glasses
(Graduated Cylinders)

Vasos Graduados Medicos
(Cilindros Graduados)

Medical Scissors

Tijeras　医療用バサミ　剪刀

One-Point & One-Blunt Scissors

Tijeras de una punta y una punta roma
片刃バサミ　単点和単钝剪刀

Stainless steel scissors with one blunt tip and one pointed tip. Overall length is 14.5 cm.

39 13 60	Scissors, one-point & one-blunt, Stainless steel	Pr.

Surgical Scissors

Tijeras Quirúrgicas
外科バサミ　外科手术剪刀

Made of stainless steel with both ends blunt for use in an operation. Overall length is 16 cm.

39 13 61	Scissors, surgical, stainless steel	Pr.

Bandage Scissors

Tijeras Para Vendajes
包带用ハサミ　绷带剪刀

Designed specially to cut bandage without scratching the skin beneath. Stainless steel. Overall length 16 cm.

39 13 62	Scissors, bandage, stainless steel	Pr.

Skin Closures

(Butterfly Closures)

Malla Quirúgica
皮膚接合用絆創膏
蝶形敷料贴

A sterile, waterproof bandage for forming skin closures on superficial lacerations. The bandage has non-adhering film on the center section to prevent the bandage from sticking to the wound. 100 large closures (7 cm x 1.3 cm) in a packet.

39 13 66	Skin closure, 7 × 1.3 cm 100's	Pkt

Sphygmomanometers

Baumanómetros
血圧計　血压计

Mercury filled blood pressure monitor. Measurement range of 0 - 300 mmHg. Enclosed in a hard plastic case.

39 13 68	Sphygmomanometer, mercury	Set

Digital Sphygmomanometers

Esfigmomanómetros digitales
数字血压计　デジタル血圧計

Compact and lightweight, battery operated sphygmomanometer. Power source is two R6P (UM-3 • AA) batteries. The measuring range is 0 – 300 mmHg. The unit is furnished with batteries and is enclosed in a soft leather case.

39 13 69	Sphygmomanometer, digital	Set

Emergency Air Splints

Férulas Neumáticas de Emergencia
应急エア副子　紧急气垫夹板

Made of double-walled transparent vinyl plastic, comfortably shapes itself to the contour of the limb and applies uniform pressure to injured arm or leg. Bone fractures with wounds can be treated at the same time. Completely washable and reusable, and can be sterilized by gas or cold solution.

Set includes; Sprint size S/M/L, Vacuum pump, Sterile gauge size S/M/L and storage bag.

39 13 78	Emergency air splint inflatable, full set	Set

Sterilizers with Alcohol Lamp

Esterilizadores con Lámpara de Alcohol
アルコールランプ付き滅菌器
酒精灯灭菌器

A set comprised of an alcohol lamp, a tripod, and a stainless steel tray with a lid. The tray size is 250 x 85 x 55 mm. Alcohol is not furnished with the lamp.

39 13 84	Sterilizer with alcohol lamp	Set

Electric Steam Sterilizers
(Autoclaves)

Esterilizadores Eléctricos de Vapor
電気式蒸気滅菌器 电力蒸汽消毒器（高压消毒蒸锅）

Portable, high speed steam pressure autoclave suitable for sterilizing and drying dressing materials, gauze and sanitary cotton as well as syringes and hypodermic needles. Stainless steel construction that weighs less than 10 kg. Furnished with a stainless steel standard tray sized 12 x 36 x 4 cm.

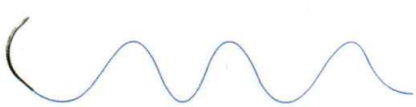
Suture Strips, Non-Stitch

Cintas para Sutura, sin Puntada
サージカル・テープ 非缝合式缝合带



Supplied in packs of 12 rolls.

39 14 02	Suture strip, non-stitch 2.5 cm × 9.1 mtr	Pkt

Sutures with Needle

Suturas con aguja 糸付き縫合針（外科用） 外科用缝针锋线

Silk suture fitted to an eyeless needle for surgical suturing. Vacuum sealed in a sterile packet.

39 14 04	Suture with needle, medium	Pkt
05	" , large	"

Temperature Charts

Diagramas de Temperatura
体温表　体温单

Charts for recording and monitoring measurements of temperature, pulse, and respiration.

39 14 20	Temperature chart	Pc.

Digital Clinical Thermometers

Termómetros Clínicos Digitales
デジタル体温計　数字式临床体温计

Battery operated thermometer graduated in increments of 0.1°C. Furnished with batteries and a protective case.

39 14 24	Thermometer, clinical, digital	Pc.

Tongue Depressors

Depresor　舌压子　压舌板

Wooden tongue depressors with an overall length of 15 cm.

39 14 26	Tongue depressor, wooden	Pc.

Tourniquets

Torniquetes 止血带　止血带

Esmarch type tourniquet for stopping excessive bleeding. Furnished with a rubber bandage and rubber tubing with a chain and hook for securing the ends.

39 14 28	Tourniquet, Esmarch type	Set

Urine Bottles

Frascos para Orina　尿瓶　尿瓶

Made of plastic with a handle attached.

39 14 40	Urine bottle, plastic	Pc.

Urine Test Paper

Papel Reactivo para Orina
尿試験紙　尿试纸

Rapid and convenient reagent strips for determining protein (albumin), glucose (sugar), and chloride (salt) levels in urine.

Infrared Digital Thermometers for Medical Use

Termómetros Digitales de Infrarrojos para Uso Médico
医療用非接触型デジタル体温計
医用红外线数字温度计

A medical infrared thermometer for body and surface temperature. Simply point the sensor of infrared thermometer at patient's forehead and will display an accurate temperature within seconds.

39 18 25	Infrared digital thermometer for medical use	Set

Marine Automated External Defibrillator (AED) LIFEFORCE

Desfibrilador Exrerno Automático (DEA) Naval LIFEFORCE
自動体外式除細動器
航海用自動體外除顫儀（AED）LIFEFORCE

Lifeforce is the world's first and only specialist marine Type Approved automated external defibrillator (AED).

Sudden cardiac arrest (SCA) is the world's biggest killer, killing over 3 million people worldwide every year. The only proven way to treat SCA is by delivering an electric shock to the heart to restore a normal heart rhythm. Lifeforce has been designed to be used by non-medically trained crew, with clear verbal and visual instructions and bright, oversized buttons, for the quick, safe and portable delivery of a shock to the heart. Lifeforce automatically detects when a shock is required, ensuring that a shock is only delivered when required.

Lifeforce has been Type Approved by Germanischer Lloyd (GL) and tested to prove its reliability in accordance with electromagnetic compatibility, humidity, pressure, radio frequency interference, saline mist, temperature and vibration. Lifeforce is manufactured under ISO 13485:2003, cleared by the FDA and CE marked to the Medical Devices Directive 93/42/EEC and supported by a 5 year warranty.

39 15 01	Marine automated external defibrillator "LIFEFORCE"	Set

Name of Mfr.: Martek Marine Ltd.

Glucometers

Glucómetros
血糖値測定器
血糖仪

A measuring device to determine the concentration of glucose in the blood, obtained by pricking the skin with a lancet (Capillary blood sampling device).

39 15 02	Glucometer with blood sampling device	Set

Antigen/COVID-19 Rapid Test Kit

Kit de prueba rápida de antígeno/COVID-19
抗原検査キット　抗原 /COVID-19 快速检测试剂盒

An antigen rapid test kit is used to detect the presence of antigen such as covid-19, flu and other viral antigen in a person's body.
It usually involves taking a sample from person's body with a nasal or throat swab, and places on a test strip or in a test cartridge to detect antigens in the body. It usually comes up with visible signal such as a color change to indicate positive result.

Relatively lower cost and quicker result, but less accurate than PCR test.

CODE	Size mm	Unit

Gasoline
(Petrol)
Gasolina ガソリン 汽油

Regular car gasoline which can be used to fuel torches, lifeboat and machinery engines, or can be used for cleaning paint and other general purposes.

45 01 01	Gasoline,	4 ltr	Can
02	"	18 ltr	"
03	"	200 ltr	Drum

Kerosene
(Paraffin Oil)
Keroseno 白灯油 煤油

Regular kerosene for use with stoves, torches, or as a paint thinner or cleaning agent for machinery parts or tools. Supplied in containers of 4 or 18 ltr, or in 200 ltr drums.

45 01 06	Kerosene,	4 ltr	Can
07	"	18 ltr	"
08	"	200 ltr	Drum

Diesel Oil
(Gas Oil/Light Engine Oil)
Diesel 軽油 柴油

A light engine oil or gas oil for use in diesel engines, generators, or for cleaning machinery and parts.

45 01 11	Diesel oil,	4 ltr	Can
12	"	18 ltr	"
13	"	200 ltr	Drum

Cutting Oil
Aeite para Corte 切削油 切削油

Quality special purpose oil that cools, speeds metal removal, produces smooth, clean threads, and prevents chips from welding to dies. Will not become rancid and is excellent for drilling, turning, and other cutting operations. Can be used to prolong the life of handtools or power tools.
Non-water soluble type for finishing will be supplied unless specified otherwise. Water soluble oil is also available upon request.

45 01 15	Cutting oil, spray, 350 ml	Can
16	Cutting oil, non-water soluble, 4 ltr	"
17	Cutting oil, non-water soluble, 18 ltr	"

Penetrating Oil
Aceite Penetrante 浸透油 渗透（润滑）油

1. A rapid penetrating and rust solvent for removing rusty nuts and for piping repair jobs.
2. A practical, all-purpose oil used as an additive to engine lubricating oil and fuel.
3. For use in wire cable treatment.

45 01 21	Penetrating oil	4 ltr	Can
22	"	18 ltr	"

White Spirit
(White Gasoline)
Aguarrás ホワイトスピリット 石油溶剤油（无铅汽油）

Commonly known as white gasoline, used as a high quality paint thinner. Furnished in containers of 4 ltr, 18 ltr, or 200 ltr large drums.

45 01 26	White spirit	4 ltr	Can
27	"	18 ltr	"
28	"	200 ltr	Drum

Rust Preventives
Desoxidante 防錆油 防锈剂（油）

For preventing parts, machinery, or tanks from rusting. Displaces and seals out moisture with a dry transparent coating. Products from a variety of global manufacturers are listed in the order table below. To order, **select the code number for Rust Preventives and indicate the brand you require separately.**

CODE	Brand	Product	Unit
45 02 11	ENEOS	Antirust Terami LS-PH	20 ltr/Can

	Chevron/Caltex	Rustproof Compound L	18 kg/can

Hydraulic Fluid
Líquido Hidraulico/Líquido para Aparatos Hidráulicos
油圧作動油 液压机液体

Suitable for use as a lubricant for high speed hydraulic tool machines. Oils of viscosity grade 5 - 10 are known as spindle oils which resist emulsion, sludge formation, oxidation, and foaming. When ordering from the table below, **select a code for the grade of oil which you require. Along with the code number, please specify the brand which you require**.

Hydraulic Fluids —Viscosity mm²/s at 40°C

Refrigerating Machine Oil

Aceite para Máquina Refrigerante　冷凍機油　制冷机油

Oil for the lubrication of bearings and crankshaft of the compressor setup for cargo refrigeration systems. These lubricants have the correct viscosity, film strength and stability, both chemical and thermal for the operating conditions. The oils are compatible with refrigerants. Straight mineral elements with additives to prevent foaming and inhibit against chemical action with refrigerants and system metals. When ordering, **select a code number for the appropriate grade of oil and indicate the brand require**.

Machine Oil

Aceite para Máquina　マシンオイル　机械油

Viscosity grade 46 or 56 machine oils suitable for use as a general industrial lubricant. Available in various sized containers. Please specify the volume required when ordering.

45 03 01	Machine Oil	100 ml	Can
02	"	1 ltr	"
03	"	18 ltr	"

Note: VG (Viscosity Grade) 5 ~ 10 - Spindle Oil
VG (Viscosity Grade) 46 ~ 56 - Machine Oil
VG (Viscosity Grade) 150 and over - Gear Oil

Liquid Paraffin

(White Oil)

Aceite Mineral (Parafina Líquida)
流動パラフィン（精密機械油）　液体石蜡

So-called white oil or sewing machine oil suitable for precision machine lubricants. Specify size of container.

45 03 11	Liquid paraffin	500 cc	Can
12	"	100 cc	"
13	"	280 cc	"
14	"	4 ltr	"

Brake Fluid

Líquido para Frenos　ブレーキ油　制动液

For hydraulic break and clutch systems requiring heavy duty synthetic hydraulic fluids.

45 03 16	Brake fluid,	500 cc	Can
17	"	1 ltr	"
18	"	4 ltr	"

Anti-freeze Liquid

Líquido Anti-congelante　不凍液　防冻液

Liquid additives for lowering the freezing point of oil.

Unit Per Can

CODE	Contents	CODE	Contents
45 03 25	4 ltr	**45 03 26**	18 ltr

Turpentine

Trementina　ターペンタイン（テレビン油）　沥青

For thinning paints, varnishes. Available in 4 and 18 ltr containers or 200 ltr drums.

25 14 61	Turpentine,	4 ltr	Can
62	"	18 ltr	"
63	"	200 ltr	Drum

Fish Oil

Aceite de Pesfado　魚油　鱼油

Oil compound for cleaning and preserving decks, scaling down rust, and slushing wire rope, anchor chains and other deck equipment. Furnished in 18 ltr square cans or 200 ltr drums.

25 14 66	Fish Oil	18 ltr	Can
67	"	200 ltr	Drum

Multipurpose Grease

Grasa Multi-usos　万能グリース　多功能黄油

For the lubrication and protection of almost all kinds of gears and a variety of other uses. Listed below are some products from a variety of global manufacturers. Select the grade and brand of grease that you require from the table below. When ordering, **select a code number for the appropriate grade and specify the required brand.**

Low Temperature Grease

Grasa para Baja Temperatura　低温グリース　低温润滑剂

Antifreeze grease suitable for ball and roller bearings and especially sealed bearings for use in very low temperatures. Supplied in 16 kg cans. Please specify the maker and the product name which you require.

45 03 21	Grease, low temperature 16 kg	Can

Cup Grease

Grasa (Gruesa) para Copa de Engrase　カップグリース　粘稠润滑油

A thick grease used for the lubrication of couplings, shafts, and gears which operate at low speed revolution. This product is not recommended for use with high load gears or in high temperature environments. Supplied in 2.5 or 16 kg cans with a spring shaft dispenser.

45 03 31	Grease, cup, 2.5 kg	Can
32	" 16 kg	"

Bearing Grease

Grasa para Rodamientos　ベアリンググリース　轴承润滑脂

Smooth, non-fibrous grease with high oil content to assure lubrication and smooth starting and running torque. Suitable for general service and has a high resistance to moisture. Furnished in 2.5 and 16 kg cans.

45 03 36	Grease, bearing, 2.5 kg	Can
37	" 16 kg	"

Wire Rope Grease

Grasa para Cables de Acero　ワイヤーグリース　钢索润滑脂

A non-gumming, anticorrosive petroleum lubricant which will penetrate inside of wire rope to prevent corrosion from fresh water, salt water, and other elements.

45 03 41	Grease, wire rope, 16 kg	Can

Biodegradable Products (EAL)

Compliance of US EPA VGP 2013/VIDA

Productos Biodegradables (EAL)
Cumplimiento de US EPA VGP 2013/VIDA
生分解性グリース・潤滑油 (VGP2013/VIDA 適合)
生物降解润滑脂和润滑剂（符合 VGP2013/VIDA 标准）

U.S. Environmental Protection Agency (EPA) issued the Vessel General Permit (VGP), with an effective date of 19th December, 2013, and will officially implement VIDA (Vessel Incidental Discharge Act) which was signed on December, 2018. Under the VIDA, EPA will work together closely with USCG to develop the standards and regulations for incidental discharges, primarily from commercial vessels. VIDA will apply to non-recreational, non-armed forces vessels that are 79 feet in length and above, and apply in waters of the US, extending out 12 miles from shore. Currently VGP 2013 is still in effect until VIDA will be officially implemented.

VGP 2013 continues to require that all vessels must use environmentally acceptable lubricants (EALs) in all oil-to-sea interfaces (stern tubes, thrusters, controllable pitch propeller,

rudder stocks and pintle bearing), unless technically infeasible.

In VIDA, oil-to-sea interfaces fall under "Oil Management" in General Standards and have been covered in great detail. In addition to those described interfaces in VGP, interfaces will be from any equipment seals or surfaces where the design is such that small quantities of oil can escape into the surrounding sea during normal vessel operations, which will include on-deck equipment such as hose handling, cranes, hydraulic system provision cranes, hydraulic cranes, and hydraulic stern ramps.

Although the guidance regarding equivalent overseas programs that certify biodegradable lubricants will be removed, it is expected that manufacturers will continue to provide EALs that they certify to be biodegradable, minimally-toxic and non-bioaccumulative.

Please see the definition of terms in VGP 2013 Appendix A.

Appendix A– Definitions

"Biodegradable" means the following for purposes of the VGP:

- Regarding environmentally acceptable lubricants and greases, biodegradable means lubricant formulations that contain at least 90% (w/w (weight in weight concentration)) or grease formulations that contain at least 75% (w/w) of a constituent substance or constituent substances (only stated substances present above 0.10% shall be assessed) that each demonstrate either the removal of at least 70 percent of dissolved organic carbon, production of at least 60 percent of the theoretical carbon dioxide, or consumption of at least 60 percent of the theoretical oxygen demand within 28 days. Acceptable test methods include : Organization for Economic Co-operation and Development Test Guidelines 301 A-F, 306, and 310, ASTM 5864, ASTM D-7373, OCSPP Harmonized Guideline 835.3110, and International Organization for Standardization 14593:1999. For lubricant formulations, the 10% (w/w) of the formulation that need not meet the above biodegradability requirements, up to 5% (w/w) may be nonbiodegradable (but not bioaccumulative) while the remainder mut be inherently biodegradable. For grease formulations, the 25% (w/w) of the formulation that need not meet the above biodegradability requirement, the constituent substances may be either inherently biodegradable or non-biodegradable, but may not be bioaccumulative. Acceptable test methods to demonstrate inherent biodegradability include: OECD Test Guidelines 302C (>70% biodegradation after 28 days) or OECD Test Guidelines 301 A-F (>20% but <60% biodegradation after 28 days).
- Regarding cleaning products, biodegradable means products that demonstrate either the removal of at least 70 percent of dissolved organic carbon, production of at least 60 percent of the theoretical carbon dioxide, or consumption of at least 60 percent of the theoretical oxygen demand within 28 days. Acceptable test methods include: Organization for Economic Co-operation and Development Test Guidelines 301 A-F, 306, and 310, and International Organization for Standardization 14593:1999.

Biodegradable Multi-Purpose Grease

Grasa biodegradable multiusos
生分解性汎用グリース
生物可降解多用途润滑脂

Heavy duty and multi-purpose grease containing proprietary EP additive to combat against seizing, galling of bearings and rust. It protects bearings wear through outstanding film strength under severe conditions of shock loading. Resists water wash-out from bearings under the most arduous conditions and provides long service life through high oxidation resistance.

NLGI Grade: 2, EAL and EPA / VGP Compliance product.

45 01 60	Multi-Purpose Grease, Biodegradable, 450 grm per can(24 cans per carton)	C/T

Biodegradable Wire Rope Grease

Grasa biodegradable de cable de acero
生分解性ワイヤーロープグリース
生物可降解钢丝绳润滑脂

A wire rope conditioner & lubricant that exhibits excellent lubrication and anti-corrosion properties. Specially developed as environmentally friendly biodegradable grease as VGP compliance, minimally toxic and non-bioaccumulative. It is used whenever protection against rust and/or lubrication is needed: Wire ropes, Crane wires, Winches, Mooring wires, Lifeboat-davits falls, Derricks, Open gears shackles, Backsprings, Tankcover-screws, Hoists, Lashings, Hatch-cover wheels, Valves, Bearings, Screws & bolts, etc.

Unit Per Can

45 03 42	20	**45 03 43**	200

Environmentally Acceptable Lubricants (EAL)

Lubricantes ecológicos　生分解性潤滑油　生物可降解润滑油

High performance, specially developed rapidly biodegradable lubricants for use in all oil-to-sea interferences such as stern tubes, thrusters and rudder systems, pitch propeller etc. There are many brands of EAL available as VGP compliance, but adoption of EAL will depend on the approval by each machinery manufactures.

Please make sure to specify the EAL brand which is accepted by machinery maker when ordering.

Unit Per Ltr

CODE	Description	Application
45 03 45	Stern Tube Oil	For Stern Tube Seal
48	Wire Rope Oil	For mooring wire, deck crane wire, cables, drive and conveyor chains
49	Hydraulic Oil	For hydraulic systems, bow thrusters and rudder systems, winches and hydraulic pitch adjusters
50	Gear Oil	For gear boxes, roller bearings and slide bearings

Graphite Grease

Geasa Grafitada グラファイトグリース 石墨润滑脂

A grease with the adhesive consistency particularly suitable for use on machine gears and bearings which are exposed to weather elements or high temperatures. This grease is also effective for lubricating and preserving wire rope.

45 03 46	Grease, graphite	2.5 kg	Can
47	"	16 kg	"

Asphalt Compounds

Compuestos asfálticos アスファルト 沥青混合料

Asphalt often used as a protective, waterproof coating on deck. When dry this asphalt has a non-slip, glossy black surface. Supplied in 18 kg cans.

45 03 51	Asphalt compound, 18 kg	Can

Coal Tar

Alquitán de Hulla, Brea Mineral コールタール 煤焦油

Used as a protective coating on deck for the prevention of rust and for the waterproofing of pipes and other fixtures. Supplied in 16 kg cans.

45 03 56	Coal tar, 16 kg	Can

Pitch

Brea ピッチ 沥青

Black bituminous putty which bonds to any material surface, wood, metal, brick, concrete, glass, etc. Contained in 18 kg square cans.

45 03 61	Pitch, 18 kg	Can

Tallow

Sebo 牛脂 牛脂

A grease derived from cow fat which has a thick consistency. Used for lubricating, wire rigging, etc.

45 03 71	Tallow, 16 kg	Can

Ferryl Anticorrosive Grease

Grasa Anti-corrosiva Ferryl フェリルグリース 铁器防腐蚀油

The Ferryl anticorrosive product range relies on chemical properties for the best possible results in rust prevention and lubrication. The special rust-inhibitors in the Ferryl greases, oils and coatings enable long-lasting rust protection at a low cost.

Ferryl 202 Standard Anticorrosive Grease features excellent penetration and lubrication, a high melting point, and special adhesive properties due to its rubberised binders and semi-drying film, such that the grease is resistant to high winds and seawater. The grease is excellent for all running gear and wires, crane wires, mooring wires, lifeboat falls, back springs, inside bearings on hatch cover wheels, valves, shackles, spring wire, screws, and bolts.

The Ferryl product range is provided in the order table below.

CODE	Product No./Unit	Application
45 04 01	Ferryl 101 Anticorrosive Oil 25 ltr/drum	Rust-protection and lubrication of wire ropes. Oil with enhanced penetration into wire. Specially designed for cold-climate use and fast-moving wires. Can be mixed with Ferryl 202 Standard Anticorrosive Grease.
45 04 02	Ferryl 103 Anticorrosive Drying Oil 25 ltr/drum	Drying oil. Forms water resistance film for short or long-term rust protection of metal (spare parts, machine parts, chains, propeller shafts).
45 04 03	Ferryl 202 Standard Anticorrosive Grease 25 kg/drum	Rust-protection and lubrication of wire ropes. Properties: penetration into wire, high melting point (70°C), rust inhibition, adhesion (binds to wire), semi-drying film, lubrication. For use in all climates.
45 04 04	Ferryl 202 S Anticorrosive Grease 25 kg/drum	Rust-protection and lubrication of wire ropes. Properties: penetration into wire, high melting point (80°C), rust inhibition, adhesion (binds to wire), semi-drying film, lubrication. For use in all climates.

(to be continued)

CODE	Product No./Unit	Application
45 04 05	Ferryl 202 White Anticorrosive Grease 30 kg/drum	Rust-protection and lubrication of wire ropes. White in colour. Properties: penetration into wire, high melting point (100°C), rust inhibition, adhesion (binds to wire), semi-drying film, lubrication. For use in all climates.
45 04 06	Ferryl 202 Aluminium Anticorrosive Grease 30 kg/drum	Rust-protection and lubrication of hatchcover rails, crane rails, container lashings, tank cover screws & bolts. Aluminium-coloured, non-cracking 'grease paint' with excellent coverage and sea-water resistance.
45 04 11	Ferryl 400R Anticorrosive White Coating 12 kg/drum (See sec 25)	One-component product applied like paint. Flexible, non-cracking plastic-like coating. Used on non-rotating wires, standing rigging, rubber insulated electrical cables and (hydraulic) hoses.
45 04 12	Ferryl 401 Anticorrosive Transparent Coating 1 kg/tin (See Sec 25)	One-component product applied like paint. Flexible, non-cracking, plastic-like coating. For preservation of metals' original colour (steel, brass, bronze, copper). Also used as a wood varnish.
45 04 13	Ferryl 404 Dilution & Cleaning Liquid 10 ltr/drum (See Sec 25)	Solvent for cleaning and dilution of the Ferryl coatings. Used as a general thinner.
45 04 17	Ferryl 502 Anticorrosive Fluorescent Coating 1 kg/tin (See Sec 25)	One-component product applied like paint. Fluorescent orange-red colour. Flexible, non-cracking, plastic-like coating. Used for safety applications. (life-saving equipment, warnings, bridge, low beams / steps).
45 04 15	Ferryl 505 Anticorrosive Fluorescent Coating 1 kg/tin (See Sec 25)	One-component product applied like paint. Fluorescent yellow colour. Flexible, non-cracking, plastic-like coating. Used for high visibility marking applications (stairs, walkways, zone markings).
45 04 19	Ferryl Armacit Pipe Sealant 150 grm/tube (See Sec 81)	Paste-like packing that dries hard for permanent sealing of threaded pipes and flanges. Resistant to oil, petrol, most gases. Temperature and pressure-resistant.
45 04 20 22	Ferryl Rustoil Penetrating Oil 450 ml/spray can 10 ltr/drum	Pre-treatment of wire ropes: penetrates into core of wires to remove rust and moisture. Releases rust and hardened grease/oil from bolts, flanges, machine parts.
45 04 23	Ferrycid Rustremover 25 ltr/drum (See Sec 55)	Efficient removal of light and heavy rust on steel, cleaning of (wooden) decks, rust stain removal on painted surfaces, removal of limescale and cement.
45 04 24	Ferryl Cleaning Fluid Oil & Grease Remover 25 ltr/drum (See Sec 55)	Water-soluble, emulsifying, solvent-based degreaser. Removes light and heavy deposits of oil and grease on decks, engine parts, oil preheaters, tools.
45 04 26 32	Ferryl Fermaid Alkaline Cleaning Liquid 25 ltr/drum 1 ltr/bottle (See Sec 55)	Alkaline cleaning liquid concentrate for general cleaning and light degreasing of decks, containers/ chambers, refrigerators, fishing vessels.
45 04 28 27	Ferryl Electroclean 450 ml/spray can 25 ltr/drum (See Sec 55)	Safe cleaning liquid with a high flash point and quick evaporation for cleaning of electrical equipment and machine parts.
45 04 29	Ferryl Cabin Clean General Cleaning Liquid 25 ltr/drum (See Sec 55)	Cleaning liquid concentrate for general cleaning of cabins, mess rooms, bathrooms, sanitary installations.
45 04 30 31	Ferryl Air refreshment Bad Odour Neutraliser 500 ml/spray bottle 25 ltr/drum (See Sec 55)	Chemically neutralises bacteria in the air, removing bad odour, leaving fresh scent. For cabins, bathrooms, cargo holds, freezers, fishing vessels.

Molybdenum Disulfide Lubricant Products

Productos Lubricantes de Sulfuro de Molibdeno
住鉱潤滑剤　二硫化钼润滑剂产品

Recommended for the lubrication of machinery parts during assembly.

For operational applications involving low speed at a heavy load capacity more MoS_2 is required than for light load operations at high speed. MoS_2 is also an effective lubricant for machinery operating at high or low temperatures. Many examples for use are available. MoS_2 is also quite effective as a lubricant restoring material for overheated machines.

To meet various applications and conditions, various types of products are available. The most common oil, grease, and aerosol products are listed below. When ordering, please specify the item and container size required.

Unit Per Can

CODE	Item	Size	Application
Anti-Seizure paste for Metal			
45 04 51	Moly Paste 500 No. 2	500 grm	An anti-seizure paste formulated with a high concentration of molybdenum disulfide (MoS_2). Positioned as the standard product in the series.
52		16 kg	
Durable Grease			
45 04 61	Molyspeed Grease No. 2	2.5 kg	A Bentone grease formulated with molybdenum disulfide (MoS_2) that has excellent wear resistance and anti-seizure properties. Can withstand momentary exposure to high temperature up to 230°C.
62		16 kg	
45 04 63	Molytone Grease No. 2	2.5 kg	A variant of Moly Speed Grease formulated with a high concentration of molybdenum disulfide (MoS_2). It excels in wear resistance.
64		16 kg	
45 04 65	Moly PS Grease No. 2	2.5 kg	A Benton grease with a further enhanced anti-seizure property over Moly Speed Grease, made possible by the addition of an extreme pressure agent.
66		16 kg	
Heat Resistant Grease			
45 04 71	Molytherm No. 2	2.5 kg	An inorganic grease formulated with a high concentration of molybdenum disulfide (MoS_2) that has excellent wear resistance and anti-seizure properties. Its excellent heat resistance enables it to tolerate momentary exposure to high temperature up to 290°C.
72		16 kg	
45 04 73	Hi-Moly Grease	2.5 kg	An inorganic grease formulated with molybdenum disulfide (MoS_2) and grafite. Switches to solid film lubrication at high temperature courtesy of its low-residue synthetic base oil.
74		15 kg	
Lithium Soap Greases for Heavy Load			
45 04 81	Moly LG Grease No. 2	2.5 kg	A lithium soap grease formulated with a high concentration of molybdenum sulfide (MoS_2). Has exceptional wear resistance and anti-seizure properties. Ideal for heavy-duty bearings, sliding parts and gears.
82		16 kg	
83	Cartridge Moly LG Grease No. 2	400 g/tube	
Open Gear Grease			
45 04 86	Moly Gear Compound 900	2.5 kg	Gear compounds containing molybdenum disulfide (MoS_2). Produce a semi-dry film with superior lubricity under heavy loads.
87		16 kg	
Wire Rope Grease			
45 04 89	Moly Rope Dresser No. 0	2.5 kg	A Bentone grease containing molybdenum disulfide ((MoS_2). Capable of penetrating deep into a wire rope to reduce inter-wire friction and prevent eccentric deformation and corrosion. Hardening and breaking off under low temperature conditions also reduced.
90		16 kg	
Open Gear Grease Spray			
45 04 88	Moly Gear 1500 Spray	420 ml/tin	Ideal for open gears. Produces a semi-dry film excellent in shear stability with regard to tooth faces.
Wire Rope Grease Spray			
45 04 91	Moly Rope Spray	420 ml/tin	Designed for wire ropes. Reduces wear and prevents eccentric deformation and corrosion by penetrating deep into inter-wire spaces.

Molykote Products

Productos de Molykote　モリコート製品
Molykote 产品

To lubricate and prevent the seizing of machine parts during repair or reassembly. Product types for a variety of applications are listed below. When ordering, please specify the product type and the container size required.

Unit Per Can

CODE	Type	Contents per Can	Description
Powder			
45 05 01	Z	1 kg	Can be used as run-in aid, in press-fittings, in heavy loads and slow speeds applications.
04	Micro size	0.5 kg	
05		2 kg	

(to be continued)

Unit Per Can

CODE	Type	Contents per Can	Description
Paste			
45 05 11	G-n	0.5 kg	Multi-purpose Assembly paste can be used at high loads and low speed application, screw, press-fit, slides and metal working.
12		1 kg	
13		5 kg	
45 05 14	G-Rapid Spray	330 ml (aerosol)	Multi-purpose molybdenum disulfide spray lubricant for preventing mechanical failures, fretting corrosion, seizure. Easy application for all running-in ns assembly.
45 05 15	U	0.5 kg	High temperature paste does not develop oil ash, suitable for screws and sliding parts, and assembly. Better compatibility with rubber can be used for O-ring lubrication.
16		2 kg	
45 05 18	M-77	0.5 kg	Suitable for assembling and lubricating plastics and rubber parts. The silicone paste can be used for wide service temperature.
19		2 kg	
45 05 20	1000	300 ml (Aerosol)	Suitable for fasteners, bolts and nuts that are subjected to high temperatures up to 650°C (1,202°F) and to corrosive effects.
21		1 kg	
22		5 kg	
45 05 23	P-37	500 grn	Lubricant paste for screws, nuts and bolts that are subjected to extremely high temperatures (1,400°C).
Grease			
45 05 26	BR-2 Plus	1 kg	Used successfully on roller bearings, plain bearings, sliding guides, roller guides, ball-and-socket joints, splined shafts and threaded spindles.
27		16 kg	
45 05 51	111 Compound	150 grm	Seal grease for vacuum and pressure systems and outdoor equipment, subject to water washing and harsh environmental exposure.
53		5 kg	
45 05 54	6169	1 kg	Fluorinated grease for use in valves and other components under low temperatures to high temperatures, corrosive, solvent, liquefied natural gasses, high vacuum, etc.
45 05 56	HP-870	100 grm	Fluorinated grease for harsh condition, high temperatures, corrosive, solvent, liquefied natural gasses, high vacuum, etc.
57		750 grm	
45 05 40	HP-300	100 grm	Fluorinated grease for harsh condition, high temperatures. Used for low to medium pressure Hydrogen value
45 05 49		500 grm	
45 05 50	55M	5 kg	Silicone grease for Pneumatic system O-ring and Valves.
Lubricant			
45 05 31	Supergliss	300 ml (Aerosol)	Quick penetration even in areas difficult to access, loosens rusted screw connections as well as other components, thus facilitating disassembly.

(to be continued)

45 05 34	M	1 ltr	Micro MoS_2 gear oil additive – Used for gears at slow speeds and extreme pressures, Oil-lubricated plane bearings.
35		4 ltr	
45 05 36	M-30	1 ltr	Micro MoS_2 dispersion for high temperature chains and rollers.
Lubricant Film			
45 05 41	M-8800	360 ml (Aerosol)	Air-curing dry film lubricant for metal/metal combinations with slow to medium fast movements and high loads. It also prevents sticking rubber parts.
42		1 ltr	
43		4 ltr	
45 05 44	D 321R	223 ml (Aerosol)	Air-curing dry film lubricant for metal/metal combinations with slow to medium fast movements and high loads and the running-in of highly stressed gear wheel.
45		1 ltr	
46		4 ltr	
45 05 47	106	1 ltr	Heat cured dry film lubricant for highly stressed friction combinations with low speeds or oscillating operation.
48		4 ltr	

Tanks Compounds

Compuestos para Tanques　アペキシャー　罐油柜保护膜

A protective coating. No. 1 is for interior surfaces of pressure steam tanks including boilers, economizers, calorifiers, turbines and hot water tanks of temperature above 100°C (212°C). No. 3 is for wet surfaces of a temperature below 50°C (125°C) or for dry, hot surfaces up to a temperature of 200°C (400°C).

45 05 61	Apexior compound	No. 1 1 gal	Can
62	"	No. 3 1 gal	"

MolySlip Anti-Seize Compounds

Compuestos Antifricción
モリスリップ焼付防止剤　防粘混合物

Copaslip™

A high-performance compound specifically formulated to protect fasteners from seizure-induced by extremes of temperature, pressure, and corrosion. The semi-synthetic base fluid is reinforced with anti-oxidants, corrosion inhibitors and ultra-pure copper particles to provide outstanding protection to threads and components.

CODE	Contents	Unit
45 05 65	400 ml (Aerosol)	Tin
66	500 grm	"
64	5 kg	Keg

Molyslip® AS 40

A high-performance lubricant containing molybdenum disulphide (MoS_2) and graphite, formed into a soft paste. Designed for use in situations where a hydrodynamic oil film cannot be tolerated or is impossible to achieve – for example during component assembly, machine start-up and high load/slow speed operations.

CODE	Contents	Unit
45 05 94	500 grm	Tin
95	5 kg	Keg

Alumslip

A high temperature anti-seize compound formulated to protect fasteners from seizure induced by extremes of temperature, pressure and corrosion. The mineral oil base fluid contains micronized particles of metal and non-metal fillers to provide excellent lubrication and protection to threads and components.

CODE	Contents	Unit
45 05 93	500 grm	Tin
97	5 kg	Keg

Molyslip Products

Productos de Molyslip　モリスリップ製品　工業用産品

CODE	Type	Contents	Application	Unit
45 05 68	ARVINA MB2	450 g	A mineral oil based, non-melting organo-modified clay thickened grease designed to lubricate bearings operating in variety of extreme conditions.	Tin
60		4.5 kg		Keg
45 05 69	ARVINA OG0	500 g	Heavy duty lubrication for extreme conditions. Tough, adhesive tenacity, won't be thrown off by gears or scraped off by motion.	Tin
70		4.5 kg		Keg
45 05 71	ARVINA HX2	450 g	A premium quality, heavy duty grease designed for the lubrication of ball, roller and plain bearings operating in arduous conditions.	Tin
72		4.5 kg		Keg
45 05 73	Liquid Grease L.Q.G.	400 ml (Aerosol)	Liquid grease for spraying into inaccessible places, it will not drain away like an oil. Will remain in place for months reducing friction and preventing metal to metal vibration and squeaking.	Tin
74		5 ltr		Tin
45 05 75	Dry Moly Spray	400 ml (Aerosol)	Molybdenum disulphide dry film lubricant. For lubrication in situations where oil or grease are not acceptable. Good for preassembly treatment.	Tin

(to be continued)

45 05 77	Combat	400 ml (Aerosol)	Multi purpose lubricating spray with water displacing, penetrating and anti rust protective film properties.	Tin
45 05 78	WRL-C5	400 ml (Aerosol)	Semi-fluid grease with Moly and graphite. Ideal for wire ropes and chains. Highly water repellent and tenacious – will not fling off.	Tin
79		4.5 kg		Tin
80		18 kg		Drm
45 05 88	SLIPCLEAN DL	400 ml (Aerosol)	Designed for the safe and effective removal of a wide range of industrial soils / contaminants including oil(s), grease, tar/bitumen wax compounds, carbon deposits, inks, and semi-cured adhesives.	Tin

SAF-T-EZE Anti-Seize Products

Productos Antifricción de SAF-T-EAE
サフ・ティ・イーズ製品
SAF-T-EZE 防粘制品

Compounded from fine metallic particles and graphite in a heat resistant lubricant. For ultimate protection to over 2,000°F use to speed assembly and prevent cold welding or carbon fusion as well as rust and other corrosion.

Unit Per Tin

CODE	No./Name	Applications	Contents
45 06 61	Regular Anti-Seize SL-16	Service to 2,000°F. Produced from copper, aluminium and graphite in grease. Resists corrosion and galvanic attack even in the presence of salt water.	16 oz/Can
45 06 62	Regular Anti-Seize SBT-8		8 oz/Can (Brush Top)
45 06 65	Nickel Anti-Seize SL-16N	Service to 2,600°F. Compounded from nickel, aluminium and graphite in a heat resistant lubricant. Recommended when very different metals are used together. Works well on stainless steel.	16 oz/Can
45 06 66	Nickel Anti-Seize SBT-8N		8 oz/Can (Brush Top)
45 06 71	Moly-Grade M-16	Service to 650°F. Compounded with molybdenum disulphide for extreme pressure applications. Prevents wear or galling on gears or splines operating under high load at low speed. Withstands pressures to 0.5 million psi.	16 oz/Can
45 06 72	Moly-Grade MBT-16		16 oz/Can (Brush Top)

Name of Mfr.: SAF-T-LOK Corporation

Anti-Seize Lubricants

Loctite® LB8150 (Silver Grade Anti-Seize 767)

Lubricantes Antigripantes 焼付き防止剤
防卡死润滑剂

Heavy-duty, temperature-resistant, petroleum-based lubricant compound fortified with graphite and metallic flake.

Inert, will not evaporate or harden in extreme cold or heat. For use in assemblies up to 1,600°C (871°C).

CODE	Contents	Unit
45 06 81	454 grm	Can
88	210 grm	Brush Top

Loctite® LB771 (Nickel Anti-Seize)

Copper-free.

Recommended for stainless steel and other metal fitting.

For preventing corrosion, seizing, and galling in harsh, chemical environments, and temperatures to 2,400°F (1,315°C).

CODE	Contents	Unit
45 06 82	454 grm	Can

Copper Anti-Seize Lubricant

Loctite® C5-A® LB8007/8008

Anti-Seize Products アンチシーズ 防胶着剤

Exclusive formula suspends copper and graphite in a high quality grease. Protects metal parts from rust, corrosion, galling, and seizing at temperatures to 982°C (1,800°F). Tested to MIL-PRF-907E. Copper colour is available.

Typically applications include original equipment and maintenance, and equipment associated with petroleum chemicals, steel mills, power plants, marine and foundries.

Unit Per Can

CODE	Product No.	Contents	Colour

Heavy Duty Anti-Seize

Loctite® LB8009

Anti-Seize Products アンチシーズ HD
重载抗咬合剂

Excellent lubricity. Metal-free formulation provides outstanding lubrication to all metals including stainless steel, aluminium, and soft metals up to 1,315°C (2,400°F). Typical applications of this product includes bolts, screws, studs, pipe joints, nuts, plugs, bushings, metal bending, mechanical packings, etc. Black colour is available.

Unit Per Can

CODE	Contents	Colour
45 06 91	1.2 lb brush-top can	Black
92	2.3 lb	

Marine Grade Anti-Seize

Loctite® LB8023

Productos Antifricción, Loctite Maritimo
アンチシーズマリングレード 海事抗咬合剂

Metal-free formulation to protect assemblies exposed directly or indirectly to fresh or salt water. Loctite® Marine Grade Anti-Seize works especially well in high humidity conditions. It has excellent lubricity, superior water-washout and water spray resistance and prevents galvanic corrosion. Protects in temperatures from -29 to 1,315°C (-20 to 2,400°F). Typical applications are bolts, screws, studs, pipe joints, nuts, shafts, bushings, splines, chains, and cables in marine applications, dressing for water pump gaskets and flanges, pulp and papermills, water and waste water treatment plants.

Unit Per Can

Freeze & Release

Loctite® LB8040

Antioxidante Freeze & Release
錆びたボルトの取り外し用潤滑剤
Freeze & Release 除锈冷冻松脱剂

Releases rusted, corroded and seized components by the shock-freezing effect; wicks directly into the rust by capillary action; released parts remain lubricated and protected from corrosion.

CODE	Contents	Unit
45 07 07	400 ml	Can

Five Way Spray

Loctite® LB8201

Lubricante Five Way Spray
錆止めファイブ・ウェイ・スプレー 防锈喷雾剂

General Purpose Lubricant.

For light lubrication of metals; cleans parts, displaces moisture and prevents corrosion.

CODE	Contents	Unit
45 07 08	400 ml	Can

Multi-Purpose Maintain Lube

Loctite® ML-11™

Mantenimiento multipropósito de lubricante
多用途潤滑剤 多用途维护润滑油

Oil base spray, provide lubrication, cleaning and rust prevention for protecting metal surface. Expel, eliminate and prevent water and moisture of various electrical devices. Penetrate smoothly to deep inside area for lubrication and rust prevention. Help the

devices operate smoothly by reducing preparatory motion or noise.

Unit Per Can

CODE	Contents	Colour
45 07 09	360 ml	Clear/Straw

Biodegradable Anti-Seize Compound

Compuesto antiadherente biodegradable
生分解性焼付き防止剤　生物可降解防卡剂

Bio-based high temperature and EP grease. This grease is fortified with additives that provide excellent lubricating properties, stability and anti-wear capabilities. It is non-gumming, no-petroleum based grease. It has no drop point, so it will not run out of threads when heated. It sticks to the metal threads and lets joints in pipe or nuts on bolts or studs make up less torque.

NLGI Grade: 1, an EAL and EPA/VGP Compliance product.

45 06 73	Anti-Seize Compound, Biodegradable 450 grm per can (24 cans per carton)	C/T

Aerosol Products

Aerosol Products　エアゾール製品　气雾剂产品

A wide range of CRC products are available according to their applications, i.e. lubricating, penetrating, demoisturizing, anticorrosion, degreasing, rust removing, electrical cleaning, etc.

The most common items are listed below. These aerosol products do not emit harmful fluorocarbons and are ozone safe. Liquid types are also available upon request.

For further detailed information or instructions for use, please write or ask local supplier for catalogues before ordering.

Unit Per Tin

CODE	Name	Contents	Description
For Mechanical use			
45 05 81	3-36	500 ml	Rust and corrosion preventive. Penetrating and Moisture-off.
82	5-56 Power Spray	400 ml	Removing rust and corrosion, lubricant and penetrating.
83	Brakleen	500 ml	Broken parts cleaner.
84	6-66	300 ml	Moisture-off, penetrating and lubricating.
86	Seal Coat	11 oz	Rust preventing.
87	Zinc-IT	13 oz	Cold galvanize rust protector.
For Electrical Use			
45 05 91	2-26	500 ml	Moisture-off corrosion preventing, lubricating and penetrating.
92	Lectra Clean II	500 ml	Electric motor and equipment cleaner.
Cleaners for Precision Use			
45 09 01	Contact Cleaner	14 oz	Solvent cleaner for light contaminants on electric or electronic parts. Compatible with most plastics.
45 09 02	N.F. Precision Cleaner	300 ml	Non-flammable solvent cleaner for light contaminants on electrical or electronic parts.
Cleaners for Heavy Duty			
45 09 05	ECO Complex Blue	750 ml	Non-flammable, slow drying water based cleaner for heavy contaminants in food grade areas.
Anti Corrosion Products for Inhibition			
45 09 11	SP 350	250 ml	Long-term corrosion inhibitor indoor protection up to 2 years.
Anti Corrosion Products for Coatings			
45 09 15	Zinc	500 ml	Cathodic protection, even for damaged galvanized parts. Zinc-based coating with excellent adhesion to metal surfaces.
16	Urethane Coating	11 oz	Protective, urethane based varnish for electronic components.
17	Cold Galvanise	400 ml	High zinc content anti-corrosion paint that offers true cathodic protection to ISO 1461:1999.
18	Bright, Cold Galvanise	400 ml	Repair for hot-dipped galvanise steel: weathers naturally for 'invisible' repairs.
19	Galvanise Zinc Rich	400 ml	High temperature, very fast drying, 'hammered' steel finish silver paint.
Lubricants for Processing			
45 09 21	Supercut II	300 ml	Low viscous cutting liquid for normal, metal-cutting operations.
Lubricants for Oils			
45 09 26	Industrial Silicone	10 oz	Synthetic lubricating oil, suitable for plastic drives and applications at high temperatures.
Welding Products			
45 09 31	Crick 110	500 ml	Solvent cleaner to prepare the surface for examination.
32	Crick 120	500 ml	Penetrating colorant to mark the cracks and failures.
33	Crick 130	500 ml	Developer to make the marked cracks and failures visible.
Anti-corrosion Products			
45 09 35	Rust Remover	250 ml	Removes corrosion and/or rust from metals.

Name of Mfr. : CRC Industries

Fault Detection Freezers

for Electronics

Congelador de detección de averías para electrónica
回路間欠探知フリーザー
电路间歇性故障检测冷冻剂

Use on electronic circuits to identify intermittent faulty components. Non-flammable, F-Gas compliant, low GWP.

45 09 22	Freezer, fault detection for electronics, Freezer/2,400 ml	Tin

Name of Mfr.: CRC Industries (Ambersil)

Remark: F-Gas regulation

Article 13(3) Refrigeration Service Bans:

From 1 January 2020, the use of fluorinated greenhouse gases with a GWP of 2,500 or more, to service or maintain refrigeration equipment with a charge size of 40 tonnes of CO_2 equivalent (CO_2e) or more, shall be prohibited.

(to be continued)

This paragraph shall not apply to:
- military equipment, or
- equipment intended for applications designed to cool products to temperatures below –50°C.
- until 1.1.2030: reclaimed or recycled f-gases providing they have been labelled in accordance with Article 12. Recycled gases may only be used by the undertaking which carried out the recovery... or the undertaking for which the recovery was carried out.
- refrigeration equipment for which received an exemption has been (Quoted from "Guide to updated EU f-gas regulation (517/2014)", published by the Linde Group).

Engine Igniters

Autoarranque イグナイター 发动机点火装置

Diesel engine aerosol igniter. Insures quick engine starts at low temperatures and reduces wear on the engine, starter, and battery. Also serves as a rust inhibitor and lubricant.

45 05 96	Engine Ignitor Aerosol 300 cc	Tin

Krylon Industrial Sprays

Aerosoles Industriales de Krylon クリロン製品 Krylon工业喷涂料

Unit per Tin

CODE	No./Name	Applications	Contents
Coatings			
45 06 01	No. 1304 Ignition Sealer	Seals all electrical connection for quick sure starts.	13 oz
02	No. 1307 Battery Protector	Effectively seals battery terminals, cables, and ignition systems.	13 oz
03	No. 1330 Belt Dressing	Provides belt gripping action. Extends belt life, and reduces machinery down time.	13 oz
04	No. 7004 Insulating Varnish	Use on re-wound motor windings, starter windings, armatures, coils, switch board parts, etc.	13 oz
Lubricants			
45 06 06	No. 1322 Open Gear Lubricant	Constant lubrication at extreme pressure. Forms a continuous film of lubrication under all loads and speed.	13 oz
07	No. 1325 All-purpose Silicone Spray	Penetrates deeply and eliminates sticking, and annoying squeaks caused by friction.	10 oz
08	No. 1332 Let-go	Penetrates deeply to free rusted and corroded parts fast. Excellent for loosening "rust frozen" nuts, bolts, etc.	13 oz
09	No. 1347 Industrial Strength Spray	Lubricates, reduces friction and stops squeaks. Used to penetrate, lubricate and free nuts and bolts, etc.	11 oz
10	No. 1349 Silicone Tube	Used as a release agent, lubricant, and parting agent on metal, plastic, rubber, wood, leather, etc.	10 oz
Cleaners			
45 06 16	No. 1323 Cleaner and Degreaser	Penetrates and dissolves engine oil, grease and grime. Excellent cleaner for all types of engines.	13 oz
45 06 17	No. 1326 Contact & Cleaner Lubricating Spray	Solvent action loosens and dissolves dirt and gummy deposits.	16 oz
18	No. 1327 Electric Motor Cleaner	Instantly penetrates, dissolves and cleans greases, oil and dirt from motors, generators, fans, etc.	16 oz
19	No. 1333 Tuner & Contact Cleaner Lubricant Spray	For contacts, switches, relays. Provides a long-lasting, non-drying film which lubricates the surface and protects against corrosion.	16 oz
20	No. 1336 Battery Cleaner	Cuts through and dissolves power-robbing acid corrosion to clean battery terminals, cable connectors, and frames.	15 oz
21	No. 1351 Electronic Contact Cleaner & Lubricant Spray	Solvent action dissolves oily deposits on switches and other electrical contacts.	10 oz
22	No. 1352 Brake Cleaner	Dissolves and flushes away brake fluid, oil, grease and dirt from brake linings, disc brake pads, etc.	16 oz

Spanjaard Products

Productos de Spanjaard

スパンヤード製品 Spanjaard 制品

The Spanjaard range of marine products covers the entire spectrum from navy or merchant navy to leisure craft.

Unit Per Tin/Can

CODE	No./Name	Applications	Contents
45 06 45	COLD ZINC GALVANISING SPRAY	A reliable galvanising coating and/or primer for the protection of steel surfaces against corrosion. Zinc-rich touch-up paint for galvanised steel. Guards the quality and integrity of iron and steel in coastal, underground and humid/corrosive conditions.	400 ml/ Spray
45 06 31	SPARK (MULTI-PURPOSE LUBRICANT) NON-FLAMMABLE AEROSOL	A non-flammable version of SPARK (MULTI-PURPOSE LUBRICANT) for use where explosive or fire hazard conditions exist.	500 grm/ Spray
45 06 32	SPARK (MULTI-PURPOSE LUBRICANT)	A water displacing, anti-corrosive, penetrating and lubricating oil for limitless applications. Available in standard and non-flammable versions (in aerosol and bulk form).	300 ml/ Spray

(to be continued)

Unit Per Tin/Can

CODE	No./Name	Applications	Contents
45 06 34	COPPER COMPOUND (ANTI-SEIZE)	Prevents the seizure of nuts and bolts up to 1,100°C or under corrosive conditions. Ensures firmer tightening and easier loosening of threaded connections and mating surfaces.	100 grm/ Tube
33			400 ml/ Spray
35			500 grm/ Tin
45 07 10			500 grm/ Brush Top Tin
45 06 30	FLAW & CRACK DETECTOR SYSTEM	A 3-part non-destructive testing (NDT) system for locating defects on the surfaces of metals. It is essential that all three packs are used: No.1 Cleaner, No.2 Penetrant and No.3 Detector.	350 ml Spray × 3/Set
45 06 46	GEARBOX & DIFFERENTIAL LUBRICANT SUPPLEMENT	A specialised supplement gives excellent performance in automotive gearboxes (non-automatic), steering boxes, differentials and transmissions in passenger, transport, earth-moving, industrial vehicles and equipment. Smoother gear selection and quieter differential. Reduces wear and extends life and reliability of manual gearboxes. Not suitable for automatic transmissions and limited slip differentials.	100 ml/ Tube
47			5 ltr/Tin
48			20 ltr/ Drum
45 06 49	LECTRO KLEEN	Precision contact cleaner spray for use in industry, the office and home. Provides a convenient method of cleaning of electrical and electronic equipment. Degreases and evaporates quickly and completely, leaving no residue. Does not attack metals, plastics, rubbers, painted surfaces or lacquers.	200 ml/ Spray
50			400 ml/ Spray
45 07 11	LECTRO KLEEN (NON-FLAMMABLE AEROSOL)	Non-flammable and non-conductive precision contact cleaner spray for cleaning of electrical and electronic equipment. Leaves no residue. Compatibility with plastics and rubbers must be checked before use.	430 grm/ Spray
45 06 53	MPG (MULTI-PURPOSE GREASE – PREMIUM GRADE)	A premium-quality, non-melting, bentonite grease with good extreme-pressure properties for use in medium to high-load applications. Suitable for working temperatures up to 160°C with intermittent peak use up to 200°C. Anti-wear properties strengthened with molybdenum disulphide (MoS_2). Anti-corrosive in harsh conditions.	500 grm/ Tin
54			5 kg/Tin
55			15 kg/ Keg
45 06 41	OPEN GEAR & WIRE ROPE SPRAY	Provides an economical, high-performance adhesive black open gear and wire rope lubricant and corrosion protector. Reduces gear shatter and will not affect gear tolerances. Penetrates deep into the core of the rope. For use in spur, helical, worm-drive gears and open gears under high-load conditions.	350 ml/ Spray
45 06 43	OPEN GEAR LUBRICANT (OGL) 1279-1.5	Lubricant in the milling industry which is completely water resistant. Suitable as a slow-speed, anti-friction bearing grease when water-resistant properties are important. Heavy-duty open gears of ball and rod mill drives in the milling industry. NLGI consistency of 1.5.	15 kg/ Keg
45 06 44	WIRE ROPE DRESSING 1345	A tacky, semi-synthetic lubricant specifically designed for wire ropes in mining, marine, earth-moving and industrial equipment.	15 kg/ Keg
45 06 56	RAPIDKLEEN	An industrial cleaner and degreaser for metal parts, glass, and ceramics. A convenient and fast drying spray, leaving no residue.	400 ml/ Spray
45 06 57	SPATTER RELEASE #640 (NON-WATER BASED) NON-SILICONE	An environmentally friendly oil-based version of the above. Suitable for surfaces requiring painting or galvanising after welding.	400 ml/ Spray
45 06 58	WR BEARING GREASE (WATER RESISTANT BEARING GREASE)	An extreme-pressure, lithium-based grease with high-adhesion properties. Water and steam-resistant, red bearing grease. Bears heavy loads at slow to medium speeds with its extreme-pressure. Suitable for temperatures of up to 180°C. Popular with agricultural machinery, heavy construction and industrial equipment.	400 grm/ Cartridge
59			15 kg/ Keg
45 07 15	SILICONE PASTE	A white, translucent, non-melting stable paste. An excellent rubber lubricant, electrical insulating compound and release agent with high water resistance. Sealing electrical equipment prevents ingress of water which evades the potential for corrosion. Non-conductive, non-staining and colourless. NSF registered for incidental food contact (Category H1: Reg # 139904).	100 grm/ Tube
45 07 17	TOOL JOINT LUBRICANT	A non-melt, extreme-pressure thread lubricant strengthened with graphite and molybdenum disulphide (MoS_2). Mainly applied to threads in "slim-hole" drilling applications in civil construction including quarries, dams and surface mining. Prevents seizure and galling of threads and joints and facilitates 'breakout' of drill rods after drilling.	15 kg/ Keg
45 07 19	"E" ENGINE OIL SUPPLEMENT	A wear-and-friction-reducing supplement for internal combustion engines. Improves oil pressure without clogging the filter and oil ways. Contains molybdenum disulphide (MoS_2) which maintains lubrication under extreme heat and pressure conditions. Improves fuel economy.	250 ml/ Tin

(to be continued)

WD-40 Products

WD-40

Productos WD-40　WD-40 製品　WD-40 产品

WD-40 products for marine maintenance work are listed below.

Unit Per Tin

CODE	Product	Content	Description
45 07 02	WD-40 Multi-Use Product	350 ml	Protects metal from rust and corrosion, penetrates stuck parts, displaces moisture and lubricates almost anything. It even removes grease, grime and more from most surfaces. Bulk 4 ltr size is ideal for heavy jobs that require soaking and dipping.
36		4 ltr	
45 07 20	WD-40 Specialist White Lithium Grease	360 ml	A high-quality lithium-based grease as its thickener, the white lubricant features high-viscosity long-term lubrication, good adhesion, water and heat resistance and is very suitable for metal to metal lubrication.
45 07 26	WD-40 Specialist Fast Dry Contact Cleaner	360 ml	Remove all kinds of grease, dust, flux residue and coagulation of sensitive electronic components and electrical equipment, featuring quick drying and residue free.
45 07 27	WD-40 Specialist Fast Acting Degreaser	450 ml	A water-based, quickly remove grease, oil stains, dirt and stains without residue. Power foam works immediately on contact and rinses away easily. Can be used to clean all kinds of non-electrical parts, such as marine equipment surface, deck, inner wall of cabin, tools and kitchen.
45 07 28	WD-40 Specialist Rust Remover	1 gal/Btl	Dissolves rust quickly without harming surrounding parts, trim, gaskets or paint. Ideal for restoring rusted parts to bare metal. Rust parts need to be soaked into liquid.
45 07 29	WD-40 Specialist Heavy Duty Grease	396 grm	A calcium sulfonate grease that offers a versatile solution for all extreme conditions. Reliable temperatures of its drop point of >650°F, it provides marine-grade water resistance and protection against rust and corrosion.
45 07 30	WD-40 Specialist Air Conditioning Disinfectant	360 ml	For cooling-fin of air-conditioners, the sprayed foams will clean the dust and disinfect the germs (99.999% sterilizing rate of Bacillus coli).

Multi-Purpose Lubricants

Lubricantes Multi-usos

錆止め浸透潤滑油　多功能润滑油

These lubricants will stop squeaks, displace moisture, penetrate and prevent corrosion. Specify product name and type when ordering.

Valvoline "Tectyl" Rust Preventives

Anti-oxidante Valvoline "Tectyl"

テクティル製品　"Tectyle" 防锈剂

The most common types of Valvoline products are shown below. For a further variety of products and detailed information, please write or call your local distributor.

Unit Per Tin/Can

CODE	Product	Cont.	Description
45 07 21	506	300 ml (Aerosol)	Excellent for protection of metallic surface for machinery, tools, dies, tubing, stampings, structures, vehicles etc, in long term indoor or outdoor exposure and during domestic and overseas shipment, storage.
22		20 ltr	
23	511M	20 ltr	Designed to protect ferrous and non-ferrous industrial parts and transportation components during covered shipment and inside storage. Polar-chemical water displacer. Self healing film. Packaging preservative for overseas shipment of parts.
24	810	20 ltr	Water emulsifiable, oil concentrate corrosion preventive compound. The film is thin and oily. Excellent lubricity for a variety of industrial metalworking.

"Biral" Aerosol Lubricants

"Biral" Aerosol Lubricants　ビラル潤滑剤

"比拉尔"气溶胶润滑剂

From among various types of Biral products, the two most common types are listed below with their respective specifications.

VG-HT Type

Penetrates deeply into difficult to access parts and sets into a grease type consistency which is very water repellent.

PO Type

An effective rust remover which serves as a lubricant and also prevents against further corrosion. It has exceptional

penetrating qualities reaching all parts of the machine, leaving behind a thin, rust preventing film.

Unit Per Tin

CODE	Product	Cont.	Type	Major use
45 07 31	VG-HT	480 grm	Visco grease high temperature	For chains, sliding surfaces, gear wheels, transmissions, hoists, hinges, wire lubrication for ships, offshore equipment, etc. From –20 to 270°C
32		5 ltr		
33	PO	40 grm	Penetrating Oil	For rusted screws, etc.
34		5 ltr		

Super Extreme Pressure Lubricants, Chlorine-Free

Lubricantes Super Extrema Presión, Sin Cloro
塩素フリー 超極圧潤滑剤　超级极压润滑剂，无氯

Super-strong lubricant spray that forms a special film on metal surfaces and maintains excellent lubrication, rust and moisture protection for a long period. Combined with high penetrating properties, it is excellent for equipment maintenance, removal of adhering fittings, machining work, and various industrial machine parts including gears, chains, hinges, sprockets etc. Environmentally friendly lubricants with chlorine-free.

45 07 35	Super Extreme Pressure Lubricants, Chlorine-Free, 420 ml	Tin

Weicon Spray Products

Weicon Spray Products
ウェイコンスプレー製品
WEICON 喷雾剂产品

High quality spray products for maintenance and repair.

Unit Per Tin

CODE	Name/ Contents	Applications
Cleaning		
45 08 01	Cleaner Spray S 500 ml	Degreases and cleans all metals, glass, ceramics and most plastics. This spray is recommended for the pre-treatment of surfaces in applications with other Weicon products where greasy or oily layers would reduce their effectiveness.
45 08 02	Sealant and Adhesive Remover 400 ml	Quickly and easily removes residues of hardened sealants and adhesives as well as lacquers and paints, even from vertical surfaces. New formulation – free of dichloromethane.
45 08 03	Stainless Steel Care spray 400 ml	Antistatic cleaning and preserving care agent for mat and glossy stainless steel surfaces indoor and outdoor.
45 08 04	Multi-Foam 400 ml	The powerful foam cleaner for metals, plastics, lacquered surfaces, glass, tiles, textiles, carpets and upholstery.
45 08 05	Compressed Air Spray 400 ml	An allround problem solver. It removes dust and fluff quickly and reliably from sensitive surfaces and parts which are not easily accessible.
45 08 06	Visor Cleaner 200 ml	Visor cleaner is the ideal product for the cleaning and care of sensitive plastic and glass surfaces, e.g. visors, safety goggles, welding face shields, protection caps safety glass, etc.
45 08 07	Screen-Cleaner 200 ml	The ideal product for the cleaning and care even of sensitive plastic and glass surfaces. Removes dirt, dust, grease, and nicotine and cleans carefully without leaving residues.
45 08 08	Electro Contact Cleaner 400 ml	Cleaning and degreasing of electrotechnical or mechanical parts, like e.g. electric machines, measuring instruments, balances, switches or sensors. Also ideal for all electric connections, contacts, relays and switchboard plants.
45 08 09	Parts and Assembly Cleaner 500 ml	Cleaner with especially long working time, especially for coarse, oily and greasy soiling as well as for cleaning bigger areas. Due to the high flash point, it corresponds to the VbF Classification A III.
Protection		
45 08 11	Zinc Spray 400 ml	Long term cathodic corrosion protection (< 550 hours salt-spray test acc. to DIN 53167 and DIN 50021) for all metal surface. For priming and touching up hot galvanized parts.
45 08 12	Zinc Spray "Bright Grade" 400 ml	Long term corrosion protection, matches the colour of hot galvanized surfaces, temperature resistant up to 300°C. Very good resistance to salt and water.
45 08 10	Zinc-Alu-Spray 400 ml	Anti corrosion protection, tone approaching hot galvanizing.
45 08 13	Stainless Steel Spray 400 ml	Corrosion and weathering-resistant surface coating, abrasion resistant, heat up to 300°C.
45 08 14	Aluminium Spray A-100 400 ml	Aluminium pigments of a purity of < > 99.5% offer excellent corrosion protection, temperature resistant up to 800°C, abrasion resistant.
45 08 15	Corro-Protection Spray 400 ml	Due to transparent protective film corrosion protection of metal parts for indoor storage. Rust-proofing of tools and precisions parts. TUV approved.
45 08 16	Fitting Spray 200 ml	Fitting spray is a maintenance and care agent with good adhering properties for all movable parts at windows, doors, gates, etc. The transparent product is free of silicones, resins, acids and solvents.
45 08 17	Metal-Fluid 400 ml	Highly-effective product for indoor care, protection and cleaning of mat and polished metal surfaces e.g. stainless steel etc.
Rust Loosener		
45 08 21	W-44T 400 ml	Multifunctions Spray: Loosens seized threads, displaces moisture, eliminates squeaky and creaky noises, cleans dirty metal surfaces, and protects and preserves tools.
45 08 22	Rust-Shock 400 ml	The "Chemical Wrench" frees up rusted threads within seconds by its unique dual-action: chill effect and capillary effect.
45 08 23	Rust Loosener and Contact Spray 400 ml	With 6-fold function: an indispensable aid in all repair, maintenance and servicing jobs.
45 08 20	Rust Converter 400 ml	For the effective neutralisation of rust on rusty cast iron and steel surfaces. Protects from corrosion and is suitable for internal and external use. Based on epoxy resin and forms a metallic-organic iron complex with the rust layer.

Unit Per Tin

CODE	Name/ Contents	Applications
Lubricating		
45 08 25	Pneuma-Lub 400 ml	Lubricant for pneumatic equipment, high content of PTFE makes it a multi-purpose product for lubrication, corrosion protection, cleaning, water displacing and conservation. Temperature resistant from -50°C (-58°F) up to +210°C (+410°F).
45 08 26	Top-Lub 400 ml	Long-term lubrication for power transmitting bolts, hinges, guides, bearings, joints and couplings. With high adhering properties and good resistance to centrifugation. Excellent creeping properties.
45 08 27	PTFE-Spray 400 ml	Dry, clean and grease-free PTFE-based lubricant with excellent sliding properties.
45 08 28	Silicone Spray 400 ml	Sliding and release agent for efficient production and maintenance. Temperature resistant from –50°C (-58°F) up to +250°C (+482°F).
45 08 29	Chain and Rope Lube Spray 400 ml	Synthetical chain- and rope Lube spray: high pressure-resistance, temperature resistance from -40°C up to +200°C, with excellent adhering and creeping properties, transparent.
45 08 30	AT 44 400 ml	For use in all sectors of industry and workshops. By its special formula, the product combines effectiveness in corrosion prevention, cleaning, water displacement and lubrication.
45 08 31	Bio-Fluid Spray 500 ml	Free of resins and acids, water-white, high purity mineral oil, especially developed for the use in the food, pharmaceutical and cosmetic industries.
45 08 32	Anti-Friction Spray MoS_2 400 ml	Anti-Friction Spray MoS_2 forms a dust-, dirt- and water-rejecting separation layer with very good resistance to oils, grease and many chemicals. The product can be applied on almost all metals, plastic and wood surfaces.
45 08 33	Spray-on Grease, White 400 ml	All-purpose sprayable grease for highly stressed parts. Contains special wear reduction and corrosion-inhibiting additives.
45 08 34	Universal Spray-on Grease with MoS_2 400 ml	Strong-bonding and high pressure resistant long-life grease with MoS_2. Friction and wear are reduced for a long time.
45 08 35	Adhering Grease - extra strong - 400 ml	Special lubricant and corrosion protection, also for underwater applications. Effective protection against aggressive liquids (e.g. salt water, sewage water) in maritime environments and in wet plants.
Hand Protection		
45 08 36	Hand Protective Foam 200 ml	The "invisible glove" prevents the penetration of soilings in the skin's pores.
Technical Sprays		
45 08 41	Leak Detection Spray 400 ml	Non-flammable compound used for fast, convenient and reliable location of even the smallest leaks in pressurized pipes or tanks. Approved for use in gas pipelines (DIN/DVGW Approval NG-5170AO0666).
45 08 42	Welding Protection Spray 400 ml	Prevents the adhesion of weld spatter to gas nozzles and workplaces without affecting the quality of the weld seam. - Silicone-free -.
45 08 43	Contact Spray 400 ml	Dispels moisture from electrical contacts, prevents leakage current and voltage loss and keeps contacts, fuses, cable connections, etc. free of oxidation and sulphide deposits.
45 08 44	Crack Testing Agent Set	System for the non-destructive material inspection using a dye penetrant procedure. The system consists of three technical sprays: Crack Testing Agent Cleaner, Penetrant and a Developer. Suitable for metals, plastics, ceramics, glass, etc.

Anti-Seize Products

Productos Antigripantes 焼き付け防止製品 防卡死产品

High-performance assembly pastes and sprays. Used as corrosion protection and high-performance assembly paste for statically high-stressed screw connections and assembly parts as well as for slowly rotating installations in the high temperature range. Anti-Seize Assembly-Paste, reliable protection against corrosion, seizing and cold welding.

Copper Paste

A protecting, separating and lubricating agent for highly stressed parts, used as assembly lubricant for threaded joints and sliding surfaces of all kinds. The strongly adhering paste consists of special additives and a combination of solid lubricants made of graphite and copper particles. This ensures low friction values in threaded joints and excellent separating characteristics. Copper Paste provides an efficient lubricating and separating layer on plug-in tools, wear bushings and threaded, plugged-in or bayonet joints of all kinds, thus protecting the functional surfaces from corrosion and seizing. Temperature resistant from -20°C (-4°F) up to +1,100°C (+2,012°F).

Heat Resistant Pipe Dressing

Pintura Protección anticorrosiva para Alta/Baja Teperatura
耐熱防錆グリース　耐热防锈管镀膜

Possessing high resistance against both high & low temperature. Surface-drying type and anticorrosion coating agent. It is particularly suitable for dressing hydraulic and steam lines, windlasses and deck winch cylinders, etc.

Specifications

Outward Appearance	Caramel color, with Homogenous soft texture
Cone Penetration	310 - 340 mm
Specific Gravity	0.940
Film Type	Semi-transparent and rubbery
Drying Time	Dries in 48 hours (Surface dry)
Ideal Film Thickness	3 mm - 4 mm
Coverage	0.5 m^2 / kg at 2 mm thick
Contents	16 kg / can

45 07 91	Heat resistant pipe dressing, 16 kg	Can

Charcoal

Carbón de Barbacoa　木炭　木炭

For broiling meat or barbecuing.
Furnished in 6 kg bags.

45 10 01	Charcoal, broiling meat, 6 kg/bag	Kgs.

Miscellaneous Oil

Oil, Colza (Rape-seed) Oil:

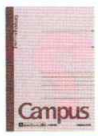
An oil produced by the expression of rape seed. It is used as a lubricant, illuminant and in small quantities in the heat treatment (quenching) of steel.

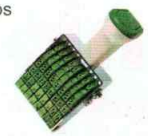
Oil, Fish:

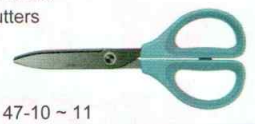
An oil produced by cooking or pressing the bodies of fish, principally the menhaden (moss bunker or pogy fish). It is used in the manufacture of low-grade paints, slushing decks, in the preparation of lubricant compounds such as are used for sluicing down rigging and hawsers, for tempering steel, as a leather dressing, and in the treatment of oil skins, it has a very disagreeable odor.

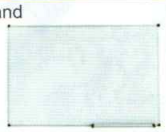
Oil, Linseed, Boiled:

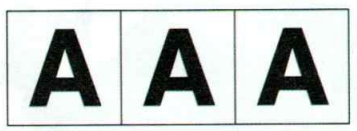
Made by heating the raw oil (obtained from the flax plant) to a temperature of from 300° to 500°F or by adding about 2% oxide of lead or oxide of manganese, or both, which produces the same effect as boiling. Paint made with boiled oil requires about 24 hours to dry hard.











Oil, Linseed, Raw:

Pressed from the seed of the flax plant and used chiefly on surfaces exposed to the weather. It requires about five times longer to dry than boiled linseed oil. However, the addition of driers greatly reduces the time required.

Oil, Storm:

A vegetable or animal oil used to spread on the sea in heavy weather to reduce the breaking crests of the waves. Animal and vegetable oils have better spreading qualities than mineral oil, in the order named, as follows : Soapsuds, sperm, rape seed (colza), linseed, petroleum.
